Cyrenaica has about 10m. acres of potentially productive land, most of which, however, is suitable only for grazing. Certain areas, chief of which is the plateau known as the Barce Plain (about 1,000 ft above sea-level), are suitable for dry farming; in addition, grapes, olives and dates are grown. With improved irrigation, production, particularly of vegetables, could be increased, but stock raising and dry farming will remain of primary importance. About 143,000 acres are used for settled farming; about 272,000 acres are covered by natural forests. The National Agricultural Settlement Authority plans to reclaim 6,000 hectares each year for agriculture.

In the Fezzan there are about 6,700 acres of irrigated gardens and about 297,000 acres are planted with date palms.

The average annual cereal production of the whole of Libya is about 110,000 tons. Olive trees number about 3·4m. and productive date-palm trees about 3m. Livestock: 931,000 sheep, 1,236,000 goats, 93,500 camels.

INDUSTRY. Amongst the more important industries of Tripolitania and Cyrenaica are sponge fishing, tunny fishing, tobacco growing and processing, dyeing and weaving of local wool and imported cotton yarn, and olive oil. Tripolitania also produces bricks, salt, leather and esparto grass for paper-making. Home industries of both territories include the making of matting, carpets, leather articles and fabrics embroidered with gold and silver.

The preliminary results of the first industrial census (1965) show that there are 622 manufacturing establishments with 5 or more employees, employing a total of 11,106 workers; production in 1964 exceeded £24m. Fifteen establishments employed 100 or more persons and 22 between 50 and 99 persons. On 21 Sept. 1969 a decree laid down that all business concerns should be 100% Libyan-owned, but oil companies and banks were excluded.

OIL. In 1968, 41 companies were working concession areas; the most important discoveries so far made are: (i) Zelten, about 200 miles south from Benghazi and 100 miles from the nearest point on the coast; discovered by Esso (the local subsidiary of the Standard Oil Company of New Jersey) in April 1959. Exports from this field began at the end of 1961, the oil being piped to the port of Marsa Bregha. (ii) Dahra, roughly midway between Tripoli and Benghazi and about 90 miles from the coast, discovered in 1958–59; a pipeline to Ras El Sidr was completed in 1962. (iii) Beida, about 140 miles from the coast and just east of the Tripolitanian/Cyrenaican border, discovered by Caltex in 1959. (iv) Other discoveries, either non-commercial or not yet evaluated, have been made by Mobiloil of Canada, Shell, Gulf, CPTL. British Petroleum has also discovered oil in commercial quantities in southern Cyrenaica some 400 miles from the coast, connected to the Tobruk terminal by pipeline. Occidental Oil Co. have made 2 high-yield strikes and are planning the construction of a pipeline and terminal at Zueitina.

In 1968 production averaged 2·6m. bbls per day with total annual production of 949m. bbls. Exports in 1965 were 58·48m. tons; 1966, 72·24m. tons; 1967, 83·5m. tons.

Oil companies imported about £14·13m. worth of equipment in 1966, and employ about 12,600 staff. On 7 Dec. 1971 the British Petroleum Exploration (Libya) Company was nationalized. The rights and concessions were listed in the Arabian Gulf Oil Company.

MINING. Annual production of minerals (in metric tons): Cement, 200,000; gypsum, 14·4m.; salt, 16,000.

POWER. Production of electric power in 1957 was 50,667,897 kwh. in Tripolitania and 23,643,768 kwh. in Cyrenaica.

COMMERCE. Total imports into Libya in 1969 were valued at £L241m. (c.i.f.) and exports at £L771m. (f.o.b.), mostly crude oil.

Total trade between Libya and UK (British Board of Trade returns, in £1,000 sterling):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	66,389	156,949	151,557	166,876	191,603
Exports and re-exports from UK	23,163	34,769	43,150	24,346	30,992

ROADS. Good motor roads connect Tripoli through Zuara with Tunis, and through Homs and Misurata with Benghazi and thence with Tobruk and Alexandria. Other roads go to Tagiura, Garian, Yefren and Nalut. A road connects Sebha with the main coastal road.

Surface communication between Benghazi and Tripoli is by twice-weekly bus service, and between Benghazi and Alexandria by weekly bus service to Sollum and thence by rail. Communication between Benghazi, Barce, Derna and Tobruk is by frequent bus services.

AVIATION. Benghazi and Tripoli are both served by international airlines, linking them with each other and Athens, Cairo, Geneva, Rome, Malta, Tunis, Nairobi, West Africa and London, British Caledonian has 2 flights weekly between Tripoli and London.

A national airline, the Libyan Arab Airlines (LAA), was inaugurated on 30 Sept. 1965. Apart from internal flights LAA operate to Athens, Geneva, London, Rome, Beirut, Cairo, Paris, Malta and Tunis.

POST. Tripoli is connected by telegraph cable with Malta and by telephone lines with Bengardane (Tunis). There are overseas wireless-telegraph stations at Benghazi and Tripoli, and radio-telephone services connect Libya with the UK and most countries of western Europe. A submarine cable from Tripoli to Italy became operative in 1968. In 1962 some 20,000 telephones and 15,000 wireless sets were in use.

BANKING. A National Bank of Libya was established in 1955; it was renamed Bank of Libya in 1963. As at 31 March 1965, its assets amounted to £L77·8m. and currency in circulation to £L27·8m.

The National Agricultural Bank has offices in Tripoli and Benghazi.

All foreign banks were nationalized by Dec. 1970.

WEIGHTS AND MEASURES. Although the metric system has been officially adopted, the following weights and measures are still used: *oke* = 1·282 kg; *kantar* = 40 *okes* = 51·28 kg; *draa* = 46 cm; *handaza* = 68 cm.

LIECHTENSTEIN

HISTORY. The Principality of Liechtenstein, situated between the Austrian province of Vorarlberg and the Swiss cantons of St Gallen and Graubünden, is a sovereign state whose history dates back to 3 May 1342, when Count Hartmann I became ruler of the county of Vaduz. Additions were later made to the count's domains, and by 1434 the territory reached its present boundaries. It consists of the two former counties of Schellenberg and Vaduz (until 1806 immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of 23 Jan. 1719, granted by the Emperor Charles VI, the two counties were constituted as the Principality of Liechtenstein.

REIGNING PRINCE. Francis Joseph II, born 16 Aug. 1906; succeeded his great uncle, 25 July 1938; married on 7 March 1943 to Countess Gina von Wilczek; there are 4 sons, Princes Hans Adam (*heir apparent*, born 14 Feb. 1945; married on 30 July 1967 to Countess Marie Kinsky), Philip Erasmus, Nikolaus Ferdinand and Franz Josef Wenzel, and one daughter, Princess Nora Elisabeth. The monarchy is hereditary in the male line.

National flag: Blue, red, with golden crown in the blue stripe.

National anthem: Oben am jungen Rhein (words by H. H. Jauch, 1850; tune. 'God save the Queen').

AREA AND POPULATION. Area, 160 sq. km (61·8 sq. miles); population, of Alemannic race (census 1970), 21,350. In 1969 there were 420 births and 168 deaths.

CONSTITUTION AND GOVERNMENT. The constitution, adopted on 5 Oct. 1921, provides for a Diet of 15 members elected for 4 years by direct vote on the basis of universal suffrage and proportional representation. The capital and seat of government is Vaduz (population, 1970, 3,921), and there are 10 more villages all connected by modern roads. Since Feb. 1921 Liechtenstein has had the Swiss currency, and since Jan. 1924 has been united with Switzerland in a customs union. Switzerland has also since 1919 represented the Principality diplomatically.

At the elections for the Diet, on 1 Feb. 1970, the Patriotic Union Party obtained 8 seats, the opposition Progressive Citizens' Party 7 seats.

Head of Government: Dr Alfred Hilbe.

EDUCATION (1970). In 14 primary and 5 secondary schools there were 3,302 pupils and 157 teachers (101 men and 56 women).

JUSTICE. The principality has a High Court and its own penal and civil code.

Police. The principality has no army. Police force, 33; auxiliary police, 25.

FINANCE. Budget estimates for 1971: Revenue, 54,091,200 Swiss francs; expenditure, 43,227,525 Swiss francs. Public debt on 31 Dec. 1970, 1·5m. Swiss francs.

PRODUCTION AND INDUSTRY. The country has a great variety of light industries (textiles, ceramics, steel screws, precision instruments, canned food, pharmaceutical products, heating appliances, etc.).

Liechtenstein has during the past 30 years changed from a predominantly agricultural country to a highly industrialized country. The farming population has gone down from 70% in 1930 to only 5·5% in 1970. The rapid change-over has led to the immigration of foreign workers (Austrians, Germans, Italians, Spaniards). Industrial undertakings in 1970 employed 5,235 workers earning 85m. Swiss francs.

Electricity produced in 1970 was 44,928,200 kwh.

AGRICULTURE. The rearing of cattle, for which the fine alpine pastures are well suited, is highly developed. In 1970 there were 6,200 cattle, 46 horses, 1,200 sheep, 150 goats, 4,210 pigs and 7,330 chickens.

TOURISM. In 1970, 72,421 foreign visitors stayed in Liechtenstein, spending an estimated 16m. Swiss francs.

TRADE. Exports of home produce in 1970 amounted to 333,631,971 Swiss francs. 49·8% went to EFTA countries and 33·2% to EEC countries. The biggest customer is Switzerland (112·9m., 33·2%).

Total trade with UK is included with Switzerland from 1968.

COMMUNICATIONS. On 3 April 1943 a canal for irrigating the valley, 26 km in length, was opened. In Dec. 1947 a tunnel, 740 metres long and connecting the Rhine and Samina valleys, was opened. The 11½ miles of main line railway passing through the country is operated by Austrian Federal Railways.

In 1970 there were 10,400 telephones, 4,157 wireless sets and 3,624 television sets. The post and telegraphs are administered by Switzerland.

USA Consul-General: Frank S. Wile (resident in Zürich).

LUXEMBOURG

Grand-Duché de Luxembourg

REIGNING GRAND DUKE. **Jean,** born 5 Jan. 1921, son of Grand Duchess Charlotte and the late Prince Felix of Bourbon-Parma; succeeded 12 Nov. 1964 on the abdication of his mother; married to Princess Joséphine-Charlotte of Belgium, 9 April 1953. *Offspring:* Princess Marie Astrid, born 17 Feb. 1954; Prince Henri, *heir apparent*, born 16 April 1955; Prince Jean and Princess Margareta, born 15 May 1957; Prince Guillaume, born 1 May 1963.

The civil list is fixed at 300,000 gold francs per annum, to be reconsidered at the beginning of each reign.

On 28 Sept. 1919 a referendum was taken in Luxembourg to decide on the political and economic future of the country. The voting resulted as follows: For the reigning Grand Duchess, 66,811; for the continuance of the Nassau-Braganza dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. But France refused in favour of Belgium, and on 22 Dec. 1921 the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxembourg. The agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian, in addition to Luxembourg, currency as legal tender in the Grand Duchy. It came into force on 1 May 1922.

The Grand Duchy was under German occupation from 10 May 1940 to 10 Sept. 1944. The Grand Duchess Charlotte and the Government carried on an independent administration in London. Civil government was restored in Oct. 1944.

National flag: Red, white, blue (horizontal).
National anthem: Ons Hemecht (words by M. Lentz, 1859; tune by J. A. Zinnen).

AREA AND POPULATION. Luxembourg has an area of 2,586 sq. km (999 sq. miles), and a population (31 Dec. 1970) of 339,848. The capital, Luxembourg, had 76,143 inhabitants; Esch-Alzette, the centre of the mining district, 27,575; Differdange, 17,963; Dudelange, 14,612, and Petange, 11,844.

Vital statistics (1970): 4,411 births, 4,154 deaths, 2,156 marriages.

CONSTITUTION AND GOVERNMENT. The Grand Duchy of Luxembourg is a constitutional monarchy, the hereditary sovereignty being in the Nassau family. The constitution of 17 Oct. 1868 was revised in 1919, 1948 and 1956. The revision of 1948 has abolished the 'perpetually neutral' status of the country and introduced the concepts of right to work, social security, health services, freedom of trade and industry, and recognition of trade unions. The revision of 1956 provides for the devolution of executive, legislative and judicial powers to international institutions.

The national language is Luxemburgish; French, German and English are widely used.

The country forms 4 electoral districts. An elector must be a citizen (male or female) of Luxembourg and have completed 21 years of age; to be eligible for election the citizen must have completed 25 years of age.

The Chamber of Deputies consists of 21 Christian Social, 12 Socialists, 11 Democrats, 6 Social Democrats and 6 Communists (elections of 15 Dec. 1968). Members are elected for 5 years; they receive a salary and a travelling allowance.

The head of the state takes part in the legislative power, exercises the executive power and has a certain part in the judicial power. The constitution leaves to the sovereign the right to organize the Government, which consists of a Minister of State, who is President of the Government, and of at least 3 Ministers.

The Cabinet was, in Oct. 1971, composed as follows:

Minister of State, President of the Government, Treasury: Pierre Werner (Christian Socialist).

Vice-President, Interior and Justice: Eugène Schaus (Lib.). *Foreign Affairs; Civil Service and Sport:* Gaston Thorn (Lib.). *National Economy, Middle Classes, Tourism, Transport and Energy:* Marcel Mart (Lib.). *National Education, Labour and Social Security:* Jean Dupong (Christian Socialist). *Agriculture and Public Works:* Jean-Pierre Buchler (Christian Socialist). *Family, Youth, Social Solidarity, Public Health and Cultural Affairs:* Madeleine Frieden-Kinnen (Christian Socialist). *Agriculture, Viticulture and National Education:* Camille Ney (Christian Socialist). *Interior:* Emile Krieps.

Besides the Cabinet there is a Council of State. It deliberates on proposed laws and Bills, on amendments that might be proposed; it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duke or the Government. The Council of State is composed of 21 members chosen for life by the sovereign, who also chooses a president from among them each year.

RELIGION. The population is Catholic, save (31 Dec. 1960) 2,951 Protestants, 643 Jews, 1,090 belonging to other denominations and 13,697 without religion (or having given no indication on this subject). The Protestant Church is organized on an inter-denominational basis.

EDUCATION (1970-71). Education is compulsory for all children between the ages of 6 and 15. The primary schools had 1,605 teachers (814 women) and 35,496 pupils (17,348 girls); 8 state grammar schools had 7,708 pupils (2,776 girls); 6 private grammar schools had 1,216 girls.

Middle, technical and vocational schools: 27 state schools had 8,074 pupils; (2,979 girls); 15 private schools had 1,830 pupils (1,453 girls). One teachers' training college had 140 students (69 girls). There also are 9 music schools.

CINEMAS (1965). There were 48 cinemas with a seating capacity of 22,831.

NEWSPAPERS (1970). There were 7 daily newspapers with an aggregate circulation of 140,000.

FINANCE. Currency. On 14 Oct. 1944 the Luxembourg franc was fixed at par value with the Belgian franc. Notes of the Belgian National Bank are legal tender in Luxembourg.

Budget. Revenue and expenditure (including extraordinary) for years ending 30 April (in 1m. francs):

	1967	*1968*	*1969*	*1970*[1]	*1971*[1]	*1972*[1]
Revenue	9,975·8	10,904·2	11,948·5	13,461·3	13,468·4	14,334·6
Expenditure	10,125·1	11,040·5	11,661·5	13,275·2	13,458·2	14,463·0

[1] Estimates.

Consolidated debt at 31 Dec. 1970 amounted to 10,747·9m. francs (long-term) and 3,989·4m. francs (short-term).

DEFENCE. A law passed by parliament on 29 June 1967 abolished compulsory service and instituted a battalion-size army of volunteers enlisted for 3 years. The defence estimates for 1971 amounted to 429·61m. francs.

Luxembourg is an original member of NATO.

AGRICULTURE. Agriculture is carried on by about 15,600 of the population; 135,143 hectares were under cultivation in 1970. The principal crops are potatoes, barley, beet, oats and wheat.

Livestock (May 1970): 1,204 horses, 192,772 cattle, 103,428 pigs, 3,480 sheep.

MINING. The mining and metallurgical industries are the most important. In 1970 production (in metric tons) of iron ore was 5,722,459; of pig-iron, 4,813,957; of steel, 5,462,455.

The number of blast furnaces in 1970 was 25, that of steelworks, 8; number of workers in the mining and metallurgical industries, 22,863.

ELECTRICITY. Power production was 2,070m. kwh. in 1970.

COMMERCE. By treaty of 5 Sept. 1944, signed in London, and the treaty of 14 March 1947, signed in The Hague, the Grand Duchy, together with Belgium and the Netherlands, became a party to the Benelux Customs Union, which came into force on 1 Jan. 1948. For further particulars *see* pp. 764 and 1183.

Total trade between Luxembourg and UK (British Board of Trade returns), in £1,000 sterling:

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	3,143	3,237	5,352	4,657	4,306	4,616
Exports and re-exports from UK	1,496	1,252	1,954	2,693	5,653	7 601

ROADS. In 1970 there were 2,831 km of state roads and 2,118 km of local roads. Motor vehicles registered in Luxembourg on 1 Jan. 1971 included 91,186 passenger cars, 11,999 trucks, 587 buses, 10,128 tractors, 3,563 motor cycles.

RAILWAYS. In 1971 there were 271 km of railway (standard gauge).

POST. In 1970 the telephone system had 2,072 km of telegraph and telephone line and 111,437 telephones, 100 post offices and 490 telegraph offices.

BANKING. On 31 Dec. 1970 there were 263,815 depositors in the State Savings Bank, with a total of 10,096·6m. francs to their credit.

REPUBLIC OF MALDIVES

The Republic of Maldives, 400 miles to the south-west of Ceylon, consists of some 2,000 low-lying coral islands (only 220 inhabited), grouped into 12 clearly defined clusters of atolls but divided into 19 for administrative purposes. Area 115 sq. miles (298 sq. km). Population (census 1963), 96,432; estimate (1970), 115,000. Capital Malé (10,875 inhabitants; 5,779 males, 5,096 females). The people are all Moslems, and Islam is reflected in the constitution and the judicial system. The islands are covered with coconut palms and yield millet and fruit as well as coconut produce.

The official language is Maldivian, which is akin to Elu or old Sinhalese.

President: Ibrahim Nasir.
British Ambassador: A. M. Mackintosh, CMG (resides in Colombo).

The islands were under British protection from 1887 to mid-1965. They now enjoy complete independence under the agreement signed in Colombo on 26 July 1965. The Republic of Maldives became a republic on 11 Nov. 1968.

The 1965 agreement confirmed the agreement of 1956, which allowed the British Government to reactivate the wartime air staging post on Gan island in Addu Atoll, the southernmost of the group (8,235 inhabitants). There is another airstrip at Hulele in the Malé atoll, some 300 miles from Gan.

In 1960 the British Government made a gift of £100,000 to the Maldivian government and a further £750,000 to be spent over a period of five or more years for development projects in the Republic. These projects have included the establishment of a hospital, a small inter-atoll dispensary ship, expansion of the fishing industry and shipping. In 1969 a further sum of £500,000 was made available for expenditure on additional development projects.

The Maldivian economy is based on the fishing industry. Dried bonito ('Maldive fish') is the main export commodity. Exports and imports balanced at about Rs 9·5m. in 1964. There is no direct taxation.

MEXICO

Estados Unidos Mexicanos

HISTORY. Mexico's history falls into four epochs: the era of the Indian empires (before 1521), the Spanish colonial phase (1521–1810), the period of national formation (1810–1910), which includes the war of independence (1810–21) and the long presidency of Porfirio Díaz (1876–80, 1884–1911), and the present period which began with the social revolution of 1910–21 and is regarded by Mexicans as the period of social and national consolidation.

CONSTITUTION AND GOVERNMENT. A new constitution, amending the constitution of 1857, was promulgated on 5 Feb. 1917, and amended frequently from 1929 to 1953. Mexico is a federal republic, divided into 29 states, each of which has the right to manage its own local affairs. Citizenship, including the right of suffrage, is vested in all nationals who are 18 years old and have 'an honourable means of livelihood'; women were given equal citizenship and suffrage with men in 1952–53. Thumbprints are taken of registered voters.

Congress consists of a Chamber of Deputies elected for 3 years by universal suffrage, and a Senate of 60 members, 2 for each state and the federal district, elected for 6 years. Since 1964 additional 'party deputies' have also been elected to the Chamber according to a system of partial proportional representation. There are (1970) 213 seats, of which the 3 small opposition parties hold 35. Senators and deputies are ineligible for re-election until another term has elapsed. Congress sits from 1 Sept. to 31 Dec. During the recess there is a permanent committee consisting of 14 senators and 15 representatives appointed by the respective Houses.

The President is elected by direct popular vote in a general election, and holds office for 6 years. He can never be re-elected. If the office falls vacant during the first 2 years a general election must be held; if after the first 2 years, then Congress elects a successor who completes the term. The administration is carried on under the direction of the President and a cabinet formed by the secretaries of 15 ministries, the Attorney-General and the heads of 3 departments.

The names of the presidents from 1920 are as follows:

Gen. Alvaro Obregón, 1 Dec. 1920–30 Nov. 1924
Gen. Plutarco Elías Calles, 1 Dec. 1924–30 Nov. 1928.
Emilio Portes Gil (Provisional),[1] 1 Dec. 1928–4 Feb. 1930.
Pascual Ortiz Rubio, 5 Feb. 1930–3 Sept. 1932.[2]
Gen. Abelardo L. Rodríguez, 4 Sept. 1932–30 Nov. 1934.
Gen. Lázaro Cárdenas, 1 Dec. 1934–30 Nov. 1940.
Gen. Manuel Ávila Camacho, 1 Dec. 1940–30 Nov. 1946.
Miguel Alemán Valdés, 1 Dec. 1946–30 Nov. 1952.
Adolfo Ruiz Cortines, 1 Dec. 1952–30 Nov. 1958.
Adolfo Lopez Mateos, 1 Dec. 1958–30 Nov. 1964.
Gustavo Diaz Ordaz, 1 Dec. 1964–30 Nov. 1970.

[1] Took office after the assassination on 17 July 1928, of Gen. Obregón, the President-elect.
[2] Resigned.

President: Luis Echeverría Alvarez (born in 1922), formerly Minister of the Interior, elected 5 July 1970 to serve for 6 years. He polled 11,923,755 votes out of the total of 14,027,816 (assumed office on 1 Dec. 1970).

Minister for Foreign Affairs: Emilio O. Rabasa.

National flag: Green, white, red (vertical); the national coat of arms on white.

National anthem: Mexicanos, al grito de guerra (words by F. González Bocanegra; tune by Jaime Nunó, 1854).

LOCAL GOVERNMENT. Mexico is divided into 29 states, 1 federal district (comprising México City and 12 surrounding villages) and 2 territories, Quintana Roo and Baja California Sur. Each state has its own constitution, government, taxes and laws, and its governor, legislature and judicial officers popularly elected. Inter-state customs duties are not permitted. The President appoints the governors of the territories and the chief of the federal district.

AREA AND POPULATION. Mexico comprises 1,967,183 sq. km (761,530 sq. miles), excluding inland waters and uninhabited islands (5,363 sq. km) offshore. The language is Spanish.

Census results for 1960 and 1970 are shown in the following table (capitals of states and territories in brackets):

[1] Excludes islands (5,363 sq. km).

At the census of 28 Jan. 1970, 23,873,207 were males and 24,440,231 females. Urban population, 1960, was 17,705,118 (50·7%) and rural population 17,218,011 (49·3%); economically active were 11,332,016 (32·4%). Of the 3,030,254 Indians, 1,104,955 spoke only their native language. There were 31 different language groups, and 21 minor linguistic divisions. Foreign-born, 1950, numbered 182,707, including 106,315 born abroad.

The chief cities, with population (in 1,000), at census, 1970 are: México City (capital), 7,006 (and another 1·2m. outside the area of the Federal District but within the Valley of Mexico); Guadalajara, 1,196·2; Monterrey, 830·3; Netzahnalcoyott, 571; León, 454; Ciudad Juárez, 436; Mexicali, 390·4; Nancalpan, 373·6; Tlalnepankla, 373; Chihuahua, 363·8; Culiacán, 358·8; Tijuana, 335·1; Puebla, 321·9; San Luiz Potosí, 274·3; Torreón, 257; Mérida 253·8; Veracruz, 242·3; Acapulco, 234·8; Tolnea, 230·1; Aguascalientes, 222·1; Ecataple, 220·9; Morelia, 209·5; Hermosillo, 206·6; Tampico, 196·1; Durango, 192·9; Saltillo, 191·8; Matamoros, 182·9; Irapuato, 175·9; Mazatlan, 171·8; Cuernavaca, 159·5; Nuevo Laredo, 150·9.

Movement of population for 3 years:

	Marriages	Births	Deaths	Immigration	Emigration
1968	331,347	2,058,251	331,347	2,260,000	1,834,473
1969	347,120	2,088,902	458,886	2,481,976	2,037,453
1970	356,658	2,132,630	485,656	2,743,296	2,178,455

Crude birth rate, 1970, was 44·1 per 1,000 population; crude death rate, 10 (26·1 in 1932); infant mortality rate, 68·5 per 1,000 live births (139·3 in 1933); crude marriage rate, 7·4 per 1,000 population; divorces, 31,181.

For the regulations governing immigration, *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1234. An Immigration Tax law came into effect 1 Jan. 1951. The net immigration in 1968 included: 938 USA subjects; 502 Spaniards; 27 Cubans; 122 Germans; 49 Italians; 25 Japanese; 53 British; 57 French.

RELIGION. The prevailing religion is the Roman Catholic (46·5m. members at the census of 1970); with 10 archbishops, 38 bishops, but by the constitution of 1857, the Church was separated from the State, and the constitution of 1917 provided strict regulation of this and all other religions. No ecclesiastical body may acquire landed property, and since 1917 the property of the Church has been held to belong to the State. In the 1920s the Government suppressed the political influence of the priesthood and temporarily (1929–31) closed the churches. An understanding between State and Church was, however, reached, and all churches eschewing public affairs flourish freely. At the 1970 census 879,241 Protestants, 49,277 Jews and 150,507 members of other religions were also numbered.

EDUCATION. Primary education is free and compulsory (up to 15 years of age), and secular. Clergy are forbidden to establish primary schools. All private schools must conform to government standards. Military drill is compulsory for boys of 18 years. In the federal district and in the territories education is controlled by the national government; elsewhere by the state authorities.

In 1969–70 there were:

	Schools	Teachers	Pupils
Kindergarten	2,910	11,493	378,098
Primary	42,815	173,615	8,766,081
Secondary	2,437	56,324	786,105
Pre-university	334	9,052	96,408
Commercial	705	6,414	92,415
Teacher training	235	7,329	65,712
Professional and special	778	15,805	198,201

There are 30 institutions teaching at higher education level in Mexico with the status of a university The most important university is the Universidad Nacional Autónoma de México (UNAM) in México City which, with its associated universities and schools, has 96,050 pupils and 7,701 teachers. UNAM was founded in 1552, reorganized in 1910, and granted full autonomy in 1920. Other universities of particular importance in México City are El Colegio de México, a small, independent university concentrating on research in the humanities and social sciences, the Instituto Politecnico Nacional, specializing in applied science, and the Universidad Iberoamericana, a private university. Outside México City the more notable universities are, in Monterrey, the Universidad de Nuevo Leon and the Instituto Tecnólügico de Estudios Superiores de Monterrey; in Guadalajara, the Universidad de Guadalajara and the Universidad Autónoma de Guadalajara; and in Xalapa, the Universidad Veracruzana.

CINEMAS (1970). Cinemas numbered 1,769 with annual attendance of 251m.

NEWSPAPERS (1970). There were 200 dailies with an aggregate circulation of nearly 5m.; 17 in México City have about half of the total circulation.

Kneller, G. F., *The Education of the Mexican Nation*. New York, 1951

HEALTH. In 1967 Mexico had 21,293 physicians (1 to 1,519 population); in 1967 there were 807 state and private internship hospitals and 1,761 state and private externship hospitals, with together about 100,000 beds.

JUSTICE. Magistrates are appointed by Congress for 6 years; but the judges of the Supreme Court can be removed only on impeachment. The courts include the Supreme Court with 21 magistrates, 6 circuit courts with 3 judges each, 6 unitary and 47 district courts with one judge each. The penal code of 1 Jan. 1930 abolished the death penalty, except for the Army, and set up a commission of alienists and other specialists, in place of the courts, to deal with criminal cases (for federal offences); each state appoints its own local magistrates also.

Mexican civil law has the legal remedy known as *amparo*, which gives any injured person whose constitutional rights have, in his opinion, been infringed, right to immediate access to the courts and full remedy, combining the swiftness of the Anglo-Saxon writ of *habeas corpus* and the breadth of remedy available through the injunction.

FINANCE. Currency. The monetary unit is the *peso* divided into 100 *centavos*. There are coins for 1 peso and 50, 20, 10 and 5 centavos; notes for 10,000, 5,000, 1,000, 500, 100, 50, 20, 10, 5 and 1 pesos.

Rate of exchange, Jan. 1971: 12·49 pesos = US$1; 29·9 pesos = £1.

Budget. Ordinary receipts and expenditure in 1m. pesos for calendar years:

	1965	*1966*	*1967*	*1968*	*1969*	*1970*
Revenue	17,200	20,132	22.108	24,221	26,512	28,134
Expenditure	17,855	20,132	22,108	24,221	26,512	28,134

In 1970, 7,947m. pesos was spent on education, 1,797m. on defence and 1,804m. on debt service.

The 1970 budgetary total balanced at 72,229m. pesos including the budgets of 20 autonomous agencies whose estimates balance at 44,095m. pesos.

The powers of federal, state and municipal authorities to contract debt are circumscribed by the constitution.

The national debt on 31 Dec. 1967 was 42,732m. pesos, of which 10% was external debt.

DEFENCE. Supreme command is vested in the President, exercised through the Ministries of Defence (for Army and Air Force) and Marine.

Army. The country is divided into 35 zones in which both the regular army and volunteer corps are trained. The Army, in 1965, had 50 battalions of infantry, 2 infantry brigades, 21 regiments of cavalry, 1 mechanized cavalry regiment, 2 regiments of artillery and 2 coastal batteries. Peace-time strength is 51,000. Military education is provided for officers, at the National Military School, the Application Centre for Army Officers and the Staff College, as well as in other specialized schools. To combat illiteracy in the Army, schools have been established in every regular and volunteer group.

Navy. The Navy consists of 10 frigates (including 6 former US destroyer escort transports), 16 escort minesweepers, 1 patrol vessel, 10 patrol boats, 1 transport, 2 oilers and a survey ship, formerly the presidential yacht. There are 4 naval districts on the Atlantic and 4 on the Pacific coast. Naval personnel in 1971 totalled 11,566 officers and men including marines. There are 7 companies of marines on active duty, with 1 regiment (3 companies) in reserve, formed by military service conscripts.

Air Force. The Air Force has a strength of about 5,000 officers and men, and 160 aircraft. These include 15 T-33A dual-purpose jet-trainer/fighter-bombers, C-118A, C-54, C-47 and LASA-60 transports, 30 T-28A and 45 T-6 armed piston-engined trainers and some light helicopters. One HS 125, a JetStar and 3 Islanders are employed on general and VIP transport duties.

AGRICULTURE. Grains occupy 68% of the cultivated land, with about 53% given to maize and about 9% to wheat. Irrigation is needed, 43% of the land having less than 500 mm. of rain a year. The arable land is approximately 24m. hectares, of which half is devoted to the chief crops: maize, wheat, beans, cotton, coffee, sorghum, sugar and rice. In 1964, 52,000 tractors were said to be in use.

In 1967 the area irrigated was 3·2m. hectares. The irrigated districts were equal in 1967–68 to 18% of the cultivated land and provided two-thirds of the agricultural production. Not until there are 17m. acres under irrigation, it is estimated, will Mexico be self-supporting; about 20·3m. acres in all might eventually be brought under cultivation. Soil-conservation work has been started; it includes teaching contour ploughing, terracing, crop rotation, transplanting of the maguey and reafforestation.

Livestock (1967): Cattle, 37·7m.; sheep, 6·7m.; hogs, 14·5m.; horses, 5·2m.; goats, 13·2m.; mules, 2m.; donkeys, 3·6m.; poultry, 95m.

Production of hides reached 3·96m. in 1968; production of meat, 593,124 tons.

Mexico's basic food crop is maize, and a rapid expansion of this crop is one of the chief aims of Mexican agricultural policy, balanced by the demand for 'cash crops' for export, such as cotton, sugar, garbanzos (chick peas), bananas, winter vegetables and coffee. Local production of nitrogen fertilizers in 1968 was 190,000 tons, and of phosphatic, 92,800 tons.

Principal products in metric tons for 1967 were: Maize, 9·49m. (1968: 9·36m.); rice, 454,580; sugar-cane, 28m.; wheat, 1·89m.; coffee, 171,000; beans, 1·04m.; tomatoes, 602,000; oranges, 892,440; bananas, 551,040. Nine-tenths of the coffee is available for export. Sugar output since 1946 has left surpluses for export; sugar crop in 1964–65 was 1·98m. tons; in 1965–66, 2·18m.

The Yucatán peninsula produces about 50% of the world's supply of sisal (known locally as henequén); plantations are almost wholly Mexican-owned and the crop was handled exclusively by the state of Yucatán until 20 June 1955, since when the principal industries were grouped together in the private enterprise Cordemex, S.A., which exercised a virtual monopoly. In April 1964 these interests were purchased by the central government and are now controlled by a state board. The industry has since suffered from over-production and, in the face of competition from Brazilian, African and synthetic products, a decline in the world price for the fibre. The 1964 sisal crop amounted to 160,200 metric tons of fibre.

Tobacco, 1968, 62,000 metric tons. Banana production started in 1895 in the state of Tabasco, reaching a peak in 1937, when 14,752,424 stems were exported; exports, 1960, 0·6m. stems. The cotton production, 1968, was 1,552,000 metric tons. Wool output, 1963, 3,679 metric tons; 1964, 3,845.

FORESTRY. Timber lands are estimated to extend over 95m. acres (about 60m. of commercial importance), containing pine, spruce, cedar, mahogany, logwood and rosewood. Reckless lumbering has destroyed the timber stands on many watersheds, resulting in spring floods and lowered water supplies in summer. In 1951 federal edicts had halted all timber-cutting in 22 states, regardless of concessions; but they have been resumed under strict supervision. There are 14 forest reserves (nearly 800,000 hectares) and 47 national park forests of 750,000 hectares. In 1966 wood products amounted to 3,438,592 cu. metres; others in metric tons (1968): chicle, 1,349; pitch, 5,551; resins, 43,819; turpentine, 1,479; fibres, 7,882; vegetable waxes, 2,418; tan-barks, 258.

FISHERY. Coastal fishing is important. The catch in 1968 was 240,060 metric tons, of which 194,428 was edible, the remainder for industry. In 1967 the industry employed 45,618 men.

MINING. Mining is the principal industry in Mexico, but practically 97% of the 31,000 mining properties are foreign-owned. Of the annual output (from 189 active mines and 127 metallurgical plants), measured in pesos, probably less than 10% is Mexican-owned. The discovery of uranium and similar deposits in the states of Chihuahua, Durango, Sonora and Querétaro was announced in Jan. 1959.

Output of silver in 1960 was 21·2% of world production. Silver output (in metric tons) was 1,334 in 1969; 1,322 in 1970. Exports, 1970, of bar and refined silver, 536,919 kg. About half the production is minted, including a 'token' coin (1949) weighing 1 troy oz. Gold output: 1969, 5,618 kg.; 1970, 6,166 kg.

Mexico has large coal resources, including high-grade coking coal at Sabinas in Coahuila; output fluctuates, but reached 2·01m. metric tons in 1965 and 2·1m. in 1966. 13,965m. cu. metres of natural gas were produced in 1965 and 14,985m. in 1966. There are large undeveloped reserves of iron ore; the new Peña Colorado field in Colima State seems to be promising. Output, 1970 (in metric tons): Pig-iron, 2,263,106; steel ingots, 3·82m.

Quantities of mineral products (in metric tons) for 6 calendar years:

Mine production of minerals, 1961 (gold, silver and iron included) was valued at 2,595·4m. pesos.

OIL. The chief Mexican oilfields (with proved reserves in 1962 of 2,764m. bbls and 353·8m. cu. metres of natural gas) are grouped in 3 widely separated regions. The international companies which discovered and developed them were expropriated by government decree, 18 March 1938. The only foreign concession left —Mexican Gulf Oil—was purchased by the Government in Dec. 1950. The industry is now controlled by Pemex (Petróleos Mexicanos). Pemex is exploiting mainly the rich Poza Rica field (discovered in 1938) and the nearby fields in Escolín and Mecatepec. In 1961, 7 new oil areas were announced. Crude petroleum output (30m. cu metres in the peak year, 1921) was 21·2m. in 1968; 20·2m. in 1967. The petroleum fields have 20 plants and 14 refineries, employing 64,800 men; Mexican refineries handled 115·8m. bbls in 1960. Areas bearing, 1966, were 146, with 96 productive oilwells and 48 gas. Mexico is obliged to export crude oil and fuel oil (for which prices are relatively low) and import kerosene and petrol at higher prices; imports, 1960, were 1,020,456 metric tons and exports, 2,255,614. Output of crude in 1970 was 24·88m. cu. metres and natural gas production (1970) 17·83m. cu. metres.

INDUSTRY. The industrial census of 1965 showed 135,188 manufacturing establishments with invested capital of 92·3m. pesos; 1,343,510 production workers were employed. In 1970 the economically active population was 15,891,139.

POWER. In 1970 the 2,377 electric generating plants had installed capacity of 7·25m. kw.; consumption, including imports, was 28·8m. kwh.

TOURISM. Tourism is the largest single source of dollar income and in 1967 1,788,003 tourists visited Mexico spending US$918m.

	1965	*1966*	*1967*	*1968*	*1969*	*1970*
Imports	19,495	20,065	21,823	24,501	25,975	30,760
Exports	13,609	14,534	13,798	13,759	17,312	17,162

Export figures for metals and for certain foreign-owned agricultural products are heavily undervalued to reduce export taxes.

Of total imports (1m. pesos) in 1970, 19,569 came from USA, 1,645 from West Germany, 2,313 from Japan, 1,075 from France, 895 from UK and

618 from Canada. Leading imports were oil, motor vehicles and parts, maize, wool, machinery and parts, fertilizers and paper.

Of total exports (1m. pesos) in 1970, 10,424 went to USA, 861 to Japan, 631 to France, 155 to Switzerland, 297 to West Germany and 126 to UK. The main visible exports in 1970 were cotton, coffee, sugar, shrimps, maize, zinc, petroleum, sulphur, salt and lead.

Total trade between UK and Mexico, in £1,000 sterling (according to British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	11,495	18,034	14,525	6,343	7,120
Exports and re-exports from UK	26,935	32,218	29,930	34,170	30,779

SHIPPING. Mexico has 49 ocean ports, of which the most important are Veracruz, Coatzacoalcos, Acapulco and Tampico. Merchant shipping loaded 19·4m. tons and unloaded 13m. tons in 1970. Passengers embarked, 148,509; landed, 148,770.

ROADS. Total length, 31 Dec. 1970, 71,882 km, of which 64,457 km are hard-surfaced highroads and 7,525 km local roads.

Motor vehicles registered at 31 Dec. 1970 included 1,233,824 passenger cars, 33,059 buses, 524,985 trucks and 136,948 motor cycles.

RAILWAYS. In 1937 the main railway lines were nationalized. In June 1946 the Government purchased the British-owned Mexican Railway Company for US$8·6m. 37,399,000 passengers and 46·8m. metric tons of freight were carried in 1970. Standard-gauge railway tracks, 23,826 km. The 173-km Viborillas–Villa de Reyes cut-off was opened by the National Railways in 1970, shortening the the distance between México City and the US border, at Nuevo Laredo, by 69 km.

AVIATION. Mexico has an excellent air service. Each of the larger states has a local airline which links them with main airports, which, in turn, furnish services to US, Central and South America and Europe. Thirty companies in 1968 maintained international services, of these 2 were Mexican. Domestic flights are handled by 60 companies. In 1970 commercial aircraft carried 4·49m. passengers and some 124,427 tons of mail and freight.

POST. On 31 Dec. 1966 the federal, state and private telegraph and telephone system had 3,051 offices and 256,660 km of telegraph lines and 4·9m. km of telephone line. Telephones in use, 1 Jan. 1971, 1,507,363; public companies operated all except 8,228 instruments; 83·8% were automatic; the Federal District had 626,877 instruments.

In 1970 there were 586 broadcasting stations: receiving sets were 14m. Television stations numbered 64; there were about 2·98m. receiving sets.

BANKING. The Bank of Mexico, established 1 Sept. 1925, is the central bank of issue; it is modelled on the Federal Reserve system, with large powers to 'manage' the currency. The Government holds 51% of the capital stock.

On 31 Jan. 1964 metallic monetary reserves (gold, silver and foreign exchange forming the required 25% reserve against notes and other demand liabilities) were 2,000m. pesos; 'authorized' holdings of securities, 4,064·3m. pesos; note circulation (outside the Bank of Mexico) was 9,472·7m. pesos. On 31 Aug. 1966 gold and dollar reserves totalled $566·5m. Total supply of money, 28 Feb. 1967, was 31,300m. pesos, divided between currency (9,880m.) and bank deposits (13,700m.).

WEIGHTS AND MEASURES. The metric system was introduced in 1896, and its sole use is enjoined by law of 14 Dec. 1928.

MONACO

HISTORY. Monaco is a small Principality on the Mediterranean, surrounded by the French Department of Alpes Maritimes except on the side towards the sea. From 1297 it belonged to the house of Grimaldi. In 1731 it passed into the female line, Louise Hippolyte, daughter of Antoine I, heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Torigni, who took the name and arms of Grimaldi. The Principality was placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna, 1815, and under that of France in 1861. Prince Albert I (reigned 1889–1922) acquired fame as an oceanographer; and his son Louis II (1922–49) was instrumental in establishing the International Hydrographic Bureau.

National flag: Red and white (horizontal).

REIGNING PRINCE. Rainier III, born 31 May 1923, son of Princess Charlotte, Duchess of Valentinois, daughter of Prince Louis II, born 30 Sept. 1898 (married 19 March 1920 to Prince Pierre, Comte de Polignac, who had taken the name Grimaldi, from whom she was divorced 18 Feb. 1933). Prince Rainier succeeded his grandfather Louis II, who died on 9 May 1949. He married on 19 April 1956 Miss Grace Kelly, a citizen of the USA. *Issue:* Princess Caroline Louise Marguerite, born 23 Jan. 1957; Prince Albert Alexandre Louis Pierre, born 14 March 1958 (*heir apparent*); Princess Stephanie Marie Elisabeth, born 1 Feb. 1965.

AREA AND POPULATION. The area is 189 hectares or 467 acres. Population (1970), 23,400. The official language is French.

CONSTITUTION AND GOVERNMENT. Prince Rainier III on 28 Jan. 1959 suspended the Constitution of 5 Jan. 1911, thereby dissolving the National Council and the Communal Council. On 28 March 1962 the National Council (18 members) and the Communal Council (16 members) were re-established as elected bodies. Elections took place on 24 Feb. 1963.

On 17 Dec. 1962 a new constitution was promulgated. It maintains the hereditary monarchy, though Prince Rainier renounces the principle of divine right. The supreme tribunal becomes the custodian of fundamental liberties, and guarantees are given for the right of association, trade union freedom and the right to strike. It provides for votes for women and the abolition of the death penalty. The constitution can be modified only with the approval of the elected National Council.

The territory of the Principality is divided into three sections—Monaco-Ville, La Condamine and Monte Carlo—which are administered by a municipal body, elected by vote. Women were given the vote in 1945.

Monegasque relations with France were based on a convention of neighbourhood and administrative assistance of 1951. This was terminated by France on 11 Oct. 1962, but has been replaced by several new conventions signed on 18 May 1963.

RELIGION. There has been since 1887 a Roman Catholic bishop, directly dependent on the Holy See.

JUSTICE. The Code Louis, adopted in 1919, is based upon the French codes. There is a Court of First Instance as well as a Juge de Paix's Court. A semi-military police force has taken the place of the 'guard of honour' and troops formerly maintained.

FINANCE. The budget (in 1,000 francs) was as follows:

	1966	*1967*	*1968*	*1969*	*1970*
Revenue	126,108	131,692	155,409	161,804	188.243
Expenditure	125,571	131,270	155,407	160,664	176.083

PLANNING. A 54-acre site has been reclaimed from the sea at Fontvieille. This land has been earmarked for office and residential development, and housing for some 15,000 people is expected to be completed within the next 10 years. The present industrial zone is to be reorganized and developed with a view to attracting new light industry to the Principality.

TRADE UNIONS. Membership of trade unions is estimated at 4,500 out of a work force of 17,000.

COMMUNICATIONS. The harbour has an area of 47 acres, depth at the entrance 90 ft, and alongside the quay 24 ft at least. The 1·6m. km of main line passing through the country is operated by French National Railways (SNCF).

Telephones numbered 15,595 in 1971. Monaco issues its own postage-stamps.

British Consul-General (resident in Nice): D. G. Crichton, MVO.
Consul-General for Monaco in London: I. S. Ivanovic.
USA Consul (resident in Nice): Joseph Williams.

MONGOLIAN PEOPLE'S REPUBLIC

Bügd Nayramdakh Mongol Ard Uls

HISTORY. Outer Mongolia was a Chinese province from 1691 to 1911, an autonomous state under Russian protection from 1912 to 1919 and again a Chinese province from 1919 to 1921. On 31 March 1921 a Provisional People's Government was established which declared the independence of Mongolia and on 5 Nov. 1921 signed a treaty with Soviet Russia annulling all previous unequal treaties and establishing friendly relations. On 26 Nov. 1924 the Government proclaimed the country the Mongolian People's Republic.

On 5 Jan. 1946 China recognized the independence of Outer Mongolia after a plebiscite in Mongolia (20 Oct. 1945) had resulted in an overwhelming vote for independence. A Sino-Soviet treaty of 14 Feb. 1950 guaranteed this independence.

Relations with the USSR were based on treaties of friendship and mutual aid (27 Feb. 1946), trade (17 Dec. 1957), economic and technical assistance (9 Sept. 1960), now replaced by a 20-year treaty of friendship, co-operation and mutual assistance (15 Jan. 1966).

Relations with China were based on treaties of economic and cultural co-operation (4 Oct. 1952), economic and technical and (29 Aug. 1956), friendship and mutual aid (31 May 1960), commerce (26 April 1961 and 18 March 1963) and a border agreement (26 Dec. 1962). Sino-Mongolian relations have deteriorated since the estrangement between China and USSR.

On 28 Oct. 1961 Mongolia was admitted to the United Nations.

CONSTITUTION AND GOVERNMENT. According to the fourth constitution (1960) power is vested in the *People's Great Khural* of deputies elected for 3 years by universal suffrage of voters over 18 years of age on a basis of 1 deputy per 2,500 inhabitants. It elects from its number 9 members of the Presidium, which carries on current state affairs. *De facto* power is in the hands of the only political party, the Mongolian People's Revolutionary (*i.e.*, Communist) Party, which had 58,048 members and candidates in 1971. The youth organization had over 90,000 members in 1970.

The last general election took place on 23 June 1969; 293 deputies were elected.

National flag: Red–sky-blue–red (vertical), with a golden 5-pointed star and under it the golden *soyombo* emblem on the red stripe nearest to the flag-pole.

Titular head of state is Jamsrangiyn Sambuu, *Chairman of the Presidium of the Khural. Prime Minister and First Secretary of the Party:* Yumjagiyn Tsedenbal. The other 5 members of the Politburo of the Party, are: S. Luvsan, *First Deputy Prime Minister*; N. Jagvaral, *Deputy Prime Minister*; D. Maydar, *Chairman, State Construction Council and Deputy Prime Minister*; D. Molomjamts; Ts. Dügersüren. Ministers not in the Politburo include: *Chairman, State Planning Commission and Deputy Prime Minister:* B. Rinchin Peljee; *Minister of Defence:* Col.-Gen. B. Dorj; *Minister of Public Security:* Bugyn Dezhid; *Foreign Minister:* Lodongiin Rinchin; *Minister of Foreign Trade:* Yë. Ochir.

AREA AND POPULATION. Area, 1,565.000 sq. km (604,095 sq. miles); population (1971), 1·3m. (49% male, 1969; 39% urban, 1969). Density, 0·8 per sq. km. Birth rate (1968), 42 per 1,000; death rate (1968), 9 per 1,000. Rate of increase, 3·9%. The population is predominantly made up of Mongolian peoples (75% Khalkha). There is a Turkic Kazakh minority (4·3% of the population). The official language is Mongolian. Some 1·5m. Mongolians live in Chinese Inner Mongolia, and 0·5m. in the Buryat Autonomous Republic of the USSR.

The Republic is administratively divided into 2 cities (Ulan Bator, the capital, population, 282,000 in 1971, and Darkhan, population, 30,000 in 1971), and 18 provinces (*aimag*). Local government is administered by People's Deputies' Khurals. The provinces are subdivided into districts (*somon*).

RELIGION. Tibetan Buddhist Lamaism was the prevalent form of religion. The church was suppressed in the 1930s, and only one monastery of 110 lamas exists today, at Ulan Bator.

EDUCATION. Schooling begins at the age of 8. There are 3-year, 5- or 7-year schools. 3-year schooling is universal. Efforts are now being made to extend 8-year schooling to the whole country. In 1970 there were 32,000 children in kindergartens, 227,600 pupils in 504 'general' schools and 11,240 in technical schools in Mongolia and abroad. There is a state university (founded 1942) at Ulan Bator (40 professors, 240 lecturers and 2,500 students in 1967), and other institutes of higher learning (teacher training, medicine, agriculture, economics, etc.) under the supervision of an Academy of Sciences (founded 1953; reorganized, 1961). In 1970 there were 8,289 students in institutes of higher learning, and some 3,000 students a year are sent to study in the USSR and Eastern Europe.

In 1946 the Mongolian alphabet was replaced by one based on Russian, but now enjoys a limited revival.

CINEMAS. There were 14 cinemas in 1966.

NEWSPAPER (1971). The Party daily paper *Ünen* ('Truth') has a circulation of 107,500. There are 35 other newspapers.

HEALTH AND WELFARE. In 1971, there were 2,300 doctors and 100 dentists, and 94·3 hospital beds per 10,000 of the population. Old-age and disablement pensions vary from 125 to 800 *tugriks* per month.

FINANCE. Currency. 100 *möngö* = 1 *tugrik*. Official exchange rates: £1 = 9·65 *tugriks*; US$1 = 4 *tugriks*; 1 rouble = 4·10 *tugriks*. Tourists receive a 50% exchange premium on hard-currency notes.

Budget (in 1m. *tugrik*):

	1960	*1965*	*1968*	*1969*	*1970*
Revenue	1,067	1,482	1,785	1,860	1,920
Expenditure	981	1,476	1,770	1,843	1,913

In the 1971–75 planning period it is planned to invest 5,500m. *tugriks* on the national economy and social and cultural measures. Mongolia receives economic aid from the USSR and other communist countries and technical aid from the UN.

DEFENCE. Military service is 2 years. The army was estimated to number 17,500 in 1967, but has certainly increased in size since. It is equipped with Soviet weapons and includes some mechanized units (T-34 medium tanks). The air force is engaged primarily in running civil air services. It has 1,000 men and about 55 non-combat aircraft (30 Il-14, An-2 transports and An-24 helicopters and trainers). There is a para-military security force of about 15,000 men. A Civil Defence force was set up in 1970. There are large Soviet forces in the country.

PLANNING. Mongolia has had for centuries a traditional nomadic pastoral economy, which the government aims to transform into an 'agricultural–industrial economy'. For earlier plans *see* THE STATESMAN'S YEAR-BOOK, 1970–71, p. 1153. The fourth 5-year plan (1966–1970) fell short in many of its targets, especially in animal husbandry, which suffered from severe spring frosts in 1968. The current 5-year plan (1971–75) aims to re-instate and develop livestock farming, and develop light and medium processing, building materials industries, electric power production and coalmining.

AGRICULTURE. The Mongols are mainly herdsmen, and in 1970 had 2·3m. horses, 684,500 camels (1965), 2·1m. cattle, 13·3m. sheep and 4·2m. goats. The total herd of all animals numbered 22·6m. in 1970. Pastures occupy 84% of the total area, forests 10·5%. In 1971 there were 272 collective farms and 32 state farms. All cultivated land and 80% of livestock belong to collective or state farms. Collective farms had a membership of 655,000 in 1968. Farms cover vast areas and in 1971 averaged 45,000 head of cattle.

Collectivization was carried through at the end of the 1950s. In the 1960s a start was made with a virgin lands campaign to grow grain.

The sown area in 1970 was 455,000 hectares, 420,000 hectares of which were sown to grain, The 1970 crop was some 350,000 metric tons of grain. In 1970 each state farm had an average of 168 tractors (15 h.p. units), 42 grain harvesters and 27 lorries.

FORESTRY. Forests, chiefly larch, cedar, fir and birch, occupy 150,000 sq. km.

MINING. There are some goldmines. Large deposits of copper, phosphorites, tin and fluorite were claimed in 1971. Wolfram and fluorspar are exported to the USSR. There are major coalmines near Ulan Bator and Darkhan. Coal production in 1970 was 2m. metric tons. Oil is produced in the eastern Gobi desert at Dzüünbayan; production, 1969, 45,000 metric tons.

INDUSTRY. Industry is small in scale and local in character. The main industrial centre is Ulan Bator; others are being built at Darkhan and Choybalsan where power stations were completed with Soviet help in 1970 and 1971. Production figures: Electricity, 493m. kwh. (1970); cement, 96,000 metric tons; washed wool, 9,800 tons; leather footwear, 1·4m. pairs (1965); processed sheep and goat skins, 1·3m. sq. metres (1970); woollen textiles, 0·9m. sq. metres (1970); fluorspar, 49,000 tons. Power stations are at Ulan Bator, Choybalsan, Tolgoyt, Sükh Bator and Darkhan. The non-agricultural labour force was 200,700 in 1970. Average monthly wage in 1970: 437 tugriks. There is a serious labour shortage necessitating the employment of military personnel, and workers from the USSR and Eastern Europe.

COMMERCE. Foreign trade is a state monopoly. Trade figures for 1970 (in million roubles); exports, 75; imports, 104, Mongolia has been a member of Comecon since 1962. The main exports are live cattle and horses, wool and hair, meat, grain, hides, furs, ores, and butter. 99% of foreign trade is with communist countries (80% with USSR). In 1970 trade with China was less than 3m. roubles (*cf.* 24m. roubles in 1961). There is a chronic trade deficit. Just over half the imports are consumer goods and just under half are machinery and industrial raw materials. Switzerland is Mongolia's most regular non-communist trading partner, and there is a trade agreement with Japan valued at US$1m. per annum.

Mongolia exported goods to the UK valued at £48,000 in 1971 (1970: £2,000) and imported from the UK goods valued at £8,000 (1970: nil) (British Board of Trade returns). Exports to USSR in 1970 (and 1969): 52·6m. (47·5m.) roubles; imports: 178·3m. (176·6m.) roubles.

RAILWAYS. The Trans-Mongolian Railway (1,423 km in 1971) connects Ulan Bator with the Soviet Union and China. The Moscow–Ulan Bator–Peking express runs each way once a week. There are spur lines to the coalmines at Nalaykha and Sharin Gol. A separate line connects Choybalsan in the east with Borzya on the Trans-Siberian railway. 7m. passengers and 4·7m. tons of freight were carried in 1970.

ROADS. There are macadam and concrete roads in and around Ulan Bator and a macadam road runs north to Darkhan. Truck services run throughout the country where there are no surfaced roads. 52m. passengers and 9·7m. tons of freight were carried in 1970.

SHIPPING. There is a steamer service on the Selenge River and a tug and barge service on Khövsgöl Lake. 200,000 passengers were carried in 1967.

AVIATION. Mongolian Airlines operate internal services and a flight to Irkutsk which links with the Moscow service. 2,800 tons of freight were carried in 1970 and 245,000 passengers. Soviet airlines (Aeroflot) operate a flight to Moscow, weekly in winter and twice weekly in summer.

POST. There were, in 1964, 370 post offices, 25 telegraph offices and 31 telephone exchanges in the country. Number of telephones (1971), 19,547.

There are wireless stations at Ulan Bator and Olgiy. In 1970 there were 99,800 radio and 14,800 television receivers. Television broadcasting began in 1967.

WEIGHTS AND MEASURES. The metric system is in use, but traditional units are still found.

Ambassador in London: Sodnomdorjiin Dambadarjaa.
British Ambassador: J. H. R. Colvin, CMG.

There are 15 other diplomatic missions in Ulan Bator, including a peripatetic French ambassador, and Mongolia is in diplomatic relations with some 35 other countries (not including the USA).

MOROCCO

al-Mamlaka al-Maghrebia

HISTORY. From 1912 to 1956 Morocco was divided into a French protectorate (established by the treaty of Fez concluded between France and the Sultan on 30 March 1912), a Spanish protectorate (established by the Franco-Spanish convention of 27 Nov. 1912) and the international zone of Tangier (set up by France, Spain and Great Britain on 18 Dec. 1923).

On 2 March 1956 France and the Sultan terminated the treaty of Fez; on 7 April 1956 Spain relinquished her protectorate, and on 29 Oct. 1956 France, Spain, Great Britain, Italy, USA, Belgium, the Netherlands, Sweden and Portugal abolished the international status of the Tangier Zone.

REIGNING KING. **Hassan II**, born on 9 July 1929, succeeded on 3 March 1961, on the death of his father Mohammed V, who reigned 1927–61. The royal style was changed from 'His Sherifian Majesty the Sultan' to 'His Majesty the King' on 18 Aug. 1957. *Heir apparent:* Crown prince Sidi Mohammed, born 21 Aug. 1963.

The King holds supreme civil and religious authority; the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. He resides usually at Rabat, but occasionally in one of the other traditional capitals, Fez (founded in 808), Marrakesh (founded in 1062), Meknès and Tangier (which has become his summer capital).

GOVERNMENT AND CONSTITUTION. The constitution was approved by referendum on 7 Dec. 1962 (3,919,737 for, 113,199 against, 72,722 void) and was promulgated on 14 Dec. 1962. In July 1970 a modification of the 1962 constitution was approved by referendum. The Kingdom of Morocco is a constitutional monarchy with a legislature of a single chamber composed of 240 deputies Deputies for 150 seats are elected by indirect vote through an electoral college representing the town councils, the regional assemblies, the chambers of commerce, industry and agriculture, and the trade unions. Deputies for the remaining 90 seats are by general election. The King, as sovereign head of State, appoints the Prime Minister and other Ministers, has the right to dissolve Parliament and approves legislation.

National flag: Red, with a green 5-pointed star in the centre.

Elections were held on 24 and 28 Aug. 1970. Cabinet at Feb. 1972:

Prime Minister, in charge of Economic Affairs: Mohamed Karim Lamrani. *Justice:* Hadj M'Hamed Bahnini. *Defence:* Gen. Mohamed Oufkir. *Interior:* Ahmed Benbouchta. *Foreign Affairs:* Dr Abdellatif Filali. *Secondary, Technical and Further Education:* Ahmed Laski. *Primary Education:* Haddou Echiguer. *Posts, Telegraph and Telephone:* Gen. Driss Benomer Alami. *Habbous and Islamic Affairs:* Hadj Ahmed Bargach. *Agriculture:* Maati Jorio. *Public Works and Transport:* Mohamed Bernoussi. *Public Health:* Abdelmajid Belmahi. *Public Administration:* Ahmed Majid Benjelloun. *Information:* Abdelkader Sahraoui. *Youth:* Arsalan Jadidi.

The country is administratively divided into 19 provinces and 2 urban prefectures. The provinces are: Rabat, Meknès, Fez, Taza, Oujda, Al-Homina, Nador, Ouarzazate, Marrakesh, Agadir, Khouribga, Settat, Al Jadida, Ksar-es-Souk, Beni-Mellal, Safi, Tangier, Tetuan, Tarfaya. The prefectures are: Casablanca and Rabat-Salé.

AREA AND POPULATION. As the south-eastern boundaries of Morocco have not been delimited, no exact figure can be given, but the total area is officially given as 500,000 sq. km (166,000 sq. miles). On 30 June 1969 the former Spanish province of Ifni was returned to Morocco, *see* THE STATESMAN'S YEAR-BOOK, 1969–70, p. 1322.

The population at the census of June 1961 totalled 11,598,070, of whom 3·4m. were urban and 8·2m. rural; foreigners numbered 400,000. Estimate, 1 March 1969, 15·03m., including 170,000 foreigners.

The principal towns (and their Moslem population) are Casablanca (1,177,000), Rabat (261,450), Marrakesh (264,300), Fez (249,000), Meknès (205,000), Oujda (149,300), Tangier (166,290), Kenitra (99,380), Safi (99,870), Tetuan (117,000). The capital is Rabat.

The official language is Arabic; French and Spanish are considered subsidiary languages.

RELIGION. Islam is the established state religion. The majority of the Moroccans are Sunni Moslems of the Malekite school. The French and Spanish settlers are Roman Catholics under the Archbishop of Rabat. The once large Jewish population is diminishing (180,000 in 1961).

EDUCATION. In 1959 a standardization of the various school systems (French, Spanish, Israeli, Moslem, etc.) was begun. Education has been made compulsory from the age of 7 to 13.

In 1970, 1·17m. children were enrolled in state primary schools and 298,000 in state secondary schools.

The language of instruction in primary schools is Arabic during the first 2 years, and half-Arabic and half-French during the following 3 years; in secondary schools lessons are in French.

The University at Rabat had 8,000 students in 1964. A new university was opened in Fez in Nov. 1961. The Qarawin Islamic University has over 4,000 students. Total of university students (1969) 12,970.

CINEMAS (1962). There are about 160 cinemas with a seating capacity of 90,000.

JUSTICE. A uniform legal system is being organized, based mainly on French and Islamic law codes and French legal procedure. The judiciary consists of a Supreme Court, courts of appeal, regional tribunals and magistrates' courts.

FINANCE. Currency. In Oct. 1959, a national currency was introduced. Its unit is the *dirham* (abbreviated DH), equalling 100 *centimes* (1 French franc = 1·025 DH; US$1 = 5·01 DH; £1 = 10·135 DH. Notes: 5, 10, 50, 100 DH; coins: 0·02, 0·05, 0·10, 0·20, 0·50, 1 DH. The exchange rate in 1969 was: US$1 = 5 DH; £1 sterling = 12·12 DH. At the end of 1963 the total circulation of money was 1,291m. DH.

Budget. The ordinary budget for 1971 envisaged revenue of 4,432m. DH (4,006m. in 1970). The main items of revenue in 1970 were (in 1m. DH): Direct taxation, 730; customs, 599; indirect taxation, 1,422; registration and stamp duties, 210. The public debt in 1970 amounted to 328m. DH.

DEFENCE. Army. The Army consists of volunteers, numbering 45,000 officers and men, organized in 2 motorized brigades, 1 armoured brigade, 1 light security brigade, 1 paratroop brigade and 12 infantry battalions. Its equipment is of French, American and (since 1962) Soviet origin.

Navy. The Navy includes 1 frigate, 2 patrol vessels, 1 seaward patrol craft and 1 landing craft acquired from France.

Air Force. The Air Force, formed in Nov. 1956, received from the Soviet Union 16 MiG-17 fighter-bombers, 2 MiG-15UTI jet trainers and 2 Il-28 light bombers. The MiGs are now in storage, and equipment in current use is mainly of US and West European origin. It includes 10 F-5A supersonic fighter-bombers and 4 two-seat F-5Bs, a total of about 70, T-28 and T-6 armed piston-engined trainers, 22 Magister jet basic trainers, Agusta-Bell 205 and Alouette helicopters, and C-47 transport aircraft. Personnel strength is about 4,000.

PLANNING. A 3-year plan (1965–67) gave priority to agriculture, tourism and professional training at a total expenditure of 711m. dirhams. A 5-year plan (1968–72) envisages a total expenditure of 1,010m. dirhams. The stated aims are the same as for the first plan, but in addition priority will be given to provide for the development of industry as a means of providing employment for a growing population.

AGRICULTURE. Agriculture is by far the most important industry, on which 70% of the population exists. The principal crops are cereals, especially wheat and barley; beans, chickpeas, fenugreek and other legumens; canary seed; cumin and coriander; linseed; olives; almonds and other fruits, especially citrus. The almost universal wild palmetto is put to various uses, including the manufacture of *crin végétal*. The trees include cork, cedar, arar, argon, oak and various conifers. Wine production, 1969–70, 1·25m. hectolitres. Tizra wood is exported for tanning purposes. Stock-raising is an important industry.

In 1964, out of a total area of 41,649,000 hectares, 23,728,000 hectares were under cultivation, including 4,743,000 of arable land, 580,000 of vine and olive plantations, 7·8m. of pastures, 2·8m. of esparto grass and 5,325,000 of forests. Effective irrigation affects 59,000 hectares.

Production (in 1,000 metric tons) in 1969: Winter wheat, 1,130; summer wheat, 339; oranges, 618.

Livestock (1968, in 1,000 heads): Camels, 222; horses, 380; cattle, 3,580; pigs, 13; sheep, 16,000; goats, 8,750; poultry, 15,000.

MINING. The principal mineral exploited is phosphate, the output of which (under a state monopoly) was 11·42m. metric tons in 1970. Other important minerals (in 1,000 metric tons) are: Coal (433), crude petrol (45·78); iron ore (872), lead (130), cobalt (6), zinc (31·9); manganese, 112·3; silver (1969), 773,000 troy oz.

FISHING. The coasts abound in fish. The chief fishing centres are Agadir, Safi, Essaouira and Casablanca. In 1965 there were 3,400 fishing vessels of 22,000 tons. Catch (in metric tons) in 1969: 169,366 sardines, 13,951 mackerel. Catch in 1964: 4,938 tunny, 2,671 anchovy, 18,808 fresh fish, 799 shellfish.

POWER. The power-plants produced 1,830m. kwh. in 1969.

TOURISM. In 1969, 716,367 foreign visitors came to Morocco.

COMMERCE. Imports and exports were (in 1m. dirhams):

	1966	*1967*	*1968*	*1969*	*1970*
Imports	2,400	2,620	2,790	2,844	3,471
Exports	2,168	2,146	2,274	2,455	2,470

Imports and exports were (in 1,000 tons):

	1966	*1967*	*1968*	*1969*	*1970*
Imports	3,311	3,756	3,728	3,404	4,037
Exports	12,416	12,636	13,442	13,910	15,074

Main imports, 1969, consumer goods and industrial products. Main exports, 1969, citrus fruit (388·6m. dirhams), phosphates and minerals.

A royal proclamation of 30 Aug. 1959 abrogated the former economic status of Tangier and integrated the zone in the kingdom. However, Tangier was declared a free port from 1 Jan. 1962; and commercial transactions within the free zone were further liberalized by decree of 8 Nov. 1965.

Total trade between Morocco and UK in £1,000 sterling (British Board of Trade returns):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	11,248	12,297	13,809	15,690	16,250	15,640
Exports and re-exports from UK	5,240	6,995	9,647	12,880	12,609	12,752

SHIPPING. In 1970, 22,431 vessels of 32·6m. net tons entered and cleared the ports of Morocco. The merchant navy had 31 ocean-going vessels of 56,223 tons on 1 Oct. 1965.

In 1970 the Moroccan ports handled 18·75m. tons of maritime traffic, of which Casablanca dealt with 13·39m.

RAILWAYS. In 1969 there were 1,756 km of railways, of which 760 km were electrified. The principal standard-gauge lines are from Casablanca eastward to the Algerian border, forming part of the continuous rail line to Tunis; Casablanca to Marrakesh with 2 important branches, one eastward from a point slightly north of Settat (Sidi el Aïdi) to Oued Zem tapping the Khouribga phosphate mines, the other westward from Ben Guerir to the port of Safi passing about midway through the phosphate district of Youssoufia (formerly Louis

Gentil); the line Oujda-Bou Arfa, serving the manganese mines of Bou Arfa and the coalmines of Jerada.

In 1969 Moroccan railways carried 3·5m. passengers and 16m. tons of goods.

ROADS. In 1969 there were 24,757 km of paved roads out of a total of 23,700 km of surfaced roads. At the end of 1969 there were in use 79,253 lorries, 207,028 private cars and 14,741 motor-cycles.

AVIATION. There are 19 airfields, of which Casablanca–Arfa and Casablanca–Nouaceur are the most important. Total international air services in 1970 comprised 897,493 passengers arrived and departed; 9,095 metric tons of freight and 1,238 tons of mail handled.

POST. Communication with Europe is maintained by cables between Casablanca and Brest, Tangier–Casablanca–Le Havre, Tangier–Gibraltar, Tangier–Cádiz, Larache–Cádiz *via* Algeciras.

Telephone subscribers totalled 169,614 at the end of 1970; of these, 46,677 were in Casablanca, 28,275 in Rabat and 9,432 in Tangier.

Broadcasting is done in Arabic, Berber, French, Spanish and English from Rabat and Tangier; television in Arabic and French began in 1962.

BANKING. The bank of issue is the Banque du Maroc in Rabat. Other important institutions are the Banque Marocaine du Commerce Extérieur (Casablanca), the Banque Nationale pour le Développement Economique (Rabat) and the Caisse de prêts immobiliers (Casablanca). There are 23 other banks in Casablanca, 3 in Tangier and 1 each in Tetouan, Fez, Kenitra, Meknès, Oujda and Rabat.

The gold and foreign-exchange reserves of the Banque du Maroc amounted to US$110m. at the end of 1963 and US$62m. at the end of 1964.

WEIGHTS AND MEASURES. The metric system of weights and measures is the sole legal system.

NEPÁL

HISTORY. From 1846 to 1951 Nepál was virtually ruled by the Ráná family, a member of which always held the office of prime minister, the succession being determined by special rules. The last Ráná prime minister (and, until 18 Feb. 1951, Supreme C.-in-C.) was HH Máhárája Mohan Shumsher Jung Bahádur Ráná, who resigned in Nov. 1951.

RULING KING. The sovereign is HM Mahárájádhirája **Birendra Bir Bikram Sháh Deva,** who succeeded his father Mahendra Bir Bikram Sháh Deva on 31 Jan. 1972,

CONSTITUTION AND GOVERNMENT. On 18 Feb. 1951 the King proclaimed a constitutional monarchy, and on 16 Dec. 1962 a new constitution of the 'Constitutional Monarchical Hindu State'. The village and town *panchayat*, recognized as the basic units of democracy, elect the district *panchayat*, these elect the zonal *panchayat*, and these finally the 90 members of the national *panchayat*. In addition, 19 representatives of professional organizations and university graduates, and royal nominees not exceeding 15% of the elected members, will be included in the national *panchayat*. The executive power is

vested in the King, who appoints a council of ministers from the national *panchayat*. A state council will advise the King and proclaim the successor or, if the heir is a minor, a regency council. Art. 81 empowers the King to declare a state of emergency and to suspend the constitution.

On 25 Aug. 1963 the King formed a 31-member National Guidance Council under his chairmanship.

Relations with the UK are regulated by the treaty of peace and friendship signed on 29 Oct. 1950, which supersedes the treaties of 1792, 1815 and 1923. Diplomatic relations with the USA were established in 1947.

For relations with Tibet, *see* p. 816.

National anthem: 'May glory crown our illustrious sovereign' (1952).

AREA AND POPULATION. Nepál, situated between 26° 20′ and 30° 10′ N. lat. and between 80° 15′ and 88° 15′ E. long., is bounded on the north by Tibet, on the east by Sikkim and West Bengal, on the south and west by Bihar and Uttar Pradesh. On 5 Oct. 1961 a treaty was signed in Peking, according to which the Chinese–Nepalese boundary line 'runs generally south-eastwards along the mountain ridge, passing through Cho Oyu mountain, Pumoli mountain, Mount Chomo Lungma (the Chinese name for Everest) and Lhotse Too Makalu mountain'. Nepál gained about 300 sq. miles of territory. Area about 54,600 sq. miles (141,400 sq. km); population (estimate, 1964), 9·5m.

In 1966 about 7,000 refugees from Tibet were living in Nepál.

Capital, Káthmándu, 75 miles from the Indian frontier; population about 195,260, and of the surrounding valley 415,000, including Pátan with a population of 135,230, and Bhádgáon with 84,240.

The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in 1559 and has since given its name to men from all parts of Nepál. The 15 semi-independent feudal chieftainships were integrated into the kingdom on 10 April 1961.

The country is administratively divided into 14 zones and 75 development districts.

RELIGION. Sanátan or Pauranic, *i.e.*, traditional or ancient Hinduism, and Buddhism are the religions of the bulk of the people. Christian missions are admitted, but conversion is forbidden. The royal family is Hindu.

EDUCATION. In 1964 there were 5,001 primary schools, 645 secondary schools, 31 colleges and the Tribhuvan University (founded 1960).

About 12% of the population are literate. The national language is Nepáli.

JUSTICE. The Supreme Court Act, 1956, established a uniform judicial system, culminating in a supreme court of a Chief Justice and no more than 6 judges. Special courts to deal with minor offences may be established at the discretion of the Government.

FINANCE. Currency. The Nepalese rupee is 171 grains in weight, as compared with the Indian rupee, which weighs 180 grains. The rate of exchange is 135 Nepalese rupees for 100 Indian rupees. 100 Nepalese pice = 1 Nepalese rupee. Coins of all denominations are minted. The Rástra Bank also issues notes of 1, 5, 10 and 100 rupees.

Budget. The general budget for the fiscal year 1970–71 envisages total expenditure of NRs 973m., of which development expenditure amounts to NRs 633m. Current revenues are estimated at NRs. 494m. The deficit is to be financed by foreign aid (NRs 402m.) and domestic loans (NRs 30m.). The main sources of

foreign aid are: India, NRs 150m.; USA, NRs 67m.; Mainland China, NRs 65m.; UK, NRs 17m.; USSR, NRs 3·5m.; others, 25·8m.

DEFENCE. The army consists of about 20,000 men, mainly infantry, all of whom are regulars. It is being modernized with the aid of Britain and USA. British equipment delivered to date includes 2 Skyvan transport aircraft. Another Skyvan Executive is operated by the Royal Air Flight.

PLANNING. The third plan of 5 years, ran from 1965 to 1970. Its cost is estimated at NRs 2,500m., of which 500m. is expected to come from foreign aid and 1,250m. from external loans. Priority was given to transport, communications, power, agriculture, irrigation, training of technicians and schools.

AGRICULTURE. Nepál has valuable forests in the southern part of the country. In the northern part, on the slopes of the Himálayas, there grow large quantities of medicinal herbs which find a world-wide market. Of the total area, nearly one-third (11·2m. acres) is under forest; 5·4m. acres is covered by perpetual snow; 9·6m. acres is under paddy, 2·9m. maize and millet, 0·8m. wheat.

Livestock: Cattle, 7m., including 2·1m. cows and 1·2m. buffaloes; sheep and goats, 1·75m.; hogs, 140,000; poultry, 14m.

INDUSTRY. New industries, such as jute- and sugar-mills, match, leather and shoe factories, and chemical works have been established. The third economic plan envisages a 60,000-kw. capacity from hydro-electric plants.

TRADE. The principal articles of export are food grains, jute, timber, oilseeds, ghee (clarified butter), potatoes, medicinal herbs, hides and skins, cattle. The chief imports are textiles, cigarettes, salt, petrol and kerosene, sugar, machinery, medicines, boots and shoes, paper, cement, iron and steel, tea. The trade is mostly financed by the Nepál Bank, Ltd (established in 1937) and the Rástra Bank of Nepál (established in 1956).

Total trade between Nepál and UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	66	101	499	702	857	371
Exports and re-exports from UK	313	367	476	563	1,767	670

RAILWAYS (2 ft 6 in. gauge) connect Raxaul with Amlekganj (30 miles) and Jayanagar on the North Eastern Indian Railway with Janakpur and thence with Bijulpura (33 miles).

ROADS. With the co-operation of India and the USA 900 miles of motorable roads are being constructed, including the East–West Highway through southern Nepál. A road from the Tibetan border to Káthmándu is being built with Chinese aid.

There are about 500 miles of motorable roads. A ropeway for the carriage of goods covers the 14 miles from Dhursing above Bhimphedi into the Káthmándu valley. A road connects Káthmándu with the railhead at Amlekhganj (80 miles).

AVIATION. The Royal Nepal Airline Corporation has linked Káthmándu, the capital, with 11 districts of Nepál; and 23 more airfields are under construction. The Royal Nepalese Airline Corporation has services between Káthmándu and Calcutta, Patna, New Delhi and Dacca.

POST. Káthmándu is connected by telephone with Birganj and Raxaul (North Eastern Indian Railway) on the southern frontier with Bihar; and with the eastern part of the Terai foothills; an extension to the western districts is being completed. Number of telephones (1971) 6,200, of which 5,750 in Káthmándu. Under an agreement with India and the USA, a network of 56 wireless stations is

being established in Nepál, with further stations in Calcutta and New Dehli. Radio Nepál at Káthmándu broadcasts in Nepáli and English. Wireless telecommunication was inaugurated on 1 Oct. 1964.

All post, telephone and telegraph services have been taken over from India. The Indian, originally English, post office, established in 1816, closed on 13 April 1965.

THE NETHERLANDS

Koninkrijk der Nederlanden

REIGNING QUEEN. **Juliana Louise Emma Marie Wilhelmina**, born 30 April 1909, daughter of Queen Wilhelmina (born 31 Aug. 1880, died 28 Nov. 1962) and Prince Henry of Mecklenburg-Schwerin (born April 1876, died 3 July 1934); succeeded to the throne on the abdication of her mother, 4 Sept. 1948, and was enthroned on 6 Sept.; married to Prince Bernhard Leopold Frederick Everhard Julius Coert Karel Godfried Pieter of Lippe-Biesterfeld (born 29 June 1911) on 7 Jan. 1937. *Offspring:* Princess Beatrix Wilhelmina Armgard, born 31 Jan. 1938 (*heir presumptive*), married to Claus von Amsberg on 10 March 1966 (*sons:* Prince Willem-Alexander, born 27 April 1967; Prince Johan Friso, born 25 Sept. 1968; Prince Constantijn, born 11 Oct. 1969); Princess Irene Emma Elisabeth, born 5 Aug. 1939, married to Prince Charles Hugues de Bourbon-Parma on 29 April 1964 (*son:* Prince Carlos Javier Bernardo, born 27 Jan. 1970); Princess Margriet Francisca, born in Ottawa, 19 Jan. 1943, married to Pieter van Vollenhoven on 10 Jan. 1967 (*son:* Prince Maurits, born 17 April 1968; Prince Bernhard, born 25 Dec. 1969); Princess Maria Christina, born 18 Feb. 1947.

The Queen's civil list was in Nov. 1968 fixed at 4·75m. guilders.

The founder of the dynasty was William of Orange (1533–84), who, as the German count of Nassau, inherited vast possessions in the Netherlands and the Princedom of Orange in France. He was the initiator of the struggle for independence from Spain (1568–1648); in the Republic of the United Netherlands he and his successors became the 'first servants of the Republic' with the title of 'Stadhouder' (governor). In 1689 William III acceded to the throne of England, becoming joint sovereign with Mary II, his wife. William III died in 1702 without issue, and after a stadhouderless period a member of the Frisian branch of Orange-Nassau was nominated hereditary stadhouder in 1747; but his successor, Willem V, had to take refuge in England, in 1795, at the invasion of the French Army. In Nov. 1813 the United Provinces were freed from French domination. The Congress of Vienna joined the Belgian provinces, the 'Austrian Netherlands' before the French Revolution, to the Northern Netherlands. The son of the former stadhouder Willem V was proclaimed King of the Netherlands at The Hague on 16 March 1815 as Willem I. The union was dissolved by the Belgian revolution of 1830, and the treaty of London, 19 April 1839, constituted Belgium an independent kingdom.

CONSTITUTION AND GOVERNMENT. According to the Constitution of the Kingdom of the Netherlands, the Kingdom consists of the Netherlands, Surinam and the Netherlands Antilles. Their relations are regulated by the 'Statute' for the Kingdom, which came into force on 29 Dec. 1954. Each part enjoys full autonomy; they are united, on a footing of equality, for mutual assistance and the protection of their common interests.

The first Constitution of the Netherlands after its restoration as a Sovereign State was promulgated in 1814. It was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the Sovereign of the title of King),

1840 (after the secession of the Belgian province), 1848, 1884, 1887, 1917, 1922, 1938, 1946, 1948, 1953, 1956 and 1963.

The Netherlands is a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture; in default of male heirs, the female line ascends the throne. The Sovereign comes of age on reaching his 18th year. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the Council of State.

The central executive power of the State rests with the Crown, while the central legislative power is vested in the Crown and Parliament (the *Staten-Generaal*), consisting of 2 Chambers. After the 1956 revision of the Constitution the Upper or First Chamber is composed of 75 members, elected by the members of the Provincial States, and the Second Chamber consists of 150 deputies, who are elected directly. Members of the States-General must be Netherlanders or recognized as Netherlands subjects and 25 years of age or over; they may be men or women. They receive an allowance.

First Chamber (as constituted in 1971): Catholics, 22; Labour Party, 18; Party for Freedom and Democracy, 8; Christian Historicals, 7; Anti-Revolutionaries, 7; Communists, 3; Radicals, 2; Pacifist Socialist Party, 1.

Second Chamber (elected on 28 April 1971): Labour Party, 39; Catholics, 35; Party for Freedom and Democracy, 16; Anti-Revolutionaries, 13; Democracy, 1966, 11; Christian Historicals, 10; Communists, 6; Political Calvinists, 3; Radicals, 2; Reformed Political Union, 2; Shopkeepers and Small Traders Party, 2; Farmers Party, 1.

The revised Constitution of 1917 has introduced an electoral system based on universal suffrage and proportional representation. Under its provisions, members of the Second Chamber are directly elected by citizens of both sexes who are Netherlands subjects not under 21 years (since 1965). Criminals, lunatics and certain others are disqualified; for certain crimes and misdemeanours there may be temporary disqualification.

The members of the Second Chamber are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 6 years, and every 3 years one-half retires by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, subject to the condition that new elections take place within 40 days, and the new House or Houses be convoked within 3 months.

The Sovereign and the Second Chamber may propose Bills; the First Chamber can only approve or reject them without inserting amendments. The meetings of both Chambers are public, though each of them may by a majority vote decide on a secret session. It is a fixed custom, that Ministers and Secretaries of State, on their own initiative or upon invitation of the Parliament, attend the sessions to defend their policy, their budget, their proposals of Bills, etc., when these are in discussion. A Minister or Secretary of State, however, cannot be a member of Parliament at the same time.

The Constitution can be revised only by a Bill declaring that there is reason for introducing such revision and containing the proposed alterations. The passing of this Bill is followed by a dissolution of both Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly stated, all laws concern only the realm in Europe, and not the overseas parts of the kingdom. Every act of the Sovereign has to be covered by a responsible Minister.

The Ministry, appointed 6 July 1971, is composed as follows:

Prime Minister and Minister for General Affairs: B. W. Biesheuvel (Anti-Rev.).

First Deputy Prime Minister, Finance, Surinam and Antilles Affairs: R. J. Nelissen (Cath.).

Second Deputy Prime Minister and Home Affairs: W. J. Geertsema (Freedom and Democracy).

Foreign Affairs: W. K. N. Schmelzer (Cath.). *Aid for Developing Countries:* Dr C. Boertien (Anti-Rev.). *Justice:* Prof. A. A. M. van Agt (Cath.). *Education and Sciences:* C. van Veen (Chr. Hist.). *Defence:* H. J. de Koster (Freedom and Democracy). *Housing and Building:* B. J. Udink (Chr. Hist.). *Transport and Waterways:* Dr W. Drees, Jr (Dem. Soc.). *Agriculture and Fisheries:* P. J. Lardinois (Cath.). *Social Affairs:* J. Boersma (Anti-Rev.). *Culture, Recreation and Social Welfare:* P. J. Engels (Cath.). *Health and Environment:* Dr L. B. J. Stuyt (Cath.). *Science and Universities:* Jhr M. L. de Brauw (Dem. Soc.). *Minister plenipotentiary for Surinam:* Dr J. D. V. Polanen. *Minister plenipotentiary for the Netherlands Antilles:* S. G. M. Rozendal.

There are 13 Secretaries of State.

The Council of State (*Raad van State*), appointed and presided over by the Sovereign, is composed of a deputy chairman and not more than 16 members. It can be consulted on all legislative matters. Decisions of the Crown in administrative disputes are prepared by a special committee of the Council.

LOCAL GOVERNMENT. The kingdom is divided in 11 provinces and 873 municipalities. Each province has its own representative body, the Provincial States. The members are elected for 4 years, directly from the Netherlands inhabitants of the province who are 21 years of age. The electoral register is the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 83 for South Holland to 43 for Zeeland. The Provincial States are entitled to issue ordinances concerning the welfare of the province, and to raise taxes pursuant to legal provisions. The provincial budgets and the provincial ordinances and resolutions relating to provincial property, loans, taxes, etc., must be approved by the Crown. The members of the Provincial States elect the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 of their members, called the 'Deputy States', is charged with the executive power and, if required, with the enforcement of the law in the province. Deputy as well as Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but attends the latter in only a deliberative capacity. He is the chief magistrate in the province. The Commissioner and the members of the Deputy States receive an allowance.

Each municipality forms a Corporation with its own interests and rights, subject to the general law, and is governed by a Municipal Council, directly elected for 4 years, by the electorate registered for the Provincial States, provided they are residents of the municipality. All Netherlands inhabitants 21 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Municipal Council has the right to issue bye-laws concerning the communal welfare. The Council may levy taxes pursuant to legal provisions; these ordinances must be approved by the Crown. All bye-laws may be vetoed by the Crown. The Municipal Budget and resolutions to alienate municipal property require the approbation of the Deputy States of the province. The Council meets in public as often as may be necessary, and is presided over by a Burgomaster, appointed by the Sovereign. The day-to-day administration is carried out by the Burgomaster and 2–7 Aldermen (*wethouders*), elected by and from the Council; this body is also charged with the enforcement of the law. The Burgomaster may suspend the execution of a resolution of the Council for 30 days, but is bound to notify the Deputy States of the province. In maintaining public order, the Burgomaster acts as the chief of police. The Burgomaster and Aldermen receive allowances.

[1] The Zuidelijke IJsselmeerpolders (drained in 1957) are part of the former Zuiderzee, now called IJsselmeer; they have not yet been incorporated in any province.
[2] The Central Register of population includes persons who are residents of the Netherlands but who have no fixed residence in any particular municipality (living in caravans and houseboats, population on inland vessels, etc.).

Of the total population on 31 Dec. 1970, 6,549,696 were males, 6,569,734 females.

The total area of the Netherlands up to the low water line (*i.e.*, sea-level at low tide) is 40,843·47 sq. km (15,784·64 sq. miles), of which 33,686·18 sq. km (13,042 sq. miles) is land area.

On 14 June 1918 a law was passed concerning the reclamation of the Zuiderzee. The work was begun in 1920; the following sections have been completed: 1. The Noordholland–Wieringen Barrage (2·5 km), 1924; 2. The Wieringermeer Polder (210 sq. km), 1930 (inundated by the Germans in 1945, but drained again in the same year); 3. The Wieringen–Friesland Barrage (30 km), 1932; 4. The Noordoost Polder (501 sq. km), 1942; 5. Oost Flevoland (651 sq. km), 1957; 6. Zuidelijk Flevoland (428 sq. km), 1967.

The polder Markerwaard (400 sq. km) is being reclaimed. A portion of what used to be the Zuiderzee behind the barrage will remain a fresh-water lake: IJsselmeer (1,250 sq. km). The 'Delta-project', scheduled to be completed in about 1980, comprises the building of enclosure dams in the estuaries between the islands in the south-western part of the country, excluding the sea-entrances to the ports of Rotterdam and Antwerp; it will also create fresh-water reservoirs. *See* map in THE STATESMAN'S YEAR-BOOK, 1959.

JUSTICE. Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 19 district courts and by 62 cantonal courts; trial by jury is unknown. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district courts, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts of appeal are constituted of 3 and the High Court of 5 judges. All judges are appointed for life by the Sovereign (the judges of the High Court from a list prepared by the Second Chamber of the States-General). They can be removed only by a decision of the High Court.

Juvenile courts were set up in 1922. The juvenile court is formed by a single judge specially appointed to try children's civil cases, at the same time charged with the administration of justice for criminal actions committed by young persons who are between 12 and 18 (in special cases up to 21) years old, unless imprisonment of 6 months or more ought to be inflicted; such cases are tried by 3 judges.

Females	4,820	4,921	4,841	Females	84,900	80,425	84,332

In addition, prosecution was evaded by paying a fine to the police in 801,607 cases in 1967, 855,375 in 1968, 797,880 in 1969, 757,396 in 1970.

Police. There are both State and Municipal Police. The State Police, about 4,800 men strong, serves 786, and the Municipal Police, about 13,600 men strong, serves 123 municipalities. The State Police includes ordinary as well as water, mounted and motor police. The State Police Corps is under the jurisdiction of the Police Department of the Ministry of Justice, which also includes the National Criminal Investigation Office, which deals with serious crimes throughout the country, and the International Criminal Investigation Office, which informs foreign countries of international crimes.

FINANCE. Currency. The monetary unit is the *gulden* (guilder, florin) of 100 cents. The official rate of exchange is US$1 = 3·62 guilders since 6 March 1961 and £1 = 8·69 guilders from 20 Nov. 1967.

Legal tender are bank-notes, currency notes of 2½ guilders, silver 2½-guilder pieces, silver 1-guilder pieces, nickel 25-cent pieces, nickel 10-cent pieces, bronze 5-cent pieces and bronze 1-cent pieces. Note circulation, 20 Sept. 1971, 9,756m. guilders, and on 28 Dec. 1970, 9,858m.

Budget. The revenue and expenditure of the central government (ordinary and extraordinary) were, in 1m. guilders, for calendar years:

	1966[3]	1967[3]	1968[3]	1969[3]	1970[4]	1971[4]	1972[5]

DEFENCE. The Netherlands are bordered on the south by Belgium, on the east by Germany. On both sides the country is quite level and has no natural defences, except the barriers of some large rivers, running east to west and south to north. The country has an excellent roadnet and a vast railway system, enabling rapid movement. The west part of the country is densely populated.

Army. Service is partly voluntary and partly compulsory. The total peacetime strength amounts to 76,000, plus 3,500 Royal Military Police directly under the Minister of Defence. The number of regulars is 26,000 (officers, n.c.o.s and technical specialists). The technical specialists serve for a period of 4–6 years and receive military and vocational training. On completing the latter training they will be given an official civilian certificate. The Army also employs 14,000 civilians. The legal period of active service for national servicemen is 22–24 months; the actual service period is 16 months for enlisted personnel and 18 months for reserve-officers and n.c.o.s. The balance may be spent at will as 'short-term leave'. After their period of actual service the conscript personnel are granted long-term leave. However, they will be liable to being called up for refresher training or in case of mobilization until they have reached the age of 35 (n.c.o.s 40, reserve officers 45).

The Netherlands have the 1st Netherlands Army Corps assigned to NATO. It consists of active and mobilizable units.

The active part of the Corps comprises 2 armoured brigades, 4 armoured infantry brigades and 40% of the Corps troops (headquarters, combat-support and service-support units); the brigades and the division-type headquarters may be grouped into 2 mechanized divisions. Part of this force is stationed in West Germany. The peacetime strength of the active brigades is 85% of the war-authorized strength.

The mobilization part of the Corps comprises 1 infantry division of 3 brigades and divisional troops plus the remaining Corps troops, among which an independent infantry brigade.

The mechanized units comprise tank battalions (200 Leopard and 400 Centurion tanks, part of the latter to be replaced by Leopards), armoured infantry battalions, heavy (175 mm) and medium (155 mm and 105 mm) artillery battalions (mainly self-propelled), armoured engineer units, armoured reconnaissance units and armoured tank-destroyer units. Helicopter squadrons are also available.

The National Command forces consist of training centres and schools, logistical units and staffs. In event of mobilization, territorial brigades with support and logistical units are called up in the 3 Army Territories. Territorial units are also maintained in Surinam. Some units in the Netherlands are earmarked for assignment to the United Nations as peace-keeping forces. A group of officers is permanently attached to the UN Truce Supervision Organization force in the Middle East. For civil defence purposes there are a number of military (mobilizable) fire-fighting, rescue and medical battalions. In time of war these units turn to the command of the National Commander of the Civil Defence.

Navy. The Royal Netherlands Navy has its main base in the Netherlands at Den Helder and a secondary base in the Netherlands Antilles at Willemstad, Curaçao.

Principal surface ships of the Royal Netherlands Navy:

Completed	Name	Standard displacement (tons)	Principal armament	Shaft horsepower	Max. speed (knots)
1953[1]	De Zeven Provincien (guided-missile cruiser)	9,850	4–15, 2 cm; 6–57 mm; 4–40 mm; twin 'Terrier' SAM launcher	85,000	32
1953	De Ruyter (light cruiser)	9,529	8–15, 2 cm; 8–57 mm; 8–40 mm		

[1] Converted to guided missile cruiser in 1962–64.

There are also 6 submarines, 12 destroyers, 6 frigates, 6 corvettes, 3 escorts (*ex*-ocean minesweepers), 3 mine countermeasures support ships (*ex*-ocean minesweepers), 5 patrol vessels, 2 survey ships, 32 coastal minesweepers, 4 coastal minehunters, 16 inshore minesweepers, 5 diving vessels, 5 small survey craft and 37 auxiliary ships.

The aircraft carrier *Karel Doorman* was sold to Argentina in 1968 and renamed *25 de Mayo*.

On 1 Jan. 1971 naval personnel totalled 20,200 officers and men, including the Royal Marine Corps.

The naval air service maintains 1 squadron Lockheed Neptunes (SP-2H), 1 squadron Breguet Atlantics, 2 squadrons Grumman Trackers (S-2A), 1 squadron Wasp helicopters, 1 squadron utility helicopters (Agusta-Bell UH-1 and Sikorsky UH-34J), 2 squadrons for training purposes equipped with Beechcraft TC-45J and Fokker S-11.

Naval estimates (in 1m. guilders): 1969, 824; 1970, 936; 1971, 998.

Air Force. The Royal Netherlands Air Force was established 1 July 1913. Its current strength is approximately 21,500 personnel and it has a first-line combat force of 8 squadrons of aircraft and 18 squadrons of surface-to-air missiles. Two F-104G Starfighter interceptor squadrons are operated by Air Defence Command, which also controls a USAF squadron of F-4E Phantom II tactical fighter-bombers based in the Netherlands. Tactical Air Command has 2 squadrons of F-104G Starfighter and 3 of NF-5 fighter-bombers, and 1 reconnaissance squadron of RF-104G aircraft. The 75 single-seat NF-5A and 30 two-seat NF-5B aircraft were built in Canada.

There are 8 Nike-Hercules surface-to-air missile (high-altitude) squadrons and 12 Hawk surface-to-air missile (low-altitude) squadrons; 3 of the latter were deactivated in 1970, under economic measures.

In addition the RNLAF comprises 1 transport squadron (Fokker Friendship) and 3 observation and communication squadrons of light aircraft and Alouette III helicopters. The observation and communication squadrons are under the operational command of the Army.

Training of RNAF pilots is undertaken in Canada.

Air Force estimates (in 1m. guilders): 1970, 866; 1971, 856.

Including early potatoes.

Livestock, May 1970: 4,366,485 cattle, 5,650,485 pigs; 47,718 horses (3 years old and over, for agricultural purposes), 610,272 sheep, 57m. poultry.

In 1970 the production of butter, under state control, amounted to 118,561 metric tons; that of cheese, under state control, to 270,881 metric tons. Export value of arable crops amounted to 3,807m. guilders; animal produce, 5,156m. guilders, and horticultural produce, 2,390 guilders.

FISHERIES. The total produce of fish landed from the sea and inshore fisheries in 1970 was valued at 270,179,000 guilders; the total weight amounted to 249,667 tons. In 1970 the herring fishery had a value of 47,312,000 guilders and a weight of 45,441 tons. The quantity of oysters produced in 1970 amounted to 824 tons (6,336,000 guilders).

MINING. Coalmining will be stopped completely. On 1 Jan. 1971 only 3 mines were still being operated.

The daily average of workers was 12,200 in 1970 (of whom 7,200 worked underground).

Production of coal in 1,000 metric tons: 1938, 13,488; 1948, 11,032; 1958, 11,800; 1967, 8,065; 1968, 6,663; 1969, 5,564; 1970, 4,334.

The production of crude petroleum (in 1,000 metric tons) amounted in 1943 (first year) to 0·2; 1953, 820; 1968, 2,147; 1969, 2,020; 1970, 1,919.

There are saltmines at Hengelo and Delfzijl; production (in 1,000 metric tons), 1950, 412·6; 1960, 1,096; 1968, 2,414; 1969, 2,668; 1970, 2,871.

POWER. The total production of electrical energy (in 1m. kwh.) amounted in 1938 to 3,688; 1958, 13,854; 1968, 33,619; 1969, 37,144; 1970, 40,817. The total net production of manufactured gas amounted in 1950 to 11,004 tcal; 1955, 14,332; 1960, 16,760; 1968, 10,385; 1969, 8,919; 1970, 8,590. Production of natural gas in 1950, 8 cu. metres; 1955, 139; 1960, 384; 1968, 14,056; 1969, 21,848; 1970, 31,668.

INDUSTRY. Numbers employed (in 1,000) and turnover (in 1m. guilders) in manufacturing enterprises with 10 workers and more, excluding building and public utilities (figures for 1970 are not comparable exactly with 1969):

COMMERCE. On 5 Sept. 1944 and 14 March 1947 the Netherlands signed agreements with Belgium and Luxembourg for the establishment of a customs union. On 1 Jan. 1948 this union came into force and the existing customs tariffs of the Belgium–Luxembourg Economic Union and of the Netherlands were superseded by the joint Benelux Customs Union Tariff. It applies to imports into the 3 countries from outside sources, and exempts from customs duties all imports into each of the 3 countries from the other two. The Benelux tariff has 991 tems and 2,400 separate specifications.

Total	1,165	4,833	1,104	4,880

[1] With accommodation for 13 or more cabin passengers.

In 1969, 44,257 sea-going ships of 208·52m. gross tons entered Netherlands ports (1970, 43,221 ships of 237·02m. gross tons).

Total goods traffic by sea-going ships in 1969 (with 1970 figures in brackets), in 1m. metric tons, amounted to 171·3 (201) unloaded, of which 79·2 (103·3) were imports, 33 (35·1) stored in bonded warehouses and 59·1 (62·5) transit, and 47·3 (63·4) loaded, of which 23·7 (36·4) were exports, 7·7 (10·1) were released from bonded warehouses and 15·9 (16·8) transit, excluding bunker fuel. The total seaborne freight traffic at Rotterdam was 176·1m. (218·9m.) and at Amsterdam 19·1m. (20·7m.) metric tons.

The number of containers at Rotterdam in 1970 was: unloaded from ships, 126,271, of which 63,031 from North America, and 116,057 loaded into ships, of which 35,609 to North America.

INLAND SHIPPING. The total length of navigable rivers and canals is 5,707 km, of which about 2,434 km is for ships with a capacity of 1,000 and more metric tons. On 1 Jan. 1970 the Netherlands inland fleet (with carrying capacity in 1,000 metric tons) was composed as follows:

Class of tonnage	Number	Capacity	Class of tonnage	Number	Capacity
21–99 tons	6,820	380	1,000–1,499 tons	820	1,044
100–199 tons	4,292	580	1,500 tons and over	458	928
200–399 tons	3,984	1,178			
400–599 tons	2,155	1,073		20,334	6,605
600–999 tons	1,805	1,422			

In 1969, 237m. (1970: 241·5m.) metric tons of goods were transported on rivers and canals, of which 146·5m. (148·8m.) in international traffic. Goods transport on the Rhine (Lobith) amounted to 45·2m. (43·8m.) metric tons downstream and 63·6m. (68·5m.) upstream.

RAILWAYS. All railways are run by the mixed company 'N.V. Nederlandsche Spoorwegen'. Length of line in 1970 was 3,148 km, of which 1,646 km were electrified. The last steam train was abolished in Jan. 1958. Passengers carried (1970), 187·9m.; goods transported, 26·7m. metric tons.

ROADS. In 1970 the length of the Netherlands network of surfaced inter-urban roads was 47,777 km. Buses transported in 1969, 662m. passengers, of whom 286m. in local traffic. Number of private cars (1970), 2·5m.

AVIATION. The Royal Dutch Airlines (KLM) was founded on 7 Oct. 1919. The company has a paid-up capital of 311m. guilders (1 March 1971). Revenue traffic, 1970–71: Passengers, 2·9m.; freight, 127·7m kg; mail, 4·4m. kg.

TELECOMMUNICATIONS. On 1 Jan. 1971 there were 2·2m. telephone connexions and 3·4m. apparatus. Number of telex lines, 13,000; teleprinters, 15,100. Television sets totalled 3·1m.; holders of television licences may, in addition, have wireless receiving sets.

BANKING. The Netherlands Bank, founded as a private institution, was nationalized on 1 Aug. 1948, the shareholders receiving, for a share of 1,000 guilders, a security of 2,000 guilders on the 2½% National Debt. Since 1863 the bank has the sole right of issuing bank-notes. The bank does the same business as other banks, but with more guarantees. The capital amounts to 20m. guilders.

In the year 1970 the state post office savings bank had deposits of 1,781m. guilders and withdrawals of 1,646m. guilders. Private savings banks: Deposits, 8,649m. guilders; withdrawals, 8,297m. guilders.

WEIGHTS AND MEASURES. The metric system of weights and measures was adopted in the Netherlands in 1820.

STATISTICAL INFORMATION. The 'Centraal Bureau voor de Statistiek' at The Hague, is the official Netherlands statistical service. *Director-General of Statistics:* Dr J. Ch. W. Verstege.

The Bureau was founded in 1899. Prior to that year, statistical publications were compiled by the 'Centrale commissie voor de statistiek', the 'Vereniging voor staathuishoudkunde en statistiek' and various government departments. These activities have gradually been taken over and co-ordinated by the Central Bureau, which now compiles practically all government statistics.

Its current publications include:

Jaarcijfers voor Nederland (*Statistical Year Book*). From 1923/24 (preceded by *Jaarcijfers voor het Koninkrijk der Nederlanden, 1898–1922*); latest issue, 1967–68

Statistisch zakboek (*Pocket Year Book*). From 1899/1924 (1 vol.); latest issue 1970

Maandschrift van het CBS (*Monthly Bulletin*). From 1906

Maandstatistiek van de buitenlandse handel (*monthly statistical bulletin of foreign trade*). From 1917

SURINAM

HISTORY. At the peace of Breda (1667) between Great Britain and the United Netherlands, Surinam was assigned to the Netherlands in exchange for the colony of New Netherland in North America, and this was confirmed by the treaty of Westminster of Feb. 1674. Since then Surinam has been twice in British possession, 1799–1802 (when it was restored to the Batavian Republic at the peace of Amiens) and 1804–16, when it was returned to the Kingdom of the Netherlands according to the convention of London of 13 Aug. 1814, confirmed at the peace of Paris of 20 Nov. 1815.

AREA AND POPULATION. Surinam is situated on the north coast of South America and bounded on the north by the Atlantic Ocean, on the east by the Marowijne River, which separates it from French Guiana, on the west by the Corantijn River, which separates it from Guyana, and on the south by forests and savannas, which separate it from Brazil.

Area, 181,455 sq. km (70,087 sq. miles). Estimated population (1970), 400,000, including 33,000 Bush Negroes and 8,000 aboriginal Indians. The capital, Paramaribo, has about 150,000 inhabitants.

Birth-rate 46 per 1,000, death-rate 9 per 1,000.

The official language is Dutch. English is widely spoken next to Hindi, Javanese and Chinese as inter-group communication. A vernacular, called 'Sranan Tongo' or 'Surinamese', is used as a lingua franca.

GOVERNMENT. The Government consists of the Governor and the Council of Ministers. The Governor is the representative of the sovereign and the constitutional head of the Government. He is assisted by an Advisory Council of 6 members.

Governor: Dr J. H. E. Ferrier.

There is a council of 13 ministers who are responsible to the Legislative Council (*Staten van Suriname*). The Legislative Council (39 members) is elected for a 4-year period by universal adult suffrage. Seven political parties are represented in the Legislative Council.

Minister-President and Minister of General Affairs: Dr. J. Sedney.

Surinam is divided into 9 districts: Paramaribo (urban district), Commewijne, Coronie, Marowijne, Nickerie, Saramacca, Suriname, Brokopondo and Para.

RELIGION. There is entire religious liberty. At the end of 1964 the various religious bodies were: Reformed and Lutheran, 16,675; Moravian Brethren, 54,392; Roman Catholics, 71,166; Moslems, 63,809; Hindus, 87,575; Confucians, 147; others, 3,680.

EDUCATION. At the end of 1970 there were 547 schools, including kindergarten, with a total of 134,927 pupils and 4,812 teachers. There are also a University with schools of medicine and law, 2 technical schools and 4 teachers' training colleges.

Schooling is compulsory from 6 to 12 years of age. Primary education is free and is undertaken by the Government in public schools and by the Roman Catholic and Protestant Missions in denominational schools.

CINEMAS (1970). There are 20 cinemas with a seating capacity of 12,000.

NEWSPAPERS (1971). There are 4 daily newspapers and 2 weeklies with a combined circulation of over 18,000.

JUSTICE. There is a court of justice, whose members are nominated by the Sovereign. There are 3 cantonal courts.

WELFARE. The Government subsidizes orphanages and other religious or philanthropical institutions, and maintains an almshouse and institutions for delinquent boys and girls. There are 13 modern hospitals in the country, 4 of which are operated by missions, 2 by a private company, 1 by the military forces and 6 by the Government.

FINANCE. Currency. Surinam florin notes ranging from 5 to 1,000 Surinam florins are legal tender. Currency notes of 1·00 and 2·50 guilders are issued by the Government. US$1 = 1·87 Surinam florins; £1 sterling = Sfl4·50 and 1 Netherlands florin = Sfl0·55.

Budget. The expenditures and local revenues (derived from import, export and excise duties, taxes on houses and estates, personal imports and some indirect taxes) are as follows (in 1,000 Surinam guilders):

	1967	*1968*	*1969*[1]	*1970*	*1971*	*1972*
Revenues	130,100	145,500	164,200	168,600	176,500	183,200
Expenditures	131,300	143,700	167,200	189,600	200,200	222,500

[1] Provisional figures.

Outstanding loans in 1971: Local, 27·9m.; foreign, 151·9m. Surinam guilders. Public debt as at 30 June 1971, 179·8m. Surinam guilders.

DEFENCE. Armed forces of the Kingdom of the Netherlands stationed in Surinam consist mainly of infantry with support units. Personnel are recruited also on a compulsory basis.

PLANNING. A 10-year development plan was launched in 1955 and later extended for 2 years. The first 5-year plan was completed in 1972 and a second 5-year plan (1972–76) is being negotiated.

AGRICULTURE. Agriculture is restricted to the alluvial coastal zone; cultivated area in 1969, 47,002 hectares. The staple food crop is rice: 35,246 hectares of paddy were planted in 1969, chiefly in the Nickerie, Commewijne, Saramacca and Coronie districts.

Principal products (in 1,000 units) in 1969:

Sugar-cane (kg)	234,863	Maize on cob (kg)	381	Oranges (pieces)	54,020
Cocoa (kg)	108	Bananas (kg)	44,684	Grapefruit (pieces)	14,038
Coffee (kg)	217	Rum 50% (litres)	2,286	Tubers (kg)	2,301
Paddy (kg)	113,328	Molasses (kg)	10,188	Coconuts (pieces)	7,284

Livestock, 1969: 39,803 head of cattle, 6,835 sheep and goats, 9,358 pigs, 457 horses, mules and donkeys, 728,104 poultry.

FORESTRY. Surinam has great timber resources. Production 1969 included 28 metric tons of balata, 469 cu. metres of sleepers, 1,600 staple metres of fuel wood, 106,000 pieces of hewn squared timber, 38,800 cu. metres of plywood and particle board, chiefly from the Suriname and Marowijne districts.

FISHERY. The catch in 1968 amounted to 6,886 metric tons.

MINERALS. Bauxite is the most important mineral; it is being mined in the Suriname and Marowijne districts. Fresh deposits have been found in the western areas. The ore is exported mainly to USA, but partly processed locally into alumina and aluminium. Production in 1969: Bauxite, 6,623,000 metric tons; gold, 74 kg; alumina, 948,778 metric tons; aluminium, 53,346 metric tons.

INDUSTRY. There are 3 large bauxite plants, 1 alumina and 1 aluminium smelting plants, sugar- and rice-mills, 2 paint factories, a fruit-juice plant, a shrimp freezing plant, a plywood factory, timber-mills, a milk pasteurization plant, a butter and margarine factory and a considerable number of various medium and small industries.

COMMERCE. Imports and exports in calendar years (in 1,000 Surinam guilders):

	1965	*1966*	*1967*	*1968*	*1969*	*1970*
Imports	179,700	168,800	193,800	188,900	208,500	217,000
Exports	110,700	171,900	201,000	218,500	247,671	256,000

Principal exports in 1969 (value in 1,000 Surinam guilders): Rice, 7,210; citrus fruits, 920; bananas, 4,083; shrimp, 987; bauxite, 78,426; alumina, 94,083; aluminium, 48,097; particle board, 1,924; plywood, 4,653.

Principal imports in 1969 (value in 1,000 Surinam guilders): Fuels and lubricants, 22,553; foodstuffs, 21,847; beverages and tobacco, 3,468; chemical products, 31,947; manufactured goods, 48,628; machine and transport equipment, 57,341.

Total trade with UK (in £1,000 sterling, British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	189	239	410	78	1,535
Exports and re-exports from UK	2,132	2,606	2,698	3,135	3,097

SHIPPING. The Royal Netherlands Steamship Co. plies between Amsterdam, Rotterdam, Antwerp, Hamburg and Paramaribo, and New York, Baltimore, New Orleans and Paramaribo. Regular sailings are made to Georgetown, Ciudad Bolívar and most Caribbean ports. The Surinam Navigation Co. maintains services from Paramaribo to Georgetown and Cayenne, and once a month to the Caribbean area. A French and an Italian company maintain passenger services to Europe. The Alcoa Steamship Co. has a fortnightly service to New York, Baltimore, Mobile and New Orleans; a Japanese line sails once a month from Hong Kong and Yokohama to Paramaribo; the Boomerang Line maintains a monthly freight and passenger service between Surinam and Australia. In 1970, 1,835 vessels totalling 5·99m. GRT entered and 1,818 of 5·97m. GRT cleared Paramaribo.

ROADS. There are 1,335 km of main roads. Two of them lead from Paramaribo to the bauxite centres of Smalkalden (29 km) and Paranam (30 km) and to the airport of Zanderij (49 km). Another main road runs across the districts of Saramacca (71 km) and Coronie (68 km), a fourth across the Commewijne district (41 km) and a fifth in the Marowijne district, from the bauxite centre Moengo to Albina (45 km).

The 'East–West connexion' is almost completed, linking the Corantijn and the Marowijne rivers (375 km).

In 1970 there were 16,207 passenger cars, 3,488 trucks, 662 buses, 31,506 powered bicycles and 4,345 motor cycles and scooters.

RAILWAY. There is one single-track railway, running from Onverwacht to Bronsweg (86 km); part of the track, from Paramaribo to Onverwacht (34 km) has been removed.

AVIATION. Regular air services are maintained by KLM, PANAM, VIASA, Air France, Cruzeiro do Sul and Empressa de Transportes Aerovias Brasil. The international airfield at Zanderij is capable of handling all types of planes.

Surinam Airways Ltd provides daily services between all major districts and maintains also a charter service.

In 1970, 1,787 aircraft landed at Zanderij airport with 71,847 incoming passengers and 1,271 tons of incoming mail and freight.

POST. Automatic telephone service links most of the districts in the interior. In 1969 there were about 11,000 telephones. Wireless telephone connects Surinam with the Netherlands, USA, Curaçao, Guyana, French Guiana and Trinidad. There are 5 broadcasting and 1 television stations.

BANKING. The Central Bank of Surinam is a bankers' bank and also a bank of issue; the Surinaamsche Bank, the Hollandsche Bank Unie and the O.R.G. Verruurt's Banking Corporation Ltd, are commercial banks; the Surinam People's Credit Bank operates under the auspices of the Government; Surinaamse Postspaarbank (postal savings bank), Surinaamse Hypotheekbank NV (mortgage bank); Surinaamse Investerings Mij. NV (investment bank); Agentschap van de Maatschappij tot financiering van het Nationaal Herstel NV (long-term investments); National Development Bank.

THE NETHERLANDS ANTILLES
De Nederlandse Antillen

The Netherlands Antilles are an integral part of the Netherlands and comprises two groups of islands, viz. the Leeward Islands, Curaçao, Aruba and Bonaire, and the Windward Islands, St. Maarten, St Eustatius and Saba. The Leeward Islands are situated 40–70 miles north of the Venezuelan coast between 12° and 13° N. lat. and 68° and 71° W. long. The Windward group lies east of Puerto Rico.

AREA AND POPULATION. The total area is 996 sq. km (390 sq. miles) and the population was 216,355 on 31 Dec. 1968.

Benedenwinds group	Sq. km	Population[2]	Bovendewinds group	Sq. km	Population[2]
Curaçao	444	145,707	St Maarten (St Martin)[1]	37	6,881
Aruba	193	60,734	St Eustatius	21	1,350
Bonaire	288	8,191	Saba	13	956

[1] The southern part belongs to the Netherlands Antilles, the northern to France. [2] 1970.

In 1969, 4,967 births, 1,208 deaths, 1,323 marriages and 252 divorces were registered.

GOVERNMENT. Since Dec. 1954, the Netherlands Antilles have been fully autonomous in internal affairs, and constitutionally equal with the Netherlands and Surinam. The Sovereign of the Kingdom of the Netherlands is Head of the Government of the Netherlands Antilles and is represented by a Governor.

The executive power in internal affairs rests with the Governor and the Council of Ministers, who together form the government. The Ministers are responsible to the unicameral legislature (*Staten*). This consists of 22 members (12 from Curaçao, 8 from Aruba, 1 from Bonaire, 1 from the Windward Islands) and is elected by general suffrage.

The executive power in external affairs is vested in the Council of Ministers of the Kingdom, in which the Antilles is represented by a Minister Plenipotentiary with full voting powers.

In 1951 the Netherlands Antilles Islands Regulation provided for self-government of each of the 4 insular communities Aruba, Bonaire, Curaçao and the Windward Islands. The autonomous powers of the insular communities are divided between the Island Council (elected by general suffrage), the Executive Council and the Lieut.-Governor (*Gezaghebber*), who is responsible for maintaining public peace and order.

Governor: Dr B. M. Leito.
Prime Minister: O. R. A. Beaujon.

Dutch is the official language. Spanish and English are also spoken. In addition a 'lingua franca', *Papiamento*, has evolved out of Spanish, Dutch and some other languages.

RELIGION. In 1960, 82% of the population were Roman Catholics, 8% were Protestants.

EDUCATION (1969). Schools numbered 277, with 69,272 pupils and 2,193 teachers.

CINEMAS (1966). Curaçao and Aruba had 13 cinemas with a seating capacity of 11,000. There is a drive-in cinema for 500 cars in Curaçao and for 350 cars at Aruba.

HEALTH. In 1968 there were 79 physicians, 51 specialists, 30 dentists and 20 pharmacists. In 1968, 7 hospitals had 1,311 beds.

FINANCE. The central budget for 1968 envisaged 69,252,924 guilders revenue and 69,206,226 guilders expenditure.

The public debt was 122,095,711 guilders as at 31 Dec. 1968.

The official rate of exchange is £1 = 4·61 (buying) and 4·39 (selling) Netherlands Antilles guilders.

ECONOMY. The economy of the Netherlands Antilles is almost entirely based on the refining of oil imported from Venezuela to Curaçao and Aruba. About 25% (Curaçao) and 30% (Aruba) of the gainfully occupied are working at the refineries or their shipping establishments. On account of the activities of the oil companies (affiliated to the Royal Dutch/Shell and the Standard Oil of New Jersey), the prosperity on Curaçao and Aruba is good in comparison with the other islands.

About 100,000 tons of calcium phosphate are annually mined in Curaçao.

In Aruba there are some petrochemical factories; Curaçao has a paint factory, 2 cigarette factories, a brewery and some smaller industries. The Texas Instruments Co. has established an electronic factory. Almost all products needed for consumption and production are imported, as the rocky soil permits little agriculture and local fishing is insufficient for home consumption. The tourist industry is being developed.

Bonaire has a textile factory. St Maarten has a rum factory and fishing is important. St Eustatius and Saba are of less economic importance.

TOURISM. In 1970, 209,005 foreign tourists visited the Netherlands Antilles.

TRADE (1969). Total imports amounted to 1,303m. guilders; total exports to 1,178m. guilders, of which oil and oil products accounted for 1,101m. guilders.

Total trade between the Netherlands Antilles and UK in £1,000 sterling (British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	16,158	16,760	13,062	13,137	
Exports and re-exports from UK	5,138	6,028	6,574	8,260	

The Free-Zones Ordinance of 1956 has established free zones in the ports of Curaçao and Aruba.

SHIPPING (1970). There entered the port of Curaçao, 6,424 vessels of 43·7m. gross tons; Aruba, 2,938 vessels of 39·3m. gross tons.

ROADS. In 1968 the Netherlands Antilles had 1,183 km of surfaced highway distributed as follows: Curaçao, 541; Aruba, 380; Bonaire, 209; St. Maarten, 53. Number of motor vehicles (31 Dec. 1968): 21,870 in Curaçao, 9,877 in Aruba.

POST. Number of telephones, 1 Jan. 1970, 26,000.

British Consul: R. F. Storm.
USA Consul-General: H. M. Lofton.

NICARAGUA

República de Nicaragua

HISTORY. Active colonization of the Pacific coast was undertaken by Spaniards from Panama, beginning in 1523. After links with other Central American territories, and Mexico, Nicaragua became completely independent in 1838, but subject to a prolonged feud between the 'Liberals' of León and the 'Conservatives' of Granada. Mosquitia remained an autonomous kingdom on the Atlantic coast, under British protection until 1860.

On 5 Aug. 1914 the Bryan–Chamarro treaty between Nicaragua and the United States was signed, under which the US in return for $3m. acquired a permanent option for a canal route through Nicaragua and a 99-year option for a naval base in the Bay of Fonseca on the Pacific coast and Corn Island on the Atlantic coast. It was ratified by Nicaragua on 7 April 1916 and by the US on 22 June 1916. US Marines finally left in 1933.

CONSTITUTION AND GOVERNMENT. Since 1963 the President of the Republic, 3 Vice-Presidents, 16 Senators, 42 deputies and members of local councils are directly elected for a term of 4 years. A secret ballot has been introduced. The franchise extends to all men and women over 21 and to those over 18 who can read or write or are married as well as to those under 18 who have a 'bachelor's', *i.e.*, school-leaver's, degree. Deputies are elected on a national list, senators in 4 electoral districts. Seats in Congress (the Senate and the Chamber of Deputies) are awarded by a modified system of proportional representation which secures not less than one-third of the seats to the minority parties. In addition, ex-presidents of the Republic are life senators and the presidential candidate who is runner up in the elections is a senator for the succeeding term. The supervision of the elections is in the hands of the Supreme Electoral Tribunal and subordinate tribunals which rank as a fourth 'power' of the state '*el poder electoral*' together with the Executive, Legislative and Judicial powers.

On 31 Aug. 1971 the Congress voted in favour of dissolution and the abrogation of the Constitution. A 100-member Constituent Assembly started its discussions on a new Constitution in May 1972.

President: Gen. Anastasio Somoza Debayle, for the term beginning 1 May 1967 and will continue in office until a new constitution is decided.

Minister for Foreign Affairs: Dr Lorenzo Guerrero.

Ministers, who are heads of departments, are chosen by the President and cannot be members of Congress.

The republic is divided into 16 'departments' and 1 *comarca* (district), each of which is under a political head (appointed by the President), who has supervision of finance, education and other matters. The departments have 123 *municipios*, headed by a mayor (*alcalde*). The Mosquito Reserve now forms part of the departments of Zelaya and Río San Juan.

National flag: Blue, white, blue (horizontal); with the coat of arms on the white stripe.

National anthem: Salve a ti Nicaragua (words by S. Ibarra Mayorga, 1937).

AREA AND POPULATION. Area estimated at 148,000 sq. km (57,143 sq. miles) or 139,000 sq. km (54,296 sq. miles) if the lakes are excluded. The coastline runs 336 miles on the Atlantic and 219 miles on the Pacific. Population estimate at the end of 1969 was 1·78m.

Nicaragua is the largest in area and most thinly populated of the Central American republics. Crude birth rate, 1960, 43·24 per 1,000 population; crude death rate, 8·57; infantile mortality rate, 70·21 per 1,000 live births; crude marriage rate, 6·99 per 1,000 population.

About 80% of the inhabitants live in the area between the great lakes and the Pacific.

The people of the western half of the republic are principally of mixed Spanish and Indian extraction, some of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and other Indians and Zambos, and Negroes from Jamaica and other islands of the Caribbean. The main ethnic groups in 1963 were: Mestizo, 71%; white, 14%; Negro, 8%; Indio, 4%.

Nicaragua is administratively divided into the following 16 departments and 1 territory, with population as on 30 June 1963:

Boaco	71,905	Jinotega	74,818	Nueva Segovia	45,323
Carazo	66,028	León	148,595	Río San Juan	15,333
Chinandega	125,476	Madriz	49,966	Rivas	63,924
Chontales	75,547	Managua	317,641	Zelaya	89,023
Estelí	68,046	Masaya	76,433		
Granada	65,706	Matagalpa	170,263	Cabo Gracias a Dios	1,456

Of the 123 *municipios*, 98 have from 2,000 to 50,000 inhabitants. The capital is Managua, situated on the lake of the same name, 180 ft above sea level, with (1967) 300,000 inhabitants; Bluefields, 17,706; Chinandega, 36,885; Granada, 40,200; Jinotepe, 15,957; León, 61,649; Masaya 34,127; Matagalpa, 61,383; Diriamba, 24,177; Boaco, 20,428; Juigalpa, 18,259; Estelí, 26,764.

RELIGION. The prevailing form of religion is Roman Catholic, but religious liberty is guaranteed by the Constitution. The republic constitutes 1 archbishopric (seat at Managua) and 6 bishoprics (León, Granada, Estelí, Matagalpa, Juigalpa and Puerto Cabezas). Protestants, established principally on the Atlantic coast, numbered 54,100 in 1966.

EDUCATION. There were (1959–60) 2,082 elementary schools, of which 1,967 were state and 115 private, with a total (1962–63) of 172,419 pupils; and 102 secondary schools, 68 of which were private, with 12,267 pupils. Illiterate persons, of all ages, number 63·7% of the population. The National University at León has faculties of medicine, law, pharmacy, dentistry, engineering (at Managua) and economics. It had 1,621 students in 1963–64. An AID loan of US$700,000 (1964) is for an expansion of capacity so that the annual intake can increase from the present 550, to 1,500 by 1971.

A Roman Catholic university was founded in Managua in 1961, and has faculties of engineering, public administration and law; 531 students.

CINEMAS. Cinemas numbered over 100 in 1965 and seated over 60,000.

NEWSPAPERS. There are 7 daily newspapers (5 in Managua and 2 in León), with a total circulation of about 75,000.

SOCIAL WELFARE. From 26 May 1963 a minimum daily wage of 6 córdobas was introduced nationally. Workers in towns of over 20,000 inhabitants receive 40% more; agricultural workers receive additional food allowances and house loans.

JUSTICE. The judicial power is vested in a Supreme Court of Justice at Managua, 5 chambers of second instance (León, Masaya, Granada, Matagalpa and Bluefields) and 153 judges of inferior tribunals.

FINANCE. Currency. The monetary unit is the *córdoba* (C$), divided into 100 *centavos*. Its exchange parity with gold is managed by the Central Bank of Nicaragua and the Government. No gold or silver coins are minted. On 31 Dec. 1964 total money supply was 460m. córdobas. Gold coins provided by law (1912) were 10, 5 and 2½ córdobas, but have never been struck. National banknotes form the greater part of the currency, in denominations from 1,000 córdobas to 1 córdoba. Silver coins struck, but now out of circulation, are 50, 25 and 10 centavos; copper–nickel and copper–zinc coins, 50, 25, 10 and 5 centavos; copper coin, 1 centavo.

Rate of exchange, Jan. 1972: 18·2 córdobas = £1.

Budget. Revenue and expenditure for fiscal years, ending 30 June (from 1965, calendar years), in 1m. córdobas (C$1 = 14·2857 US cents):

	1965[2]	*1966*[1]	*1967*[1]	*1968*[1]	*1969*[1]	*1970*[1]
Revenue	447·4	583·7	673·5	661·2	659	686·2
Expenditure	465·4	583·7	673·5	661·2	659	686·2

[1] Estimates. [2] Last 6 months.

The 1967 budget included C$42·5m. for the Ministry of Finance and Public Credit, 119·2m. for education, 165·8m. for development and public works, 72·4m. for defence and 61·3m. for health. On 1 July 1964 a special budget, balanced at C$207·6m., was announced, to cover the 6-month period to 31 Dec. 1964. From then the calendar year was followed.

The practice of borrowing heavily from the National Bank resulted in a debt of 28·25m. córdobas, which, 1950, was funded for 25 years.

Of Nicaragua's external debt, the sterling bonds were finally redeemed in 1958. The external debt at the end of 1965 was equal to US$55·3m.; the internal debt at 31 Dec. 1964 was 124·3m. córdobas.

A Social Security scheme became operative in 1958 for the Managua area and was extended to the City of León in 1964.

DEFENCE. The National Guard (which functions as police force and army) numbers 560 officers and some 4,850 other ranks, besides 4,000 in the trained reserve. Period of enlistment, 3 years, but military service may be made compulsory at any time. There is a military academy.

Some small coastguard boats patrol the east and west coast to prevent smuggling.

Formed in June 1938 as the Nicaraguan Army Air Force, the air force has been semi-independent since 1947. Its combat units have re-equipped with 6 T-33 armed jet trainers, 6 B-26 light piston-engined bombers and 6 T-28 armed piston-engined trainers. Other equipment includes a few C-47 transports, T-6 piston-engined trainers and smaller communications aircraft. Approximate strength is 1,500 personnel and 60 aircraft.

PRODUCTION. Of the total land area (about 36·5m. acres), about 17·5m acres are under timber, 0·9m. acres are used for grazing and 2·1m. acres are arable. In 1964, 58·9% of the population were estimated to live in rural areas. The unit of area used locally is the *manzana* (= 1·73 acres). A survey in 1954 showed that of the arable only 1,044,000 acres were actively cultivated, 500,000 in annual crops such as cotton and rice and the remainder in perennial crops such as coffee and sugar-cane, or in two harvests a year in the cases of maize, sorghum and beans. Five-sevenths of the working population are in agriculture. A Natural Resources Law came into operation on 17 April 1958, and a new Agrarian Reform Institute came into being on 1 July 1964.

AGRICULTURE. Agriculture is the principal source of national wealth, finding work for 65% of the labour force, and furnishing, 1961, 37% of the gross national product of C$2,294,424,000. There are big plans to increase its efficiency by means of irrigation schemes depending on the Tipitapa and Tuma rivers. The principal production of the eastern part of the republic was formerly bananas, but the exports in 1961 were only 62,766 stems. An American company, in 1961, laid out banana plantations on the west coast on new soil which should be free of the Panama disease. The Chinandega crop was valued at C$20m. in 1963–64; it suffered heavy storm damage in Feb. 1965, which destroyed 50% of the trees. Cotton production in 1962–63 was 1·5m. quintals, of which approximately 700,000 quintals was exported, value US$26m. Production was 419,000 bales in 1963–64 and 541,000 in 1964–65. There are 19 gins, of which 16 are operating. Plantains, oranges, pineapples, sweet potatoes and yucca are raised for home consumption.

The products of the western half are much more varied, the most important being cotton, coffee, now under the aegis of the new *Instituto del Café*, sugar-cane, cocoa, maize, sesame and beans. A firm has been organized to produce soluble banana, cocoa and coffee powder, principally for export. Sugar-cane output, 1963–64, was 1·1m. tons. The first shipments of a Havana-type tobacco were made in 1964 from a farm controlled by the *Instituto de Fomento Nacional*. A USA company bought the entire crop, valued at C$1·2m.

Rice is grown (500,561 quintals in 1962–63) and wheat in León and the hilly Jinotega district, while tobacco is cultivated round Masaya. Sesame seed is the

country's only oilseed of importance, but it is ninth after coffee, gold, cotton, meat, sugar, powdered coffee, cotton seed and copper as an export; the 1963–64 crop was 102,000 quintals. An experimental planting of castor seed was made in May 1957. The coffee crop (from 155,000 acres) was 375,000 quintals in 1965 (360,687 in 1964). There are 67 processing plants. Some other 1963–64 crops (in quintals) were: Maize, 3·1m.; beans, 0·7m.; sorghum, 0·9m. With the exception of plantains and yucca or cassava, the greater part of the food supply of the eastern section is imported from the US. The western half of the country produces much of its own food, but is seriously dependent upon weather conditions. There are about 1·8m. head of cattle. A modern meat-packing plant was established in 1955; slaughterings were 151,522 in 1961, rising to 200,000 in 1965. There are 350,000 pigs. Beef exports in 1963 were valued at US$8·4m., third only to coffee and cotton. A big programme for the improving of the quality of the cattle was jointly introduced in 1965 by the National Development Institute and the National Bank of Nicaragua.

FISHERY. On the Atlantic coast fisheries are an important subsistence activity. Over 6m. lb. of shrimps were exported in 1967 and were processed in 3 plants at Schooner Cay, El Bluff and Corn Island. The fishing limit off the coast has been defined as 200 nautical miles. Within that limit, fishing is subject to the provisions of the Natural Resources Exploration Law.

FORESTRY. Timber production has been declining, though the forests, which cover 10m. acres and 4 distinct zones, contain mahogany and cedar, which were formerly largely exported, three varieties of rosewoods, guayacán (*lignum vitae*) and dyewoods. In 1968–69 exploitation of these vast areas of timber with a potential production of 300,000 tons per annum was begun.

MINING. Production of gold in 1964 was 211,900 fine oz.; of silver, 332,370 troy oz.; exports in 1963 being valued at US$7·11m. Copper (20,262,417 lb. in 1964); there is no iron or coalmining. Large deposits of tungsten in Nueva Segovia were announced in 1961. Exploration for petroleum began off the Pacific and Atlantic coasts in 1965. A petroleum refinery handling 5,000 bbls a day is functioning at Managua. A new mining law was enacted in March 1965 to replace the mining code of 1906.

INDUSTRY. Chief local industries are matches, cigarettes, beer, soap, leather, plastics, metal products, flour, cement (1·6m. sacks of 94 lb. in 1964), cotton and silk, strong and soft drinks, soluble coffee, dairy products, meat, plywood, cosmetics, detergents and paints. In 1964 almost 100 new enterprises received tax incentive authorization under the law.

POWER. In 1964, 71 diesel and 11 hydro-electric power units produced 155·9m. kwh. Construction work on the Río Tuma hydro-electric scheme, designed to augment the supply to Managua and west-coast districts, continues; the first unit of 25,000 kw. began on 27 March 1965.

LABOUR. In 1960 there were some 477,338 persons gainfully employed; of these: agriculture, 64%; manufacturing, construction, mining and power, 16·7%; services, transport and commerce, 19·3%. There were fully six times as many males as females 'economically active'.

COMMERCE. The foreign trade of Nicaragua, in US$1m., was as follows in calendar years:

	1961	*1962*	*1963*	*1964*	*1965*	*1966*	*1967*
Imports	74·4	98·2	110·7	109·8	136·7	152·0	204
Exports	68·4	90·2	106·8	125·5	143·0	141·2	146

The main imports in 1964 (in US$1m.) were: Manufactured goods, 28·1; machinery and vehicles, 41·2; chemicals, 23·7; foodstuffs, 12·1. These were supplied largely by USA, Germany, Japan, UK and Guatemala. Imports from the ODECA countries were almost double those of 1963.

In 1964 the main exports (in US$1m.) were: Cotton, 58·1; coffee, 21·1; meat, 6·1; timber, 2·1; sugar, 5·7; soluble coffee, 3·8; bananas, 2·1. The coffee export quota for 1965–66 is 489,000 bags (of 60 kg).

Total trade between Nicaragua and UK (British Board of Trade returns) in £1,000 sterling:

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	563	697	1,216	996	821	481
Exports and re-exports from UK	1,795	2,905	2,130	2,953	2,724	2,215

SHIPPING. The Pacific ports are Corinto (the largest), San Juan del Sur and Puerto Somoza through which pass most of the external trade. The chief eastern ports are El Bluff (for Bluefields) and Puerto Cabezas. The merchant marine consists solely of the Mamenic Line with 4 vessels owned and 5 chartered. In 1960, 1,034 ships entered and 1,015 left Nicaraguan ports.

ROADS. 800·1 km are paved, out of a total of 6,124 km. The whole 368·5 km of the Nicaraguan section of the Pan-American Highway is now (1970) paved. The all-weather Roosevelt Highway linking Managua with the river port Rama was completed in 1968, to provide the first overland link with the Atlantic coast. There are paved roads to San Juan del Sur, Puerto Somoza and Corinto. Motor vehicles, 1964, were 14,383 passenger cars, 5,050 trucks, 570 buses and 3,610 motor cycles.

RAILWAYS. The Pacific Railroad of Nicaragua, owned and operated by the Government, has a total length of 348 km, all single-track, and connects Corinto, Chinandega, León, Managua, Masaya and Granada. Passengers carried (1969), 756,000; freight, 136,000 metric tons.

AVIATION. LANICA, the Nicaraguan airline, 77% national and 23% Pan-American owned, has 3 flights a week to Miami and to Bluefields, Puerto Cabezas and the mining towns of Siuna and Bonanza. PANAM and TACA (Transportes Aéreos Centroamericanos), a US-owned line registered in El Salvador, have daily services to Panama, Mexico, the other central American countries and USA. Craft Airlines, a new airline, has begun daily service between Managua, Nicaragua, and San José, Costa Rica. In 1963, 61,588 passengers entered and left, and air freight was nearly 3m. kg in either direction.

Las Mercedes airport, Managua, is being extended to accommodate jet aircraft, with the help of a 1963 A.I.D. loan of US$950,000.

POST. There are (1962) 7,474 km of (government-owned) telegraph wire and 221 offices; also 6,284 km of telephone wire and 208 telephone stations serving (1969) 23,484 instruments, 75% automatic and all government-operated. There are 233 post offices, and good service between the chief towns of the western section; service into the interior is carried by air-mail. All American Cable Co. connects with New York and has a powerful station at San Juan del Sur.

The Tropical Radio Telegraph Company maintains a powerful station at Managua, and branch stations at Bluefields and Puerto Cabezas. The Government operates the National Radio with 47 broadcasting stations: there are 31 commercial stations and some 70 others. Number of wireless sets in 1963 was 80,000. There is a television station at Managua.

BANKING. The National Bank of Nicaragua at Managua, founded in 1912, owned by the Government since 1924 was completely reorganized in May 1940. On 1 March 1962 its capital was increased to C$130m. and a new law gave it increased responsibilities as a development bank. The Central Bank of Nicaragua came into operation on 1 Jan. 1961 as an autonomous bank of issue, absorbing the issue department of the National Bank. The total gold and foreign-exchange reserve of the Central Bank was, as of 31 Dec. 1964, US$41·3m.

A new exchange law came into force on 1 March 1963 under which the free convertibility of the Nicaraguan córdoba was decreed. A new import law

effective also as from 1 March 1963 waived the formality of issuing import permits for consular purposes. The standard 3 classifications still remain in force, namely essential goods, less essential goods and non-essential or luxury goods. The Foreign Investment Law of 26 Feb. 1955 guarantees the repatriation of capital and profits of foreign investments.

A new Workers' Bank (*Banco Obrero y Campesino*) was established by law of 2 May 1966; the State provides C$5m. over 5 years towards the initial capital. In 1967 a savings and loan company, *Centroamericana de Ahorro y Préstamo*, opened in Managua.

Two private commercial banks opened in Managua in 1953, the Banco Nicaragüense SA and the Banco de América SA, with paid-up capital of C$15m. and $C14·5m. respectively. There is a branch of the Bank of London & Montreal Ltd in Managua, and the Bank of America National Trust and Savings Association opened a branch there in 1964. The legal minimum cash holding for commercial banks with the Central Bank is 28% for all accounts.

WEIGHTS AND MEASURES. Since 1893 the metric system of weights and measures has been recommended.

NORWAY

Kongeriket Norge

HISTORY. By the Treaty of 14 Jan. 1814 Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederik of Denmark as their king. The foreign Powers refused to recognize this election, and on 14 Aug. a convention proclaimed the independence of Norway in a personal union with Sweden. This was followed on 4 Nov. by the election of Karl XIII (II) as King of Norway. Norway declared this union dissolved, 7 June 1905, and Sweden agreed to the repeal of the union on 26 Oct. 1905. The throne was offered to a prince of the reigning house of Sweden, who declined. After a plebiscite, Prince Carl of Denmark was formally elected King on 18 Nov. 1905, and took the name of Haakon VII.

REIGNING KING. **Olav V**, born 2 July 1903, married on 21 March 1929 to Princess Märtha of Sweden (born 28 March 1901, died 5 April 1954), daughter of the late Prince Carl (son of King Oscar II). He succeeded on the death of his father, King Haakon VII, on 21 Sept. 1957. *Offspring:* Princess Ragnhild Alexandra, born 9 June 1930 (married, 1953, Hr. Erling Lorentzen); Princess Astrid Maud Ingeborg, born 12 Feb. 1932 (married, 12 Jan. 1961, Hr. Johan Martin Ferner); Crown Prince Harald, born 21 Feb. 1937, married, 29 Aug. 1968, Sonja Haraldsen. *Offspring:* Princess Märtha Louise, born 22 Sept. 1971.

CONSTITUTION AND GOVERNMENT. Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

The constitution, voted by the constituent assembly at Eidsvoll on 17 May 1814 and modified at various times, vests the legislative power of the realm in the Storting (Parliament). The royal veto may be exercised twice; but if the same Bill passes three Stortings formed by separate and subsequent elections it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

Since June 1938 all branches of the Government service, including the state church, are open to women.

National flag: A blue cross with white borders on red.

National anthem: Ja, vi elsker dette landet (words by B. Bjørnson, 1865; tune by R. Nordraak, 1865).

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday in October each year, and their duration is not limited. Every Norwegian subject of 20 years of age (provided that he resides and has resided for 5 years in the country) is entitled to vote, unless he is disqualified for a special cause. Women are, since 1913, entitled to vote under the same conditions as men. The mode of election is direct and the method of election is proportional. The country is divided into 20 districts, each electing from 4 to 13 representatives.

At the elections for the Storting held on 7–8 Sept. 1969 the following parties were elected: Labour, 74; Conservative, 29; Centre Party, 20; Christian Popular, 14, and Liberal, 13.

The Storting, when assembled, divides itself by election into the *Lagting* and the *Odelsting*. The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. Each Ting (the Storting, the Odelsting and the Lagting) nominates its own president. Most questions are decided by the Storting, but questions relating to legislation must be considered and decided by the Odelsting and the Lagting separately. Only when the Odelsting and the Lagting disagree, the Bill has to be considered by the Storting in plenary sitting, and a new law can then only be decided by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution, which can only be decided by the Storting in plenary sitting. The Storting elects 5 delegates, whose duty it is to revise the public accounts. The Lagting and the ordinary members of the Supreme Court of Justice (the *Høyesterett*) form a High Court of the Realm (the *Riksrett*) for the trial of ministers, members of the *Høyesterett* and members of the Storting. The impeachment before the *Riksrett* can only be decided by the Odelsting.

The executive is represented by the King, who exercises his authority through the Cabinet or Council of State (*Statsråd*), composed of a Prime Minister (*Statsminister*) and 14 ministers (*Statsråder*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote.

The Cabinet was in April 1972 composed as follows:

Prime Minister: Trygve Bratteli.
Foreign Affairs: Andreas Cappelen. *Finance:* Ragnar Christiansen. *Defence:* Alv Jakob Fostervoll. *Ecclesiastical Affairs and Education:* Bjartmar Gjerde. *Fisheries:* Knut Hoem. *Industries:* Finn Lied. *Transport and Communications:* Reiulf Steen. *Wages and Prices:* Olav Gjærevoll. *Social Affairs:* Odd Højdahl. *Family and Consumer Affairs:* Inger Louise Valle. *Municipal Affairs and Labour:* Oddvar Nordli. *Agriculture:* Thorstein Treholt. *Commerce and Shipping:* Per Kleppe. *Justice:* Oddvar Berrefjord.

The official languages are Bokmål (or Riksmål) and Nynorsk (or Landsmål).

Local Government. For the purposes of administration the country is divided into 19 counties (*fylker*), in each of which the central government is represented by a county governor (*fylkesmannen*). In addition, there are 47 urban districts (*by-kommuner*) and 397 rural districts (*herredskommuner*), each of which usually corresponds in size to a parish (*prestegjeld*). The districts are administered by district councils (*kommunestyre*), whose membership may vary between 13 and 85 councillors, and by a committee (*formannskap*) which is elected by and from the members of the council. The council is four times the size of the committee. The council elects a chairman and a vice-chairman from among its members. Councillors are elected in accordance with rules which are in most cases identical with the rules governing election to Parliament.

Each of the 18 counties forms a county district (*fylkeskommune*), while the remaining 1, Oslo, comprises an urban district. The supreme authority in a county district is the county council (*fylkesting*). Every district council elects its district representatives in the proportion of one to every 6,000 inhabitants, though no one district may elect more than one-third of the total number of representatives in the county council. In a county district the county committee (*fylkesutvalg*) occupies a position corresponding to that of the committee (*formannskap*) in the primary districts. The county committee is elected by and from among the members of the county council. The number of county committee members is one-fourth of the membership of the county council, but must be at least 7 and not more than 11. The county council elects from among the members of the county committee a county sheriff (*fylkesordfører*) and a deputy sheriff.

RELIGION. There is complete freedom of religion, the Evangelical Lutheran Church, however, being the national church, endowed by the State. Its clergy are nominated by the King. All other religions are tolerated. Ecclesiastically Norway is divided into 10 *Bispedømmer* (bishoprics), 91 *Prostier* (provostships or archdeaconries) and 589 *Prestegjeld* (clerical districts). In 1960 there were 134,551 dissenters. The Roman Catholics are under a Bishop at Oslo, a Vicar Apostolic at Trondheim and a Vicar Apostolic at Tromsø.

EDUCATION. In Norway the children normally start their school attendance the year they complete 7. Some children (1·6%) start when they are 6. Norway has now 7 years compulsory school, but from 1959 a 9 years compulsory school has been under gradual introduction, as the municipalities from that year were authorized to extend the school attendance by 2 years by introducing an 'upper stage' in primary schools. According to the 1969 Act on Primary Schools, the 9 years compulsory schooling will have been completed by 1974–75.

On 1 Oct. 1970 the number of Primary Schools and pupils were as follow:

(*a*) Rural municipalities: 2,500, primary schools, lower stage, 239,257 pupils; 431, primary schools, upper stage, 90,961 pupils; 199, continuation schools, 7,462 pupils. (*b*) Urban municipalities: 533, primary schools, lower stage,

144,682 pupils; 146, primary schools, upper stage, 53,292 pupils; 33, continuation schools, 2,133 pupils.

On 1 Oct. 1970 the number of secondary general schools, lower stage, was 260 with 76,949 pupils.

In 1970–71, 6,916 students attended Folk High Schools and 89,899 Vocational Schools (of 7,465 attended Teachers Training Colleges).

There are in Norway 4 universities and 6 institutions equivalent to universities. In the autumn 1970 the total number of students was 30,461. The University of Oslo, founded in 1811, had in 1970, 17,150 students. The University of Bergen, founded in 1948, had in 1970, 5,790 students. The University of Trondheim consists for the time being, of the State Institute of Technology, founded in 1910, and the State College for Teachers, founded in 1925. At each of them the number of students was in the autumn 1970, 3,684 and 1,373 respectively. The University of Tromsø was established in 1968. Regular students have not, however, yet started. The State College of Business Administration and Economics had in 1970, 878 students, the State College of Agriculture, 510 students, the Independent Theological College, 454 students, the State Veterinary College, 207 students, the State College of Sport, 200 students, and the State College of Architecture, 180 students.

In 1970–71, 3,265 Norwegians were studying at foreign universities.

CINEMAS (1970). There were 200 cinemas with a seating capacity of 84,083.

NEWSPAPERS (1970). There were 81 daily newspapers with a combined circulation of 1,487,000.

SOCIAL WELFARE. In 1970 a total of 9,460m. kroner were paid under different social insurance schemes, amounting to 15·8 % of the net national income.

The National Insurance Act of 17 June 1966, which came into force on 1 Jan. 1967, replaces the schemes relating to old age pensions, disability benefits, widows' and mothers' pensions, survivors' benefit for children and rehabilitation aid. Schemes relating to health insurance, unemployment insurance and occupational injury insurance came into force on 1 Jan. 1971.

The following conspectus gives a survey of the schemes established by law. Many municipalities grant additional benefits to old-age and disablement pensions.

Type of scheme	Introduced[1]	Scope	Principal benefits in 1971
Unemployment insurance[2]	1939 (1970)	Nearly all wage-earners	Daily allowance during unemployment kr. 8 to 74 per day; contributions to training and retraining, removal expenses, wage subsidies in the case of relief work

Provisions have been laid down for the integration of more than one benefit, pension, etc., so as to limit the total amount.

JUSTICE. The judicature in Norway is common to both civil and criminal cases. The same judges, who are state officials, preside over both kinds of cases. The participation of lay assessors and jurors, summoned for each case, varies according to the civil or criminal nature of the case.

The ordinary Court of First Instance (*Herreds- og byrett*) is presided over by a judge who in criminal cases is, and in civil cases may be, assisted by 2 lay assessors, chosen by ballot from a panel elected by the district council. In criminal matters the Court of First Instance is generally competent in cases

where the maximum penalty incurred is 5 years imprisonment. Altogether there are 104 Courts of First Instance. There is a Conciliation Council (*Forliksråd*) for each community, consisting of 3 men or women, elected by the district council, before which, as a general rule, civil cases must first be brought for mediation.

The Court of Second Instance (*Lagmannsrett*) is presided over by a judge, together with 2 other judges. In civil matters they may be assisted by lay assessors, ordinarily 4 but in some cases 2, chosen and elected in the same way as mentioned above. In criminal cases the lay element is a jury composed of 10 jurors. This court is a court of appeal in both civil and criminal cases. In addition, as a court of first instance, it takes cognizance of all criminal cases (other than those coming under the *Riksrett*—the court for impeachments) which do not come under the competence of the Court of First Instance. The kingdom is divided into 5 districts (*Lagdømmer*) for the purpose of the Courts of Second Instance.

The Supreme Court (*Høyesterett*) is the ultimate court of appeal. In criminal cases the competence of the court, however, is limited to the complaints against the application of laws, the measuring out of the penalty and the trial of the case of the subordinate courts. The Supreme Court consists of a president and 17 judges. In each single case the court consists of 5 judges. Criminal procedure is at present under revision.

All serious offences are prosecuted by the State. The public prosecution is led by a general prosecutor (*riksadvokat*) and there are 15 district prosecutors (*statsadvokater*). Counsel for the defence is, generally, paid by the State.

There are 4 central penal and correctional institutions for delinquents: inmates (1 July 1971), 307 males and 27 females. There are also 40 local prisons in which were detained (1 July 1971) 1,331 persons.

FINANCE. Currency. By a treaty signed 16 Oct. 1875 Norway adopted the same monetary system as Sweden and Denmark. The Norwegian *krone*, of 100 *øre*, is of the value of 1*s.* at par, or about 17 kroner to £1 sterling. National bank-notes of 10, 50, 100, 500 and 1,000 kroner are legal means of payment. On 27 Sept. 1931 the gold standard exchange clause was suspended and there was placed an embargo on gold.

On 30 June 1971 the nominal value of the coin in circulation was 304m. kroner; notes in circulation, 7,479m. kroner.

Budget. Current revenue and expenditure for years ending 31 Dec. (in 1,000 kroner):

DEFENCE. Service is universal and compulsory, liability in peace-time commencing at the age of 20 and continuing till the age of 44. The training period in the Army is 12 months, in the Navy and Air Force, 15 months.

Army. The Army is organized in 5 regional commands, comprising all land forces. The regional commands again are divided into a number of land defence districts. Major units are organized mainly in Regimental Combat Teams. Peace establishment includes 1 RCT, a number of independent units and supporting elements as well as training units. Total peace-time strength, 19,000.

Navy. The Navy is organized in 5 regional commands, and consists of the coastal batteries and the following naval units: 15 coastal submarines, 5 frigates, 2 patrol vessels, 10 coastal minesweepers, 26 missile torpedo boats, 20 missile

gunboats, 4 coastal minelayers, 1 mineplanter, 1 training ship, 1 depot ship, the royal yacht *Norge* and 6 fishery protection vessels.

Total personnel (1971), 6,400 officers and ratings.

Air Force. The Royal Norwegian Air Force is organized in 2 regional commands. It operates 6 squadrons of F-5 supersonic fighter-bombers (including 1 squadron equipped with RF-5A reconnaissance fighters), 1 squadron of F-104G Starfighters, 1 maritime patrol squadron of P-3B Orions, 1 squadron of C-130H Hercules and C-47 transports, and a number of UH-1B Iroquois helicopter, communications and training units, as well as 4 Nike surface-to-air missile batteries and several light anti-aircraft artillery units. Ten Westland Sea King helicopters are used for search and rescue duties. Total strength is approximately 9,000 officers and men.

Home Guard. The Home Guard is organized in small units equipped and trained for special tasks in their home area. Compulsory service after basic training is 50 hours a year. The total strength is approximately 70,000.

PRODUCTION. The following table sets forth the estimated value of net production, at factor cost, by industries, in 1m. kroner:

[1] Provisional

The distribution of the population according to professions in 1960, showed 546,770 (15·2%) dependent on agriculture, forestry and gardening; 1,247,086 (34·7%) on mining, manufacturing, building, etc.; 370,735 (10·3%) on commerce; 366,994 (10·2%) on transportation; 141,400 (3·9%) on fishery, sealing and whaling; 473,590 (13·2%) on public administration, liberal professions and services.

AGRICULTURE. Norway is a barren and mountainous country. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fiords and lakes. Large, continuous tracts fit for cultivation do not exist. Of the total area, 75·9% is unproductive, 21% productive forest and 3·1% under cultivation.

Livestock, 20 June 1970: 35,177 horses, 943,002 cattle (424,257 milch cows), 1,752,910 sheep, 84,314 goats, 641,746 pigs, 3,745,900 poultry.

Fur production in 1970–71 was as follows (1969–70 in brackets): Silver fox, 1,000 (1,300); blue fox, 136,000 (155,000); mink, 2·27m. (2·24m.).

FORESTRY. The forests are one of the chief natural sources of wealth. The total area covered with forests is estimated at 83,300 sq. km, of which 64,800 sq. km is productive forest. 81% of the productive forest area consisted of conifers and 19% of broadleaves. Forests in public ownership cover 8,970 sq. km of productive forests and 5,820 sq. km of unproductive forests. Besides the home consumption of timber and fuel wood, the essential part of the cut is consumed as raw material in the paper industry. The annual natural increase is about 13·2m. cu. metres. In 1969–70, 7·5m. cu. metres were cut for production of pulp and other industrial wood products. In 1970 the export of timber products was 15% of the total exports.

FISHERIES. The number of persons in 1969 engaged in cod fisheries was 20,071; in winter herring fisheries, 1,973; the total number of persons engaged in the fisheries was 44,972, of whom 11,699 had another chief occupation. The number of fishing vessels with motor was 36,402 in 1969; of these, 27,521 were open boats.

The value of sea fisheries in kroner in 1970 was: Cod, 404m.; mackerel, 152m.; coal-fish (saithe), 88m.; haddock, 44m.; herring, 162m.; dogfish, 17m.; deep-water prawn, 42m. The catch totalled in 1970, 2·7m. metric tons, valued at 1,403m. kroner.

Whale oil and sperm oil (in 1,000 bbls): 109 in 1967, 36 in 1968, 6 in 1969, 5 in 1970. Total value of oil and by-products was, in 1967, 55m.; 1968, 22m.; 1969, 3m.; 1970, 3m. kroner.

The Norwegian fishery limit is 12 miles from 1 Sept 1961, for the coast east of Lindesnes from 1 July 1967.

MANUFACTURES. Industry is chiefly based on raw materials produced within the country (wood, fish, etc.) and on water power, of which the country possesses a large amount. The pulp and paper industry, the canning industry and the chemical and basic metal industries are the most important export manufactures. In the following table are given figures for industrial establishments in 1969, excluding one-man shops. Electrical plants, construction and building industry are not included. The values are given in 1,000 kroner.

ELECTRICITY. Norway is a large producer of hydro-electric energy. The potential total hydro-electric power, for a whole year at regulated minimum water flow and by 82% efficiency, is estimated at 15m. kw. or about 131,000m. kwh. annually. About 60% of the water power suitable for development consists of waterfalls with a height of at least 900 ft.

By the end of 1969, 6·5m. kw. (about 43%) of the available water power had been developed for production of electricity At the same time the capacity of the installations for production of thermo-electric energy amounted to only 140,000 kw. As at 31 Dec. 1969 the total capacity of generators (of hydro-electric plants) was 19m. kva.

In 1969 the total production of electricity amounted to 57,021m. kwh., of which 99·6% was produced by hydro-electric plants.

Most of the electricity is used for industrial purposes, especially by the chemical and basic metal industries for production of nitrate of calcium and other nitrogen products, carbide, ferrosilicon and other ferro-alloys, aluminium and zinc. The paper and pulp industries are also big consumers of electricity.

SHIPPING. The total registered mercantile marine on 1 Jan. 1971 was 2,177 vessels, 19·71m. gross tons (steam and motor vessels above 100 gross tons). These figures do not include fishing and catching boats, floating whaling factories, tugs, salvage vessels, ice-breakers and similar special types of vessel, totalling 744 vessels of 252,000 gross tons.

Goods (in 1,000 metric tons) discharged, 19,144; loaded, 35,362, of which 19,115 was Swedish iron ore shipped from Narvik.

ROADS. On 1 Jan. 1971 the length of the public roads (including roads in towns) was 72,261 km. Of these, 53,892 km were main roads; 12,236 km had some kind of paving, mostly bituminous treatment, 9,490 km were oil-gravel roads, the rest being gravel-surfaced.

Number of registered motor vehicles (31 Dec. 1970) was 1,116,528, including 747,237 passenger cars (including taxis), 71,436 lorries, 73,299 vans, 7,485 buses, 3,807 special vehicles, 170,068 motor cycles and mopeds. The scheduled bus and lorry services in 1969 drove 3,707m. passenger-km and 219m. net ton-km.

RAILWAYS. The length of state railways on 31 Dec. 1970 was 4,242 km; of private companies, 52 km. On 2,440 km of state and 16 km of private railways electric power is installed. Total receipts of the state railways and road traffic in 1970 were 849m. kroner; total expenses (excluding interest on capital), 955m. kroner. The state railways carried 29·8m. metric tons of freight (of which 19·9m. was iron ore on the Ofoten railway) and 29·2m. passengers.

AVIATION. Det Norske Luftfartselskap (DNL) started its post-war activities on 1 April 1946. On 1 Aug. 1946 DNL, together with DDL (Danish Airlines) and ABA/SILA (Swedish Airlines), formed the 'Scandinavian Airlines System'—SAS. The 3 companies remained independent units, but all services were co-ordinated. In 1951 a new agreement was signed (retroactive from 1 Oct. 1950)

according to which the 3 national companies became holding partners in a new organization which took over the entire operational system. Denmark and Norway hold each two-sevenths and Sweden three-sevenths of the capital, but they have joint responsibility towards third parties.

In the autumn of 1970 SAS had a fleet of 71 planes (including 61 jet planes). Length of route network, about 205,000 km.

Norwegian scheduled air services:

TELECOMMUNICATIONS. Number of telephones on 31 Dec. 1970 was 1,144,795 (29 per 100 of population). Receipts, 1,011·4m. kroner; expenses, 959·9m. kroner (interest on capital included).

BANKING. The Norges Bank is a joint-stock bank; in 1949 the state acquired all the shares hitherto privately owned. The bank is governed by laws enacted by the State, and its directors are elected by the Storting, except the president and vice-president of the head office, who are nominated by the King. It is the only bank of issue.

At the end of 1970 there were 40 private joint-stock banks. Their total amount of capital and funds was 1,695m. kroner (capital 867m., funds 828m.). Deposits amounted to 16,572m. kroner, of which 5,048m. kroner were at call and notice, and 11,524m. kroner on time.

The number of savings banks at the end of 1970 was 493. The total amount of the funds of the savings banks amounted to 738m. kroner, and total deposits 17,321m. kroner, of which 2,753m. kroner were at call and notice and 14,568m. kroner on time.

WEIGHTS AND MEASURES. The metric system of weights and measures has been obligatory since 1875.

SVALBARD

An archipelago situated between 10° and 35° E. long. and between 74° and 81° N. lat. Total area, 62,000 sq. km (24,000 sq. miles).

The main islands of the archipelago are Spitsbergen (formerly called Vestspitsbergen), Nordaustlandet, Edgeøya, Barentsøya, Prins Karls Forland, Bjørnøya, Hopen, Kong Karls Land, Kvitøya, and many small islands. The arctic climate is tempered by mild winds from the Atlantic.

The archipelago was probably discovered by Norsemen in 1194 and rediscovered by the Dutch navigator Barents in 1596. In the 17th century the very lucrative whale-hunting caused rival Dutch, British and Danish–Norwegian claims to sovereignty and quarrels about the hunting-places. But when in the 18th century the whale-hunting ended, the question of the sovereignty of Svalbard lost its actuality; it was again raised in the 20th century, owing to the discovery and exploitation of coalfields. By a treaty, signed on 9 Feb. 1920 in Paris, Norway's sovereignty over the archipelago was recognized. On 14 Aug. 1925 the archipelago was officially incorporated in Norway.

Coal is the principal product. Of the 3 Norwegian and 3 Soviet mining camps, only 1 Norwegian and 2 Soviet camps are operating. A second Norwegian mining camp, Sveagruva, is being prepared for re-opening. In 1970–71, 2,822 persons (989 in Norwegian and 1,833 in Soviet establishments) wintered in Svalbard. In 1970, 483,907 metric tons of coal were exported from the Norwegian and 391,400 metric tons from the Soviet mines.

Norwegian and foreign companies have been prospecting for oil. So far only one deep drilling has been made: insignificant amounts of gas were found.

The following Norwegian stations are in operation in Svalbard: 3 meteorological and coast radio stations (Bjørnøya, since 1920; Hopen, since 1945, and Isfjord Radio, since 1934); 1 telemetry station furnishing the European Space Research Organization (ESRO) with satellite data (Ny-Ålesund, since 1967); 1 all-year research station (Ny-Ålesund, since 1968).

JAN MAYEN

This bleak, desolate and mountainous island of volcanic origin is situated 71° N. lat. and 8° 30′ W. long., 300 miles NNE of Iceland. The total area is 380 sq. km (147 sq. miles). Beerenberg, its highest peak, reaches a height of 2,277 metres. Volcanic activity, which has been dormant, possibly for centuries, or even millennia, was reactivated in Sept. 1970.

The island was possibly discovered by Henry Hudson in 1608, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name derives from the Dutch whaling captain Jan Jacobsz May, who indisputably discovered the island in 1614. It was uninhabited, but occasionally visited by seal hunters and trappers, until 1921 when Norway established a radio and meteorological station. On 8 May 1929 Jan Mayen was officially proclaimed as incorporated in the Kingdom of Norway. Its relation to Norway was finally settled by law of 27 Feb. 1930. A LORAN station (1959), a landing strip for aircraft (1963); and a CONSOL station (1968) have been built.

BOUVET ISLAND
Bouvetøya

This uninhabited island, situated 54° 26′ S. lat. and 3° 24′ E. long., was discovered in 1739 by a French naval officer, Jean Baptiste Lozier Bouvet, but no flag was hoisted till, in 1825, Capt. Norris raised the Union Jack. In 1928 Great Britain waived its claim to the island in favour of Norway, which in Dec. 1927 had occupied it. A law of 27 Feb. 1930 declared Bouvetøya a Norwegian dependency. The area is 48 sq. km (19 sq. miles).

PETER I ISLAND
Peter I øy

This uninhabited island, situated 68° 48′ S. lat. and 90° 35′ W. long., was sighted in 1821 by the Russian explorer, Admiral von Bellingshausen. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag. On 1 May 1931 Peter I Island was placed under Norwegian sovereignty, and on 24 March 1933 it was incorporated in Norway as a dependency. The area is 180 sq. km (69 sq. miles).

QUEEN MAUD LAND
Dronning Maud Land

On 14 Jan. 1939 the Norwegian Cabinet placed that part of the Antarctic Continent from the border of Falkland Islands dependencies in the west to the border of the Australian Antarctic Dependency in the east (between 20° W. and 45° E.)

under Norwegian sovereignty. The territory had been explored only by Norwegians and hitherto been ownerless. Since 1949 expeditions from various countries have explored the area. In 1957 Dronning Maud Land was given the status of a Norwegian dependency.

OMAN

Sultanat Oman

The Sultanate of Oman is an independent sovereign state, situated in south-east Arabia. It was known as the Sultanate of Muscat and Oman until 1970. Its seaboard is nearly 1,000 miles long and extends from the Ras al Khaimah Shaikdom near Tibat on the east side of the Musandum Peninsula to Ras Dharbat Ali, which marks the boundary between Oman and the territory of the People's Republic of South Yemen. A small strip of the coast on the east side of the Musandum Peninsula from Dibah to Khor Kalba is administered by 2 shaikhs of Trucial Oman, independent of the Sultan. The sultanate extends inland to the borders of the Rub' al Khali ('Empty Quarter'). Physically Oman consists of three divisions—a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles near Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns, where the hills descend abruptly into the sea. The mountain range reaches its greatest height (of over 9,000 ft) in the Jebel Akdhar region. The hills are for the most part barren, but in the high area round Jebel Akdhar they are green and there is considerable cultivation. The plateau has an average height of 1,000 ft. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain, known as the Batinah, is fertile and prosperous. The date gardens extend for over 150 miles. The Batinah dates are famous for their flavour; they ripen in the first half of July, well before the Basra dates. The coastline between the capital, Muscat, and the province of Dhofar is barren. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar-cane is grown and cattle are raised. Its principal town is Salalah on the coast, while Murbat is the port.

In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development were the water supply more certain. The average annual crop of dates is 6,000 tons, most of which is exported to India. Camels are bred in large numbers by the inland tribes. There are no industries of any importance.

AREA AND POPULATION. The area has been estimated at about 82,000 sq. miles (212,000 sq. km) and the population at 750,000, chiefly Arabs; of these, some 40,000 live in Dhofar. The town of Muscat is the capital (population, 6,000). Formerly of some commercial importance, it has now lost most of its trade to the adjacent town of Matrah (population, 14,000), which is the starting point for the trade routes into the interior. The population of both towns consists of pure Arabs, Indians, Pakistanis and Negroes; numerous merchants are Khojas (from Sind and Kutch) and Hindus (mostly from Gujarat and Bombay). Other ports are Sohar, Khaburah and Sur; none, however, affords shelter from bad weather.

The port of Gwadur and a small tract of country on the Balúchistán coast of the Gulf of Oman were handed over to Pakistan on 8 Sept. 1958.

The **Kuria Muria** islands were ceded to the United Kingdom in 1854 by the Sultan of Muscat and Oman for the purpose of a cable station. On 30 Nov. 1967 the islands were retroceded to the Sultan of Muscat and Oman, in accordance with the wishes of the population.

Ruler: The present Sultan is Qabus bin Said (born Dec. 1940). He took over from his father Said bin Taimur, on 24 July 1970 in a Palace *coup*.

National flag: Red.

The Treaty of Friendship, Commerce and Navigation between Britain and the Sultan, signed on 20 Dec. 1951, reaffirmed the close ties which have existed between the British Government and the Sultanate of Oman for over a century and a half.

FINANCE. Currency. The *Rial Saidi* which is equal to £1 sterling was introduced into the Sultanate on 7 May 1970. It is divided into *baizas*. There are notes of 100, 250 and 500 baiza and 1, 5 and 10 Rial Saidi and coins of 2, 5, 10, 20, 50 and 100 baiza.

Budget. Annual revenue from customs duties is about £1m., the majority of revenue coming from oil.

DEFENCE. The air force, formed in 1959, has 10 BAC 167 Strikemaster light jet attack aircraft, 2 Viscount turboprop transports, 2 Caribou, 8 Skyvans and 3 Beaver light transports, and 12 Agusta-Bell 205 and JetRanger helicopters for security duties.

The army is of approximately brigade strength.

DEVELOPMENT. Several public buildings have been completed or are in the course of construction including a post office, a secretariat, a girls' school, flats for government staff and hospitals at Rui and Taua'am. The fresh water pipeline from Sib to Muscat (over 33 miles) has been completed. Work on the construction of a new port at Muttrah has been started and a survey for 242 miles of road to Sohar along the Batinah coast and to Nizwa in the interior is being undertaken. The Sultan has put forward some of his own plans for future development which include agricultural expansion, water resources throughout the country to be surveyed and developed, a survey of the radio and television requirements of the country to be carried out, a public transport system to be established and roads improved.

OIL. In 1937 a 75-year oil concession was granted to Petroleum Development (Oman) Ltd (a subsidiary of I.P.C.). A concession covering Dhofar was granted in 1953 to Dhofar Cities Service Petroleum Corporation; this was transferred to MECOM, who abandoned it in 1967. In 1969 the Dhofar concession was taken up by P.D. (O.) Ltd.

In 1964 Petroleum Development (Oman) Ltd (now a subsidiary of Royal Dutch Shell, C.F.P. and Partex) announced that drilling had proved sufficient reserves to go into commercial production. The export of crude oil started in 1967, at a forecast initial rate of 7m. tons per annum; by the end of 1969 the rate was 350,000 bbls per day, equivalent to 17m. tons in a full year. The route is by a pipeline through the Sumail gap to the terminal at Mina al Fahl a few miles west of Muscat town. The P.D.O. concession covers Oman and its territorial waters; a German group, including Wintershall, has the Gulf of Oman off-shore concession and begun drilling off the coast near Sohar.

COMMERCE. Trade is mainly with UK, India, Pakistan and the Persian Gulf States. In the calendar year 1969 imports amounted to £5,619,167 (1968: £4,044,761), excluding duty-free imports for government and oil company use. The overall import figure would be about £12m. Chief imports were rice, wheat flour, sugar, cement, vehicles and accessories, cigarettes, coffee, cotton piece-goods and building materials. The main countries exporting to Oman in 1969 were UK, India, Pakistan, Australia, Singapore and Thailand.

Exports, excluding oil, consist of dates, dried limes, dried fish, tobacco leaf and frankincense, valued at about £800,000 annually.

Trade with UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	16	1,075	11,086	10,368	7,813	4,021
Exports and re-exports from UK	3,127	2,348	2,895	5,347	7,791	13,087

SHIPPING. In 1969, 182 ships called at Muscat and 46 at Mina al Fahal. In addition, 218 tankers called at Mina al Fahl and took on 119·2m. bbls of crude oil.

ROADS. The road Muscat–Matrah continues as a motorable track for 260 miles up the coast to Khor Fakkan *via* Kalba at the far end of the Batinah. Hajar,

Boshar and Qariyat are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah, *via* Shinas and the Wadi al Khor to Sharjah, and up various *wadis* to the interior.

AVIATION. Gulf Aviation run a 4 times a week service from Bahrain to Muscat *via* Doha, and Dubai. The airport at Bait al Falaj is 5 miles from Muscat.

POST. A Sultanate post office operates in Muscat. Cable and Wireless Ltd maintain a telegraph office at Muscat and an automatic telephone system (1,040 telephones) which includes Matrah and Saeh-el-Maleh, the oil company terminal. Telephone and telex connexions with Bahrain serves to establish communication with other parts of the world.

WEIGHTS AND MEASURES. The weights in use are 1 *kiyas* = the weight of 6 dollars of 5·9375 oz.; 24 kiyas = 1 Muscat *maund*; 10 maunds = 1 *farásala*; 200 maunds = 1 *bahár*. Rice is sold by the bag; other cereals by the following measures: 40 *palis* = 1 *ferrah*; 20 ferrah = 1 *khandi*.

British Ambassador: D. F. Hawley, CMG, MBE.
Indian Consul-General: M. L. Suri.
USA Consul: Lee F. Dinsmore (resident in Dhahran).

There are also West German and Netherlands Consuls-General, resident in Kuwait and Baghdad respectively.

PANAMA

República de Panamá

HISTORY. A revolution, inspired by the USA, led to the separation of Panama from the United States of Colombia and the declaration of its independence on 3 Nov. 1903. The *de facto* Government was on 13 Nov. recognized by the USA, and soon afterwards by the other Powers. In 1914 Colombia agreed to recognize the independence of Panama. This treaty was ratified by the USA and Colombia in 1921, and on 8 May 1924 diplomatic relations between Colombia and Panama were established.

For the treaties regulating the relations between Panama and the United States *see* p. 1222.

CONSTITUTION AND GOVERNMENT. The new constitution of 1 March 1946 continued the existing provisions for a National Assembly of 42 members. The deputies' mandate was for 4 years. The Assembly met annually on 1 Oct. The term of the President of the Republic, elected by direct vote, was 4 years, and he was not eligible for the two succeeding terms. Women had equal rights with men.

There were normally 2 vice-presidents, elected every 4 years by direct popular vote, and a cabinet of 7 ministers nominated by the President, who might attend and address the legislature but could not vote. The Comptroller General was elected by the National Assembly for 4 years.

On 11 October 1968, however, the newly elected President, Dr Arnulfo Arias, was deposed after only 11 days in office, in a 'coup' conducted by the National Guard. The National Assembly was suspended and a provisional government set up consisting of a two-man military Junta and a civilian cabinet. In Dec. 1969 the military members of the Junta resigned and were replaced by civilians.

Commander-in-Chief of the National Guard: Brig.-Gen. Omar Torrijos.
President of the Junta: Demetrio Lakas.
Member of the Junta: Arturo Sucre.
Minister for Foreign Affairs: Juan Antonio Tack.

The official language is Spanish.

National flag: Rectangle of 4 quarters: white with blue star, blue, white with red star, red.
National anthem: Alcanzamos por fin la victoria (words by J. de la Ossa; tune by Santos Jorge, 1903).

AREA AND POPULATION. Extreme length is about 480 miles; breadth between 37 and 110 miles; coastline, 426 miles on the Atlantic and 767 on the Pacific; total area (excluding the Canal Zone) is 29,201 sq. miles (75,650 sq. km); population according to the census of 10 May 1970 was 1,428,082. No recent figures are available of the racial composition of the population; the 1940 census gave 12% white, 14·5% Negro, 72% mixed and 1·5% other races. There are approximately 10,000 British subjects, chiefly coloured people from the West Indies.

The capital is Panama City, on the Pacific coast; population, census 1970, 418,000. There are 9 provinces (with populations, 1970) as follows (the capitals in brackets): Bocas del Toro (Bocas del Toro), 40,800; Chiriquí (David), 236,300; Coclé (Penonomé), 117,900; Colón (Colón), 134,300; Los Santos (Las Tablas), 72,200; Herrera (Chitré), 72,500; Darién (La Palma), 22,600; Panama (Panama City), 576,900; Veraguas (Santiago), 151,900. The port of Colón on the Atlantic coast had 95,300. Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, Puerto Mutis and Puerto Armuelles; on the Atlantic, Bocas del Toro, Almirante, Portobello, Mandinga and Permé.

Birth rate, 1969, was 37·9 per 1,000 population; death rate, 7·3; marriage rate, 24·1; infantile death rate, 40·5 per 1,000 live births. The figures exclude the tribal Indians.

RELIGION. The 1950 census showed that 95% of the population was Roman Catholic and 5% Protestant. There is freedom of religious worship and separation of Church and State. Clergymen may teach in the schools but may not hold public office.

EDUCATION. Elementary education is compulsory for all children from 7 to 15 years of age, with an estimated 238,027 students in schools throughout the Republic in 1969; 1,613 official primary schools had 223,645 pupils and 75 private ones, 14,382; 48 official secondary schools had 45,118 pupils, and 115 private ones, 24,786. The University of Panama at Panama City, inaugurated on 7 Oct. 1935, had a total enrolment (1969) of 6,527 students in the schools of law, science and other professional subjects; the university was granted autonomy on 28 Sept. 1946. Up to the academic year 1956–57 the university was a centre of evening studies (except for the faculty of medicine); since 1956–57 all faculties hold day classes as well. A new site, called University City, was inaugurated in June 1950. The Catholic university Sta. Maria La Antigua, inaugurated on 27 May 1965, had 725 students in 1969.

The 1970 census showed that 20·6% of the population over 10 years old were illiterate, excluding the tribal Indians (compared with 25·2% in 1950).

CINEMAS. There were, in Dec. 1969, 82 cinemas, of which 40 were in the district of Panama. All films must have Spanish subtitles.

NEWSPAPERS. Of the 5 daily newspapers published in the capital, 1 has both morning and afternoon editions and 2 have separate English editions. There is also an English weekly with a Spanish supplement, catering for the large British West Indian community in Panama.

JUSTICE. The death penalty does not exist. The Supreme Court consists of 9 justices appointed by the executive with the approval of the National Assembly, one every 2 years to serve 18 years.

FINANCE. Currency. The monetary unit is the *balboa*, which is of the same size and fineness as the US silver dollar but is maintained equivalent to the gold dollar. Other coins whose metallic content is required by law to correspond exactly to that of similar US coins are the half-balboa (equal to 50 cents US); the quarter and tenth of a balboa piece; a cupro-nickel coin of 5 cents, and a copper coin of 1 cent. US coinage is also legal tender. Volume of the currency has not been disclosed since 31 Dec. 1950, when it stood at 1·5m.; 5·1m. balboas of Panamanian coin had been minted up to 31 Dec. 1963. The only paper currency used is that of the USA.

Budget. The current revenue budget for calendar years since 1968 balanced as follows (in balboas; 1 balboa = US$1): 1968, 119m.; 1969, 133m.; 1970, 160m.; 1971, 186m. Financial benefits accruing to the Republic from the Canal Zone in 1969 were estimated to have been more than US$160m., including the annual rent of US$1·93m. Panamanian citizens working in the Canal Zone are now subject to taxation by Panama.

The funded internal debt on 31 Dec. 1969 amounted to 134,019,100 balboas, and the external debt to 71,977,500 balboas.

DEFENCE. The *Guardia Nacional* is the only military type force with police as well as military and para-military functions. It has a strength of about 6,000 and includes a coastguard section and an air wing.

AGRICULTURE. Of the whole area (1961 census), only 23·9% is developed, 4·3% is cultivated, 10·6% is natural or artificial pasture land and 9% is fallow. Of the remainder only a small part is cultivated, though the land is rich in resources. About 60% of the country's food requirements are imported. In Jan. 1953 the Institute for Economic Development, a semi-governmental organization, was formed with large powers, *e.g.*, to buy up leading crops at fixed prices and to loan machinery to farmers. Of the land under cultivation, 18% is owned and 59% is usufructuary. The most important export product is bananas, grown by an affiliate of the United Fruit Company and shipped to the USA. Exports, 1969, 21·2m. stems. Most important food crop, for home consumption, is rice, grown on 80% of the farms; Panama's *per capita* consumption is very high. Output of rough rice from 125,700 hectares, was 3,643,000 quintals in 1969–70. Other products are maize (102,500 hectares, yielding 1·92m. quintals in 1969–70), cocoa, abacá fibres, abacá seeds, coffee and coconuts. Beer, whisky, rum, 'seco', anice and gin are produced. Coffee is grown in the province of Chiriquí, near the Costa Rican frontier; total production in 1968–69 was 99,300 quintals, and small amounts were exported to West Germany and USA. The country has great timber resources, notably mahogany. According to the livestock estimate of July 1969 there were 1,156,800 cattle, 195,900 pigs and 2,941,000 poultry. Hides are among minor articles of export.

ENERGY. Production of electric energy, 1969, amounted to 549,508 Mw (Panama City and Colón). Gas production was 695,027 cu. ft.

INDUSTRY. Local industries include cigarettes, clothing, food processing, shoes, soap, cement factories; foreign firms are being encouraged to establish industries, and a petrol refinery is operating in Colón. In 1968 a United Nations mineral survey team discovered what may prove to be valuable copper deposits in the Colón province.

TOURISM. In 1970, 305,447 foreigners visited Panama.

COMMERCE. The imports and exports (including re-exports), for 6 calendar years are as follows (in 1,000 balboas; 1 balboa = US$1):

	Imports	Exports		Imports	Exports
1964	165,390	60,988	1967	229,273	86,355
1965	189,620	70,169	1968	243,460	95,334
1966	214,530	79,744	1969	267,664	110,633

The USA have the right to import into the Canal Zone supplies of all descriptions required for canal construction, maintenance and protection and for the use of their employees, free of all taxes.

The huge adverse trade balance is mainly with the USA and is due to the heavy import of consumer goods for sale to the Canal Zone employees and to the big transient population. In 1969 the USA furnished 28·1% of Panama's imports and took 64·8% of her exports. The UK was the sixth largest supplier.

A Free Zone exists at Colón for the storage, processing or sale of goods in transit.

Chief exports (virtually all to the USA) in 1969 (in 1,000 balboas or dollars) were: Bananas, 61,241; fresh shrimps, 9,731; cacao, 369; coffee, 1,101; sugar (cane and beet), 5,444; fishmeal, 276; petroleum products, 24,055.

Chief imports, 1969, were valued (in 1m. balboas f.o.b.): Fuel, minerals and similar, 60·6; food, 20·7; chemicals, 26·7; manufactured goods, 63·4; machinery and transport material, 59·3.

Total trade between Panama (including Canal Zone) and UK (British Board of Trade returns, in £1,000 sterling):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	2,070	2,451	2,699	1,839	3,135
Exports and re-exports from UK[1]	6,667	6,113	7,746	8,765	9,414

[1] Including new ships built for foreign owners and registered in Panama.

SHIPPING. Ships under Panamanian registry on 31 Dec. 1969 numbered 2,082 of 4,887,478 tons; most of these ships elect Panamanian registry because fees are low and labour laws lenient. All the international maritime traffic for Colón and Panama runs through the Canal Zone ports of Cristóbal and Balboa; Almirante is used for both the provincial and international trade.

RAILWAYS. The Panama Railroad (owned by the Panama Canal Company), which connects Ancón on the Pacific with Cristóbal on the Atlantic, is the principal railway. It is 47·61 miles long and lies entirely within the Canal Zone territory. As most vessels unload their cargo at Cristóbal (Colón), on the Atlantic side, the greater portion of the merchandise destined for Panama City is brought overland by the Panama Railroad. Between David and La Concepción there is a line 18 miles long, which has now been extended to the port of Puerto Armuelles. From Almirante and Guabito (property of the United Fruit Company), a third railway runs to Suretka on the Costa Rican border (51 miles).

The Chiriqui National Railroad operates 169 km with a terminus at Armuelles.

ROADS. Panama had on 31 Dec. 1969, 6,717·2 km of roads. The road from Panama City westward to the cities of David and Concepción, with several branches, is part of the Pan-American Highway. From Concepción it continues towards the frontier to link up with Costa Rican road system. Work is expected to begin early in 1972 on the extension of the highway eastwards from Panama City through Darien to Colombia. A concrete highway, maintained by the USA, connects Panama City and Colón.

On 31 Dec. 1969 registered motor vehicles, private and commercial, numbered 55,205; this excludes vehicles owned by Government departments, and in the Canal Zone.

AVIATION. Commercial aviation has developed rapidly. PANAM, Braniff Airways, KLM and other international companies operate at Tocumen Airport, 17 miles from Panama City. The Compañía Panameña de Aviación (COPA) and (RAPSA) provide a local service between Panama City and the provincial towns and, internationally, to other points in Central America. In 1970 a total of 216,285 passengers arrived by air, of whom 33,460 were in transit.

POST. There are telegraph cables from Panama to North America and Central and South American ports, and from Colón to the USA and Europe. There is also inter-continental communication by satellite. There are 50 licensed commercial broadcasting stations, nearly all operated by private companies, one of which functions in the Canal Zone. There are 3 television stations, one of them run by the US Army in the Canal Zone. Number of telephones in Dec. 1969 was 61,459 in Panama City and 7,730 in Colón.

BANKING. There is no statutory central bank. The Government accounts are handled through the *Banco Nacional de Panama*. The number of commercial banks rose from 9 in 1964 to 20 by Dec. 1970. Leading banks are the First National City Bank and the Chase Manhattan Bank of New York. The Bank of London and Montreal opened a branch in Panama City in June 1966. Other foreign-owned banks include the Bank of America, as well as Colombian, Swiss, West German, French and Spanish banks.

WEIGHTS AND MEASURES. English weights and measures are in general use; those of the metric system are also used.

THE PANAMA CANAL AND THE CANAL ZONE

On 18 Nov. 1903 a treaty between the USA and the Republic of Panama was signed making it possible for the US to build and operate a canal connecting the Atlantic and Pacific oceans through the Isthmus of Panama. The treaty granted the US in perpetuity the use, occupation and control of a Canal Zone, approximately 10 miles wide, in which the US would possess full sovereign rights 'to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority'. In return the US guaranteed the independence of the Republic and agreed to pay the Republic $10m. and an annuity of $250,000. The US purchased the French rights and properties—the French had been labouring from 1879 to 1899 in an effort to build the Canal—for $40m. and in addition, paid private landholders within what would be the Canal Zone a mutually agreeable price for their properties.

The treaty of 1936 increased the annuity to $430,000 and, as desired by Panama, withdrew the guarantee of independence. In 1955 the annuity was increased to $1·93m., and the Panama Canal Company turned over to the Republic the Panama City railroad yards and other properties valued at $22m. At the end of 1962 the US completed the construction of a high-level bridge over the Pacific entrance of the Canal, and the flags of Panama and the US were flown jointly over areas of the Canal Zone under civilian authority.

Governor of the Canal Zone and President of the Panama Canal Company: Maj.-Gen. David S. Parker, US Army.
Lieut.-Governor and Vice-President: Col. Charles R. Clark,, US Army.

The Canal Zone Government is responsible for such governmental functions as police and fire protection, postal service, and schools and hospital services (such as the Gorgas hospital, greatly enlarged in 1964). The Panama Canal

Company is concerned primarily with the actual operation of the Canal. The Panama Canal has not increased tolls since 1914 and has operated at a minimal net margin averaging about $4m. per year, after paying its own expenses as well as reimbursing the US Treasury for the net cost of the Canal Zone Government and paying interest on the $490m. net investment of the US Government in the Canal enterprise.

The area of the Canal Zone, including land and water, is 647·29 sq miles (1,676·3 sq. km). The water area of the zone, including the water area within the 3-mile limit from the Atlantic and Pacific ends, is 274·97 sq. miles.

The total civilian and military population of the Canal Zone (July 1970) was 50,344, of whom 39,084 are US citizens. The total full-time force employed by the Panama Canal Company and the Canal Zone Government on 30 June 1971 numbered 4,193 US citizens and 11,731 others, mostly Panamanian citizens.

There are 144·4 miles of improved streets and highways in the zone, exclusive of those within Armed Forces reservations. Motor vehicles number over 18,000.

The Canal was opened to commerce on 15 Aug. 1914. It is 85 ft above sea-level. It is 51·2 statute miles in length from deep water in the Caribbean Sea to deep water in the Pacific ocean, and 36 miles from shore to shore. The channel ranges in bottom-width from 300 to 1,000 ft; the widening of Gaillard Cut to a minimum width of 500 ft was completed in 1969. The average time of a vessel in Canal waters is 15 hours, 8 of which are in transit through the Canal proper. A map showing the Panama, Suez and Kiel canals on the same scale will be found in THE STATESMAN'S YEAR-BOOK, 1959.

Particulars of the ocean-going commercial traffic through the canal are given as follows (vessels of 300 tons Panama Canal net and 500 displacement tons and over; cargo in long tons):

Fiscal year ending 30 June	North-bound (Pacific to Atlantic)		South-bound (Atlantic to Pacific)		Total		Tolls levied (in $)
	Vessels	*Cargo*	*Vessels*	*Cargo*	*Vessels*	*Cargo*	
1968	6,588	35,190,046	6,611	61,360,119	13,199	96,550,165	83,907,063
1969	6,610	36,640,325	6,536	64,732,419	13,146	101,372,744	87,423,430
1970	6,664	40,595,595	6,994	73,661,665	13,658	114,257,260	94,654,468
1971	6,834	44,282,852	7,186	74,344,054	14,020	118,626,906	97,380,036

In the fiscal year ending 30 June 1971, of the 14,020 toll-paying ships which passed through the canal 1,587 were Liberian; 1,558 British; 1,462 Japanese; 1,368 US; 1,202 Norwegian; 1,069 West German; 948 Panamanian; 629 Greek; 494 Netherlands; 479 Swedish, and 454 Danish.

PARAGUAY

República del Paraguay

HISTORY. The Republic of Paraguay gained its independence from Spain on 14 May 1811. In 1814 Dr José Gaspar Rodríguez de Francia was elected dictator, and in 1816 perpetual dictator (el Supremo), by the National Assembly. He died 20 Sept. 1840. In 1844 a new constitution was adopted, under which Carlos Antonio López (first elected in 1842, died 10 Sept. 1862) and his son, Francisco Solano López, ruled until 1870. During the devastating war against

Brazil, Argentina and Uruguay (1865–70) Paraguay's population was reduced from about 600,000 to 232,000. Argentina, in Aug. 1942, and Brazil, in May 1943, voided the reparations which Paraguay had never paid. Further severe losses were incurred during the war with Bolivia (1932–35) over territorial claims in the Chaco. A peace treaty by which Paraguay obtained most of the area her troops had conquered was signed in July 1938

CONSTITUTION AND GOVERNMENT. A new constitution replacing that of 1940 was drawn up by a Constituent Convention in which all legally recognized political parties were represented and was signed into law on 25 Aug. 1967. It provides for a two-chamber parliament consisting of a 30-seat Senate and a 60-seat Chamber of Deputies. Two-thirds of the seats in each Chamber are allocated to the majority party and the remaining one-third shared among the minority parties in proportion to the votes cast. Voting is compulsory for all citizens over 18. The President, who has wide emergency powers, is elected for 5 years and can be re-elected for a further term. He appoints the Cabinet and during parliamentary recess can govern by decree through the Council of State, the members of which are representatives of the Government, the armed forces and other bodies.

The first elections under the new constitution were held on 11 Feb. 1968. The Senate consists of 20 Colorados, 9 Radicals and 1 Liberal; the Chamber of Deputies, of 40 Colorados, 16 Radicals, 3 Liberals and 1 Febrerista.

President: Gen. Alfredo Stroessner, Commander-in-Chief, elected 11 July 1954 to complete the presidential period of his predecessor; assumed office 15 Aug. He was re-elected as 'Colorado' candidate in 1958, 1963 and 1968.

The following is a list of past presidents since 1940, with the date on which each took office:

Gen. Higinio Morínigo, 7 Sept. 1940 (resigned).
Dr Juan Manuel Frutos, 3 June 1948.[1]
Dr J. Natalicio González, 15 Aug. 1948 (deposed).
Gen. Raimundo Rolón, 30 Jan. 1949.
Dr Felipe Molas López, 26 Feb. 1949[1] (resigned).
Dr Federico Chávez, 16 July 1950 (resigned).
Tomás Tomero Pereira, 4 May 1954.

[1] Provisional, *i.e.*, following a *coup d'état*.

The President has a cabinet of 11 ministers.

National flag: Red, white, blue (horizontal); the white stripe charged with the arms of the republic on the obverse, and, on the reverse, with a lion and the inscription *Paz y Justicia*—the only flag in the world with different obverse and reverse.

National anthem: ¡Paraguayos, república o muerte! (words by F. Acuña de Figueroa; tune by F. Dupey).

The country is divided into 2 sections: the 'Oriental', east of Paraguay River, and the 'Occidental', west of the same river. The Oriental section is divided into 13 departments, subdivided into 133 *partidos*. The more important departments are supervised by a *Delegado* appointed by and directly responsible to the central government. Municipalities are administered by elected municipal councils. The Occidental section, or Chaco, is under military government and divided into 3 departments (with 4 *partidos*).

AREA AND POPULATION. The area of the Oriental section is officially estimated at 159,827 sq. km (61,705 sq. miles) and the Occidental section at 246,925 sq. km (95,337 sq. miles), making the total area of the republic 406,752 sq. km (157,042 sq. miles).

The population at the census taken in 1970 was 2,395,614. The capital, Asunción, had 437,136 inhabitants.

The 16 departments and principal towns had the following populations at the time of the 1970 census:

Concepción	110,555	San Ignació	18,408
Concepción	52,826	Santa Rosa	17,120
Horqueta	29,090	Paraguarí	228,192
San Pedro	127,767	Ybycuí	28,006
San Pedro	26,797	Carapeguá	27,991
San Estanislao	25,737	Yaguarón	17,860
De la Cordillera	199,621	Alto Paraná	67,497
Pirebebuy	23,869	Hernandarias	43,883
Arroyos y Esteros	19,935	Central	256,458
Caacupé	21,732	Lambaré	21,506
Caraguatay	18,895	Luque	35,790
Guaira	132,772	Itá	26,913
Villarrica	38,052	Capiatá	23,994
Caaguazú	226,657	San Lorenzo	20,458
Coronel Oviedo	59,307	Ñeembucú	69,639
Caaguazú	73,583	Pilar	15,324
San José	15,293	Amambay	67,917
Caazapá	105,578	Pedro Juan Caballero	52,005
Caazapá	23,349	Presidente Hayes	42,141
Yuty	23,788	Villa Hayes	34,648
Itapuá	201,670	Boquerón	47,033
Encarnación	47,333	Mcal. Estigarribia	36,788
San Pedro del Paraná	29,255	Olimpo	4,940
Misiones	74,023		

Number of births, 1970, was 79,581; deaths 13,044 (of which about 2,500 for children less than 1 year old).

The population is overwhelmingly *mestizo* (mixed Spanish and Guarani Indian) forming a homogeneous stock. There are some 40,000 unassimilated Indians of other tribal origin, in the Chaco and the forests of eastern Paraguay. There are some small traces of Negro descent. About half the population speak only Guaraní; some 4% speak only Spanish; the rest are bilingual.

Mennonites who arrived in 3 groups (1927, 1930 and 1947) are settled in the Chaco and Oriental Paraguay and were estimated in 1969 to number 13,000, of whom 2,000 came from Canada and 11,000 from Germany. The Japanese colonists in the Oriental section, who first came in 1935, were reckoned to number 7,000 in 1969. Under an agreement signed with Japan in 1959 up to 85,000 Japanese were to be admitted over 30 years. An agreement with Korea was signed in 1966.

RELIGION. Religious liberty is guaranteed by the 1967 constitution. Article 6 thereof recognizes Roman Catholicism as the official religion of the country. The same article disposes that relations between Paraguay and the Holy See shall be regulated by concordats or other bilateral agreements, but no such agreements have yet been negotiated.

The Roman Catholic Church is organized into the Archdiocese of Asunción, 3 other dioceses (San Juan Bautista de las Misiones, Concepción and Villarrica); 4 Prelatures (Coronel Oviedo, Encarnación, Alto Paraná and Caacupé); and 2 Vicariates Apostolic (Chaco and Pilcomayo). The bishops meet in a Conference of Paraguayan Bishops. Only civil marriages are legally valid. There are numerous non-Catholic communities, the largest of whom are the Mennonites. There is a small Anglican church in Asunción, with missions in the Chaco, which comes under the jurisdiction of a Bishop of the South American Missionary Society resident at Salta in the northern Argentine.

EDUCATION. Education is free and nominally compulsory, but schools are not everywhere available, and the system has been extensively revised to provide, *inter alia*, primary education for adults. Illiteracy is estimated at 32%. In 1970 there were 2,676 government primary schools and 369 private schools, with about 431,000 pupils and 13,331 teachers; 480 secondary schools had 55,777 pupils. The National University in Asunción had, in 1971, approximately 6,000 students and 650 professors. In 1971 the Catholic University and associated colleges had 2,100 students and 231 professors.

CINEMAS (1971). Cinemas numbered 61 in Asunción. The larger country towns usually have an outdoor cinema.

NEWSPAPERS (1971). There are 4 daily newspapers, 3 based on Asunción and one provincial, with an aggregate circulation of about 80,000. Some of the political opposition papers have been suspended by the government.

JUSTICE. The highest court is the Supreme Court with 5 members. There are special Chambers of Appeal for civil and commercial cases, and criminal cases. Judges of first instance deal with civil, commercial and criminal cases in 6 departments. Minor cases are dealt with by Justices of the Peace.

The Attorney-General represents the State in all jurisdictions, with representatives in each judicial department and in every jurisdiction. In matters of revenue, taxes, etc., the State is represented by the Abogado del Tesoro.

FINANCE. Currency. The *guaraní* was established on 5 Oct. 1943 equal to 100 old paper pesos. Total monetary circulation was Gs.8,326m. in July 1970; of this, notes were Gs.3,996m. and the remainder money at sight.

Rate of exchange, Oct. 1971: 126 guaraníes = US$1; 295–305 guaraníes = £1.

Budget. Revenue and expenditure, in Gs.1m. for calendar years:

	1966[1]	*1967*[1]	*1968*	*1969*	*1970*[1]	*1971*[1]
Revenue	5,542·3	7,744·7	8,743	10,091	9,994	10,255
Expenditure	6,030·3	8,587·0	9,889	9,944	10,441	10,522

[1] Estimate.

The 1971 budget provided Gs.8,001m. for current and 2,421m. for capital expenditure: National defence, 2,089m.; public works, 1,614m., and education, 1,217m.; interior, 923m. The budget revenue includes 671m. foreign loans and grants.

Total external debt outstanding at the end of Dec. 1969, including undisbursed sums (which amounted to US$45m.), was US$134m.

DEFENCE. The army, navy and air forces are separate services under a single command. The President of the Republic is the active Commander-in-Chief. The armed forces total about 13,500 officers and men. Of these, the Army account for about 11,000 (75% conscripts), the Navy about 1,700 (25% conscripts) and the Air Force about 800 (25% conscripts). There are also about 6,500 armed police (75% conscripts). Military service is compulsory between the ages of 18 and 20 but there are many exemptions.

The main units of the Army are: a Presidential Escort Regiment, 5 infantry regiments, a Cavalry Division with 4 regiments, an Artillery Division and an Engineer Command with 5 battalions. Three Sherman tanks were a gift from Argentina, 1971.

The Navy consists of 5 armoured river gunboats (2 of 636 tons built in Italy and 3 *ex*-Argentine minesweepers), 3 river patrol boats, 2 launches and a training ship (*ex*-tug).

The Air Force came into being in the early thirties as a combat service, but now has only transport and training formations. These are equipped mainly with US aircraft of wartime origin, including a number of C-54 4-engined and C-47 twin-engined transports, 3 Corvair 240s, a Twin Otter and T-6 Texan armed basic trainers. HQ and flying school are at Campo Grande, Asunción.

PRODUCTION. In 1970 the gross domestic product was estimated at about US$577m., of which 32·2% originated in agriculture, livestock, mining and forestry; 16·2% in manufacturing; 24% in commerce. The labour force was estimated at about 690,000, of whom 54·2% were engaged in agriculture, livestock and forestry, and 13·7% in manufacturing and mining.

AGRICULTURE. It is estimated that agriculture absorbs some 2m. hectares, as against 14m. for grasslands and 24m. for woodlands. Small holdings predominate: 86% are of 10 hectares or less.

Area (in hectares) and yield (in metric tons) of the main agricultural products in 1970–71:

	Area	Yield		Area	Yield
Cotton	44,976	27,446	Tobacco	17,568	19,085
Rice	21,000	290,000	Wheat	42,000	45,000
Maize	217,724	255,138	Soybeans	56,559	74,132

Wheat, soybean, cotton, sugar, tobacco, coffee are increasing in importance, as are also essential oils and oilseeds. *Yerba maté*, or strongly flavoured Paraguayan tea, continues to be produced but is declining in importance.

The principal sources of finance for agricultural development are USAID and Interamerican Development Bank loans and, for the wheat programme, suppliers' or other credits administered by the National Development Bank.

Livestock. In 1970 Paraguay had about 5·6m. cattle, 600,000 horses, 625,000 pigs and 415,000 sheep. Jerked beef, corned beef and other animal products are exported. Exports of meat products in 1970 were 24,889 metric tons. In 1970 production of fresh meat was 92,246 metric tons; of processed meat, 23,241 metric tons; slaughtered livestock was 512,506 for local consumption and 184,494 for 'industrialization'. Paraguay produces and exports salted and dry cattle hides.

FORESTRY. In the Oriental section there are huge reserves of hardwoods and cedars that have scarcely been exploited. Palms, tung and other trees are exploited for their oils. The Japanese are experimenting with mulberries for silk growing. Pines and firs have been introduced under a United Nations project. In the Chaco the accessible Quebracho forests have nearly been worked out but plans are being made to open up new areas. In 1968 production of quebracho extract, from which tannin is made, was 17,428 metric tons.

MINING. Iron, manganese and other minerals have been reported but have not been shown to be commercially exploitable. There are large deposits of limestone, and also salt, kaolin and apetite. *Pennzoil Paraguay* started in 1969 to prospect for oil and natural gas in the northern Chaco.

INDUSTRY. There are 3 main meat-packing plants and other factories producing vegetable oils. A textile industry in Pilar and Asunción meets a large part of local needs. As a result of government restrictions on the export of logs the sawmilling and woodworking industry has recently been expanding. A cement works at Valle-mi, with a capacity of 7,000 bags a day, was inaugurated in Jan. 1970. The oil refinery at Villa Elisa, which has been in operation since 1966, has a production of about 3,500 bbls a day. There are some flour-mills and small match, pharmaceutical, soap, cigarette, footwear, furniture and building materials industries.

ELECTRICITY. The Acaray hydro-electric plant, with a first stage capacity of 45,000 kw., went into operation at the end of 1968 but so far supplies only the Asunción area.

TOURISM. Visitors numbered 111,643 in 1969, 119,239 in 1970.

LABOUR. Trade unionists number about 25,000 (Confederación Paraguaya del Trabajo and Confederación Cristiana de Trabajadores).

A contributory national insurance scheme for all salary and wage earners except civil servants, domestic servants (from 1 Jan. 1967) and railway employees went into effect 1 Jan. 1951.

COMMERCE. Imports and exports since 1965 (in US$1m.):

	1965	*1966*	*1967*	*1968*	*1969*	*1970*
Imports	44·0	49·5	51·9	72·7	82·3	76·2
Exports	57·3	49·4	50·8	47·5	51·0	64·1

Chief exports in 1970 included (in US$1m.): Meat products, 17·2, timber, 12·6; oils, 9; tobacco, 5·8; cotton, 4; quebracho extract, 2.

Of the imports in 1970 (principally foodstuffs and beverages, vehicles and machinery, chemicals, fuels and lubricants; in US$1m.) 14·9 came from USA, 11·8 from Argentina, 11·8 from W. Germany and 5·4 from the UK.

The trade between Paraguay and UK (British Board of Trade returns) in £1,000 sterling was as follows:

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	1,592	2,287	2,721	2,122	2,271	1,813
Exports and re-exports from UK	1,295	1,273	2,043	2,450	2,210	2,563

SHIPPING. In flood the Paraguay River, which divides the country into two distinct parts, is navigable for 12-ft-draft vessels as far as Concepción, 180 miles north of Asunción, and for smaller vessels for a further distance of 600 miles northward. Drought conditions often restrict navigation to lighter traffic. The Paraná River is navigable by large boats from Corrientes up to Puerto Aguirre, at the mouth of the Yguazú River. Boats of a few hundred tons capacity navigate the tributary rivers.

Asunción, the chief port, is 950 miles from the sea. In June 1945 the Government formed—after a break of 80 years—a national merchant marine which operates in the river Plate basin, connecting with Argentine, Uruguayan and Brazilian ports. The cargo fleet includes 25 vessels of 300–1,000 tons, 3 tankers of 1,100–1,700 tons, 2 passenger river boats and 1 ocean-going freighter of 713 tons.

RAILWAYS. The President Carlos Antonio López (formerly Paraguay Central) Railway runs from Asunción to Encarnación, on the Río Alto Paraná, with a length of 274 miles (4 ft 8½ in.). There is a through train service from Asunción to Buenos Aires twice a week.

ROADS. In 1968 there were 6,258 km of roads, of which 638 were paved, 1,025 of gravel and 4,595 of earth. The principal paved roads are Route No. 2 7 running from Asunción to the bridge over the Parana at Puerto Presidente Stroessner, and thence down to the ocean at Paranaguá; and Route No. 1 to Encarnación in the south. The other main arteries (unpaved) are the road from Coronel Oviedo, on the Asunción–Puerto Presidente Stroessner road, to Pedro Juan Caballero in the north, and the trans-Chaco road which starts from the ferry across the Paraguay River north of Asunción and ends near Nueva Asunción on the Bolivian border. Unpaved roads are closed when it rains. In the Argentine, a paved road starts from Clorinda, opposite Asunción, and provides good communication with Buenos Aires. Motor vehicles, 1969, numbered 23,700, of which 9,954 were motor cars; 6,399 pick-ups and 4,029 lorries.

AVIATION. International services are furnished by 9 airlines (domestic and foreign). Internal routes are operated by military aircraft and some small private lines.

POST. The national telegraph (137 offices) connects Asunción with Corrientes and Posadas in the Argentine Republic, and thus with the outside world; new direct links have been opened with Germany, USA, Bolivia and Chile. In addition, 34 stations are operated by the President Carlos Antonio López Railway; total, 2,070 miles. Three companies (12 stations) offer radio-telegraph and telex services to several countries. The telephone system has been under government control since 5 Oct. 1945; a new government agency, the National Telephone

Administration, took over the telecommunication services in July 1947. Telephone lines, 1949, 5,225 miles; instruments, 1968, 16,048, of which 14,918 were in Asunción and were automatic. There are one state and 7 commercial radio stations in Asunción and one in each of 8 main provincial centres, and a television station in Asunción.

BANKING. The Banco Central del Paraguay opened 1 July 1952 to take over the central banking functions previously assigned to the National Bank of Paraguay, which had opened in March 1943 and been reorganized as the Banco del Paraguay in Sept. 1944 with a monetary, a banking and a mortgage department. The Banco del Paraguay closed in Nov. 1961 and has been replaced, with the aid of a US loan of US$3m., by the Banco Nacional de Fomento; the latter's authorized capital was increased on 13 June 1966 by Gs.600m. to 2,100m.

The Banco Central on 30 Aug. 1971 had gold amounting to US$82,000 and foreign exchange equal to US$9·73m. exclusive of IMF holdings.

The Banco Nacional de Fomento, Bank of London and South America, Ltd, Banco Exterior do Brasil, First National City Bank of New York, Banco de Asunción, Banco Exterior SA, Banco Paraguayo de Comercio, Banco Aleman Transatlantico, Banco Holandés Unido, Bank of America all have agencies in Asunción and branches in some main towns. From 1 Sept. 1966 their legal cash requirements in local currency must be 42% of total deposits (previously 39%).

WEIGHTS AND MEASURES. The metric system was officially adopted on 1 Jan. 1901.

PERU

República del Perú

HISTORY. The Republic of Peru, formerly the most important of the Spanish vice-royalties in South America, declared its independence on 28 July 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom.

CONSTITUTION AND GOVERNMENT. On 3 Oct. 1968 a military junta overthrew the government of President Fernando Belaúnde Terry and installed Gen. Juan Velasco Alvarado as President of a 'Revolutionary Government' with a cabinet composed entirely of officers of the armed services. Gen. Velasco retired from active army service in Jan. 1969, having reached retiring age, but remained in office as President. Congress has been suspended and rule is by Decree Law.

The Government have stated that the existing Constitution will be revised before fresh elections are held.

At present the Constitution provides for a Legislature consisting of a Senate (45 members) and a Chamber of Deputies (140 members) and an Executive formed of the President of the Republic and a Council of Ministers appointed by him. Elections are to be held every 6 years with the President and Congress elected, at the same time, by separate ballots. All literate Peruvians (native-born or naturalized) over the age of 21 are eligible to vote; in Dec. 1970 the number of registered voters was 2,829,728, including 1m. in Lima province. Voting is compulsory; women were fully enfranchised in 1955.

President: Gen. Juan Velasco Alvarado.
Prime Minister: Gen. Ernesto Montagne Sánchez.
Minister of Foreign Affairs: Gen. Miguel de la Flor.

As of 30 June 1965 the 23 departments are divided into 148 provinces (plus the constitutional province of Callao) and 1,662 districts; the province of Callao has some of the functions of a department. Each department is administered by a prefect, and each province by a sub-prefect. The first municipal elections for 40 years were held in Dec. 1963.

National flag: Red, white, red (vertical).
National anthem: Somos Libres, seámos lo siempre (words by J. de la Torre Ugarte; tune by J. B. Alcedo, 1821).

AREA AND POPULATION. A report dated 30 Jan. 1959, by the Military Institute of Geography, calculated the total area of Peru to be 1,285,215 sq. km (496,093 sq. miles).

The long-standing dispute with Chile over the provinces of Tacna and Arica (*see* THE STATESMAN'S YEAR-BOOK, 1928, p. 1198) reached an amicable settlement on 3 June 1929 at Lima, Tacna going to Peru and Arica to Chile. For an account of the settlement of other boundary disputes, *see* THE STATESMAN'S YEAR-BOOK, 1948, p. 1173. A map of the boundary with Ecuador is to be found in THE STATESMAN'S YEAR-BOOK, 1942.

The census taken on 2 July 1961 gave the population as 10,420,375, including an estimated 100,830 nomadic jungle Indians. The estimate for 1970 was: 13,586,000, based on an annual population growth rate of 3·1%. At the time of the 1961 census the population was distributed as follows: northern zone, 29·8%; central zone, 39·6%; southern zone, 23·9%; jungle area or eastern zone, 6·7%. 50% of the population is under 18 years of age. The language is Spanish, but the Indian population speak either Quechua or Aymará.

Foreign residents registered in Aug. 1971 included: Japanese, 11,958; Chinese, 8,806; Italian, 8,709; USA, 8,523; Spanish, 8,342; German, 3,994; Chilean, 3,949; British, 2,885; Swiss, 1,613; French, 1,518.

The census population (1970, preliminary) of Lima was 2,541,300; Callao City, 335,400; Arequipa, 194,700; Trujillo, 156,200; Piura, 111,400; Cuzco, 108,900; Ica, 72,300; Sullana, 43,500; Tacna, 41,200; Talara, 39,600. Just under 50% of the population is urban.

In 1960 there were registered 376,356 births, 114,605 deaths and 43,549 marriages.

The area of the 23 departments and the constitutional province of Callao are given below with the population, according to the official census (revised) of 1940 and that of 2 July 1961 approved by decree of 1964. The department of Pasco, created in Nov. 1944 from the department of Junín, is shown with its present area and 1959 estimate. The area of the department of Puno includes the Peruvian zone of Lake Titicaca, 4,996·28 sq. km. The chief towns are shown in brackets:

RELIGION. Religious liberty exists, but the Roman Catholic religion is protected by the state, and since 1929 only Roman Catholic religious instruction is permitted in schools, state or private. In 1956 there were 4 Roman Catholic archbishops (the archdiocese of Lima, dating from 1545, takes precedence), 12 bishops, 4 vicars-general, 2 apostolic prefects, 1,662 priests, 605 cloistered monks and 3,182 members of religious orders.

Protestants numbered 128,000 in 1966.

All marriages must be civil, regardless of religion and preceded by medical examination; there are liberal divorce regulations, including divorce for 'absence without just cause for more than 2 years', and by mutual consent. Divorcees may remarry immediately. A law of 1936 emphasizes that the religious obligations of marriage are fully recognized.

EDUCATION. Elementary education is compulsory and free for both sexes between the ages of 7 and 16; secondary education is also free. But schools, despite substantial increases, are still too few. The system is highly centralized; all teaching appointments are made by the Minister of Education for the public schools; for the private schools he supervises plant and equipment and limits fees but does not appoint teachers.

In 1966 there were public, private and state-supervised elementary schools, including kindergartens, with 49,523 teachers and 2,206,000 pupils; 612 secondary schools, with 12,476 teachers and 356,500 students. Training in 401 public technical schools is also free; in 1966 they had 5,984 teachers and 76,900 pupils. The 'normal' schools had 948 teachers and 19,200 pupils. Education centres for adult illiterates had 3,226 teachers and 96,132 students. There are also 29 schools for teachers.

Higher education is provided at the central university in Lima, called 'Universidad Nacional Mayor de San Marcos', founded by Charles V in 1551. Students in 1962 numbered 14,000; teachers, 1,200. There are other state universities at Arequipa (founded in 1827), Cuzco, Trujillo, Ayacucho (Universidad de Huamanga), Puno, Iquitos, Huancayo (Universidad del Centro) and some Catholic universities. The state maintains the National Engineering University and the Agrarian University of La Molina. In Lima there are also 4 universities described as private. In 1966 the total number of university students was 64,400.

CINEMAS (1966). Cinemas numbered some 230, of which 124 in the Lima area; total seating capacity, 243,000.

NEWSPAPERS. There are numerous daily newspapers; the main Lima dailies are *La Prensa, El Comercio* and *Expreso*.

SOCIAL WELFARE. Contributary social security schemes exist for employees and workers. These are administered by the Ministry of Labour. There were in 1969, 285 hospitals (30,600 beds), of which 149 (26,007 beds) belonged to the public sector and 136 (4,589 beds) to the private sector. In addition there

were 63 health centres, 307 medical posts and 842 sanitary posts, all administered by the authorities. There are about 420 inhabitants for every one hospital bed. At 31 Aug. 1966 there were 5,061 doctors in Peru (in 1971 there were 8,000 registered with the College of Doctors). There is said to be 1 doctor for every 800 people in Lima against 1 to every 18,000 in the provinces.

JUSTICE. The Peruvian judicial system is a pyramid at the base of which are the justices of the peace who decide minor criminal cases and civil cases involving small sums of money. The apex is the Supreme Court with 17 members; in between are the judges of first instance, who usually sit in the provincial capitals, and the superior courts of which there are 18.

The Revolutionary Government decreed in Dec. 1969 that all judges, except justices of the peace, will in future be elected by the National Council of Justice, composed of representatives of the Executive, the Legislature, the Judiciary, the National Federation of the College of Lawyers and 2 of the university law faculties. Justices of the peace will be appointed, as before, by the superior courts.

FINANCE. Currency. The monetary unit is the *sol*. It was devalued by 40% in Sept. 1967 and in Dec. 1971 stood at the free market rate of 110 to the £ and 43 to the US$. In May 1970 exchange control was imposed on the small free exchange market. Foreign residents were exempted from a number of the regulations but Peruvian citizens were required to repatriate overseas bank deposits and declare all foreign assets. The official exchange rate is S/.106 to the £ for normal transactions. The certificate exchange rate is S/.38·70 to the US$.

Coins include the new 10- and 5-sol pieces (copper 75%; nickel 25%), the sol and half sol (copper 30%; zinc 70%), the 20, 10 and 5 centavos (copper–zinc); the 2- and 1-centavo pieces (zinc) have been discontinued. Peru has a paper currency issued by the Banco Central de la Reserva in denominations of 1,000, 500, 200, 100, 50, 10 and 5 soles. Money in circulation at 30 June 1971 was S/.24,602·4m.

Budget. On a cash-flow basis (*i.e.*, development loans considered as receipts and debt service included in payments) the revenue and expenditure for calendar years were as follows (in 1m. soles):

	1967[1]	*1968*[2]	*1969*[3]	*1970*	*1971–72*[3]
Revenue	28,222	30,745	32,300	42,715	114,760
Expenditure	33,183	30,745	32,300	44,877	115,605

[1] Budget year 15 months ending 31 March 1968. [2] Estimates. [3] Biennual basis.

In the 1971–72 budget proposed expenditure includes (in 1m. soles): Defence 18,780; economy and finance, 25,515 (including 13,757 for debt refinancing); interior, 11,230; education, 23,009; health, 6,487; transport and communications, 6,545; agriculture, 7,491; energy and mines, 3,926; housing, 1,940.

The external debt rose from US$311m. in 1964 to 847m. in 1969.

DEFENCE. The national budget for 1971–72 included the following estimates: Army, S/.8,241m.; Air, S/.3,242m.; Navy, S/.5,117m.

Army. While military service is compulsory youths are only conscripted to fill the annual quota. The term of service is 2 years and all males of 20–25 years of age are liable. The country is divided into 5 military regions.

The Army comprises approximately 35,000 all ranks, of which some 3,000 are regular officers. There are 7 light infantry divisions, 1 jungle infantry division, 1 armoured division, 1 armoured group, 1 cavalry division and 1 special forces division which includes parachute and commando battalions. There is an air element of 4 Helio Courier 395 communications aircraft. Equipment consists of approximately 150 tanks (AMX13 and Sherman) over 50 light armoured fighting vehicles and 105-mm./155-mm. field artillery.

The section of the national police force with a para-military role is known as the *Guardia Republicana* and comprises approximately 21,000 personnel.

Navy. The Peruvian Navy consists of 4 submarines completed in USA in 1954–55; 2 cruisers, *Almirante Grau* (ex-*Newfoundland*) and *Coronel Bolognesi* (ex-*Ceylon*), acquired from Great Britain in 1959–60; 2 'Daring' class destroyers delivered from Britain in 1971–72; 2 destroyers acquired from USA during 1960–61; 3 destroyer escorts; 2 corvettes (*ex*-fleet minesweepers) acquired from USA in 1960–61; 6 coastal patrol boats (built in Britain in 1964–65); 2 coastal minesweepers; 2 coastal gunboats; 4 landing ships; 3 patrol launches (acquired in 1960 from Italy); 7 river gunboats; 3 transports; 6 oilers, 3 auxiliaries and 2 tugs.

All naval training takes place in the Callao area at various schools. The main naval base and dockyard are also in Callao. Smaller bases are at Iquitos on the Amazon, and at San Lorenzo. Naval personnel in 1971 totalled 7,870 officers and men.

Air Force. The Air Force is under the direction of the Minister for Air, who is also C-in-C. Command is exercised through base and unit commanders.

The operational force consists of 3 combat groups. No. 6 Group has 2 squadrons of Canberra jet-bombers and 1 of Mirage 5-P jet fighters. No. 7 Group has 1 squadron of B-26C Invader piston-engined bombers. No. 11 Group has 1 squadron of F-86F and T-33A jet combat aircraft and 1 squadron of Hunter F.4 fighters. Other aircraft in service include about 25 medium transports (4 C-130, 16 Buffalo, a few C-54s and C-118s), 45 light transports (C-46, C-47, Twin Otter, Beaver and Catalina), 13 helicopters, 100 training aircraft (T-33, T-37, Mirage, Cessna 172) and a small number of miscellaneous types for photographic and communications duties. There are military airfields at Talara, Chiclayo, Piura, Pasco, Lima (2) and Iquitos, with another under construction at La Joya. In addition there is a seaplane base at Iquitos. All officers and pilots are trained at the Air Academy at Lima (Las Palmas). The approximate strength of the Peruvian Air Force is 7,000 personnel and 240 aircraft.

PLANNING. Peru has had a National Planning Institute since 1963. The plans it has published are of an indicative nature. The Institute announced in May 1971 a comprehensive plan for economic and social development in the years 1971–75. The plan provides for an annual growth rate of 7·5%, an annual increase in private investment and the creation of 1·16m. new jobs over the 5-year planning period

AGRICULTURE. There are 4 zones: the coast strip, with an average width of 80 km; the Sierra or Uplands, formed by the coast range of mountains and the Andes proper; the Montaña or high wooded region which lies on the eastern slopes of the Andes, and the jungle in the Amazon Basin, known as the Selva. Land under cultivation, 1967, was about 2·75m. hectares. There are 4 fertilizer factories, near Callao and in Cuzco.

Peru is a substantial importer of foodstuffs, chiefly wheat (522,300 metric tons, 1970), but also fats and oil, meat and dairy products, which use up over 20% of the available foreign exchange.

Nearly half pf the population is dependent on agriculture, which accounted for 15% of the GDP in 1970. Peru's third land reform law, that of June 1969, is the most comprehensive. It provides for the large sugar estates in the north of Peru to be turned into co-operatives. Maximum permitted sizes for other types of land holding are stipulated for the various regions of the country. These range from 150 hectares for irrigated land on the coast to an area capable of supporting 5,000 sheep for pasture land in the Sierra. These sizes may be increased if certain efficiency criteria are met. Holdings too small to be economically viable are to be consolidated into co-operative units. The chief agricultural productions of Peru are, in the order named: Cotton, sugar, wool, hides, skins, coffee and rice.

Production in 1970 (in metric tons): Cotton, 247,804; exports of ginned cotton, 300; sugar, 772,658; exports, 523,736; coffee, 65,386; exports, 45,209; cocoa, 2,113; wheat, 131,589; rice, 586,721; rubber, 438; coca, 15,058; exports, 254.

Output of cattle hides (in metric tons), 1970, 1,200; sheepskins, 1,110; goatskins, 953 Output of sheep wool in 1970 was 13,121 metric tons. Alpaca and llama wool and vicuña hair, 4,458 metric tons; exports, 1970, were sheep wool, unwashed, 606 metric tons; llama, alpaca and vicuña wool, 1,537 metric tons.

Peru suffers from periodically severe droughts particularly in the northern zone; losses were estimated at 1,000m. soles in 1968.

Livestock (1970). 4·76m. llamas, alpacas, etc., 1·45m. horses and mules, 4·12m. cattle, 17·06m. sheep, 1·93m. swine, 22m. poultry.

FISHERIES. Peru is the world's foremost fishing nation in terms of value of catch, most of which is anchoveta which is reduced into fishmeal for export as animal feed. Peru produces around 45% of the world's total fishmeal supplies or nearly 2m. tons a year. There are 120 fishmeal plants employing 3,000 workers spread among the 23 ports of the 1,400-mile Peruvian coastline. Over 30% of the capacity is in Chimbote. There are approximately 1,300 fishing boats employing 20,000 fulltime fishermen. In 1970 exports of fishmeal amounted to 1,872,800 metric tons, production was 2,253,000 metric tons and the anchovy catch was 12·4m. metric tons (1969, 9m.; 1968, 10m.). The limit of the anchovy catch is set at 10m. tons a year to maintain the biological balance of the species. Other fish caught include tuna (exports in 1969 of canned tuna were 2,753 metric tons and of frozen tuna 4,500 metric tons); bonito (1969 exports were 1,600 tons for canned and 1,207 tons for frozen); barrilete; merluza; swordfish. Increasing importance is being placed on the development of the table fish industry.

MINING. Mineral exports accounted for about 48–50% of foreign trade earnings in 1970; copper alone accounted for 27%. Lead, copper, iron, silver, zinc and petroleum are the chief minerals exploited. Mineral exports in 1970 were valued at US$564m. and amounted to (in metric tons) 10·5m. made up as follows: copper, 215,000; silver, 1,218; lead, 160,000; zinc, 318,000; iron, 6,003,800; petroleum and derivatives, 400,000. Crude petroleum output in 1970 was 26·3m. bbls. Mine production (in metric tons, 1970) of copper, 215,000; lead, 170,000; zinc, 320,000; antimony, 780; tungsten, 1,591; bismuth, 765; molybdenum, 810; cadmium, 285; mercury, 121; tin, 71; manganese (37·8%), 12; silver (troy oz.), 38m.; gold, 90,000 grammes. Diamonds were discovered during 1966 in the department of Cuzco (Canchis). Iron deposits are large; production (62% Fe), 1970, 10·1m. long tons. Excellent coal deposits, with an ash content of from 5 to 7%, lie near by; output, 1969, 161,769 metric tons. Nepheline was discovered in Puno department in 1962.

Oil deposits have been discovered and are now being exploited on the Continental Shelf. On 9 Oct. 1968 the Revolutionary Government announced the expropriation of the International Petroleum Company's oilfield at La Brea y Pariñas and refinery at Talara. Mine concessions, 1968, numbered 1,028. The State is now the largest producer. Active exploration is now being carried out in the Amazon jungle area and in northern Peru for fresh petroleum deposits. There are 5 petroleum plants and production capacity is 90,000 bbls per day. Production of natural gas in 1970 was 494,000 cu. metres.

In Sept. 1969 a law was introduced to force the major mining companies to work their hitherto unexploited concessions or lose them. In June 1971 a Mining Law was published which introduced a new tax structure for the industry and stated that as a matter of policy the State would undertake the marketing and refining of minerals.

The government-controlled guano deposits on Huanillos, Punta Lobos and other islands are important; the 1966 production was 55,505 metric tons.

Production of domestic and industrial salt in 1970 was 103,400 metric tons.

INDUSTRY. The Industrial Promotion Law, 1959, succeeded in encouraging local enterprises. The manufacturing industry has been the fastest growing sector of the economy in recent years. The average compounded annual

growth rate for the period 1960–70 was 7·5% per annum. In 1970 it was estimated that the manufacturing industries accounted for 20% of the GNP. In July 1970 a new Law of Industry was promulgated. This classifies industries according to national priorities and defines certain basic industries which it will be in the interests of the economy for the State to control. It also provides for worker participation in industrial companies to the extent that they will share both in the profits and ultimately, through the creation of an industrial community, own 50% of all companies. In future foreign owned companies must either become Peruvianized or operate under a special contract with the Government, which will enable them to recover their investment and reasonable profits, but eventually for the enterprise to pass to the hands of the Peruvian Government. In the motor vehicle industry approximately 17,000 units were assembled in 1969 by 13 different plants. The Government in an attempt to rationalize the industry, has stipulated that as from 1 Jan. 1971 there will only be 5 plants assembling automobiles. The aim of the Government is progressively to increase the proportion of nationally produced vehicle parts and components. About 70% of Peru's manufacturing industries are located in or around the Lima/Callao metropolitan area.

Peru's first iron and steel mill came into production at Chimbote in April 1958. Products include pig-iron, blooms, billets, largets, round and round-deformed bars, wire rod, black and galvanized sheets and galvanized roofing sheets. Refractories are manufactured at Lima.

The Government has a monopoly in the import and/or local manufacture and sale of guano, salt, alcohol and explosives. The monopoly in matches was abandoned in 1954 and that in tobacco in June 1955.

Output of Peru's manufacturing industry grew 10·5% in 1970 and annual production in the following industries was (in metric tons):

Refined copper	35,900	Vehicle assembly, cars (units)	10,300
Refined zinc	69,000	Lorries and buses (units)	4,200
Refined lead	72,200	Tyres (units)	456,000
Sulphuric acid	45,000	Radio receivers (units)[3]	27,000
Caustic soda[1]	26	TV receivers (units)[3]	32,000
Cement	1,138,000	Non-cellulose fibres (lb.)	3,000,000
Cast iron[2]	176,000	Rayon and acetate filament threads (lb.)	3,700,000
Crude steel[2]	153,000		

[1] 1968. [2] 1969. [3] 1967.

LABOUR. In 1969 the economically active population was considered to number 4·2m. persons (3·3m. male). This was 52% of the urban population of the country or about 30% of the country's population. The population is distributed roughly as follows: Agriculture, stock-raising and fishing, 2·25m.: miscellaneous services, 600,000; manufacturing industry, 550,000; construction, 150,000; transportation, 130,000; mining, 90,000; other activities, 450,000.

ELECTRICITY. In 1970 the production of electric energy was 5,003m. kw. The installed capacity in 1970 was 1,684 kw.

TOURISM. Tourism ranks as seventh among dollar earning industries. In 1968, 113,532 foreigners visited Peru, spending about US$28m.

TRADE UNIONS. Trade unions have about 2m. members (approximately 1·5m. in peasant organizations and 0·5m. in industrial). The major trade union organization is the *Confederación de Trabajadores del Perú*, which was reconstituted in 1959 after being in abeyance for some years. The other labour organizations recognized by the Government are the *Confederación General de Trabajadores del Perú* and the *Confederación Nacional de Trabajadores*.

COMMERCE. The value of trade has been as follows (in US$1m.):

	1966	*1967*	*1968*	*1969*	*1970*
Imports	816·9	818·9	629·8	600	695
Exports	764·4	757·0	866·1	865	1,032

On 2 May 1961 Peru ratified the Montevideo treaty and thereby became one of the members of the Latin American Free Trade Area (LAFTA).

On 26 May 1969 Peru signed the Cartagena Agreement between Bolivia, Colombia, Chile and Ecuador establishing the Andean Group, the aim of which is to accelerate the process of economic integration and development on a sub-regional basis within the ambit of LAFTA. Venezuela has until 1971 to join.

In 1970 the principal imports were: Machinery and appliances (25%); foodstuffs, beverages and tobacco (20%); metals and manufactures (11%); chemicals and allied products (12%); vehicles and transport equipment (10%); wood, pulp and paper (6%); textiles (4%); fuel, lubricants and other non-metallic minerals (3%); rubber, plastics, etc. (5%); miscellaneous (5%).

The principal exports were: Minerals and metals (48%); marine products (32%); cotton (5%); sugar (6%); coffee (4%); wool (1%); petroleum (1%); miscellaneous (3%).

The major suppliers were (in S/.1m.):

Total trade between Peru and UK in £1,000 sterling (British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	7,697	11,622	13,903	15,197	16,422
Exports and re-exports from UK	12,454	11,634	11,796	9,905	15,899

SHIPPING. In 1966, 6,900 vessels of 26,602,270 tons entered, and 6,871 of 26,610,772 tons cleared the ports. Since 1928 the coasting trade has been largely reserved for Peruvian-owned vessels with Peruvian crews; in 1960 it handled 2,246,000 metric tons, valued at 1,665m. soles.

ROADS. There were at 30 June 1966, 45,549 km, of which 17,114 km were made up and 4,547 km asphalted. Work on the Carretera Marginal de la Selva (South American Marginal Forest Highway) started in 1965; the 5,600 km road between the Colombian–Venezuelan border and Sta. Cruz, Bolivia, of which the Peruvian portion consists of 394 km already existing, 503 km now under construction and 1,565 km outstanding, to make a sectional total of some 2,460 km.

In 1969 there were 340,000 licensed road vehicles, including private cars, 220,000; lorries and buses, 120,000.

RAILWAYS. In 1967 the total working length of the railways was 2,880 km, including 389 km state-owned. The Peruvian Corporation owned 1,546 km.

AVIATION. Air services connect Lima and the capitals of every South American republic. The first Peruvian international line, Aerolíneas Peruanas SA, began operating with 3 planes on 3 June 1957.

TELECOMMUNICATIONS. An earth satellite ground communication station at Lurin connects Peru through Intelsat. III to the US and Europe. In 1967 there were 1,179 post offices, 316 telegraph and radio-telegraph offices.

Length of telegraph lines was 26,121 km. In 1970 the Lima Telephone Co. was nationalized and the Government have announced their intention to nationalize progressively the entire telephone and communications network. Radio-telephone circuits connect Lima with distant towns. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the republics to the north. There are 153 broadcasting stations, of which 29 are in Lima. Wireless receiving sets, about 2m. There are 7 television stations in Lima, 16 in the provinces and 45 relay stations.

BANKING. The Government bank of issue is the Banco Central de la Reserva del Perú, which was established in 1922. A new charter for the bank was promulgated in Aug. 1968; this, *inter alia*, extended the bank's authority with regard to the organization of the commercial banking system. This bank also regulates the certificate exchange market through which import, export and foreign currency loan operations are channelled. As at March 1971 its paid-up capital and reserves stood at 311m. soles and its net foreign currency reserves at US$219m.

The Government's fiscal agent is the Banco de la Nación which, since May 1970, has control of the 'giro' market through which most non-trade foreign currency transactions are channelled. As at March 1971 it had a paid-up capital and reserves of 563m. soles.

Banks, domestic and foreign, are supervised by the Superintendent of Banks and Insurance. There were in March 1971, 7 state banks, 11 commercial banks (of which 3 were controlled by the Banco de la Nación), 6 regional banks (with head office outside Lima or Callao) and 4 foreign banks (1 British, 2 American and 1 Japanese). At March 1971 Peruvian currency deposits of the banking system (excluding state banks) amounted to 36,935,000 soles and advances to 25,398,000 soles.

WEIGHTS AND MEASURES. The metric system of weights and measures was established by law in 1869, and since 1916 has come into general use.

REPUBLIC OF THE PHILIPPINES

República de Filipinas—Republika ñg Pilipinas

HISTORY. The Philippines was discovered by Magellan in 1521 and conquered by Spain in 1565. Following the Spanish–American war, the islands were ceded to the USA on 10 Dec. 1898, after the Filipinos had tried in vain to establish an independent republic in 1896.

The Republic of the Philippines came into existence on 4 July 1946, by agreement with the US Government embodied in an Act of Congress signed by President Roosevelt on 24 March 1934, accepted by the Philippine Legislature on 1 May 1934 and ratified at a plebiscite on 14 May 1935. This Act established a 10-year transitional period, designated as that of the Philippine Commonwealth, at the end of which complete independence was automatically effective.

CONSTITUTION AND GOVERNMENT. The republic is governed by a constitution adopted on 14 May 1935 and amended in 1940 and 1946. The President and Vice-President are elected for 4 years; both may be re-elected for another term. The President is assisted by 11 departmental secretaries in charge of Foreign Affairs; Finance; Justice; National Defence; Health; Education; Public Works and Communications; Labour; Commerce and Industry; Agriculture and Natural Resources; General Services; by 6 other officials of cabinet rank, namely the Executive Secretary, the Budget Commissioner, the Chairman of the National Economic Council, the Press Secretary, the Administrator of Economic Co-ordination, the Commissioner of National Integration; and 12 officials invited to cabinet meetings.

President: Ferdinand E. Marcos (Nationalist), elected for a second term of 4 years on 11 Nov. 1969, obtained 3,759,479 votes in the election against 1,372,641 cast for Senator Sergio Osmena, Jr (Liberal).

Congress consists of a Senate of 24 members and a House of Representatives of 104 members. All male and female citizens 21 years of age or older who can read or write Spanish, English or a native dialect and who meet certain residential qualifications are entitled to vote. Registered voters at the 1961 local elections numbered 9·6m.

The constitution vests in the republic all ownership of the country's natural resources, which, apart from public agricultural land, may not be alienated. An agreement with the USA signed on 4 July 1946, ratified by plebiscite on 11 March 1948 and expiring in 1974, admits American interests or companies to the exploitation of any resources and public-utility business open to Filipinos. Concessions and leases are limited to 25 years, renewable for another 25 years; maximum area of agricultural public land which any corporation may acquire or lease is 1,024 hectares (2,529 acres) and not more than 2,000 hectares (4,940 acres) if used for grazing purposes.

National flag: Blue and red (horizontal), with a white canton charged with a gold sun (with 8 rays) and 3 gold stars.

National hymn: 'Tierra adorado', 'Land of the morning', lyric in English by M. A. Sane and C. Osias, in Spanish by Jisé Palma (1899), tune by Julian Felipe (1898); 'Pambansang Awit ñg Pilipinas', Tagalog lyric by the Institute of National Language, music by Julian Felipe.

LOCAL GOVERNMENT. The country is administratively divided into 67 provinces, 59 chartered cities, 1,423 municipalities and 21 municipal districts. Each province elects its executive, consisting of a governor, and 3 members of the provincial board. The municipalities are public corporations, each composed of a number of *barrios*: the elected municipal mayor is the executive official. The mayors of the chartered cities are elective.

AREA AND POPULATION. The Philippines is situated between 21° 20′ and 4° 30′ N. lat. and between 110° 55′ and 126° 36′ E. long. It is composed of 7,107 islands and islets, 2,870 of which are named. Approximate land area, 115,600 sq. miles (299,400 sq. km). The 12 most important islands with their areas (in sq. miles) are: Luzon, 41,845; Mindanao, 36,381; Samar, 5,184; Negros, 5,278; Palawan, 5,751; Panay, 4,749; Mindoro, 3,995; Leyte, 3,090; Cebu, 1,964; Bohol, 1,589; Masbate, 1,562; Catanduanes, 583.

The total population at the census of 6 May 1970 was 37,008,419 (provisional).

The population of Manila, the capital, in 1970, was 1,582,000. The new capital, Quezon City, just north-east of Manila, had a population of 585,100. Other cities, with their population in May 1970, are: Iloilo on Panay, 213,000; Cebu on Cebu, 351,000; Zamboanga on Mindanao, 188,300; Davao on Mindanao, 315,300; Basilan on Basilan Island, 222,000; Bacolod on Negros, 165,600; San Carlos, 174,000; Pasay, 183,500.

On 7 June 1940 the President of the Philippines approved a law, effective 4 July 1946, making a new language based on Tagalog (a Malayan dialect) the official national language of the republic. About 10,689,200 people speak English and about 558,650 Spanish; for government and commercial purposes these two languages are commonly used. Some 70 native languages are spoken in the Philippines, of which 9 are of major importance; they belong to the Malayo-Polynesian family.

RELIGION. In 1967 there were 24,176,989 Roman Catholics; in 1960, 1,414,431 Aglipayans, 1,317,475 Moslems, 785,399 Protestants, 270,104 members of the Iglesia ni Kristo, 39,631 Buddhists and 574,549 others.

The Roman Catholics are organized in 10 archbishoprics, 43 bishoprics, 12 prelatures nullius, 4 apostolic vicariates, 4 apostolic prefectures and 1,633 parishes. The Philippine Independent Church, founded in 1902, and comprising about 5% of the population, denies the spiritual authority of the Roman Pontiff. It is divided into two groups, one of which has accepted ordinations by the Episcopalian Church.

EDUCATION. Education is free in the primary schools and is completely co-educational. In all schools English is the main medium of instruction, although the Filipino language is also taught. The vernaculars are used as the medium of instruction in the lower primary grades, and Spanish is one of the possible subjects in all high schools and obligatory in all colleges. In 1960, of the persons 10 years old and over, 72% were literate.

In 1967–68, 6,579,349 attended elementary, 452,771 secondary and 8,830 collegiate schools. In 1967–68, 287,111 pupils attended private elementary schools, 812,906 secondary, 539,378 collegiate. The University of the Philippines (founded in 1908) had 21,776 students in 1966–67.

NEWSPAPERS (1967). There were 770 newspapers and magazines with a circulation of 206m.; 18 of them are dailies, of which the 6 largest are published in English.

SOCIAL WELFARE. The government programme includes the purchase and subdivision of big landed estates for resale on easy instalment plans to tenants, the opening of virgin lands and settlement of landless families, the granting of bank loans to such families for seeds and the building of homes, the opening of rural roads and rural schools, the setting up of travelling medical clinics and the distribution of relief goods, including food, clothing and medicine, to families who have been displaced due to the depredations of the communist outlaws.

JUSTICE. The judiciary is headed by the Supreme Court, with a chief justice and 10 associate justices; it can declare a law or treaty unconstitutional by the concurrent votes of 8 justices. There is a court of appeal, headed by a presiding justice, with 17 associate justices. There are 16 judicial districts subdivided into 212 branches, each with a presiding judge of first instance. Every city has a city

court and every municipality has one municipal judge. In addition, the juvenile and domestic relations court in Manila has exclusive jurisdiction to try all cases involving minors and matrimonial disputes.

There are also 3 agencies of the Government which have been denominated as 'courts', namely, the Court of Tax Appeals, the Court of Industrial Relations and the Court of Agrarian Relations, which perform judicial as well as quasi-judicial functions.

All members of the judiciary are appointed by the President with the consent of the Commission on Appointments.

FINANCE. Currency. The republic is on a free foreign-exchange market with the peso equivalent to about 26 cents US. Total money supply, Dec. 1966, was P.3,371·3m., of which P.1,543·4m. was currency in circulation and P.1,287·9m. were demand deposits. The peso contains 20 grammes of silver, 0·800 fine. The coins used are: Peso, one-half peso, peseta (20 centavos), media peseta (10 centavos), all in silver of 0·750 fine; 5 centavo in cupro-nickel, and 1 centavo in copper–tin–zinc. Central Bank notes are of 5, 10, 20 and 50 centavos denominations. Treasury certificates and Central Bank notes are issued in 1, 2, 5, 10, 20, 50, 100 pesos denominations.

Budget. The revenues and expenditures of the central government for fiscal years (ending 30 June) were, in 1m. Philippine pesos as follows:

	1965–66	*1966–67* [1]	*1967–68* [1]	*1968–69* [1]	*1969–70* [1]
Revenue	2,148	2,371	2,830	3,156	3,502
Expenditure	2,228	2,354	2,764	3,013	3,197

[1] Estimates.

Taxation furnished P.1,523m. of the revenue for 1964–65, P.1,799m. for 1965–66, P.1,945m. for 1966–67 and P.2,199m. for 1967–68.

Expenditure (1967–68) included (in 1m. pesos): National defence and police, 382; education, health and welfare, 1,016; general administration, 308; economic development, 826; public debt, 156.

As of 31 Dec. 1966 the total internal public debt outstanding of the national and local governments, including those of the government corporations, stood at P.3,520m., while the external public debt amounted to US$501m., of which US$260m. was short-term obligations.

DEFENCE. On 14 March 1947 the Philippine and US Governments signed a 99-year military-base arrangement. The USA was granted the use of a series of army, navy and air bases, with the right to use a number of others on mutual agreement. On 21 March a second agreement provided for a US Military Advisory Group as well as military assistance. A treaty of mutual assistance was signed in Washington on 30 Aug. 1951; the instruments of ratification were exchanged in Manila on 27 Aug. 1952. The Philippines is also a signatory of the S.E. Asia Collective Defence Treaty (*see* pp. 44–46).

The Chief of Staff of the Armed Forces has overall command over the Army, Air Force, Navy and Constabulary.

Army. The Army consists of 18,000 officers and men in the active force. It is organized in 1 combat-ready division and 4 training divisions, equipped with M-24 and M-41 tanks.

Navy. The Navy includes 7 escort vessels, 3 command ships, 2 coastal minesweepers, 7 patrol vessels, 24 patrol boats, 4 hydrofoils, 6 landing ships, 10 auxiliary vessels, all *ex*-USA, and 15 coastguard vessels. Naval personnel in 1971 totalled 1,640 officers and 16,360 men, including Coast Guard and marine reserves.

Air Force. The Air Force has a strength of some 9,000 officers and men, with 188 aircraft, and has been built up with US assistance to meet its commitments to SEATO. Its fighter-bomber wing is equipped with 1 squadron of supersonic

F-5s and 2 squadrons of F-86F Sabre jets, and there is a squadron of F-86D Sabre all-weather fighters. There are also transport, observation, air/sea rescue and training units, flying aircraft of US design, including Japanese-built Mentor primary trainers (received as war reparations).

Police. Public order is maintained partly through the Philippine constabulary and partly through the local police forces. The constabulary now forms part of the Armed Forces.

AGRICULTURE. Of the total area of 29,741,290 hectares, 8,257,556 hectares are commercial forests; 4,102,021 hectares non-commercial forests; 11,210,050 hectares cultivated land; 662,447 hectares mangrove and marshes, 2,033,917 hectares brush land and 3,475,299 hectares open land.

About 98·4% of the total cultivated area is owned by Filipinos; the average size of the farm is 3·21 hectares. The principal products are unhusked rice (palay), Manila hemp (abaca), copra, sugar-cane, maize and tobacco. In Oct. 1966, 6·29m. persons were employed in agriculture (57·5% of the working population).

In 1968 production (in metric tons) was: Rough rice, 4·56m.; copra, 1·54m.; desiccated coconut, 56,300; sugar (muscovado), 1·66m.; molasses, 502,900; abaca fibre, 103,400.

Minor crops are fruits, nuts, root crops, vegetables, onions, beans, coffee, cacao, peanuts, ramie, rubber, maguey and kapok.

Livestock, estimated in 1968: 4,173,000 carabaos (water buffaloes), 1,643,800 cattle, 281,700 horses, 6,090,200 hogs, 623,500 goats; (1967) 1,750 sheep and 70·4m. poultry.

FORESTRY. The forests (covering 44·3% of the area, with an estimated stand of 416,400,000m. bd ft) furnish cabinet and construction timber, gums and resins, vegetable oils, rattan and bamboo, tan and dye barks and dye woods. About 97·5% of this belongs to the Government. In 1967, 3,637,199,000 bd ft of timber and 48,479,000 bd ft of sawn lumber was exported.

FISHERIES. Fish production from all sources was 937,684 metric tons and was valued at P.361,938,000 in 1968.

MINING. Mineral production in 1968–69 (in metric tons): Lead, 56; zinc, 2,824; copper, 117,973; manganese, 57,542; chromite, 463,618; iron, 1·47m.; coal, 61,540; salt, 161,606; molybdenum, 33; gypsum, 29,298; gold, 546,315 fine oz.; silver, 1·5m.; fine oz.; quicksilver, 3,505 flasks (of 76 lb.). Other minerals include cement, rock asphalt, sand and gravel.

INDUSTRY. Manufacturing is largely carried on in homes (chiefly embroidery, buntal hats, woven cloths, mats and pottery), but the number of factories has been fast increasing. In 1963 there were 17 coconut-oil mills, 102 cigar and cigarette factories, 8,215 rice-mills, 928 shoe factories, 25 sugar centrals, 6 cement plants and 17 hydro-electric plants. The non-agricultural labour force in Oct. 1966 was 4,646,000 out of a total of 10,936,000 employed.

ELECTRICITY. In 1968 the Manila Electric Company produced 3,853m. kwh. (3,431m. in 1967).

COMMERCE. The values of imports and exports for calendar years are stated as follows in 1m. pesos:

	1963	*1964*	*1965*	*1966*	*1967*	*1968*
Imports	2,487·1	3,106·7	3,236	3,398	4,125	4,470
Exports	2,812·6	3,046·4	3,100	3,423	3,477	3,752

The principal exports in 1968 were (in P.1m.): Copra, 530; sugar (centrifugal), 503; logs, lumber and timber, 892; abaca fibres, 48; coconut oil, 314; copper concentrates, 296; desiccated coconut, 120.

Main imports in 1968 (in P.1m.): Machinery, 894; mineral fuels and lubricants, 378; cereals, 162; dairy products, 148; transport equipment, 479; base metals, 428: electrical machinery and appliances, 254.

Owing to the commercializing of agriculture for export, foodstuffs have to be imported, representing normally from 15 to 20% of all imports, chiefly meat and fish products and wheat and dairy products from USA.

For over a half-century the foreign trade has been chiefly with the USA. The trade relationship of the two countries is governed by the Philippine Trade Act of 1946 as amended. American goods entering the Philippines now pay a tariff duty of 90% of the regular duty on other foreign goods to 31 Dec. 1973, and 100% from 1 Jan. 1974.

Philippine products entering the USA paid 10% of the US tariff in 1959–61. and pay 20% in 1962–64, 40% in 1965–67, 60% in 1968–70, 80% in 1971–73 and 100% from 1 Jan, 1974.

The Philippines exported to the USA goods valued at $437·1m. in 1968 and imported from the Philippines goods valued at $1,533·5m.

Total trade between the Philippines and UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	3,089	5,113	3,689	4,333	7,480	5,853
Exports and re-exports from UK	16,711	19,559	22,444	28,169	25,087	28,437

SHIPPING. In 1966, 2,303 vessels of 10,483,576 net tons entered and 2,323 vessels of 10,568,555 net tons cleared all ports. Of the vessels entering, 376 (2·1m. tons) were American, 395 (2·05m. tons) Norwegian, 446 (2·47m. tons) British and 1,086 (3·86m. tons) Filipino.

ROADS. In 1967 highways extended 56,180 km. In 1965 there were registered 303,300 motor vehicles of all types.

RAILWAYS. Railway tracks (1966), 1,026 km in Luzon. In 1964–65, 8,234,792 passengers and 918,973 metric tons of freight were carried by rail.

AVIATION. The Philippine Air Lines, Inc., with a capital of P.6m., in 1968 carried 2,298,196 passengers, 47·7m. lb. of cargo and 2·2m. lb. of mail.

POST. In 1965 there were in operation 1,414 post offices and 978 telecommunication stations. There were (1971) 309,922 telephones, of which 123,740 were in Manila; the Government operated 28,706 and private companies 197,654.

Licensed radio stations in 1964 numbered 5,153, including 904 ship stations and 145 aircraft stations.

BANKING. In 1966 there were 343 branches of commercial banks, 7 of them being overseas branches. Total deposits of the commercial banks in June 1967 were P.5,188·9m. In June 1967 the post office savings bank held deposits of P.60·4m.

Under a law passed 15 June 1948 the Central Bank of the Philippines was created to have sole control of the credit and monetary supply, independent of the Treasury. It has a capital of P.10m. furnished solely by the Government. Its total assets, as of 31 Dec. 1966, were P.3,373·3m.

POLAND

Polska Rzeczpospolita Ludowa

HISTORY. In 1966 Poland celebrated its millennium, but modern Polish history begins with the partitions of the once-powerful kingdom between Russia, Austria and Prussia in 1772, 1793 and 1795. After the creation by Napoleon I of a semi-independent Grand Duchy of Warsaw, the country was again partitioned at the Congress of Vienna in 1815 between Russia (Congress Poland), Austria and Prussia (Grand Duchy of Posen), and the free city of Cracow.

The Polish revolution of 1830–31 caused the suppression of the 1815 constitution and made 'Congress Poland' virtually a Russian province. The revolution of 1846–48 led to the incorporation of Cracow in Austria, the abolition of the Grand Duchy of Posen and further repression in 'Congress Poland', which was intensified after the revolution of 1863–64.

During the First World War Russian Poland was occupied by the Austro-German forces. On 10 Nov. 1918 independence was proclaimed by Józef Piłsudski, the founder of the Polish Legions during the war. On 28 June 1919 the Treaty of Versailles recognized the independence of Poland.

On 1 Sept. 1939 Germany invaded Poland, on 17 Sept. 1939 Russian troops entered eastern Poland, and on 29 Sept. 1939 the fourth partition of Poland took place. After the German attack on Russia, the Germans occupied the whole of Poland. War casualties and victims of German terror amounted to 6–7m. people. By March 1945 the country had been liberated by the Russians.

In July 1944 the USSR recognized the Polish Committee of National Liberation (*Polski Komitet Wyzwolenia Narodowego*) established in Lublin as an executive organ of the National Council of the Homeland (*Krajowa Rada Narodowa*). The Committee was transformed into the Provisional Government in Dec. 1944, and on 28 June 1945, supplemented by members of the Polish Government in London (which had been recognized by the UK and USA), it was re-established—in Moscow—as the Polish Provisional Government of National Unity and on 6 July recognized as such by the UK and USA.

Elections were held on 19 Jan. 1947. Of the 12·7m. votes cast, 11·24m. were recognized as valid, and 9m. were given for the Communist-dominated 'Democratic Bloc'.

In 1948 the Socialist and Communist parties merged into the Polish United Workers' Party. In 1949 the Peasants' Party and the Polish Peasants' Party merged into the United Peasants' Party. All parties form part of the Communist-controlled National Unity Front.

Relations between Poland and West Germany were normalized by a treaty of 7 Dec. 1970, by which West Germany recognized as permanent and inviolable Poland's western boundary as laid down by the Potsdam Conference on 2 Aug. 1945 (the 'Oder–Neisse line').

CONSTITUTION AND GOVERNMENT. The present Constitution was adopted on 22 July 1952.

After riots in Poznań in June 1956 nationalist anti-Stalinist elements gained control of the Communist Party in 1956, under the leadership of Władysław Gomułka, who had spent several years in prison for 'Titoist deviation'. Following student unrest in March 1968, the goverment carried out purges of Party and military personnel, intellectuals and 'Zionists'.

In Dec. 1970 strikes and riots broke out in the ports of Gdańsk, Szczecin and Gdynia in protest against steep rises in food prices. Despite savage repression the situation deteriorated and led to the resignation of a number of leaders including Gomułka. He was replaced by Edward Gierek (born 1913), formerly provincial Party secretary in Katowice, Silesia. The price increases were cancelled on 1 March 1971, a step made possible by credits from the USSR.

The titular head of state is the Chairman of the Council of State, Henryk Jabłoński, (replaced Józef Cyrankiewicz on 28 March 1972).

Supreme *de facto* power is in the hands of the Politburo of the Polish United Worker's (*i.e.*, Communist) Party, in March 1972 composed as follows: Edward Gierek, *First Secretary of the Central Committee*; Edward Babiuch; Piotr Jaroszewicz, *Chairman of the Council of Ministers* (*Prime Minister*); Władysław Kruczek, *Chairman, Central Council of Trade Unions*; Stefan Olszowski, *Foreign Minister*; Jan Szydlak; Zdisław Zandrarowski; Henryk Jabloński; Mieczysław Jagielski, *Deputy Prime Minister and President of the Planning Commission*; Gen. Wojciech Jaruzielski, *Minister of Defence*; Franciszek Szlachcic. Candidate members: Józef Kępa; Kazimierz Barcikowski; Zdzisław Grudzień; Stanisław Kania. Ministers not in the Politburo include: Jadeusz Olechowski (*Foreign Trade*); Wiesław Ociepka (*Interior*); Stefan Jędrychowski (*Finance*); Włodzimierz Berutowicz (*Justice*).

In 1970 the Polish United Workers' Party had 2·32m. members; the United Peasants' Party, 413,500, and the Democratic Party, 88,400.

The authority of the Polish People's Republic is vested in the Sejm, which is elected for 4 years by all citizens over 18. The Sejm elects a Council of State, composed of a Chairman, the Secretary and 14 members, including 4 vice-chairmen. It also elects the Council of Ministers. Local administration is carried out by People's Councils, elected for 4 years in provinces, districts, boroughs, towns and villages.

Elections for the Sejm were advanced from 1973 to 19 March 1972 to ratify political changes and revisions of the Constitution. The electorate numbered 22,313,851; of these 21,854,481 (97·94%) voted; the single list of the National Unity Front received 99·53% of the votes. The 460 seats were distributed as follows: 255 United Workers' Party, 117 United Peasants' Party, 39 Democratic Party, 49 independents, including 14 Catholic representatives. There were indications in 1971 that the Sejm was taking a more active role in policy-making.

National flag: White, red (horizontal).

National anthem: Jeszcze Polska nie zginęla (words by J. Wybicki, 1797; tune by M. Ogiński, 1796).

AREA AND POPULATION. The republic comprises an area of 312,700 sq. km (120,633 sq. miles), and a population (census 8 Dec. 1970) of 32,589,000 (15·8m. males; 17m. urban). Density 104 per sq. km.

Poland is administratively divided into 17 'voivodships' or provinces (*wojewodztwo*, plural *wojewodztwa*) and 5 cities of province status. These are subdivided into 322 rural and 74 urban districts. The capital is Warsaw (Warszawa).

Area (in sq. km) and population (in 1,000) on 8 Dec. 1970:

Province	Area	Population	Province	Area	Population
Warsaw City	446	1,308	Gdańsk (Danzig)	10,939	1,465
Warsaw	29,333	2,514	Koszalin	17,974	793

Olsztyn	21,023	978	Rzeszów	18,646	1,757

Population (in 1,000) of the largest towns (Dec. 1970):

Warsaw	1,308	Bydgoszcz	281	Radom	159
Łódź	762	Lublin	236	Chorzów	151
Kraków (Cracow)	583	Zabrze	197	Sosnowiec	145

Szczecin (Stettin)	337	Gliwice	171	Wałbrzych	125
Katowice	303	Białystok	167	Bielsko-Biała	106

Rate (per 1,000 persons) of live births, in 1970 (and 1969), was 16·7 (16·3); of deaths, 8·1 (8·1); marriages, 8·5 (8·3); divorces, 1 (1); infantile mortality, 33·4 (34·4).

The rate of natural growth has been declining (per 1,000): 1955, 19·5; 1969, 8·2; but there was a small upturn in 1970: 8·6. Expectation of life in 1966 was 66·8 years for males, 72·8 years for females. The population is young: average age in 1970, 27·5 years.

National minorities in 1963: 180,000 Ukranians, 165,000 Byelorussians, 31,000 Jews, 21,000 Slovaks, 10,000 Lithuanians.

In 1969, 10·33m. Poles lived abroad (6·5m. in USA, 1·4m. in USSR, 145,000 in UK). In 1970 there were 800 immigrants and 10,300 emigrants.

RELIGION. 95% of the population is Roman Catholic. Church–State relations are regulated by agreements of 14 April 1950 and 8 Dec. 1956. The Church has a university (Lublin), 48 seminaries and 16,000 'catechism posts'. It has the right to publish and propagate the faith. Relations have improved since 1971 with the advent of the Gierek government.

The archbishop of Warsaw and Gniezno is the primate of Poland (since 1948, Stefan Cardinal Wyszyński). The Vatican considers the archbishoprics of Lwów and Vilnius (incorporated in the USSR in 1940) as still being under Polish jurisdiction. There are 5 archbishoprics, 25 dioceses and 6,333 parishes. In 1967 there were 69 bishops, 17,931 priests, 3,281 monks, 28,054 nuns and 12,395 churches and chapels.

In 1967 the Vatican made the 4 bishops in the (formerly German) western territories apostolic administrators and created the archbishop of Cracow a second cardinal.

The Polish Orthodox Church, which broke away from Moscow after the Russian Revolution and received canonical status under the Patriarchate of Constantinople, in 1948 returned to Moscow obedience and was granted autocephaly. In Sept. 1967 it claimed 527,000 members in 2 dioceses with 215 parishes, under a Metropolitan.

Protestants are estimated at 140,000, including 100,909 Lutherans, 15,000 Methodists and Baptists, and 5,000 Reformed. There are also 21,870 Old Catholics in 41 parishes with headquarters at Płock and 56,646 'Polish Catholics'.

The number of Jews (in 1939 some 3·5m.), was estimated at 31,000 in 1963. At least 3m. perished under the Nazis.

EDUCATION. Basic education from 7 to 15 is free and compulsory. Optional free secondary education is then available in technical-vocational or general schools. In 1970–71 there were (teachers, 1969–70): Kindergartens, 8,921 with 498,600 pupils; primary schools, 26,126 with 5,257,000 pupils and 211,150 teachers; secondary schools, 858 with 401,300 pupils and 17,500 teachers; schools for the handicapped, 559 with 86,200 pupils; primary schools for adults, 389 with 46,800 pupils and 667 teachers; secondary schools for adults (including correspondence courses), 317 with 135,500 pupils and 1,600 teachers; vocational schools, 9,697 with 1,710,700 pupils and 63,800 teachers, and 85 institutions of higher education (9 universities, 19 polytechnics, 7 agricultural schools, 6 schools of economics, 9 teachers' training colleges, 10 medical academies, 5 schools of physical training, 16 academies of arts, 2 naval colleges and 2 theological academies) with 329,400 students (including 119,400 part-time and correspondence students) and 2,866 professors, 3,625 readers and 21,671 lecturers and assistants.

CINEMAS AND THEATRES. In 1970 there were 3,285 cinemas, 93 theatres and 37 concert halls.

NEWSPAPERS (1970). There are 55 papers of which *Trybuna Ludu* (People's Tribune) is the Party organ, and 1,745 periodicals.

SOCIAL WELFARE. In 1970 there were 672 hospitals with 204,300 beds,

66 tuberculosis sanatoria with 18,928 beds, 5,536 dispensaries and 2,530 health centres. There were 49,278 doctors and 13,591 dentists.

JUSTICE. The legal system was reorganized in 1950. A new penal code was adopted in 1969. Espionage and treason carry the severest penalties and severer punishment is provided for 'serious crimes'. For minor crimes there is more provision for probation sentences and fines. Previous jurisprudence was based on a penal code of 1932 supplemented by the Concise Penal Code of 1946.

There exist the following courts: The Supreme Court; voivodship, district and special courts. Judges and lay assessors are elected. The State Council elects the judges of the Supreme Court for a term of 5 years, and appoints the Prosecutor-General. The office of the Prosecutor-General is separate from the judiciary.

Lawyers belong to 'legal collectives'; private practice has been abolished.

399,678 crimes were reported in 1969, including 415 cases of homicide, 203,828 of larceny and 2,653 of 'speculation'.

FINANCE. Currency. The currency unit is the *złoty*, divided into 100 *groszy* From 30 Oct. 1950 to 31 Dec. 1960 the zloty equalled the Soviet rouble, but with the revaluation of the rouble on 1 Jan. 1961, the basic relation changed to 1 rouble = 4·44 zlotys and, for non-trade transactions within the Soviet bloc, to 1 rouble = 1·5 zlotys. The currency consists of notes of 5, 10, 20, 50, 100, 500 and, since 1 June 1966, 1,000 zlotys; and of coins of 1 grosz, 2, 5, 10, 20 and 50 groszy and 1, 2, 5 and 10 zlotys. The official rate of exchange is £1 sterling = 9·60 zlotys, US$1 = 4 zlotys. Tourist rates; £1 = 57·46 zlotys, US$1 = 24 zlotys.

Budget. Budget in 1m. zlotys, for calendar years:

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Revenue	326,700	326,700	329,700	357,600	389,600	379,400
Expenditure	318,300	326,400	326,200	351,000	378,800	376,600

Main items of 1970 revenue (in 1m. zlotys): Sales tax and profits tax from state enterprises, 308,100; social insurance contributions, 20,800; personal taxes, 24,900; taxes from the private economic sector (mainly agriculture), 10,600.

Main items of 1970 expenditure (in 1m. zlotys): State enterprises, 182,500; social security, 16,600; education, 70,400; defence, 35,300; administration, 17,500.

Polish debts to UK have been fully repaid. Poland does not accept liability for the £495,000 debts of Danzig.

DEFENCE. Poland is divided into 3 military districts: Warsaw (the eastern half of Poland); Pomerania (Baltic coast, part of central Poland; headquarters at Bydgoszcz); Silesia (Silesia and southern Poland; headquarters at Wrocław).

The armed forces are on Soviet lines and divided into army (2 years' service), air force (3 years), navy (3 years), anti-aircraft, rocket and radio-technological units (3 years) and internal security forces (27 months). In 1965 the security forces were taken away from the Ministry of Internal Affairs and placed under the Defence Ministry.

The military age extends from the 19th to the 50th year. The strength of the armed forces is estimated at 275,000, plus 45,000 security and frontier forces both of which include armoured brigades.

Army. The Army consists of 5 armoured, 9 motorized and 1 airborne divisions. Total strength, 185,000. Tanks (mostly T-54) number 3,000.

Navy. The Navy comprises 5 submarines, 3 destroyers, 24 fleet minesweepers, 8 patrol vessels, 12 missile craft, 38 patrol boats, 20 torpedo boats, 16 landing ships, 8 training ships, 27 minesweeping boats, 6 surveying vessels, 7 oilers and 12 auxiliaries. It has 50 naval aircraft (mostly MiG-17). Personnel in 1971 totalled 20,000 officers and men.

Air Force. The Air Force has a strength of some 55,000 officers and men and

750 first-line jet aircraft of Soviet design. Six interceptor and fighter-bomber divisions each comprise 3 wings (of 2 or 3 squadrons each) of MiG-21, MiG-19 and MiG-17 fighters. Tactical attack wings operate mainly Sukhoi Su-7B and MiG-17 close-support fighters. Another fighter division (2 wings) supports the Navy. There are also reconnaissance, transport, helicopter and training units. Soviet 'Guideline' surface-to-air missiles are operational.

Some 30,000 Soviet troops (2 divisions, 1 armoured) were stationed in Poland in 1969.

PRODUCTION. Before 1940 Poland was a predominantly agricultural country, but by 1970 only 29·5% of the population made a living by agriculture. In the mid-1960s some steps were taken towards decentralizing the economy: funds were made available to enterprises proportional to labour inputs, and profits are maximized at a planned output level. Major investments are decided upon and supervised by the Government. Industrial undertakings employing over 50 workers are under the control of Central Industrial Boards. Workers participate in the management of industrial undertakings through 'workers' self-management councils' (*konferencje samorządu robotniczego*), of which there were 8,586 in 1970 with 262,459 members.

PLANNING. The plan for 1971–75 was revised as a result of the crisis of Dec. 1970 (*see* p. 1246) to give greater emphasis to consumer goods, production, housing and social services. Planned growth of national income is 38–39% (over 1970), and it is assumed that consumption and personal incomes will increase at the same rate. Investments will amount to 1·29m. zlotys. Industrial output is expected to grow by 48–50%, agriculture by 18–21%.

AGRICULTURE AND FORESTRY. In 1970 there were 19·5m. hectares of agricultural land, of which 16·3m. were in private hands, 0·2m. in co-operatives, 2·9m. in state farms. Private holdings average 5 hectares, and may not exceed 50 hectares. Incentives to encourage production and the formation of larger, more efficient holdings were announced in 1971: the abolition of compulsory deliveries to the State, the extension of full social insurance benefits to farmers and tax concessions to purchasers of land. Farmers, on retiring, are encouraged to turn over their private plots to state farms in exchange for a pension. 15m. hectares were arable, 0·2m. orchards, 2·5m. meadows, 1·7m. pasture lands; 8m. hectares were forests (82% coniferous). 113,500 hectares were afforested in 1970, and 18·4m. cu. metres of timber gained.

Collectivization has been abandoned; there were only 1,096 co-operatives in 1970. A new approach is being tried with 'agricultural circles' (35,000 with 2·6m. members in 1970). In 1970 there were 5,374 state farms.

	Area (1,000 hectares)			Yield (1,000 metric tons)		
Crops	*1965*	*1969*	*1970*	*1965*	*1969*	*1970*
Wheat	1,660	1,965	1,985	3,422	4,700	4,600
Rye	4,494	4,174	3,413	8,289	8,200	5,500
Barley	1,349	759	924	1,468	1,900	2,100
Oats	1,349	1,367	1,531	2,541	3,100	3,200

Sugar-beet	476	409	..	12,314	11,300	12,700

Livestock (1970): 10·8m. cattle (6m. cows), 13·4m. pigs, 3·2m. sheep, 2·6m. horses, 87·6m. poultry. Milk production in 1970 was 14,500m. litres.

Tractors in use in 1970: 273,200 (in 15-h.p. units).

FISHERIES. In 1970 the fishing fleet numbered 696 vessels totalling 243,100 GRT. The catch was 449,400 metric tons.

In 1966 Poland joined the Fisheries Convention of 1964, extending the fishing limits from 3 to 12 miles.

INDUSTRY. Production in 1969 (and 1970) (in 1,000 metric tons): Coke, 16,200 (16,500); pig-iron, 7,028 (7,296); crude steel, 11,291 (11,792); rolled steel,

7,655 (8,134); cement, 11,830 (12,128); sulphuric acid (100%), 1,516 (1,917); nitrogenous fertilizers, 938 (1,031); phosphoric fertilizers, 534 (600); aluminium, 96·8 (98·8); electrolytic copper, 54·7 (72·2); lead, 50·7 (54·5); zinc, 208 (209); crude oil, 439 (424); salt, 2,817 (2,903); sugar, 1,551 (1,388); electricity, 60,100m. kwh. (64,500m.); natural gas, 3,920m. cu. metres (5,182m.). In 1970, 57 ships were built and 56,900 passenger cars.

Output of light industry in 1969 (and 1970): Cotton fabrics, 846m. metres (880); woollen fabrics, 98·1m. metres (98·9); silk fabrics, 152m. metres (156); linen and hemp fabrics, 121m. metres (128); leather shoes, 68·4m. pairs (68·3); soap, 83,600 metric tons (75,900); paper, 702,000 metric tons (772,000).

MINING. Poland is a leading copper producer with reserves of some 10m. metric tons. There are also iron ore, lead and zinc. Coal reserves are estimated at 71,000m. metric tons. Production in 1970 (in 1,000 metric tons): Coal, 140,000; brown coal, 32,800; copper ore, 6,552; iron ore, 2,553; zinc–lead ores, 3,583.

LABOUR. Atypically in Communist Eastern Europe, there is serious unemployment, largely the result of a 'population explosion' in the early 1950s.

Total number employed in 1970: 10·1m., of which 431,000 were in private industry. Industrial workers numbered 4,263,000; building workers, 1,075,000. Total number of women employed; 3,869,600 (excluding the private sector, in which were employed some 121,000 in 1969). Trade unions had a membership of 9·7m. in 1969 (including 3·7m. women). Monthly wage: legal minimum, 1,000 zlotys; average earnings (1970), 2,459 zlotys.

COMMERCE. Trade statistics for calendar years (in 1m. zlotys):

	1965	*1967*	*1968*	*1969*	*1970*
Imports	9,361	10,579	11,412	12,839	14,430
Exports	8,911	10,106	11,431	12,566	14,191

Main imports in 1970 (in metric tons): Iron ore, 11·8m.; petroleum and products, 9·4m.; fertilizers, 4·4m.; wheat, 1m.; coking coal, 1m.; motor vehicles, 24,000 units.

Main exports in 1970 (in metric tons): Coal, 28·8m.; lignite, 4m.; coke, 2·3m.; fertilizers, 458,100; ships, 402,000 dead-weight tons.

65% of Poland's trade is with Communist countries. UK is Poland's fourth largest trade partner after USSR, East Germany and Czechoslovakia.

A Soviet–Polish trade agreement for 1971–75 was signed on 29 Dec. 1970. Soviet credits have been available to enable the government to keep prices down. Soviet exports are to include raw materials, chemicals, food and machinery; Polish, machinery, ships and consumer goods.

Total trade between Poland and UK for 5 years (according to British Board of Trade returns) was (in £1,000 sterling):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	56,100	60,469	57,001	63,025	59,869
Exports and re-exports from UK	48,834	44,635	55,079	59,695	64,282

An Anglo-Polish trade agreement for 1971–74 was signed on 21 April 1971. It contains the 'most favoured nation' clause on both sides in accordance with GATT principles, and envisages the lifting of UK import restrictions by 1974, and the mutual promotion of industrial co-operation. UK imports of machinery will be increased.

SHIPPING. The principal ports are Gdynia, Gdańsk (Danzig) and Szczecin (Stettin). The merchant marine is grouped into Polish Ocean Lines, based on Gdynia and operating regular liner services, and the Polish Shipping Company based on Szczecin and operating cargo services. There are 6,855 km of inland waterways.

In 1970 the merchant marine had 259 vessels totalling 1,318,872 GRT (including 30 vessels over 10,000 tons). There are regular lines to London, Hull,

China, Indonesia, Australia, North Vietnam and some African and Latin American countries.

Total shipping entering Polish ports in 1970 was 11,491 vessels of 15·6m. NRT.

Freight traffic in 1970 was 17·6m. metric tons.

ROADS. In 1970 Poland had 130,444 km of hard-surfaced roads. Number of motor vehicles: Passenger cars, 454,893 (of which 395,589 private); lorries, 259,071 (23,465 private); motor cycles, 1,742,711 (1,736,595 private).

In 1970 state and co-operative road transport carried 1,356m. passengers and 1,021m. metric tons of freight.

RAILWAYS. The length of the standard gauge railway system was (1970) 23,196 km (3,872 km electrified); of narrow gauge, 3,367 km. In 1970 the railways carried 382·3m. tons of freight and 105·6m. passengers.

Wireless licences in 1970 numbered 5·66m.; television licences, 4·22m. There are 21 television broadcasting stations and 2 channels.

BANKING. The banking system was reorganized in 1948. The National Bank of Poland (established 1945) is the central bank, has exclusive authority to issue currency, is charged with control of money and credit, and has responsibility for financial implementation of the national economic plan. Since its merger with the former Investment Bank in 1 Jan. 1970 it exercises centralized control over investment financing.

The Agricultural Bank (Bank Rolny) has exclusive responsibility for direct financing of rural areas through both short-term and investment loans. It operates through a comprehensive network of branch offices and communal co-operative banks. The General Savings Bank (Powszechna Kasa Oszczędności) exercises central control over savings activities, transfers and checking transactions, including activities of workers' co-operative banks.

In addition to the National Bank of Poland, other authorized foreign-exchange banks are: Bank for the National Economy, the Polish Welfare Bank (Bank Polska Kasa Opieki SA) and the Commercial Bank of Warsaw (Bank Handlowy w Warszawie SA).

Deposits in savings institutions amounted to 133,801m. zlotys on 31 Dec. 1970.

PORTUGAL

República Portuguesa

CONSTITUTION AND GOVERNMENT. Portugal has been an independent state since the 12th century; until 1910 it was a monarchy. The last King was Manuel II of the house of Braganza-Coburg, born 15 Nov. 1889, died 2 July 1932. On 5 Oct. 1910 the republic was proclaimed with Dr Teófilo Braga as the provisional president (5 Oct. 1910 to 24 Aug. 1911). Thereafter there were duly elected presidents, as follows:

Dr Manuel de Arriaga, 24 Aug. 1911–29 May 1915.[1]
Dr Joaquim Teófilo Braga, 29 May 1915–5 Oct. 1915.
Dr Bernardino Luís Machado Guimarães, 5 Oct. 1915–11 Dec. 1917.[2]
Dr Sidonio Bernardino Cardoso da Silva Pais, 11 Dec. 1917–14 Dec. 1918.[3]
Adm. João de Canto e Castro Silva Antunes, 16 Dec. 1918–5 Oct. 1919.
Dr António José de Almeida, 5 Oct. 1919–5 Oct. 1923.
Manuel Teixeira Gomes, 5 Oct. 1923–11 Dec. 1925.[1]
Dr Bernardino Luís Machado Guimarães, 11 Dec. 1925–1 June 1926.[1]
Provisional government, 1 June–29 Nov. 1926.
Marshal António Oscar Fragoso Carmona, 29 Nov. 1926–18 April 1951.
Marshal Francisco Higino Craveiro Lopes, 22 July 1951–9 Aug. 1958.

[1] Resigned. [2] Deposed. [3] Assassinated.

President of the Republic: Rear-Adm. Américo de Deus Rodrigues Tomás; born 19 Nov. 1894 (elected 22 July 1958; assumed office 9 Aug. 1958; re-elected 9 Aug. 1965).

National flag: Green, red (vertical).
National anthem: A Portuguesa (words by Lopes de Mendonça, 1890; tune by Alfredo Keil).

On 19 March 1933 the present constitution, which declares that the Portuguese state is a unitary and corporative republic, was adopted by plebiscite. The latest amendment to the constitution was passed on 29 Aug. 1959. The president is to

be elected for 7 years by an electoral college, constituted of members of the National Assembly and the Corporative Chamber, with representatives of municipalities and oversea legislative councils.

The National Assembly (one chamber) of 130 Deputies is elected for 4 years by direct suffrage. Angola and Moçambique are represented by 7 deputies each, India by 3, Cape Verde by 2, Guinea, S. Tomé and Principe, Macao, Timor by 1 each.

At the elections in Nov. 1965 only government candidates stood for re-election.

A State Council composed of the Prime Minister, the Presidents of the National Assembly, the Corporative Chamber and the Supreme Court, the Public Prosecutor and 10 other members assists the President of the Republic. A Corporative Chamber functions alongside the National Assembly.

The Cabinet was on 6 Dec. 1970 composed as follows:

Prime Minister: Dr Marcello José das Neves Alves Caetano.
Foreign Affairs: Dr Rui Manuel de Maedeiros d'Espiney Patricio.
Defence: Gen. Horácio José de Sá Viana Rebelo.
Interior: Dr António Manuel Gonçalves Rapazote.
Justice: Dr Mário Júlio Brito de Almeida Costa.
Finance: Dr João Augusto Dias Rosas.
Army: Gen. Horácio José de Sá Viana Rebelo.
Marine: Cdr Manuel Pereira Crespo.
Public Works: Rui Alves da Silva Sanches.
Overseas Provinces: Dr Joaquim Moreira da Silva Cunha.
Education: Dr José Veiga Simão.
Communications: Rui Alves da Silva Sanches.
National Economy: Dr João Augusto Dias Rosas.
Corporation and Social Security, Health and Welfare: Dr Baltasar Leite Rebelo de Sousa.
Ministry of the Presidency: Dr João Mota Pereira de Campos.

[1] 34,861 sq. miles.

In 1960 the population consisted of 4,254,416 males and 4,634,976 females, or 109 females to every 100 males.

The Azores islands are divided into 3 widely separated groups, with clear channels between, São Miguel together with Santa Maria being in the most easterly. About 100 miles north-west of them lies the central cluster of Terceira, Graciosa, São Jorge, Pico and Faial. Still another 150 miles to the north-west are Flores and Corvo, the latter being the most isolated and primitive of the islands. São Miguel, Terceira and Pico are the largest, the first measuring 41 miles in length and 9 in breadth, and containing over half the total population of the archipelago. For political and administrative purposes they are divided into 3 districts, each sending its representatives to the Chamber at Lisbon. The capitals of the 3 districts are the chief seaports, Ponta Delgada on São Miguel Island, Horta on Faial Island and Angra do Heroísmo on Terceira Island.

VITAL STATISTICS for calendar years:

	Births	Still-births	Marriages	Divorces	Deaths	Emigrants
1968	194,962	5,769	76,553	743	94,661	80,452

1970	172,891	4,963	81,461	509	93,093	66,360

In 1970 the births included 89,246 (1969: 98,054) boys and 83,465 (91,685) girls; the deaths, 47,364 (51,611) males and 45,729 (49,477) females.

At the census of 15 Dec. 1960 the population of Lisbon was 802,230 (metropolitan area, 1,034,141); Oporto, 303,424 (metropolitan area, 693,170); Vila Nova de Gaia, 45,739; Coimbra, 46,313; Setúbal, 44,435; Braga, 40,977; Amadora, 36,331; Matosinhos, 37,694; Almada, 30,688; Barreiro, 30,399; Évora, 24,144; Guimarães, 23,229; Covilhã, 23,091; Moscavide, 22,065; Faro, 18,909.

In 1970, 1,669 emigrants went to Brazil and 9,726 to USA.

RELIGION. The predominant faith is the Roman Catholic, but there is freedom of worship, both in public and private, with the exception of creeds incompatible with morals and the life and physical integrity of the people.

On 7 May 1940 a Concordat and a Missionary Agreement with the Vatican were signed. The Concordat recognizes the lawful existence of the Catholic Church and the exercise of its spiritual mission according to the Canon Law. Religious marriages, duly notified to the Registrar's Office, are recognized, and divorce is forbidden to parties married by the Church. Church property which had come into the possession of the State is restored, except that used for public services or classified as immovable property of public interest, or national monuments.

The Missionary Agreement regulates religious activities in the Overseas Provinces. Since the 16th century, Portugal has had the privilege of the Roman Catholic jurisdiction in the Orient (Padroado), which had by 1950 been reduced to Portuguese India and part of India; agreements of 18 July 1950 and 25 Sept. 1953 adapted the Concordat to the changed political situation in India.

Portuguese territory is divided into 6 ecclesiastical provinces, with their sees at Lisbon, Braga, Évora, Goa (India), Luanda (Angola) and Lourenço Marques (Moçambique). The Archbishop of Lisbon (Patriarch since 1716 and Cardinal since 1737) has suffragans in Guarda, Leiria and Portalegre-Castelo Branco on the continent; Angra do Heroísmo and Funchal in the adjacent islands, and Cape Verde in Africa. The Archbishop of Braga (Primate of the Iberian Peninsula) has as suffragans: Aveiro, Bragança, Coimbra, Lamego, Oporto, Vila Real and Viseu. The Archbishop of Évora has 2 suffragans: Beja and Faro.

By the concordat of 1940 the metropolitan sees of Luanda (Angola) and Lourenço Marques (Moçambique) were created. The former has as suffragans, besides the see of S. Tomé, the 7 new dioceses of Nova Lisboa, Silva Porto, Sá da Bandeira, Malange, Luso, Carmona–S. Salvador and Benguela; the second has as suffragans the 8 new dioceses of Beira, Inhambane, Nampula, Quelimane, Porto Amélia, Tete, Vila Cabral and Vila Pery. The Archbishop of Goa and Damão (who also holds the titles of Archbishop of Cranganor, Primate of the East and

Patriarch of Eastern India) has jurisdiction over the diocese of Goa. The privilege of the Far East is constituted by the suffragan sees of Macao, with the vicariates of Shiu-Hing, Singapore and Malacca, and Dili (Timor). The province of Guinea is an Apostolic Prefecture.

EDUCATION. According to the latest statistics, 70% of the population over 7 years could read and write. Compulsory education has been in force since 1911. In 1969–70 there were 16,439 public primary schools with 937,758 pupils and 27,664 teachers. Private elementary schools numbered 751 with 51,918 pupils and 2,089 teachers. Secondary preparatory schools numbered 1,164 with 138,564 pupils. Secondary instruction is supplied in two types of schools: in the *liceus* and other grammar schools, and in schools of technical instruction. In 1969–70 there were 51 *liceus* and 387 institutions of *liceu* standard, with 120,373 pupils, and 277 professional and technical secondary schools, with 134,122 pupils. For higher education there are 3 universities; at Lisbon (founded in 1911), Coimbra (founded 1290) and Oporto (founded 1911). In 1969–70 the number of students at the universities was 31,982; and the Technical University at Lisbon (founded in 1930) had 7,756 students. There are also a military and a naval school, art schools in Lisbon and Oporto (1,868 students) and 8 colleges of music (111 students).

CINEMAS (1970). There were 485 cinemas with a seating capacity of 273,281.

NEWSPAPERS (1970). There were 33 daily newspapers with a combined circulation of 260,425; 10 of these, with a combined circulation of 189,846, appeared in Lisbon.

JUSTICE. Portuguese law distinguishes civil (including commercial) and penal, labour, administrative and fiscal law, each branch having its lower courts, courts of appeal and the Supreme Court.

The republic is divided for civil and penal cases into 171 *comarcas*; in every comarca there is a lower court. In the comarca of Lisbon there are 33 lower courts (16 for criminal procedure and 17 for civil or commercial cases); in the comarca of Oporto there are 17 lower courts (8 for criminal and 9 for civil or commercial cases); at Braga, Setúbal, Guimarães, Santarém, Leiria, Aveiro, Viseu, Almada, Feira, Anadia, Cascais and Funchal there are 2 courts; at Coimbra there are 3 courts. There are 3 courts of appeal (Tribunal de Relação) at Lisbon, Coimbra and Oporto, and a Supreme Court in Lisbon (Supremo Tribunal de Justiça). There are also 33 municipal courts, which are lower courts, similar to those of the comarcas; their jurisdiction is, however, limited.

Capital punishment is abolished, except, in the case of war, by court martial.

The prison population as at 31 Dec. 1970 was 7,281.

FINANCE. Currency. The unit of currency is the *escudo* of 100 *centavos*, which contains 0·66567 gramme of fine gold. It was stabilized on 9 June 1931, and the paper currency re-linked to gold when the notes of the Bank of Portugal became payable in gold or its equivalent in foreign currency. When Great Britain devalued the £ in Nov. 1967, Portugal fixed the value at 67·71 escudos = £1 sterling. 1,000 escudos is called a *conto*.

At present there are silver coins of 50, 20, 10 and 5 escudos; 5 and 2½ escudos (nickel and copper); Alpaca coins of 1 and ½ escudo (50 centavos), and bronze coins of 1 and ½ escudo and 20 and 10 centavos. The 20- and 10-centavo coins, issued in 1943, were made of an alloy of 95% copper, 3% zinc and 2% tin.

Navy. The Navy comprises 4 submarines, 10 frigates, 5 corvettes, 4 ocean minesweepers, 1 minesweeping trawler, 14 patrol vessels, 12 coastal minesweepers,

47 patrol launches, 1 sail training ship, 6 surveying vessels, 4 landing craft, 1 fleet oiler, 1 lighthouse tender, 2 depot ships, 5 large, 58 small landing craft, and 2 support ships. The navy personnel in 1971 totalled 1,700 officers and 16,600 men including marines.

Air Force. Formed in 1912, the Air Force has been independent since 1952, when it was combined with the naval air service and given equal status with the Army and Navy. In 1971 it had a strength of about 21,000 officers and men, with some 750 aircraft. It contributes 1 maritime reconnaissance squadron to NATO.

Portugal is divided into 3 air regions, with headquarters in Lisbon, Luanda and Lourenço Marques.

In 1971 the Air Force comprised 1 interceptor squadron (F-86F Sabre jets), 1 fighter-bomber squadron (F-84G), 2 light-strike squadrons (G-91Rs), 1 bombing squadron of obsolescent PV-2 Harpoon piston-engined aircraft, 1 ASW reconnaissance squadron (P2V-5 Neptune), a military air transport service (Noratlas, C-47, C-54 and DC-6) and a number of light attack and counter-insurgency units equipped with armed T-6 aircraft and Alouette III and Puma helicopters. Other aircraft in service include Chipmunk, T-6 and Do 27 piston-engined trainers and liaison aircraft, T-37C jet trainers and T-33 jet advanced trainers, and 3 Boeing 707 long-range jet transports.

There is a paratroop regiment of 4,000, which comes under Air Force command.

DEVELOPMENT. During the first 6-year plan (1953–58), 16·5m. contos were invested (11·6m. in metropolitan Portugal, 4·9m. in the overseas provinces). The second 6-year plan (1959–64) envisaged investments of 31m. contos (22m. in metropolitan Portugal, 9m. overseas). The interim plan 1965–67 envisaged expenditures of 34·78m. contos in metropolitan Portugal and 14·4m. contos overseas. The third 6-year plan (1968–73) envisages investments of 122m. contos in metropolitan Portugal and 46·5m. in the overseas provinces. The main items in metropolitan Portugal are industry (30·85m.), transport and communications (27·1m.), energy (17·9m.), agriculture and forestry (14·6m.) and tourism (11·85m.).

AGRICULTURE. The following figures show the area (in hectares) and yield (in metric tons) of the chief crops:

Wine production, 1970, 11,327,605 hectolitres, and olive oil, 1970, 687,476 hectolitres. In 1955, 228,996 hectolitres of port wine were exported; 1960, 211,560; 1967, 303,324; 1968, 337,986; 1969, 327,207; 1970, 352,090.

Livestock. In 1968 Portugal (continental only) possessed 26,654 horses, 92,986 mules, 156,869 asses, 950,264 cattle, 530,680 goats and 1,514,652 pigs.

FORESTRY. The forest area covers 3·2m. hectares, of which 1·41m. are pine, 758,000 cork oak, 704,000 other oak, 75,000 chestnut, 155,000 eucalyptus and 135,000 other species.

Portugal surpasses the rest of the world in the production of cork (1968, 197,152; 1969, 163,490; 1970, 132,308 metric tons). Most of it is exported crude; exports of cork and cork products totalled 139,208 metric tons in 1968; 152,070 in 1969; 147,002 in 1970. Production of resin (in metric tons) was 91,369 in 1967; 91,954 in 1968; 93,562 in 1969; 106,625 in 1970, more than two-thirds are exported. Exports of turpentine (in metric tons) were 14,014 in 1968; 5,692 in 1969; 6,908 in 1970.

FISHERIES. The fishing industry is of importance. At 31 July 1970 there were 35,304 men and boys employed, with 9,964 boats. The sardine catch, 1970, was 69,214 metric tons valued at 346,702 contos; 1969, 64,133 metric tons valued at 387,441 contos; 1968, 79,645 metric tons valued at 362,989 contos; 1967, 114,817 metric tons valued at 381,313 contos. Exports of tinned sardines (in metric tons) amounted to 52,016 in 1967, 45,999 in 1968, 30,898 in 1969, 23,328 in 1970. The most important centres of the sardine industry are at Matosinhos, Setúbal, Portimão and Olhão.

MINING. Portugal possesses considerable mineral wealth. Production in metric tons:

SHIPPING. In 1970, 16,314 vessels of 56,078,204 tons entered the ports (continental and islands). Of those entering 7,108 (15,303,010 tons) were Portuguese, 796 (7,304,603 tons) British and 911 (1,998,581 tons) Spanish. On 31 Dec. 1970 the merchant marine consisted of 142 transport vessels of 693,614 tons.

RAILWAYS. A decree of 9 May 1951, based on the law of 7 Sept. 1945, merged all leases and concessions in a single concession for all Portuguese railways, granted to the *Companhia dos Caminhos de Ferro Portugueses*, except the Estoril railway (Lisbon–Cascais), of 26 km length. In 1970 total railway length was 3,563 km. (5 ft 6 in. and metre gauges). In 1970, 144,757,000 passengers were carried and 3,927,000 tons of merchandise transported.

ROADS (1970). There were 30,165 km of road. There were registered in continental Portugal in 1970, 756,608 motor vehicles, including 59,022 motor cycles and 37,903 tractors; not counting vehicles used by the armed forces.

AVIATION. Regular services connect Lisbon with Brussels, Johannesburg, New York, Madrid, Paris, London, Frankfurt, Rio de Janeiro and the overseas provinces. These lines in 1970 carried 1·11m. passengers and 11,927 metric tons of freight. The Azores are served by airlines between S. Miguel, Sta Maria and Terceira, carrying, in 1966, 35,072 passengers and 176 metric tons of freight.

POST (1970). The length of telegraph lines was 175,111 km; number of offices, 1,715. The state owned 1,356,412 km of telephone line and the *Telefones de Lisboa e Porto* owned 1,347,504 km of lines. Number of telephones was 749,963, of which 236,252 were government-owned.

Cable and Wireless, Ltd, operate in Portugal (Carcavelos), the Azores, Madeira and Cape Verde Islands, connecting Portugal with Great Britain, North and South America, and West and South Africa.

BANKING. The one bank of issue for the mainland of the country and adjacent islands is the Bank of Portugal, founded 19 Nov. 1846. By decree of 29 June 1962, its constitution was modified and its privileges were prolonged until 30 June 1991. The capital of the bank was fixed at 200m. escudos. The bank is the treasury of the State, and its reserve must be not less than 50% of the total amount of its notes in circulation and other sight liabilities. Not less than 25% of the amount of the notes in circulation and other sight liabilities must be represented by gold (coin or bullion). The bank issues notes of 1,000, 500, 100, 50 and 20 escudos. Its gold and foreign exchange reserves were 28,856m. escudos on 31 July 1971. The notes in circulation amounted to 33,302m. escudos.

The National Development Bank began operations on 4 Jan. 1960. Of its total capital of 1,000m. escudos, 650m. have been subscribed by the Government and 75m. by the Bank of Angola.

There are 24 banks registered on the mainland and 1 in the islands, with cash in hand on 31 Dec. 1970, 28,077m. escudos; bills, 72,972m. escudos; deposits, 124,261m. escudos. The deposits in the savings banks and general deposit bank (state) amounted to 32,997m. escudos.

OVERSEAS TERRITORIES

By law no. 2.048 of 11 June 1951 the status of the Portuguese overseas possessions was changed from 'colonies' to 'overseas territories'. Each one has a Governor and enjoys financial and administrative autonomy. Their budgets are under approval of the Minister for the Overseas Territories. They are not allowed to contract public loans in foreign countries.

On 6 Sept. 1961 all Africans were given full Portuguese citizenship, thereby achieving the same status as the inhabitants of Portuguese India and the other provinces.

All customs duties between Portugal and the overseas provinces were abolished with effect from 1 Jan. 1964.

CAPE VERDE ISLANDS

The Cape Verde Islands were discovered in 1460 by Diogo Gomes, the first settlers arriving in 1462. In 1587 its administration was unified under a governor.

The territory consists of 10 islands and 5 islets which are administered by a Governor, whose seat is at Praia, the capital. The islands are divided into 2 groups, named Barlavento (windward) and Sotavento (leeward), the prevailing wind being north-east. The former is constituted by the islands of São Vicente, Santo Antão, São Nicolau, Santa Luzia, Sal and Boa Vista, and the small islands named Branco and Raso. The latter is constituted by the islands of Santiago, Maio, Fogo and Brava, and the small islands named Rei and Rombo. São Vicente is an oiling station which supplies all navigation to South America. The total area is 4,033 sq. km (1,557 sq. miles). The population (census, 1970) was 272,071. There were, in 1969–70, 332 primary schools (40,685 pupils), 7 secondary schools (799 pupils), 2 technical schools (302 pupils) and a church school (69 pupils).

The chief products are bananas, salt, tunny, coffee, nuts and pozzolana. The coffee is of excellent quality; exports in 1970 were 1 metric ton. In 1970 there were 8,072 goats, 4,207 cattle, 3,512 pigs and 2,236 asses. The revenue in 1969 was 302,969,000 escudos and expenditure was 275,933,000 escudos; public debt, 853,069,000 escudos. Imports, in 1970, 469,418 contos (special commerce); exports, 47,731 contos (special commerce).

In 1970, 5,194 steamers entered the ports of the province; total shipping, 8,047,102 net tons. There were 984 km of roads in 1970. There is an airport at Ilha do Sal.

There are British and American consular representatives at São Vicente.

Governor: Brig.-Gen. Antonio Lopes dos Santos.

PORTUGUESE GUINEA

Portuguese Guinea, on the coast of Guinea, was discovered in 1446 by Nuno Tristão. It became a separate colony in 1879. It is bounded by the limits fixed by the convention of 12 May 1886 with France, and is bounded by Senegal in the north and by Guinea in the east and south. It includes the adjacent archipelago of Bijagoz, with the island of Bolama. The capital is, since 1942, Bissau. Area is 36,125 sq. km (13,948 sq. miles); population (census, 1970), 487,448. There were, in 1969–70, 242 primary schools with 26,401 pupils; 3 technical schools with 346 pupils and a secondary school with 394 pupils.

Chief products are rice, palm-oil, groundnuts, coconuts, timber, hides, seeds, wax. The revenue in 1969 was 451,583, the expenditure 391,819 and the public debt 375,731 contos. Imports in 1970, 775,035 contos; exports, 89,814 contos (special commerce). The chief port is Bissau. Other ports are Bolama and Cacheu. In 1969, 107 vessels of 194,661 net tons entered the ports of the province. There are (1968) 3,360 km of roads and (1971) 1,969 telephones.

Governor: Gen. António Sebastião Ribeiro Spínola.
British Consul-General: A. G. Battle (resident at Lisbon).

SÃO TOMÉ E PRINCIPE

The islands of S. Tomé and Principe, which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471 by Pedro Escobar and João Gomes, and since 1522 constitute a province under a Governor. The

province also includes the islands of Pedras Tinhosas and Rolas; the fort of St Jean Baptiste d'Ajudá on the coast was annexed by the Dahomey republic on 1 Aug. 1961. Area of the islands 964 sq. km (372 sq. miles). According to the census of 1970 the population of the islands was 73,811. There were, in 1969–70, 45 primary schools with 9,089 pupils, a secondary preparatory school with 901 pupils, 2 technical schools with 86 pupils and a secondary school with 544 pupils. The chief commercial products are cacao, copra, coconut, coffee, palm-oil and cinchona. In 1970 there were 1,008 goats, 1,938 sheep, 2,897 pigs and 2,749 cattle.

In 1969–70 revenue was 209,336 contos and expenditure 172,315 contos; public debt, 421,184 contos. Imports (1970), 260,522 contos; exports, 237,440 contos.

There were 284 km of roads in 1970. In 1970, 1,033 vessels of 1·03m. net tons entered the ports. There were, in 1970, 2 wireless stations, 265 km of telephone lines and a telephone exchange (with 578 instruments).

Governor: Lieut.-Col. António da Silva Sebastião.

ANGOLA

Angola, with a coastline of over 1,000 miles, is separated from the Congo (Br.) by the boundaries assigned by the convention of 12 May 1886; from the Congo (K.) by those fixed by the convention of 22 July 1927; from Rhodesia in accordance with the convention of 11 June 1891, and from South West Africa in accordance with that of 30 Dec. 1886. The Congo region was discovered by the Portuguese in 1482, and the first settlers arrived there in 1491. Luanda was founded in 1575. It was taken by the Dutch in 1641 and occupied by them until 1648. The area is 1,246,700 sq. km (481,351 sq. miles). By a decree of 20 Oct. 1954 it is divided into 13 districts. The important towns are S. Paulo de Luanda (capital), Benguela, Moçâmedes, Lobito, Sá da Bandeira, Malange and Huambo (Nova Lisboa) the future capital. The population at census, 1970, was 5,673,046, of whom 300,000 are white.

For primary education there were (1969–70) 3,576 primary schools with 333,767 pupils; 66 secondary schools with 16,754 pupils; 55 professional technical schools with 12,958 pupils; 12 teachers' training schools with 1,147 students; 5 high schools (1,074 pupils); an art school (553 pupils); 6 church schools (727 pupils).

There were, in 1968, 33 cinemas with a seating capacity of 26,743.

In 1969 the revenue was 9,387,676 contos; expenditure, 8,967,167 contos, and public debt, 6,522,164 contos.

Livestock, 1970: 2,727,000 cattle, 171,000 sheep, 821,000 goats, 332,000 pigs.

The principal crops are coffee, maize, sugar, palm-oil and palm kernels. Other products are cotton, wheat, tobacco, cocoa, sisal and wax. The country possesses valuable diamond deposits. Production of diamonds during 1970 totalled 2·4m. carats (1969: 2·02m.). Production (1970) of iron ore, 6,051,865 metric tons; crude petroleum, 5,065,105 metric tons; salt, 87,743 metric tons.

Imports, 1969, 9,261m. (1970: 10,595m.) escudos; exports, 9,387m. (1970: 12,172m.) escudos. The chief imports are textiles, transport equipment, foodstuffs, pig-iron and steel; chief exports are coffee (180,554 tons in 1970), diamonds, sisal, iron ore, fish, maize, crude oil, palm-oil. Coffee exports were valued at 3,234m. contos in 1970.

The Portuguese National Navigation Company has most of the carrying trade to and from Europe. The length of railways open for traffic in 1969 was 3,159 km. The Benguela Railway runs from Lobito through the Congo (K.) and Rhodesia, ending at Beira in Moçambique. A further extension goes through Rhodesia, as far as Mafeking, and from thence to Komati Port, in the Republic of South Africa where it connects with the Lourenço Marques Railway. The total length

of railway, from Lobito to Lourenço Marques, is 5,638 km. In 1969 Angola's railways carried 1,934,000 passengers and 8,804,000 metric tons of freight.

There were, in 1970, 72,291 km of roads.

Angola is connected by cable with east, west and south African telegraph systems. There were, in 1970, 1,808 km of telegraph lines, 65 telephone stations (with 27,151 instruments), 158 telegraph stations and 27 wireless stations.

In 1970, 5,359 vessels of 13,354,392 net tons entered Angolan ports.

Regular air service is maintained by the Divisão de Transportes Aéreos from Luanda to: (South) Moçamedes *via* Lobito and Sá da Bandeira, with connexions to Porto Alexandre and Lucira; (east) Vila Luso *via* Cela, Nova Lisboa and Silva Porto; (north) Pointe Noire (Congo) *via* Cabinda; and to Léopoldville (Congo); (east) Portugália *via* Malange and Henrique de Carvalho; (south) Vila Pereira d'Eça *via* Nova Lisboa, Sá da Bandeira and Rocadas; Windhoek *via* Sá da Bandeira.

MOÇAMBIQUE

Moçambique was discovered by Vasco da Gama's fleet on 1 March 1498, and was first colonized in 1505. The frontier with British Central and South Africa was fixed between Great Britain and Portugal in June 1891. The border with Tanganyika, according to agreements of 1886 and 1890, runs from Cape Delgado at 10° 40′ S. lat. till it meets the courses of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. The Treaty of Versailles, 1919, allotted to Portugal the original Portuguese territory south of the Rovuma, known as the 'Kionga Triangle' (formerly part of German East Africa).

Moçambique, with an area of 784,961 sq. km (303,070 sq. miles) is administered by the state, since 19 July 1942, when the state took over the territory of Manica and Sofala, which was incorporated as a fourth district of the province, with Beira as its capital. The Companhia de Moçambique was then wound up on the expiration of its charter. Lourenço Marques is the capital of the province. As established by decree of 20 Oct. 1954, the province is divided into 9 districts: Lourenço Marques, Gaza, Inhambane, Manica and Sofala, Tete, Zambézia, Moçambique, Cabo Delgado, Niassa.

There is a government council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and also an executive council. The population, according to the census of 1970, was 8,233,034. In 1967–68 there were 3,691 primary schools with 485,045 pupils; 46 secondary schools with 9,512 pupils (1966–67); 10 normal schools with 974 pupils; 25 professional technical schools with 14,093 pupils; 9 high schools with 904 pupils; 6 church schools with 594 pupils; 7 art schools with 444 pupils.

There were, in 1968, 23 cinemas with a seating capacity of 17,100.

In 1969 the revenue was 8,567,811 contos, expenditure 8,115,291 contos and public debt 4,145,540 contos.

The chief agricultural exports in 1969 were (in metric tons): Sugar, 178,638; cotton, 44,291; copra, 45,096; sisal, 21,338; cashew nuts, 63,941; tea, 16,576. Mining products in 1968: Gold, 0·2 kg; beryl, 95 metric tons; bauxite, 3,274 metric tons; coal, 314,408 metric tons.

Livestock 1969: 1,259,829 cattle, 521,916 goats, 118,435 sheep, 128,887 pigs, 18,981 asses.

Imports, 1970, amounted to 9,302,188 contos; exports, 4,496,866 contos.

The principal ports are: Lourenço Marques (1,801 vessels of 9,544,556 net tons handled in 1969), Beira (1,178 vessels of 4,544,348 net tons), Moçambique (103 vessels of 311,613 net tons) and Nacala 282 vessels of 691,733 net tons).

There were, in 1970, 3,599 km of railway and 37,106 km of road, of which 11,280 km are main roads. Motor vehicles, in 1969, included 70,733 passenger cars, 16,418 lorries and buses and 3,729 motor cycles.

The Delagoa Bay Railway has a length of 64 miles in Portuguese territory and is continued for 290 miles to Pretoria. The Beira Railway has a length of 200 miles in the territory formerly administered by the Moçambique Co., and links up at the frontier with the Rhodesian Railway system. The Trans-Zambézia Railway, 175 miles in length, from Dondo, on the Beira Junction Railway, to Murraça, on the southern bank of the Zambezi, was opened for traffic on 1 July 1922. On the northern bank of the Zambezi, the Central Africa Railway (61 miles long, of which 45 miles are in Portuguese territory) connects at Port Herald with the Shiré Highlands Railway. With the opening of the Lower Zambezi Bridge on 14 Jan. 1935 (3,677 metres, one of the longest bridges in the world), these 3 railways give a continuous connexion between Malawi and the port of Beira.

Regular air service is maintained between Lourenço Marques, Johannesburg and Durban; and between Beira, Salisbury and Blantyre.

Beira is connected by telegraph with Salisbury in Rhodesia, and Lourenço Marques with the Transvaal system. Quelimane has telegraphic communication with Chiromo. In 1969 there were 72,825 km of telegraph line, 25 wireless stations, 108 telephone stations and 224 telegraph stations; length of telephone lines, 72,821 km, including 55,616 km of conductor wires in cable; number of telephones (1969), 24,300.

Barclays Bank International has branches in Beira and Lourenço Marques.

Note circulation, Dec. 1969, was 1,851,000 contos. The metric system is used.

Governor-General: Engº Eduardo de Arantes e Oliveira.

British Consul-General (*Lourenço Marques*): H. C. Byatt. There is also a Consul at Beira.

USA Consul-General (*Lourenço Marques*): John G. Gossett.

MACAO

Macao, in China, situated on a peninsula of the same name at the mouth of the Canton River, which came into possession of the Portuguese in 1557, forms with the 2 small adjacent islands of Taipa and Colôane a province, divided into 2 wards, each having its own administrator. The boundaries have not yet been definitely agreed upon; at present Portugal holds the territory in virtue of the treaty with China of 1 Dec. 1887. The area of the province is 16 sq. km (6 sq. miles). The population, according to the census of 1970, is 248,316; the steady influx of Chinese refugees is creating serious social and economic difficulties, while Chinese communists cause sporadic political unrest.

Revenue in 1969 was 297,735 contos; expenditure, 287,873 contos, and public debt, 167,667 contos.

Education (1969–70) is provided at 29 secondary schools (7,280 pupils), 113 elementary schools (25,836 pupils), 16 technical schools (1,053 pupils), 1 church school (47 pupils) and an art school (87 pupils).

The trade, mostly transit, is handled by Chinese merchants. Imports, in 1970, 1,867,531 contos; exports, 1,223,028 contos. The province has 697 km of telephone line (5,366 instruments in 1970). It is served by a Portuguese and various British and Dutch steamship lines. In 1970, 15,226 vessels of 4,754,672 gross tons entered the port.

TIMOR

Portuguese Timor has been under Portuguese administration since 1586. It consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring islands of Pulo Cambing and Pulo Jako, a total area of 14,925 sq. km. By treaty of April 1859, ratified 18 Aug. 1860, the island was divided between Portugal and Holland; by convention of 1 Oct. 1904, ratified in 1908, the boundaries were straightened and settled. The territory, formerly administratively joined to Macao, was in 1896 (confirmed in 1926) made an independent province. Population in 1970, 610,541. There were (1969–70) 1 secondary school with 327 pupils, 367 primary schools with 27,229 pupils, 1 technical school with 668 pupils, 2 church schools with 84 pupils and a normal school with 89 pupils.

In 1969 the revenue was 136,008 contos; expenditure, 170,358 contos, and public debt, 25,983 contos. Imports (1970), 207,118 contos; exports, 95,773 contos. Chief exports are coffee, copra, rubber and wax.

Livestock, 1969: 67,035 (1970: 70,607) cattle; 38,920 (1970: 43,033) sheep; 204,274 (1970: 217,011) goats; 202,849 (1970: 224,268) pigs; 123,955 (1970: 127,148) buffaloes; 106,772 (1970: 114,152) horses.

The port is Dili, the capital (population, 10,753). In 1970, 47 ships of 65,235 net tons entered and cleared. In 1970 there were 2,033 km of roads, telephone lines (1970) of 4,222 km, 58 telephone stations (638 instruments) and 4 wireless stations at Dili.

Portuguese India (Estado da India) was under Portuguese rule 1505–1961. It consisted of Goa, containing the capital, Goa, together with the islands of Angediva, São Jorge and Morcegos, on the Malabar coast; Damão, with the territories of Dadrá and Nagar-Haveli, on the Gulf of Cambia; and Diu, with the continental territories of Gogola and Simbor, on the coast of Gujerat.

In violation of the United Nations charter, Indian troops invaded Goa, Damão and Diu without declaration of war on 18–19 Dec. 1961 and forcibly incorporated the Portuguese territory in the Indian Union (*see* p. 383).

STATE OF QATAR

HISTORY. The State of Qatar declared its independence from Britain on 1 Sept. 1971, ending the Treaty of 3 Nov. 1916 which was replaced by a Treaty of friendship between the 2 countries.

AREA AND POPULATION. The State of Qatar, which includes the whole of the Qatar peninsula, extends on the landward side from Khor al Odeid to the boundaries of the Saudi Arabian province of Hasa. Area, about 4,247 sq. miles (11,000 sq. km); population estimate in 1971 about 160,000, including a number of migrant labourers from neighbouring states.

The capital is Doha (population, 100,000), which is the main port. Other towns are Dukhan, the centre of oil production, and Umm Said, oil-terminal of Qatar.

The Amir: HH Shaikh Khalifa bin Hamad Al-Thani, who deposed his cousin on 22 Feb. 1972.
Foreign Minister: Shaikh Suhaim bin Hamad Al Thani.

Flag: Maroon, with white serrated border on hoist.

EDUCATION. There were, in 1971–72, 11,568 boys at 49 schools with 680 teachers; 38 girls' schools had 7,115 pupils and 375 teachers.

HEALTH. There are 5 hospitals (including one for women and one for gynaecology and obstretrics) with a total of 621 beds.

FINANCE. Currency. The Indian external rupee was withdrawn in June 1966 and replaced temporarily by the Saudi riyal. In Sept. 1966 the new Qatar/Dubai currency was introduced. £1 = 11·4 *riyals.*

Budget. The revenue from oil operations is the principal source of income; it has enabled the Government to institute an extensive development programme.

DEFENCE. The Qatar Public Security Forces received 3 Whirlwind 3 helicopters in 1968 and subsequently acquired from UK 6 Hunter jet fighter-bombers and Tigercat surface-to-air missile systems.

PRODUCTION. There are 4 oil companies operating in Qatar, the Qatar Petroleum Co. (a subsidiary of the Iraq Petroleum Co.), Qatar Oil Co. (Japan), S.E. Asia Oil and Gas Co. and the Shell Co. of Qatar (a subsidiary of Royal Dutch Shell). The Q.P.C. concession now covers part of the land surface from which the Company is producing at the rate of about 9m. tons a year. The Shell Co. concession covers part of the offshore seabed, from which production began in 1964. Qatar Oil Co. (Japan) was granted an 8,900-sq. km offshore concession in March 1969. The terminal of Halul Island was completed in March 1966; from it about 7m. tons of oil were exported in 1969.

TRADE. Total trade between Qatar and UK, in £1,000 sterling (British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	4,283	24,349	24,743	30,581	41,322
Exports and re-exports from UK	3,709	7,196	5,847	7,430	15,722

COMMUNICATIONS. Ships of several lines used to call at Umm Said; with the completion in 1969 of the new Doha port, it has become the main port of Qatar.

The Gulf Aviation Co., Ltd, operates daily services from Bahrain; BOAC, Middle East and 9 other airlines operate regular international flights from Doha airport.

Telephone and radio-telephone services connect Qatar with Europe and America; there were 10,926 telephones in Dec. 1970.

BANKING. Banking facilities are provided by the Qatar National Bank (established 1965), and branches of the Eastern Bank, the British Bank of the

Middle East, the Ottoman Bank, First National City Bank, Bank Sodirat Iran and the Arab Bank. The Intra Bank reopened in March 1968 for limited banking transactions.

British Ambassador: E. F. Henderson.

ROMANIA

Republica Socialistă România

HISTORY. For the history and constitution of Romania from 1859 to 1947, *see* THE STATESMAN'S YEAR-BOOK, 1947, pp. 1187–89. On 30 Dec. 1947 King Michael abdicated under Communist pressure and parliament proclaimed the 'People's Republic'.

CONSTITUTION AND GOVERNMENT. The present Constitution was adopted on 21 Aug. 1965 and supersedes those of 13 April 1948 and 24 Sept. 1952. Under it Romania becomes a 'Socialist' (as opposed to 'People's') Republic. The leading role of the Communist Party is reaffirmed. The Grand National Assembly of 465 is elected for 4 years. It holds short sessions twice a year, and between sessions delegates its legislative rights to the State Council (the President, head of state; 4 Vice-presidents, 1 secretary and 22 members). By a law of Nov. 1969 the policy of ministries is shaped by deliberative collegiate bodies of which the minister is the chairman. All citizens of 18 and over have the right to vote and electoral law provides for the nomination of 'one or more' candidates in each constituency. The National Council of the Socialist Unity Front functions as a consultative body on home and foreign affairs. It has a central and local councils in which workers, peasants, professional bodies, ethnic minorities and the Communist Party are represented. It replaces the Popular Democratic Front which was a coalition formed in 1948 of the Romanian Workers' Party (a merger of the Communist and Social Democratic Parties), the Ploughmen's Front (a pro-Communist Peasant Party), the National Popular Party and the Hungarian Popular Union.

Elections were held on 30 Nov. 1952, 3 Feb. 1957, 5 March 1961, 7 March 1965 and 2 March 1969.

At the 1969 elections 99·96% of the electorate voted and 99·75% of the votes were for candidates on the single list of the Socialist Unity Front.

In 1965 the Romanian Workers' Party was renamed the Romanian Communist Party. The Party Congress elects the General Secretary, and its Central Committee elects the Executive Committee (21 full and 16 alternate members), the Permanent Presidium (9 members) and the Secretariat (General Secretary and 7 secretaries). The Party had over 2·1m. members in 1971.

President of the State Council: Nicolae Ceauşescu, succeeded Chivu Stoica in Dec. 1967. *Vice-Presidents:* Emil Bodnaraş, Manea Mănescu, Ştefan Péterfi, Vasile Vîlcu.

Council of Ministers (April 1972). *Chairman:* Ion Gheorghe Maurer. *First Vice-Chairman:* Ilie Verdeţ. *Vice-Chairmen:* Janos Fazekaş; Gheorghe Rădulescu; Leonte Răutu; Iosif Banc; Emil Drăgănescu; Mihai Marinescu; Ion Păţan. *Interior:* Cornel Onescu; *Foreign Affairs:* Corneliu Mănescu; *Armed Forces:* Col.-Gen. Ion Ioniţă; *Foreign Trade:* Cornel Burtică; *Finance:* Florea Dumitrescu; *Justice:* Teodor Vasiliu; *Chairman, State Planning Commission:* Maxim Berghianu. *Chairman, State Security Council:* Ion Stănescu.

Since the mid-1960s Romania has been taking an increasingly independent stand in foreign affairs, and denounced the Soviet intervention in Czechoslovakia in 1968. In July 1970 Romania signed a treaty of friendship, co-operation and mutual assistance with the USSR. A previous such treaty had expired in 1968.

National flag: Blue, yellow, red (vertical), with the coat of arms of the republic in the middle.

National anthem: Te slăvim România, pământ strămoşesc (We praise thee, fatherland Romania).

AREA AND POPULATION. The area of Romania is 237,500 sq. km (91,699 sq. miles). Pre-war Romania had an area of 113,918 sq. miles. Population figures at censuses: 1930, 18,057,028 (of whom 14,280,729 lived within the boundaries of present-day Romania); 1948, 15,872,624 (48·3% male); 1966 19,103,163 (49% male, 38·2% urban).

On 1 July 1970 the population was 20·25m. (49% male, 42% urban), density per sq. km, 84·3. Vital statistics, 1970 (per 1,000 population): Live births, 21·1; deaths, 9·5; marriages, 7·2; divorces, 0·4; stillborn (per 1,000 live births), 1·3; infant mortality (per 1,000 live births), 49·4; average expectation of life (1969), 68·51 years; population growth rate (1970), 1·2%.

Administratively, Romania is divided into 40 districts and 2,706 communes. The capital is Bucharest (Bucureşti).

The 1966 census listed the following ethnic groups (in 1,000): Romanians, 16,747; Hungarians, 1,620; Germans, 383.

The official language is Romanian.

RELIGION. Churches are organized and function in accordance with art. 30 of the Constitution. Churches administer their own affairs and run seminaries for the training of priests. Expenses and salaries are paid by the State. There are 15 Churches, all under the control of the 'Department of Cults'. The largest is the Romanian Orthodox Church, which claimed 13·67m. members in 1950. It is autocephalous, but retains dogmatic unity with the Eastern Orthodox Church. It is administered by the consultative Holy Synod and National Ecclesiastical Assembly and the executive National Ecclesiastical Council and Patriarchal Administration. It is organized into 12 dioceses grouped into 5 metropolitan bishoprics (Hungaro-Wallachia; Moldavia-Suceava; Transylvania; Olt; Banat), and headed by Patriarch Justinian Marina (since May 1948). There are some 11,800 churches, 2 theological colleges and 6 'schools of cantors', as well as seminaries.

The Uniate (Greek Catholic) Church severed its connexion with the Vatican (formed 1698) to rejoin the Romanian Orthodox in 1948.

Other churches: Serbs have a Serbian Orthodox Vicariate at Timişoara. There is a Roman Catholic archbishopric of Bucharest and a bishopric of Alba Iulia. There were 820 priests and 254 monks in 1958. The Church has not secured approval for a Statute and has no hierarchical ties with the Vatican.

Calvinists (780,000; mainly Hungarian) have bishoprics at Cluj and Oradea; Lutherans (250,000, mainly Germans) a bishopric at Sibiu and Unitarians a bishopric at Cluj. These sects share a Protestant seminary at Cluj.

There are communities of Baptists (814), Adventists (587), Evangelicals (165) and Pentecostals (447).

The 3 main Jewish communities (110,000 members) have formed a federation under a Chief Rabbi with 300 rabbis and some 300 synagogues.

Moslems have a Muftiate at Constanţa.

EDUCATION. General education is free and compulsory and lasts 10 years (from 6 to 15). Secondary education is then available in general, technical or vocational schools, or (since 1968) in lycées combining both types of education.

In 1970–71 education at all levels (including evening classes) comprised 10,336 kindergartens with 18,887 teachers and 448,244 children; 15,504 general education schools with 151,599 teachers and 3,317,107 pupils; 226 specialized-curriculum schools with 6,489 teachers and 151,599 pupils; 322 technical schools with 2,585 teachers and 44,903 pupils; 403 vocational schools with 11,775 teachers and 195,941 pupils. There are 1,722 general and 265 secondary schools for ethnic minorities, with over 240,000 pupils.

There are universities at Iaşi (founded 1860), Bucharest (1864), Cluj (1919), Timişoara (1962), Craiova (1965) and Braşov (1971), and 51 other institutes of higher education. Student population in 1970–71: 151,885.

The Academy, with seat at Bucharest, has 2 branches at Iaşi and Cluj. The National Council for Scientific Research co-ordinates research, of which there were 303 centres in 1971.

Spelling reforms were introduced in 1954 and 1965.

CINEMAS. There were, in 1970, 6,275 cinemas.

NEWSPAPERS. There were, in 1970, 55 daily newspapers, including 11 in minority languages. The Party newspaper is *Scînteia* ('The Spark').

WELFARE. In 1969 there were 163,983 hospital beds and 29,471 doctors.

JUSTICE. Justice is administered by the Supreme Court, the 39 district courts and lower courts. People's assessors (elected for 4 years) participate in most court trials, collaborating with the judges. The Procurator-General exercises 'supreme supervisory power to ensure the observance of the law' by all authorities, central and local, and all citizens. The Procurator's Office and its

organs are independent of any organs of justice or administration, and only responsible to the Grand National Assembly (which appoints the Procurator-General for 4 years) and, between its sessions, to the State Council. Since 1968 the Ministry of the Interior has been responsible only for 'ordinary' police work. State security is the responsibility of a new, separate State Security Council. A new penal code came into force on 1 Jan. 1969. It is based on 'the rule of law' and is aimed at preventing illegal trials. The death penalty is retained for 'specially serious offences' (treason, some classes of murder, theft of state property having serious consequences).

FINANCE. Currency. The monetary unit is the *leu*, pl. *lei* (of 100 *bani*). On 1 Feb. 1954 the gold content of the leu was changed to 0·148112 gramme of fine gold. Exchange rates: £1 = 14·4 lei; US$1 = 6 lei; 1 rouble = 6·67 lei. Tourist rates: £1 = 43·2 lei; US$1 = 18 lei; 1 rouble = 8·30 lei.

Bank-notes of 1, 3, 5, 10, 25, 50 and 100 lei are issued by the National Bank, and there are coins of 5, 10, 15 and 25 bani and 1 and 3 lei.

Budget. Revenue and expenditure (in 1m. lei) for calendar years:

	1965	*1966*	*1967*	*1968*	*1969*	*1970*
Revenue	96,954	108,867	129,307	138,757	146,957	133,342
Expenditure	93,057	105,372	124,322	131,921	142,805	130,900

In lei, 1970 revenue included 29m. from state enterprises, 41m. from sales tax, 12m. from direct taxes and 9m. from social insurance contributions. Expenditures: 79m. on the economy, 36m. social and cultural, 7m. defence.

The revenues of local councils yielded 26m. lei in 1970.

Romania's external debts consisted of pre-war obligations and those stipulated in the peace treaty. Total UK claims amounted to over £100m., including some £20m. of bonded debt. Negotiations for a settlement were resumed in 1966 but no agreement has been reached. Payment of £1·25m. in settlement of UK claims arising out of the peace treaty was completed by 31 Jan. 1967.

DEFENCE. Defence is the responsibility of the Defence Council, which is controlled by the Council of State and headed by President Ceauşescu.

Army. Service is 16 months. Strength in 1969 was reported to be some 150,000 men plus 50,000 in para-military forces (frontier troops, internal-security troops, militia, military firemen).

Units of the Ministry of the Armed Forces are under one of the 3 military regions of Iaşi, Bucharest and Cluj. There are 3 army corps, each made up of 3 infantry divisions and supporting tank, artillery, engineer and reconnaissance elements. There are also 2 mountain divisions at Tîrgu Mureş and Sinaia, 2 tank divisions at Bucharest and Lipova, 2 motorized divisions and an independent artillery division at Tecuci. The AA artillery consists of 14 regiments. There are 2,000 T-34, T-54 and T-55 tanks. A Territorial Defence Force was set up in 1970.

Navy. In 1971 there were 5 missile boats, 8 torpedo boats, 3 patrol vessels, 4 minesweepers, 22 inshore minesweepers, 2 training ships and 30 service craft. Headquarters of the Danube flotilla and main river port is Brăila. The naval school is in Constanța. Personnel in 1971 totalled 5,000 officers and men. Service is 2 years.

Air Force. Service is 2 years. The Air Force numbers some 15,000 men, with 275 combat aircraft. These are organized into 3 fighter regiments with MiG-21 fighters and 2 ground-attack regiments and other close-support squadrons with MiG-19 and MiG-17 fighters. There are also 150 training aircraft, transports and helicopters. 'Guideline' surface-to-air missiles are operational, and short-

range surface-to-surface missiles have been displayed, but may not have warheads.

PLANNING. Economic policy is implemented by the State Planning Committee. There have been three 5-year plans (1951–56, 1956–60, 1966–70) and one 6-year (1960–65). The fourth 5-year plan (1971–75) envisages an annual industrial growth rate of 11–12% to expand industry by 68–76%, and an expansion of agriculture by 36–49%. Industries scheduled for particular development: machine-building, iron and steel, non-ferrous metals, chemicals and electric power. Guidelines for the development of the economy up to 1980 have also been drawn up. There were severe floods in 1970 and agricultural plan targets were not met. Output of main products:

Product	*1950*	*1960*	*1965*	*1967*	*1968*	*1969*	*1970*
Crude oil (1,000 metric tons)	5,047	11,500	12,571	13,206	13,285	13,246	13,377

Sugar-beet (1,000 metric tons)	633	3,399	3,275	3,830	3,936	3,783	3,175

Other product figures are given below.

Economic reforms were introduced in 1967 to give enterprises 'functional autonomy', but there is no move towards any fundamental decentralization of planning authority.

AGRICULTURE. Utilization of the land in 1970 (in 1,000 hectares): Arable, 9,733; meadows and pasture, 4,418; vineyards and fruit trees, 778.

Production in 1970 (in 1,000 metric tons): Wheat, 3,356; barley, 740; maize, 6,527; potatoes, 2,084; sunflower seed, 770.

Livestock in 1971: 667,800 horses, 5,215,000 cattle, 6,359,400 pigs, 13,818,400 sheep and 54,333,100 poultry.

In 1970 there were 4,626 collective farms, with 9m. hectares of land (7·3m. arable). State farms numbered 370 (731 in 1966), with 2·1m. hectares of land, of which 1·67m. hectares were arable. There were 293 machine and tractor stations with 75,710 tractors, 44,865 mechanical seeders and 33,615 mechanical harvesters. Total number of tractors, 107,290. The socialist sector comprises 90·6% of the agricultural land. The National Union of Agricultural Co-operatives promotes self-management in collective farms, and gives guidance on planning and marketing. In 1967 the state-farm system was reorganized and specialized farms (3,350 by 1971) were set up under state agricultural enterprises; farm managers have full autonomy over production. In 1970 there were 731,300 hectares of irrigated land.

FORESTRY. Total forest area is 6·32m. hectares. In 1970 the output of sawn timber was 5·3m. cu. metres (2·8m. coniferous). In 1970, 52,679 hectares were afforested.

MINING. The principal minerals are oil and natural gas, salt, brown coal, lignite, iron and copper ores, bauxite, chromium, manganese and uranium. The oilfields are in the Prahova, Băcau, Gorj, Crișana and Argeș districts. Refining capacity (13m. tons per annum) exceeds production of crude oil and efforts are being made to expand it; some crude is imported. Salt is mined in the lower Carpathians and in Transylvania; production in 1970 was 2·9m. metric tons.

Output, 1969 (and 1970) (in 1,000 metric tons): Iron ore, 2,990 (3,206); crude oil, 13,246 (13,377); coal, 15,152 (19,152).

INDUSTRY. Output of main products in 1969 (and 1970) (in 1,000 metric tons): Pig-iron, 3,477 (4,210); steel, 5,540 (6,517); steel tubes, 756 (767); metallurgical coke, 939 (1,070); rolled steel, 3,816 (4,504); chemical fertilizers, 720 (895); washing soda, 595 (582); caustic soda, 312 (330); paper, 398 (431); cement, 7,515 (8,127); sugar, 491 (377); edible oils, 268 (274); butter, 31 (31). Fabrics (in 1m. sq. metres): Cotton, 410 (437); woollens, 56 (63); silk, 43 (48). Light industry (in 1,000 units): Radio sets, 428 (455); TV sets, 221 (280); bicycles, 211 (201); sewing machines, 86 (85); footwear, 63m. pairs (66); washing machines, 124 (131); refrigerators, 147 (135).

ELECTRICITY. The second 10-year power plan (1966–75) envisages an output of electric power of 55,000–60,000m. kwh. by 1975. Installed electric power in 1970: 6,432,000 kw. Output: 33,088m. kwh. A joint Romanian–Yugoslav hydro-electric power plant is being built on the Danube at the 'Iron Gates'; yearly output is to be 5,000m. kwh. Atomic power stations are being built.

LABOUR. The labour force in 1970 was 5·11m., of whom 2m. worked in industry; 94% of the labour force is employed in the 'socialist sector'. The minimum monthly wage is 800 lei.

COMMERCE. Between 1949 and 1959 some 80% of external trade was with communist countries, but since 1960 this proportion has dropped, *e.g.*, to 50% in 1970 (23% with USSR).

In 1970 exports totalled 11,104m. lei and imports 11,761m. lei.

Principal exports in 1970 were (in 1,000 metric tons): Oil (crude and products), 5,285; cement, 1,201; agricultural products, 2,749; timber, 2·7m. cu. metres; tractors, 13,465 units; oilfield equipment, 270m. lei; equipment for cement mills, 11·9m. lei; equipment for chemical factories, 49m. lei; equipment for refineries, 20·9m. lei; shipbuilding, 237·9m. lei. Principal imports (in 1,000 metric tons): Iron ore, 6,268; industrial coke, 2,417; rolled ferrous metals, 1,460; electrical equipment, 327m. lei; electric motors, 45,611; motor cars, 11,451, and industrial and agricultural equipment.

In 1969 (and 1970) the main export trade (in 1m. lei) went to: USSR, 2,729 (3,173); West Germany, 724 (1,004); Czechoslovakia, 844 (791); Italy, 625 (656); East Germany, 728 (635); Poland, 368 (425); UK, 294 (307). In 1969 (and 1970) the main import trade (in 1m. lei) came from: USSR, 2,789 (3,005); West Germany, 1,027 (959); Czechoslovakia, 652 (951); East Germany, 617 (691); France, 564 (674); UK, 611 (593); Italy, 625 (577).

Total trade between Romania and UK for calendar years (British Board of Trade returns) in £1,000 sterling:

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	25,657	25,839	24,970	23,188	21,220
Exports and re-exports from UK	10,101	32,058	29,060	29,077	31,273

In 1968 Romania and the UK signed a trade arrangement to run until the end of Sept. 1973. It did not introduce major changes in the structure of trade, but looks forward to a steady expansion. By an agreement in 1969 the number of Romanian exports subject to quota restrictions in UK was reduced to 15%. Import quotas for agricultural products were increased in 1971. A trade agreement signed with the USSR for 1972 provides for a 17% increase in the volume of trade. A trade and payments agreement was signed with China for 1971 and a trade agreement for 1972–75.

Foreign trade is handled by industrial agencies under the overall supervision of the Ministry of Foreign Trade. Joint production schemes with Western firms have been set up.

SHIPPING. The main ports are Constanţa on the Black Sea and Galaţi and Brăila on the Danube. The largest shipyard is at Galaţi.

In 1971 the mercantile marine (NAVROM) had 53 ocean-going ships of 500,000 deadweight tons. By 1975 the fleet is planned to expand to 94 ships totalling 1,365,000 tons. In 1970 sea-going transport carried 4·37m. tons of freight; river transport, 3·4m. tons.

RAILWAYS. Length of track (4 ft 8½ in. gauge) in 1970 was 10,341 km; (narrow-gauge), 635 km. Freight carried, 171m. tons; passengers, 328m.

ROADS. There were in 1970, 12,167 km of national roads, of which 8,688 km were modernized. Freight carried, 340m. tons; passengers, 359m.

AVIATION. TAROM (Transporturi Aeriene Române), the state airline, operates all internal services, and also services to Berlin, Prague, Vienna, Moscow, Athens, Cairo, Tel-Aviv, Rome, Paris, London, Belgrade, Budapest, Sofia, Warsaw, Amsterdam, Istanbul, Beirut, Brussels, Copenhagen, Cologne, Frankfurt, Düsseldorf and Zürich. Bucharest is also served by BEA, from London; SABENA, from Brussels; Aeroflot, from Moscow and Sofia; Air France, from Paris; Interflug, from East Berlin; ČSA, from Prague; MALEV, from Budapest; Austrian Air Lines, from Vienna; Lot, KLM, TABSO, El Al, Alitalia, Lufthansa, JAT and Swissair.

Bucharest's airports are at Băneasa (internal flights) and Otopeni (international flights; 12 miles from Bucharest). Air transport in 1970 carried 849,000 passengers and 18,000 tons of freight.

POST. Number of telephone subscribers, in 1970, 440,000. Radio receiving sets, in 1970, 3·75m.; television sets, 1·5m. There are 46 broadcasting stations and 95 television stations.

BANKING. In 1948 most banks were dissolved and the National Bank of Romania (founded 1880, nationalized 1946) was made the State Bank under the Minister of Finance. Half its profits are allotted to the State budget. There are also a Bank of Investments, a Foreign Trade Bank, an Agriculture and Food Industry Bank and the Savings Bank, all state-owned.

WEIGHTS AND MEASURES. The metric system for weights and measures was introduced in 1881. The Gregorian calendar was adopted in 1919.

RWANDA

HISTORY. From the 16th century to 1959 the Tutsi kingdom of Rwanda shared the history of Burundi (*see* pp. 790–91). In 1959 an uprising of the Hutu destroyed the Tutsi feudal hierarchy and led to the departure of the Mwami Kigeri V. Elections and a referendum under the auspices of the United Nations in Sept. 1961 resulted in an overwhelming majority for the republican party, the Parmehutu (Parti du Mouvement de l'Emancipation du Bahutu), and the rejection of the institution of the Mwami. The republic proclaimed by the Parmehutu on 28 Jan. 1961 was recognized by the Belgian administration (but not by the United Nations) in Oct. 1961. Internal self-government was granted on 1 Jan. 1962, and by decision of the General Assembly of the UN the Republic of Rwanda became independent on 1 July 1962. An agreement, signed with Burundi under United Nations auspices at Addis Ababa in April 1962, provided for a monetary and customs union. These and other common organizations came to an end by 1 Oct. 1964.

AREA AND POPULATION. Rwanda lies between lat. 1° and 3° S. and long. 29° and 31° E., with an area of 26,330 sq. km (10,166 sq. miles). The Nile–Congo mountain divide (about 9,000 ft) and the Kirunga volcanoes (Mt. Karisimbi, 14,825 ft), rising steeply from Lake Kivu in the west, slope down first to a hilly central plateau (7,000–5,000 ft) and farther eastwards to a complex of marshy lakes in the upper reaches of the Kagera River. Rwanda is bounded in the south by Burundi, in the west by Lake Kivu and the Congo, in the north by Uganda and in the east by Tanganyika.

The population, the densest in Africa outside the Nile delta, probably about 3·3m. There are 3 ethnic groups, the Tutsi (Nilotic), the Hutu (Bantu) and a few Twa (pygmoid). The Tutsi, traditionally the ruling caste and about 15% of the population, have greatly diminished in number since the troubles of 1959–61, as a result of which over 140,000 took refuge in neighbouring territories. In Jan. 1964 several thousand Tutsi were massacred by the Hutu, and an exodus of 12,000 more Tutsi followed. The Tutsi now form only 9% of the total population. There are some 1,200 Europeans and 750 Asians.

Kigali, the capital, has a population of some 7,000, including about 250 Europeans and 75 Asians. Nyanza (between Kigali and Butare) is the seat of the High Court. Other centres are Gisenyi and Cyangugu on Lake Kivu, and Gitarama.

GOVERNMENT. Rwanda is a republic with an executive President as Head of State, assisted by a Council of 12 Ministers. The National Assembly consists of 47 members elected by universal suffrage for 4 years. The administrative divisions are 10 prefectures (Kigali, Kibungo, Byumba, Ruhengeri, Gisenyi, Kibuye, Gitarama, Gikongoro, Butare, Cyangugu) and 144 communes.

President of the Republic and Prime Minister: Gregoire Kayibanda (elected 26 Oct. 1961; re-elected 3 Oct. 1965 and 28 Sept. 1969).

On 3 Oct. 1965 the Parmehutu party won all seats in the National Assembly.

Flag: Three equal vertical panels of red, yellow and green (left to right), the letter 'R' in black superimposed on the centre panel.

RELIGION. The population is predominantly Roman Catholic; there is an archbishop (Kabgayi) and 3 bishops. The Ruanda Mission of the Church Missionary Society have 4 stations.

EDUCATION. In 1965 there were 352,406 children attending primary schools. There were 25 secondary schools of various types with a total of 7,800 pupils; but only 135 completed the full 6-year course. The National University, opened at Butare in 1963, had over 300 students in 1969.

The local language is Kinyarwanda, a Bantu language. French is also an official language, and Kiswahili is spoken in the commercial centres.

FINANCE. Currency. On 12 April 1966 the Rwanda franc was devalued. The previous official rate of Rwanda francs 140 = £1 and the free rate of about Rwanda francs 330 = £1 were abolished and a single official rate of Rwanda francs 280 = £1 substituted; since Nov. 1967 the rate is 240 francs to the £.

Budget. The budget for 1970 showed an overall surplus, the first time since independence, of 187m. Rwanda francs.

DEFENCE. The national army has a strength of nearly 2,500 all ranks, including a Belgian cadre.

AGRICULTURE. Subsistence agriculture accounts for most of the gross national product. Staple food crops are beans, cassava, maize, sweet potatoes, peas, groundnuts and sorghum. The annual rainfall varies from under 40 in. in the north-east to 60 in. in the west and over 70 in. in the extreme north-west.

The main cash crop is *aravica* coffee as in Burundi; the 1970 crop was about 16,000 tons. Tea and pyrethrum are also produced on a limited scale. There is a pilot rice-growing project.

On 30 July 1964 the Rwanda Industrial Produce Bureau was established, which is responsible for organizing and controlling the quality of Rwandese agricultural exports, notably coffee. Coffee exports (1970) 14,700 tons earning 1,423m. Rwanda francs.

Long-horned Ankole cattle, 682,000 head in 1967, play an important traditional role. Efforts are being made to improve their present negligible economic value. There are over 370,000 goats and some 147,000 sheep.

INDUSTRY. There is no general industrial development apart from mining. About 3,500 tons of cassiterite were produced in 1970. There are 4 hydro-electric installations and a large modern brewery. Methane gas is abundant under Lake Kivu.

COMMERCE. Trade between Rwanda and UK (British Board of Trade returns, in £1,000 sterling):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	112	274	373	974	625
Exports and re-exports from UK	131	317	329	261	362

COMMUNICATIONS. There are about (1968) 1,500 miles of main and 2,200 miles of secondary roads. There are road links with Burundi, Uganda, Tanzania and Zaïre. There were in 1967 2,122 cars and 1,243 trucks. Because of the strained political relations with Burundi nearly all goods traffic passes through Kampala and Mombasa.

Shipping on Lake Kivu in 1967 amounted 70,000 metric tons. Kigali has an international airport, with services to Bujumbura, Bukavu *via* Kamembe, Entebbe, Goma, Lubumbashi, Athens and Brussels.

BANKING. On 5 Aug. 1967 a Development Bank was created with a capital of 50m. Rwanda francs, of which 27·5m. can be held only by the government or public bodies. There are 4 other banks in Rwanda.

SAN MARINO

Repubblica di San Marino

On 22 March 1862 San Marino concluded a treaty of friendship and good co-operation, including a *de facto* customs union with the kingdom of Italy, preserving the independence of the ancient republic, although completely surrounded by Italian territory. The treaty was renewed on 27 March 1872, 28 June 1897 and 31 March 1939, with 7 amendments in 1942–71. The republic has extradition treaties with Great Britain, Belgium, France, the Netherlands and USA.

National flag: Sky-blue and white (horizontal).

The frontier line is 38·6 km in length, area is 61·19 sq. km (24·1 sq. miles) and the population (30 June 1971), 17,000; some 20,000 citizens live abroad.

The legislative power is vested in the Great and General Council of 60 members elected every 5 years by popular vote, 2 of whom are appointed every 6 months to act as regents (*Capitani reggenti*).

The elections held on 7 Sept. 1969 gave 27 seats to the Christian Democrats, 11 to the Democratic Socialists (the government coalition), 14 to the Communists, 7 to the left-wing Socialists and 1 to the Movement for Statutory Liberties (opposition).

Women were given the vote in 1960, but cannot be elected.

The regents exercise executive power together with the Congress of State (*Congresso di Stato*), which comprises 10 departments, and through Commissions on social welfare, public works, etc. Law is administered by a Commissioner for civil and commercial cases and a Commissioner for criminal cases (acting with a penal judge), from whom appeals can be made to a civil appeals judge and a criminal appeals judge respectively. The highest legal authority is, in certain cases, the *Consiglio dei XII.*

There are 14 infant schools, 17 elementary schools, a secondary school and a grammar school, the diplomas of which are recognized by Italian universities. Civil marriage was instituted in Sept. 1953.

The budget (ordinary and extraordinary) for the financial year ending 31 March 1971 balanced at 6,474,969,865 lire.

The militia consists, in case of necessity, of all able-bodied citizens between the ages of 16 and 55, with certain exceptions (teachers and students, etc.). The chief exports are wine, textiles, tiles, varnishes, ceramics and the building stone quarried on Mount Titano. Italian and Vatican City currency is in general use, but the republic issues its own postage stamps.

In 1970, 2,343,700 tourists visited San Marino.

San Marino is connected with Rimini by a bus service and, in summer, by helicopters. There were 2,705 telephones in 1971.

British Consul-General (resides at Florence): S. H. Hebblethwaite, CMG
USA Consul-General (resides at Florence): William J. Barnsdale.
Consul-General in London: Charles Forte.
Acting Consul-General in Washington: Gaspar Morell.

SAUDI ARABIA

al-Mamlaka al-'Arabiya as-Sa'udiya

HISTORY. Saudi Arabia was founded by Abdul-Aziz ibn Abdur-Rahman al-Faisal Al Sa'ud, GCB, GCIE (born about 1880; died 9 Nov. 1953), who had been proclaimed King of the Hejaz on 8 Jan. 1926 and had in 1927 changed his title of Sultan of Nejd and its dependencies to that of king, thus becoming 'King of the Hejaz and of Nejd and its Dependencies'. On 20 May 1927 a treaty was signed at Jidda between Great Britain and Ibn Sa'ud, by which the former recognized the complete independence of the dominions of the latter. The name of the State was changed to 'The Saudi Arabian Kingdom' by decree of 23 Sept. 1932.

In Nov. 1937 a general agreement between Saudi Arabia and the Yemen concerning the settlement of disputes was ratified, and an agreement regarding the delimitation of the frontiers was negotiated. In March 1953 the treaty of Taif, first signed with the Yemen in May 1934, was extended for 20 lunar years.

In 1942 Saudi Arabia and the British Government, acting on behalf of the Shaikh of Kuwait, signed agreements for friendship and neighbourly relations, for the extradition of offenders and for the regulation of trade between Saudi Arabia and Kuwait.

In Aug. 1962 Saudi Arabia and Jordan agreed on measures of co-operation in the military, political and economic fields.

GOVERNMENT AND CONSTITUTION. The Kingdom has been welded together from Hejaz, Nejd, Asir and Al-Hassa. Riyadh is the political capital and Mecca the religious capital.

In May 1958 a 'Cabinet system' was instituted under which, from 1962, effective power devolved upon the President of the Council of Ministers.

The religious law of Islam is the common law of the land, and is administered by religious courts, at the head of which is a chief judge, who is responsible for the Department of Sharia (legal) Affairs. The constitution also provides for the setting up of certain advisory councils, comprising a consultative Legislative Assembly in Mecca, municipal councils in each of the towns of Mecca, Medina and Jidda, and village and tribal councils throughout the provinces. The members of these councils consist of chief officials and of notables nominated or approved of by the King.

Reigning King. **Faisal ibn Abdul-Aziz,** GBE, born 1905; succeeded on 2 Nov. 1964, when the Council of Ministers and the Consultative Assembly deposed King Saud, his brother. *Crown Prince:* Prince Khaled ibn Abdul-Aziz, Deputy Minister, younger brother of the King (appointed 29 March 1965).

Royal flag: Green, with white crossed swords and the text 'There is no God but God and Mohammed is his prophet' in white Arabic characters.

National flag: Green, with one sword and same text as royal flag in white Arabic characters.

AREA AND POPULATION. The total area of Saudi Arabia is estimated to be 927,000 sq. miles (2·4m. sq. km).

The population of the Hejaz is about 2m.; Mecca is said to have 250,000; Jidda, 300,000; Medina, 60,000, and Taif, 30,000. The chief port is Jidda on the Red Sea; ports of less importance are Yenbo, Gizan, El Wejh, Rabigh, Lith and Kunfida. Taif, about 3,800 ft above sea-level and some 50 miles from Mecca, is a summer resort.

The population of Nejd is 3m.–4m. The largest towns are: Riyadh, the capital (about 300,000), Buraida (70,000), Anaiza (25,000–30,000), Hail, Jauf and Sakaka. The total population is about 6m.

Slavery was declared illegal in Nov. 1962.

EDUCATION. Administration is in educational districts (23 in 1969). Schooling is in three stages, elementary, intermediate, and secondary which is to prepare older pupils for college. Education is free in all these stages; monthly scholarships are paid to students in higher education. Girls' education is separate. In 1969–70 there were 1,472 elementary schools with 342,600 pupils. In 1968 there were 150 intermediate schools with 30,716 pupils and 44 secondary schools with 10,783 students. There are also adult literacy schools, special schools, commercial, agricultural and industrial schools including the Royal Vocational Institute in Riyadh which can take 8,000 students on two daily shifts. There were 34 teacher-training schools in 1968.

The University of Riyadh (founded 1957) has faculties of arts, science, pharmacy, commerce, agriculture, engineering, education and medicine. The Islamic University at Medina was founded in 1961. The National King 'Abdal-Aziz' University in Jiddah opened in 1967 as a school of economics and business administration, and is to have three more faculties and a girls' college.

WELFARE. The Ministry of Health is responsible for 10 administrative districts, serving both Saudi citizens and pilgrims. In 1968 there were 49 hospitals, 63,000 beds, 180 clinics and 270 health units. The Jiddah Quarantine Centre, designed by WHO and primarily for pilgrims, can take 2,400 patients. In 1970 there were 3 nursing schools and 3 sanitation training institutes. There is a strict system of health controls for visiting pilgrims and strict supervision of sanitation and water supply.

FINANCE. Currency. The legal monetary unit is the *rial*, a silver coin containing 0·34 oz. fine (4·5 *rials* = US$1). There are silver coins for ¼, ½ and 1 *rial*, and a nickel *qurush*, 20 of which (or 11 for certain official payments including Customs duties) equal 1 *rial*. For higher denominations the Saudi gold guinea is the official currency, although now seldom seen; most have been withdrawn because of skilful replicas circulating on the market. The genuine Saudi sovereign has a fixed rate of 40 *rials* (not quite £4).

In 1960 the Saudi Arabian Monetary Agency announced the issue of a paper rial to replace the 'pilgrims' receipts'; the paper rial is divided into 20 *qurush* (instead of 22) and backed 100% by gold or transferable currencies; the gold rial will cease to be legal tender. The gold cover of the currency was raised to 50% in Sept. 1961.

Budget. The fiscal year runs from 15 Oct. to 14 Oct. The budget for 1970–71 balanced at SR6,380m., that for 1966–67 at SR5,025m., that for 1967–68 at SR4,937m.; that for 1968–69 at SR5,530m., and that for 1969–70 at SR5,966m. Receipts from the oil companies account for 80% of revenue; since Jan. 1950 Saudi Arabia has had a 50/50 share in oil profits.

The main items of expenditure in 1969–70 were (in SR1m.): Education, 587·4; labour training and social services, 100·4; health, 168·2; agriculture and irrigation, 382·3 (including 300 for special projects).

DEFENCE. In 1937 a Ministry of Defence and a training school for officers were established. British Military and Civil Air Missions helped in training the Army and civil aviation from 1947 to 1941. The United States now maintains a Military Mission (with an Air Force element). Personnel are now trained in Saudi Arabia and the UK.

The Air Force began as a small army support unit in 1932 and has been built up considerably with British and US assistance since 1946. Personnel total about 5,000.

Complete re-equipment began in 1966 when orders were placed in Britain for 34 Lightning F.53 supersonic fighters, 6 Lightning T.55 two-seat fighter trainers and 25 BAC 167 armed strike and training aircraft, with associated radar and American-designed Hawk surface-to-air missiles. As interim equipment, a total of 7 Lightning F.52 fighters and Lightning T.54 trainers, 4 Hunter F.6 fighters, 2 Hunter T.66 two-seat trainers and Thunderbird surface-to-air missiles were

acquired from Britain. The Hunters were donated subsequently to Jordan; 32 of the Lightning F.53s and 3 F.52s were operational in late 1971. Three JetStar VIP jet transports, 34 Agusta-Bell 205 and 206 helicopters, and about 12 Cessna T-41A piston-engined trainers have been bought. Other current equipment includes a squadron of F-86F Sabre fighters, T-33A jet advanced trainers, T-34 Mentor and T-28 basic trainers, and C-130 Hercules and C-47 transports of US design; and Chipmunk primary trainers from the UK. A total of 50 F-5E/B supersonic fighters/trainers was ordered from USA in 1971. The main bases are at Riyadh and Jidda.

AGRICULTURE. The Saudi Arabian Agricultural Bank in Riyadh had (1970) capital of SR30m. Most of the loans granted were for agricultural equipment or for drilling or deepening wells. SR300m. has been allocated to major projects of desert reclamation, including irrigation schemes, land preparation and sowing, drainage and control or surface water, control of moving sands and distribution of undeveloped land to farmers. A full survey of water resources is in progress; there are 3 sea-water desalination plants working and 4 others proposed.

Medina produces excellent dates in abundance; Taif and other oases in the mountains and valleys produce honey and a fair variety of fruit: while Beduin products are hides, wool, charcoal and clarified butter. The products of Nejd are dates, wheat, barley, coffee, limes, henna, pearls, hides, wool, oil, clarified butter (*saman* or *ghi*) and abaas (Arab cloaks), besides camels, horses, donkeys and sheep.

OIL. The geologic–geographical mapping of Saudi Arabia was completed in 1961 under the joint sponsorship of the Saudi Arabian and US governments.

Oil operations are chiefly carried out by the Arabian American Oil Co. (Aramco) owned by US interests. Other American interests have secured a concession of Saudi Arabia's oil rights in the Kuwait/Saudi Arabia Neutral Zone. Here first shipments began in 1954. In 1958 a Japanese concern obtained concessions for both the Saudi and Kuwait half-shares in the Neutral Zone offshore. Crude oil production was 146,000 bbls daily in 1946 and 3m. bbls daily in 1970.

The operating centre is at Dhahran, and the principal oilfield at Abqaiq; the next most important producers are in Ain Dar and the Dammam oilfield, where the original discovery of oil was made in 1938. Several other oilfields, notably the great Ghawar field south of Ain Dar and the offshore wells of Safaniya, are being developed. Of the 1948 concession area, Aramco had by March 1963 retained only 105,000 sq. miles, *i.e.*, about 20%.

Some crude oil is refined in a large refinery at Ras Tanura (11m. tons in 1960), and some is transported by pipeline to Bahrain Island, for refining there. Crude oil is also shipped from the Persian Gulf. In addition, some 15m. long tons of crude oil is annually transported along the Trans-Arabian Pipeline system (TAPline). This 1,068-mile long pipeline connects the oilfields to a Mediterranean oil port at Saida; it came into operation at the end of 1950.

The government-established General Petroleum and Mineral Organization (Petromin) works to set up new oil- and mineral-related industries, and to co-ordinate national interest in oil production. Petromin handles exploration and concession agreements and is active in drilling, distribution and marketing. It has 75% interest in a new refinery at Jiddah and is building another at Riyadh.

COMMERCE. Exports amounted to the equivalent of US $508m. in 1966–67. The US was the main supplier, accounting for 23% of the total. Other major supplying countries were the UK (8%), Italy (8%), Lebanon (7%), Japan (7%) and West Germany (6%). Foodstuffs accounted for 30% and machinery, electrical appliances and transport items for another 30%.

Total trade with UK (British Board of Trade returns, in £1,000 sterling):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	62,542	68,718	86,796	104,231	172,785
Exports and re-exports from UK	16,167	47,030	56,969	35,249	38,946

SHIPPING. The ports of Dammam on the Persian Gulf and Jidda on the Red Sea have deep-water piers.

ROADS. There are asphalted roads from Jidda to Mecca, to Medina, to Taif and to Riyadh. There is also a track from Mecca eastward through Riyadh to Uqair and Dhahran on the Persian Gulf, a distance of 829 miles, which is used for motor transport. Motor cars can travel between Riyadh and Kuwait, Riyadh and Hail, Jauf and the northern frontier towns, Jidda and Hail, and between Jidda and Jizan and Sabya.

RAILWAYS. A railway from Riyadh to Dammam on the Persian Gulf *via* Dhahran and the oilfields Abqaiq, Ithmaniya (near Hofuf) and Haradh was completed in Oct. 1951. That section of the Hejaz Railway which is in Saudi Arabian territory is not now in working order, but the Damascus–Medina section is being re-constructed by a British firm.

AVIATION. Saudi Arabian Air Lines, a government-owned company managed by Trans-World Airlines, operates regular internal air services, and services to Cairo and other North African countries, to Beirut and to London, as well as special flights for pilgrims. The pilots are mainly Americans, with a growing number of Saudi Arabian co-pilots. The main airports are at Jidda, Dhahran and Riyadh.

TELECOMMUNICATIONS. Jidda, Mecca and Taif are linked by telephone, Jidda and Cairo by radio-telephone. An international radio-telephone station at Riyadh was opened in 1956. Number of telephones (1969), about 44,000. Number of post offices (1970) about 400.

BANKING. Branches of the Algemene Bank Nederland NV, the Banque de l'Indochine, the British Bank of the Middle East, the Arab Bank (of Jerusalem), the Banque de Caire, the National Bank of Pakistan and the Banque du Liban et d'Outremer conduct banking business in Jidda. The Banque de l'Indochine, the British Bank of the Middle East, the Algemene Bank Nederland, the Banque de Caire and the Arab Bank have branches in Al Khobar and Dammam; the last two banks have also branches in Riyadh. The locally-controlled National Commercial Bank has branches in Jidda, Mecca, Taif, Medina, Riyadh, Al Khobar and Dammam.

SIKKIM

Denjong

HISTORY. Sikkim is a kingdom in the Eastern Himalayas. It is inhabited chiefly by the Lepchas, who are a tribe indigenous to Sikkim with their own dress and language, the Bhutias, who originally came from Tibet, and the Gorkhalis (Nepalis), who entered from Nepál in large numbers in the late 19th and early 20th century. The main languages spoken are Sikkimese, Bhutia, Lepcha and Khaskura (Nepali). Being a small country Sikkim has frequently been involved in struggles over her territory, and as a result her boundaries have been very much reduced over the centuries. In particular the Darjeeling district was acquired from Sikkim by the British East India Company in 1839. The Namgyal dynasty has been ruling Sikkim since the 14th century; the first consecrated ruler was Phuntsog Namgyal who was consecrated in 1642 and given the title of 'Chogyal', meaning 'Divinely appointed King', derived from Cho—religion and Gyalpo—king.

Sikkim is a land of wide variation in altitude, climate and vegetation, and is known for the great number and variety of birds, butterflies, wild flowers and

orchids to be found in the different regions. It is a fertile land and to the Sikkimese the country is known as Denjong, The Valley of Rice.

National flag: A golden yellow wheel with 8 spokes, representing Buddha's eightfold path to Nirvana, on a white background with a red border.

HEAD OF STATE. The Miwang Chogyal Chempo Palden Thondup Namgyal, Twelfth consecrated Chogyal of Sikkim, Incarnate of Choygal Sidkeong and Reincarnate of the Palpung Entrul Karma Nge-lek Rimpoche of Kham, born 22 May 1923, succeeded 2 Dec. 1963.

CONSTITUTION AND GOVERNMENT. Sikkim was joined to the British Empire by a treaty in 1886 until 1947, but that relationship ceased when Britain withdrew from India in 1947. Thereafter there was a standstill agreement between India and Sikkim until a treaty was signed on 5 Dec. 1950 between India and Sikkim by which Sikkim became a protectorate of India and India undertook to be responsible for Sikkim's defence, external relations and strategic communications.

The Chogyal governs Sikkim with the help of the Sikkim Council, consisting of 18 elected members, 7 seats being reserved for Bhutias and Lepchas, 7 seats for Nepalis, 1 seat for Tsongs, 1 seat for Sangha (the Monasteries), 1 seat for the Scheduled Castes and 1 for general interests, and 6 members nominated by the Chogyal. The present elected members of the Council are drawn as follows: Sikkim National Party, 7; Sikkim National Congress, 5; Sikkim State Congress, 4; Sangha and Scheduled Castes, 1 each, both supported by Sikkim National Party. From the Sikkim Council an Executive Council is formed, consisting of a number of the elected members who, up to date, have always formed a coalition government. Executive Councillors hold portfolios of Education, Health, Forestry, Excise, Bazaar, Agriculture, Food, Public Works, Transport, and Press and Publicity. The Secretaries to the Government, who are Civil Servants, are responsible for Home Affairs, Land Revenue and Finance. The *Sidlon*, or Prime Minister, is chosen by the Chogyal and is directly responsible to him. He is President of the Council and Head of the Civil Service.

Prime Minister: I. S. Chopra.

Senior Executive Councillor: Martam Topden.

Executive Councillors: Nahakul Pradhan, Lhendup Dorji Khangsarpa, Ashook Tsering, Harka Bahadur Basnett, Kalu Rai, Dorji Dahdul (Chief Secretary).

The official language of the Government is English.

Sikkim is divided into 4 districts for administration purposes, Gangtok, Mangan, Namchi and Rabdentse being the headquarters for the Eastern, Northern, Southern and Western districts respectively. Each district is administered by a District Officer. Within this framework are the *Panchayats* or Village Councils, representing the villages.

AREA AND POPULATION. Area, 7,298 sq. km. Census population (1971), 208,609, of whom 15,000 live in the capital, Gangtok.

RELIGION. The state religion is Mahayana Buddhism, but a large proportion of the population is Hindu. There are some Christians, Moslems and members of other religions.

EDUCATION. Sikkim has 164 primary schools and 27 secondary schools, providing education for over 20,000 children. There is also a training institute for primary teachers. Education is free up to the sixth grade, and thereafter at a nominal fee. A university college is in the planning stage and scheduled to be completed in 1976. At present Sikkimese students of higher education attend universities outside Sikkim and there are over 300 graduates.

HEALTH. There are 5 hospitals, serving the 4 districts, at Gangtok, Singtam, Gyalzing, Namchi and Mangan, with a total of 292 beds, besides 26 dispensaries, 4 sub-dispensaries, a maternity ward, chest clinic and two blocks for tuberculosis patients. There are 20 doctors. Medical and hospital treatment is free; there is a hospital or dispensary within 10 miles of every homestead and a primary school within 2 miles. Malaria has been eliminated after a concentrated programme of eradication.

FINANCE. The annual revenue exceeded Rs 3 cores in 1971.

AGRICULTURE. The economy is mainly agricultural; main crops are cardamom (a spice), mandarin oranges, apples, potatoes, rice, maize, millet, ginger and soybean. Sikkim is the world's largest supplier of cardamom, about 200 tons per annum. A tea plantation has recently been started. Forests occupy about 30% of land area and the potential for a timber and wood pulp industry is being explored. Some medicinal herbs are exported.

PLANNING. The fourth 5-year plan commenced in April 1971. All plans have been supported by India in the form of loans and aid with Indian expertise and advice.

COMMERCE. There is a distillery at Rangpo and a fruit preservation factory at Singtam. Copper and graphite are mined by the Sikkim Mining Corporation and the Geographical Survey of India is investigating resources of coal, lime, graphite and other minerals. There is a tannery at Majitar and it is possible a watch factory will be started in collaboration with Hindusthan Machine Tools Ltd. A jewel-bearing factory is being set up. There are 4 hydro-electric power stations and the Government hopes to take further advantage of natural facilities for hydel power; one major project, the Lagyap Scheme, will begin in 1972. Local crafts include carpet weaving, handmade paper, wood carving and silver work. There is great potential for the tourism industry; a second government hotel is planned and other tourist facilities are being developed.

COMMUNICATIONS. There are 930 miles of metalled roads, all on mountainous terrain, and 48 major bridges. Public transport and road haulage is nationalized. There are 530 telephones (1971) and 32 wireless stations throughout Sikkim. The nearest airport is at Bagdogra, India (75 miles), and the nearest railhead at Siliguri, India (70 miles).

SOMALI DEMOCRATIC REPUBLIC

Al-Jumhouriya As-Somaliya Al-Domocradia

The Somali Republic came into being on 1 July 1960 as a result of the merger of the British Somaliland Protectorate, which became independent on 26 June 1960, and the Italian Trusteeship Territory of Somalia. For the previous history of these territories *see* THE STATESMAN'S YEAR-BOOK, 1960, pp. 337 and 1367.

AREA AND POPULATION. The Somali Republic has a total area of about 700,000 sq. km (270,000 sq. miles) with an estimated population (1969) of 2·8m. Mogadiscio is the capital (population, 100,000). Other towns: Hargeisa

(50,000), Kisimayu (30,000), Berbera (20,000, but fluctuates between 15,000 and 40,000 depending on the marketing season).

Negotiations are going on to settle a long-standing territorial dispute with Kenya.

CONSTITUTION AND GOVERNMENT. The constitution of the Somali Republic was established under the Italian trusteeship during 1960. It was provisionally adopted on 1 July 1960 by the two regions by means of an Act of Union and approved by a national referendum in June 1961. The Somali armed forces took over supreme power in the country from the civilian Government on 21 Oct. 1969. The Parliament was dismissed, the constitution suspended and Supreme Court dissolved.

A Supreme Revolutionary Council was formed which took over the responsibility of Legislature, Executive and Judiciary. Fourteen civilian Secretaries of State responsible for Government Ministries were appointed by the Revolutionary Council.

The Supreme Court was re-established with new Judges by the Revolutionary Council.

The Somali Democratic Republic is administratively divided into 8 regions, Migiurtinia, Hiran, Mudugh, Benadir, Upper Giuba, Lower Giuba, North Western Province (consisting of Hargeisa, Berbera and Borama districts) and North-Eastern Province (consisting of Burao, Erigavo and Las Anod).

The national language is Somali. Arabic, Italian and English are all official languages of the Government, and all 3 are extensively spoken.

RELIGION. The population is about entirely Sunni Moslems. There are very few Roman Catholics, mainly in the capital.

EDUCATION. The literacy rate, estimated at 5%, is low because of language problems and shortage of schools. The nomadic life of a large percentage of the population inhibits educational progress.

HEALTH. There are 67 physicians and 15 hospitals with about 3,200 beds.

FINANCE. Currency. The currency is the Somali shilling, divided into 100 cents (17·143 Somali shillings = £1 sterling). The money is issued in notes of 1, 5, 10, 20 and 100 shillings and coins of 1, 5, 10, 50 cents and 1 shilling. Currency in circulation about Som.Sh.60m.

Budget. The budget for 1971 envisaged Som.Sh.306·3m. expenditure (1970: 300m.) and Som.Sh.316·3m. revenue (1970: 307·9m.). Indirect taxation accounts for more than 80% of the revenue. The deficit is expected to be covered by foreign assistance.

DEFENCE. Army. The army is being built up to about 10,000 by Soviet military and technical advisers; the police numbers about 4,000, the finance guards about 400 and the local Illaloes (rural police) about 2,500.

Air Force. Formed with a nucleus of aircraft taken over from the former Italian Air Corps of Somalia, in 1960, the Air Corps was built up with Soviet aid. Current equipment includes about 20 MiG-17 and MiG-15 jet-fighters and small transport and training units.

DEVELOPMENT. A 5-year development plan (1963–67) envisaged capital expenditure of Som.Sh.1,400m., to be vested mainly in transport and communications (29%), agriculture (18%) and industry (16%). Owing to shortage of skilled manpower only about 20% of the plan has been implemented. In 1970 a new development plan was under preparation.

AGRICULTURE. Somalia is essentially a pastural country, and about 80% of the inhabitants depend on livestock-rearing (cattle, sheep, goats and camels). In Southern Somalia, especially along the Shebeli and Giuba rivers, there are Somali and Italian plantations with a cultivated area of some 90,000 hectares. There is an estimated annual output (1,000 tons) of sugar from sugar-cane, 392; bananas, 140; sorghum, 195; maize, 103. Fresh fruit and oil seeds are grown in increasing quantities.

Livestock (1967). 4·5m. goats; 3m. sheep; 2·5 camels; 1·2 cattle; 25,000 horses.

INDUSTRY. There are a number of small meat and fish canneries, a small leather tanning industry, oil seed and fresh fruit processing plants, a small shoe and leather-works industry, weaving of coloured cloth for local use and some woodwork, milk.

MINING. Deposits of iron are in the south and gypsum in the north are known to exist. Beryl and columbite are also found in the north. None are commercially exploited. Several firms hold exploration and drilling licences for oil. Uranium is found in Juiba region.

TRADE. In 1968 imports were estimated at US$47·6m. and exports at US$29·7m. The chief exports are fresh fruit, livestock, hides and skins. The adverse balance of trade is offset by foreign-aid receipts and remittances from Somalis living abroad.

Total trade between the Somali Republic and UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	121	133	105	88	72	134
Exports and re-exports from UK	658	725	1,008	1,006	1,224	1,321

ROADS. Somalia has no developed transport system. Internal freight and passenger transport is almost entirely by means of road haulage. There are 8,115 miles of roads (373 miles are paved and 2,600 miles are improved). There are no railways. In 1964 there were 4,200 passenger cars and 6,300 commercial vehicles, including buses.

POST. There is a manual telephone system in several towns, but Mogadiscio has an automatic system; number of telephones (1971), about 4,740. The state radio stations transmit in Somali, Arabic, English and Italian from Mogadiscio, Hargeisa, Anhazic, Swahili, Koti.

AVIATION. There is a commercial national airline, Somali Airlines. Mogadiscio airport is used by Alitalia, United Arab Airlines, Aden Airways and East African Airlines. Through Nairobi to the south and Aden to north there are reasonable connexions for travelling to any part of the world.

BANKING. The Banco di Roma, Napoli, National & Grindlays Bank and Banco di Portsaid have all more than one branch each in the country. The Somali National Bank and the Somali Development Bank are both state-owned.

WEIGHTS AND MEASURES. The metric system is used in six provinces and the Imperial system in two; the latter is gradually disappearing.

DIPLOMATIC REPRESENTATIVES. The Somali Republic maintains embassies in:

Egypt	Kenya	USSR
Ethiopia	Saudi Arabia	UK
France	Southern Yemen	USA

REPUBLIC OF SOUTH AFRICA

Republiek van Suid-Afrika

CONSTITUTION AND GOVERNMENT. The Republic of South Africa Constitution Act 1961 established with effect from 31 May 1961, the Republic, consisting of the 4 provinces—the Cape of Good Hope, Natal, the Transvaal and the Orange Free State—which until then comprised the Union of South Africa.

On 5 Oct. 1960 a referendum was held among the white voters (1,800,426 on roll) to decide whether the Union should become a republic. Of the 1,634,240 votes polled, 850,458 were in favour of a republican constitution, 775,878 against it; 7,904 votes were invalid. The voting was as follows: Transvaal, 406,632 for, 325,041 against; Cape Province, 271,418 for, 269,784 against; Orange Free State, 110,171 for, 33,438 against; Natal, 42,299 for, 135,598 against; South West Africa, 19,938 for, 12,017 against.

The head of the Republic is the State President; he is elected for a 7-year term (at a meeting specially convened for the purpose) by an electoral college consisting of the members of the Senate and the House of Assembly and presided over by the Chief Justice or a judge of appeal designated by him.

Legislative power is vested in a Parliament consisting of the State President, a Senate and a House of Assembly. The State President has power to summon, prorogue and dissolve Parliament, either both Houses simultaneously or the House of Assembly alone. He may also dissolve the Senate at any time within 120 days of any dissolution of the House of Assembly or the expiry of the term of office of a provincial council. A session of Parliament must be held once at least in every year.

The Senate consists of 54 members, 10 being nominated by the State President-in-Council (2 for each of the Provinces and 2 for South West Africa) and 44 being elected (15 in the Transvaal, 11 in the Cape Province, 8 in Natal, 8 in the Orange Free State, 2 in South West Africa). A senator must be a white South African citizen, at least 30 years of age, qualified as a voter in one of the provinces and resident for 5 years within the Republic. Senators hold their seats for 5 years, subject to a prior dissolution of the Senate.

At least one of the 2 senators nominated by the State President from each province should be thoroughly acquainted with the interests of the Coloured population. Similarly, one of the senators nominated from South West Africa should be selected mainly for his thorough acquaintance with the reasonable wants and wishes of the Coloured races of the Territory.

The House of Assembly consists of 166 members chosen in electoral divisions as follows: Cape of Good Hope, 54; Natal, 18; Transvaal, 73; Orange Free State, 15; South West Africa, 6.

A member of the House of Assembly must be a white South African citizen, qualified as a voter and resident for 5 years within the Republic. Every House of Assembly continues for 5 years unless sooner dissolved.

Only the House of Assembly can originate money bills, but may not pass a bill for taxation or appropriation unless it has been recommended by the State President during the session. Restrictions are placed on the amendment of money bills by the Senate. Provision is made respecting disagreements between the Houses and the State President's assent to bills.

A member of one House cannot be elected to the other, but a minister and a deputy minister may sit and speak, but not vote, in the House of which he is not a member. To hold an office of profit under the State (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime and insanity. Pretoria is the seat of government, and Cape Town is the seat of legislature.

The state of the parties in the House of Assembly after the elections of 28 April 1970 is as follows: National Party, 118; United Party, 47; Progressive Party, 1.

In the Senate, for which elections were held on 16 Nov. 1970, the National Party has 41 members and the United Party 13.

The Executive Council (National Party) was, in May 1970, composed as follows:

State President: J. J. Fouché (elected 19 Feb., installed 10 April, 1968).

Prime Minister: B. J. Vorster.

Transport: B. J. Schoeman. *Finance:* Dr N. Diederichs. *Agriculture:* D. C. H. Uys. *Defence:* P. W. Botha. *Tourism, Sport and Recreation, Indian Affairs:* F. W. Waring. *Foreign Affairs:* Dr H. Muller. *Labour, Posts and Telegraphs:* M. Viljoen. *Bantu Administration and Development and Bantu Education:* M. C. Botha. *Justice and Prisons:* P. C. Pelser. *Mines and Health:* Dr C. de Wet. *Community Development and Public Works:* B. Coetzee. *Economic Affairs and Police:* S. L. Muller. *Water Affairs and Forestry:* S. P. Botha. *Information, Social Welfare and Pensions, Immigration:* Dr C. P. Mulder. *National Education:* Senator J. van der Spuy. *Planning, Coloured Affairs, Rehoboth Affairs and Statistics:* J. J. Loots.

The following are Deputy Ministers, who do not have Cabinet rank and are not members of the Executive Council: *Transport:* H. E. Martins. *Bantu Administration and Education:* Dr P. G. J. Koornhof. *Finance and Enonomic Affairs:* A. H. du Plessis. *Agriculture:* H. Schoeman. *Bantu Development:* H. J. Raubenheimer. *Interior, Social Welfare, Pensions, Coloured Affairs and Rehoboth Affairs:* Dr S. W. van der Merwe.

The Prime Minister receives an annual salary of R13,000 and a reimbursive allowance of R4,500; a member of the Cabinet an annual salary of R10,000 and

a reimbursive allowance of R3,000; and a Deputy Minister an annual allowance of R8,000, a reimbursive allowance of R2,000 plus R1,740 in lieu of an official residence.

The English and Afrikaans languages are both official, subject to amendments carried by a two-thirds majority in joint session of both Houses of Parliament.

National flag: Orange, white, blue (horizontal), with the flags of the Orange Free State, the South African Republic and the Union Jack superimposed on the white stripe.

National anthem: The Voice of South Africa/Die Stem van Suid-Afrika (words by C. J. Langenhoven, 1918; tune by M. L. de Villiers, 1921).

PROVINCIAL ADMINISTRATION. In each province there is an Administrator appointed by the State President-in-Council for 5 years, and a provincial council elected for 5 years, each council electing an executive committee of 4 (either members or not of the council), the Administrator acting as chairman. Members of the provincial council are elected on the same system as members of Parliament. The provincial committees and councils have authority to deal with local matters, of which provincial finance, education (primary and secondary, other than higher education and technical education), hospitals, roads and bridges, townships, horse and other racing, and game and fish preservation are the most important. In 1953 the administration and control of Bantu education was transferred from the provincial councils to the central government. All ordinances passed by a provincial council are subject to the veto of the State President-in-Council.

BANTU ADMINISTRATION. In 1951 the Bantu Authorities Act was enacted to provide a system of Bantu tribal, regional and territorial authorities. These were given limited administrative, executive and judicial functions and limited legislative powers. In 1959 the main ethnic groups received legislative recognition by the passing of the Promotion of Bantu Self-Government Act, which provided *inter alia* for the various ethnic groups to develop into self-governing national units, each with a Commissioner-General representing the Government of the Republic.

As the territorial authorities became experienced an executive body in the form of a government service was set up for each authority to increase their administrative power.

As the Act envisages eventual political autonomy for each of the various national units and as representation in the highest White governing bodies is regarded as a retarding factor, the representation of Bantu by Whites in Parliament and the Cape Provincial Administration was abolished with effect from 30 June 1960.

The Bantu Homelands Constitution Act was passed in 1971. In terms of the provisions of part I of this Act, 6 of the existing 7 territorial authorities in the Republic of South Africa (the Transkei became a self-governing territory in 1963 by virtue of the provisions of the Transkei Constitution Act of 1963) have been converted to Legislative Assemblies with extended legislative and administrative powers. Part II of the Bantu Homelands Constitution Act makes provision for the areas of these legislative assemblies to be proclaimed self-governing territories with *inter alia* the power to repeal or amend, with minor exceptions, acts of the Republican Parliament.

The Coloured Peoples Representative Council consists of 40 elected and 20 nominated members. Elections took place in Sept. 1969 and Tom Swartz, leader of the Federal Party, was appointed Chairman of the Council by the State President.

In 1961 the ex-chief of the Umvoti Mission reserve, Albert Luthuli was awarded the Nobel Peace Prize for his advocacy of peaceful means in the achievement of Bantu aspirations.

The Transkei, territory of the Xhosa nation, has an area of 16,675 sq. miles and a population of about 1·5m. (half of the total Xhosa population). At the election for its first Legislative Assembly in Nov. 1963, Paramount Chief Victor Poto was supported by 30 and Chief (now Paramount Chief) Kaizer Matanzima by 15 of the elected members then returned, but at the subsequent secret ballot of the total membership (109) of the Legislative Assembly in Dec. 1963, Chief Kaizer Matanzima received a majority of their votes cast and therefore became Chief Minister in terms of the Transkei Constitution Act. In the second general election in 1968 the ruling Transkei National Independence Party headed by Paramount Chief Matanzima won 28 of the 45 seats, the Democratic party 14 and independents 3. The majority of the chiefs in the Assembly support Matanzima. The ruling party supports the policy of separate development.

AREA AND POPULATION. The total area of the Republic is 471,445[1] sq. miles (1,221,042 sq. km), divided between the provinces as follows: Cape of Good Hope, 278,380 (721,004); Natal, 33,578 (86,967); Transvaal, 109,621 (283,918); Orange Free State, 49,866 (129,153).

On 25 Dec. 1947 the Union formally took possession of Prince Edward Island and, on 30 Dec., of Marion Island, about 1,200 miles south-east of Cape Town.

[1] Excludes Walvis Bay (434 sq. miles), which is an integral part of the Cape Province but is administered under Act No. 24 of 1922 by South West Africa.

The census taken in 1904 in each of the four colonies was the first simultaneous census taken in South Africa. In 1911 the first Union census was taken.

[1] Census, May 1970.

Of the non-White population in 1970, 15,057,952 were Bantu, 620,436 Asiatic and 2,018,453 Coloured. The numerically leading Bantu nations are the Zulu (4·02m.), Xhosa (3·9m.), Tswana (1·7m.), Sepedi (1·6m.), Sotho (1·4m.).

In 1960 Afrikaans was the home language of 1·79m. Whites, English of 1·15m. Whites. Of the 12·7m. Bantu about 50% can read and write, and 3m. (80%) of Bantu children of school-going age were attending school in 1970.

The registration of Bantu essential data was introduced on a compulsory basis many years ago. However, despite serious efforts on the part of the registering authorities, the Bantu are still largely reluctant to have their essential data registered. Consequently no complete vital statistics are available for this population group.

Principal cities (excluding suburbs) according to the latest statistics (1968) are:

EDUCATION. *Higher Education.* There are 16 universities in the Republic: (1) The University of Cape Town. (2) The University of Natal, Durban and Pietermaritzburg. (3) The University of the Orange Free State at Bloemfontein. (4) Potchefstroom University for Christian Higher Education, Potchefstroom. (5) The University of Pretoria. (6) Rhodes University, Grahamstown, C.P. (7) The University of Stellenbosch. (8) The University of the Witwatersrand, Johannesburg. (9) The University of South Africa, with its seat in Pretoria, which conducts a Division of External Studies by means of correspondence and vacation courses; it is also an examining body. (10) The University of Port Elizabeth. (11) Rand Afrikaans University, Johannesburg.

The University of Fort Hare (12), the University of the North (13) near Pietersburg and the University of Zululand (14) near Empangeni, Natal, are operated by the Department of Bantu Education and provide education at university level for the Bantu, the University of the Western Cape (15), Kasselsvlei, offers university facilities to the Coloured population and is administered by the Department of Coloured Affairs; while the University for Indians (16) at Durban falls under the Department of Indian Affairs.

Technical and Vocational Education. Technical, vocational and special education for persons other than those for whom specific provisions is made (*e.g.*, Bantu): The Department of National Education is responsible for the maintenance, management and control of or the payment of subsidies to colleges for advanced technical education, technical colleges, technical institutes, special schools, schools of industries and reform schools. Colleges for advanced technical education provide education on an advanced level for a variety of technical, commercial and general courses of study as well as secondary education on a part-time basis. Technical colleges and technical institutes are mainly responsible for the training of apprentices and the education, on a part-time basis, of persons not subject to compulsory school attendance. Special schools for handicapped children cater for the educational needs of those who are blind, partially sighted, deaf, hard of hearing, epileptic, cerebral palsied and physically handicapped. Children found to be in need of care by a children's court, are admitted to schools of industries and reform schools.

The Department of Coloured Affairs has taken over all schools of this nature for Coloureds.

In 1970, 26 technical colleges for Whites had 561 teachers and 19,927 students; 1 for Coloureds had 18 teachers and 468 students; 1 for Asians had 358 teachers and 6,288 students. In addition there are 5 vocational schools for Coloureds and 12 teacher-training colleges with 183 teachers and 2,782 students. Provision is made for vocational education for the Bantu at 6 technical schools and 24 industrial or trade schools; total enrolment at these institutions was nearly 3,000 in 1966. Twelve schools for the blind, the deaf, epileptics and cerebral palsied had 1,321 white pupils.

State and State-aided Education other than Higher Education. Primary and secondary public education, other than that specifically provided elsewhere, falls under the Provincial Administration. In terms of the National Education Policy Act, 1967, the Minister of Education, Arts and Science may, after consultation with the Provincial Administrators and the National Advisory Education Council, determine general educational policy within the framework of the Act. Bantu education is the responsibility of the Department of Bantu Education, while education for Coloureds and Indians is controlled by the Departments of Coloured Affairs and Indian Affairs respectively.

Public schools in 1968: 2,821 for Whites with (1966) 66,400 teachers and 822,482 pupils; in 1969: 1,837 for Coloureds with 15,392 teachers and 493,462 pupils; 391 for Asians with 5,841 teachers and 160,080 pupils; 7,752 for Bantu (in the Republic) with 35,436 teachers and 2,075,801 pupils. (Bantu teachers include those in teacher-training schools, technical and private schools.)

Private Schools. To a certain extent the activities of private schools are controlled by government regulations. Their pupils generally sit for the state schools'

examinations. These schools make provision for kindergarten, elementary and preparatory, general primary, secondary and commercial education.

In 1969, 197 private schools for Whites had 2,498 teachers and 49,134 pupils; 23 for Coloureds had 121 teachers and 3,380 pupils; 3 for Asians had 35 teachers and 1,349 pupils; 441 for Bantu in the Republic had 1,906 teachers and 81,293 pupils; 53 in Transkei had 6,087 pupils in 1967.

Teacher-training colleges in 1966: 16 for Whites had 737 teachers and 9,734 students; in 1967, 2 for Coloureds had 127 teachers and 1,887 students; 2 for Asians had 66 teachers and 855 students; 23 for Bantu in the Republic had 4,332 students and 7 in Transkei had 1,099 students.

NEWSPAPERS (1970). There are 6 Afrikaans and 14 English daily newspapers with a combined circulation of about 1,382,609, of which 1,022,464 are English.

HEALTH. In 1970 there were 7,271 medical practitioners, 2,641 specialists, 688 hospital interns and 1,594 dentists; in 1969 there were 135,486 hospital beds, of which 44,076 were in private and mission hospitals. More tuberculosis patients were treated as outpatients than in hospital.

SOCIAL WELFARE. Social Security. In 1967 social pensions (old-age, blind persons, disability grants, maintenance for children, war veterans) were paid to 143,274 White and 455,861 non-White beneficiaries; the total provision amounted to R92·49m. in 1968.

Welfare Services. South Africa is not a welfare state, yet provides many services for the community. Welfare work on behalf of the Government is done by the Departments of Social Welfare and Pensions, Coloured Affairs, Indian Affairs, and Bantu Administration and Development. There are also a great number of voluntary welfare societies which undertake a variety of welfare services. Social assistance is not based on compulsory insurance but is financed from taxation.

The Department of Social Welfare and Pensions formulates the broad policy and takes care of the co-ordination of the various welfare services. The National Council for Welfare, a statutory body set up under the National Welfare Act of 1965, among others, is used by the Government for the execution of this policy. Four specialized commissions serve under the National Council. These are: the Social Work Commission, the Commission for Family Life, the Commission for Welfare Planning and the Commission for Welfare Organizations. The Department also provides such personal services as pensions and allowances, and practical assistance to individuals or families who may have social problems, neglected and uncared-for children, juvenile delinquents, adults needing special guidance and alcoholics. There is assistance for mental or physical disability, death or absence of the breadwinner. There are professional field services and institutions available as well as financial help.

Voluntary Welfare Societies. These organizations supply supplementary services to those provided by the Government. Voluntary welfare organizations must register at the Department of Social Welfare and Pensions under the National Welfare Act of 1965. There are more than 2,000 registered welfare organizations; they have organized themselves into national and provincial councils so as to co-ordinate their activities. Funds for these voluntary services are raised from Government subsidies and by public subscription.

In the past the State, with the assistance of local authorities, voluntary welfare agencies and church organizations, provided welfare services for the Bantu, the voluntary agencies being controlled by White committees. However, this situation is gradually changing as more Bantu are taking an interest in welfare work. The various Bantu nations are being encouraged and assisted to form their own voluntary agencies and so to provide, as far as possible, welfare services for their own people. As far as is practicable, the institutions required for the care of the

aged and the disabled and for needy children are sited in the homelands, and are staffed by Bantu.

Child and Family Welfare. Welfare or professional officers employed by the State are responsible for the implementation and administration of the Children's Act (amended and consolidated in 1960). This Act makes provision for the prevention and treatment of neglected and maladjusted children, with the full integration of the services of voluntary child and family welfare organizations. Children's institutions, mainly established and controlled by private organizations, are subsidized by the State, as are crèches, community centres and other projects in aid of child and family welfare.

JUSTICE. The common law of the Republic is the Roman–Dutch law—that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The law of England as such is not recognized as authoritative, though by statute the principles of English law relating to evidence and to mercantile matters, *e.g.*, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping and insurance, English law is followed in the Cape Province, and it has also largely influenced civil and criminal procedure throughout the Republic. In all other matters, family relations, property, succession, contract, etc., Roman–Dutch law rules, English decisions being valued only so far as they agree therewith.

The Supreme Court of South Africa is constituted as follows: (i) The Apellate Division, consisting of the Chief Justice and 10 Judges of Appeal, is the highest court and its decisions are binding on all courts. It has no original jurisdiction, but is purely a Court of Appeal. (ii) The Provincial Divisions: In each province there is a provincial division of the Supreme Court, while in the Cape there are three such divisions possessing both original and appellate jurisdiction. (iii) The Local Divisions: There is a local division each in the Transvaal and Natal exercising the same original jurisdiction within limited areas as the provincial divisions.

The judges hold office till they attain the age of 70 years. No judge can be removed from office except by the State President upon an address from both Houses of Parliament on the ground of misbehaviour or incapacity. The circuit system is fully developed.

The Bantu appeal courts and 3 Bantu divorce courts have jurisdiction to some extent concurrent with and in certain respects exclusive of that of the Supreme Court in cases in which the parties are Bantu.

Each province is further divided into districts with a magistrate's court having a prescribed civil and criminal jurisdiction. From this court there is an appeal to the provincial divisions of the Supreme Court, and thence to the appellate division. Magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a judge. In addition, several regional divisions consisting of a number of districts have been constituted. Convictions of such courts are not subject to automatic review by a judge.

Courts of Bantu affairs commissioners have been constituted in defined areas to hear all civil cases and matters between Bantu and Bantu only. An appeal lies to the Bantu appeal court, whose decision is final, unless the court consents to an appeal to the apellate division of the Supreme Court on a point stated by the court itself. Bantu affairs commissioners have concurrent criminal jurisdiction with magistrates' courts in respect of certain offences committed by Bantu, while a limited civil and criminal jurisdiction is conferred upon the Bantu chief or headman over his own tribe.

Police. In 1971 the police force consisted of 1,703 White officers and 6,674 n.c.o.s, 7 Coloured officers and 250 n.c.o.s, 11 Bantu officers and 2,036 n.c.o.s, 3 Indian officers and 139 n.c.o.s. There were 8,397 White, 1,150 Coloured, 590 Indian and 11,148 Bantu constables.

FINANCE. Currency. The Decimal Coinage Act, 1959, introduced the decimal system, the units being the *rand* (abbreviated as R) and the *cent* (abbreviated as c).

The rand/cent coinage system came into operation on 14 Feb. 1961. The decimal coins are: *Gold coins.* 2 rand; 1 rand. *Silver coins.* 50 cents; 20 cents; 10 cents; 5 cents. *Bronze coins.* 2 cents; 1 cent.

Budget. A new basis of subsidy has, with effect from the 1971–72 financial year been brought into operation by the Government following the investigation of the commission of enquiry into the financial relations between the central government and the provinces.

The formula on which this subsidy is based is mainly derived from the calculation of: (1) The needs of the various provinces in respect of the services which, they have to provide in the fields of education, health, roads and miscellaneous services; (2) the capacity to pay of the various provinces in respect of the different sources from which their 'own' revenue has to be derived; (3) the deficit which arises when the available revenue of each province, as reflected in its capacity to pay, is subtracted from its expenditure, as adjusted in accordance with its needs.

DEFENCE. The South African Defence Force comprises a Permanent Force, a Citizen Force and a Commando organization. The Permanent Force consists of professional soldiers, airmen and seamen who are responsible for the administration and training of the whole Defence Force in peace-time, but who are gradually absorbed into the Citizen Force in time of war. The Permanent Force and the Citizen Force consist of Army, Air Force and Naval components; the Commando organization is an army and air organization.

Every citizen between the ages of 17 and 65 is liable to undergo training and to render personal service in time of war. Those between the ages of 16 and 25 are liable to undergo a compulsory course of peace training. Peace-time training in Commando organizations extends over a period of 16 years' intermittent training. Training in the Citizen Force takes the form of 1 year of continuous training, followed by 9 years during which training takes place at regular intervals.

Aliens have become liable for military service after 5 years' residence by Act of Parliament, 1967.

The S.A. Defence Force is administered by the Commandant-General, SADF, his advisors being the Army, Air and Naval Chiefs of Staff, Chief of Defence Staff, Chief of Defence Force Administration, the Comptroller, SADF and the Surgeon-General.

Army. South Africa is divided into 9 territorial Commands: Western Province, Eastern Province, Natal, Orange Free State, North Western, Northern Transvaal, Witwatersand, South West Africa and Southern Cape Commands. Within the various Commands are training units, of which members of the Permanent Force form the permanent staff. Courses of various types are held also at the S.A. Military College. Total strength, 10,000 regulars and 22,300 Citizen Force.

Navy. The South African Navy, with its headquarters at Simonstown, is administered by the Naval Chief of Staff, who holds the rank of Rear-Admiral. The Navy includes 3 new French-built submarines, 3 British-built anti-submarine frigates, 2 destroyers (*Jan van Riebeck*, *ex*-HMS *Wessex*, and *Simon van der Stel*, *ex*-HMS *Whelp*), 1 fast anti-submarine frigate (*Vrystaat*, *ex*-HMS *Wrangler*), 2 training frigates, 1 ocean minesweeper, 10 coastal minesweepers, 1 survey ship (*ex*-frigate), 1 boom defence vessel, 5 seaward defence boats, training vessels, a torpedo recovery vessel, 2 rescue launches, 2 tugs and a fleet replenishment ship. Naval personnel in 1971 totalled 420 officers and 3,140 ratings.

The facilities of the base at Simonstown are available for use by the Royal Navy and ships serving with the Royal Navy and by navies or allies of the United Kingdom in any war in which the United Kingdom is involved.

Air Force. Units of the South African Air Force are organized in Strike, Transport, Maritime, Light Aircraft Commands and a Maintenance Group. There are 1 bomber squadron with 9 Canberra B.12, 1 light bomber squadron with 15 Buccaneer Mk 50, 1 fighter-bomber squadron with 20 Mirage III-EZ carrying AS.20 and AS.30 missiles, and 1 interceptor squadron with 16 Mirage III-CZ armed with R.530 air-to-air missiles. Other aircraft in service include 4 Mirage III-RZ reconnaissance fighters, 30 F-86 Sabres with Sidewinder air-to-air missiles, 40 Vampire FB.5 fighter-bombers and at least 100 Impala dual-purpose trainer/light attack aircraft. A maritime reconnaissance squadron is equipped with 7 Shackletons. Transport squadrons have 9 Transall C-160s, 7 C-130B E Hercules, 44 C-47s, 4 C-54s, 1 Viscount and 9 P.166 light transports. Helicopter units have 56 Alouette IIs, 106 Alouette IIIs, 8 Wasps and 16 Super Frelons.

The Citizen Air Force comprises 8 squadrons with C-47 transports, Impala light jet attack aircraft and about 100 Harvard armed trainers. Total strength is 5,000 regular officers and men and 3,000 Citizen Air Force in training at one time.

AGRICULTURE. The number of farms owned by Whites in 1968 was 92,908, with an area of 102·65m. morgen (1 morgen = 2·11 acres).

South African farmers produced mainly the following crops for the years indicated:

Product	*1967*	*1968*	*1969*	*1970*

LIVESTOCK, in 1,000 (1968): 10,698 cattle; 39,544 sheep; 5,564 goats; 1,340 pigs.

In 1970, 1,518 cattle and 8,763 sheep were slaughtered.

The annual production of butter is about 48,000 metric tons; tinned milk, 37,000 metric tons; milk powder, 6,000 metric tons; cheese, 19,000 metric tons.

Wool exported in 1970–71 amounted to 83,144,000 kg valued at R52·9m.

Cotton-growing is now undertaken by many farmers, the plant being found a better drought resistant than either tobacco or maize.

During 1970, 422·7m. litres of wine were produced, of which 190·9m. litres were distilled.

IRRIGATION. The government activities in respect of the control and utilization of water are governed by the Water Act, 1956 (as amended), which is administered by the Department of Water Affairs. The Department's expenditure for 1971–72 is: Revenue account, R17m.; Local account, R101·5m.; South West Africa account, R13·2m.

The Orange River Project, launched in 1966, will take about 30 years to complete. It is to embrace 3 major dams on the Orange River, 9 smaller dams or weirs, a 51½-mile tunnel, 20 hydro-electric power stations and a system of canals. The first of the major dams—the Hendrik Verwoerd Dam—was built 5 miles upstream from Norvalspont. A Water Research Commission was established in 1971 to co-ordinate and promote research; it is responsible for hydrological research, major water resource development, water pollution control.

FORESTRY. The forested surface occupies about 1·25m. hectares, of which 0·25m. hectares are indigenous trees and 1m. hectares exotic trees (pine, gum, wattle). The annual output of forest products is about 85m. cu. metres. Production now meets about 90% of domestic need. Capital invested is about R600m., and the number of employees about 100,000.

FISHING. The catch of off-shore whaling in 1969 was 2,078 whales. Whaling is conducted off the Natal coast.

In 1969, 2·02m. short tons of fish were landed, including 1·86m. short tons of shoal fish. 7,115 fishing boats, including 1,004 motor boats, were engaged.

MANUFACTURES. The manufacturing industry's contribution to the gross domestic product is 22·7%—twice as much as the share of the mining industry. The gross value of output of all private industries rose from about R2,451m. in 1955–56 to just over R4,641m. in 1966. The number of private factories increased during the same period from 9,973 in 1955–56 to 13,142 in 1967–68, while the total industrial labour force increased from 622,350 (White and non-White) to 1·18m., excluding mining, in 1970.

Wages paid to workers in manufacturing industry in 1969 were R1,412,160,000. The gross sales of the principal groups of industries were (in R1,000) in 1969: Food, beverages and tobacco, 1,386,501; textiles, 357,964; wood, furniture, 243,563; paper, printing, 402,816; chemicals, 498,211; non-metal mineral products, 307,662; basic metal, 582,072; metal products, 506,159; machinery and transport equipment, 850,193.

DOMESTIC TRADE. The distributive trade in South Africa has developed to the stage where it ranks second only to manufacturing industry as the principal contributor to the gross domestic product of the country. In 1969 the contribution by the group of undertakings classified as wholesale, retail, catering and accommodation establishments to the gross domestic product was 14·3%.

Retail distributors include general dealers, departmental and chain stores, bazaars, supermarkets, discount houses, speciality shops and consumer co-operatives.

The wholesale and retail trade excludes the motor trade, which is now regarded as a separate economic sector. The retail trade also excludes provision dealers (café) which are now regarded as catering services. The automotive industry covers the motor trade and other motor-industry establishments, including manufacturers and assemblers.

ELECTRICITY. The total capacity of the power plants controlled by the Electricity Supply Commission was 7,583 Mw at the end of 1970. Power sold in 1970 was 34,890m. kwh.

TRADE UNIONS. At the end of 1970 there were 182 trade unions with a total membership of 405,032 Whites and 182,210 Coloureds and Asians.

The total revenue of trade unions in 1964–65 was R3,857,545; their total assets were valued at R10,624,661.

Although there is no legal provision for Bantu trade unions, there is no legal prohibition of trade unions by Bantu workers. However, the vast majority of Bantu workers have not shown much interest in trade unionism.

The Wage Board inquires into the wage levels of numerous categories of workers, particularly the Bantu, and it fixes minimum levels of pay and other conditions of employment. Special machinery exists under the Bantu Labour (Settlement of Disputes) Act to safeguard the interests of Bantu workers. This Act provides for the establishment by Bantu workers of local labour committees which are linked with regional committees. The latter committees are in contact with the Central Bantu Labour Board, which, together with Bantu Labour Officers, attends the meetings of the Wage Board and the other industrial bodies. Bantu Labour Officers also maintain close contact with employers of Bantu.

COMMERCE. South Africa, Botswana, Lesotho and Swaziland are members of a customs union and the foreign trade statistics shown below represent the combined imports and exports of these countries. The total value of the imports and exports, exclusive of specie and gold bullion, was as follows (in R1m.):

	Imports	Exports		Imports	Exports
1965	1,752·5	1,058·0	1968	1,876·8	1,502·4
1966	1,640·5	1,202·8	1969	2,128·0	1,528·6
1967	1,913·9	1,361·9	1970	2,540·1	1,537·9

South Africa's imports primarily consist of manufactured goods and in 1970 were constituted as follows: Capital goods approximately 45%; intermediary goods 35%; and consumer goods 20%.

The country's exports mainly comprise foodstuffs and industrial raw materials, but manufactured goods are also becoming of increasing importance in South Africa's total exports.

The principal commodity groups of imports and exports (in Rm.) were:

Imports	*1969*	*1970*	Exports	*1969*	*1970*
Mineral products	138·7	144·1	Vegetable products	126·7	148·0

Machinery, mechanical appliances and electrical equipment	556·7	704·9	Pearls, precious and semi-precious stones and metals, etc.	269·4	215·4
Vehicles, aircraft and vessels	407·0	466·8	Base metals	250·9	262·0
			Machinery, mechanical appliances and electrical equipment	74·5	83·8

The geographical origin of South Africa's imports and the direction of its export trade were mainly as follows (in Rm.):

	Imports		Exports

RAILWAYS. Railway history in South Africa begins in 1860 with the line Durban–Point. With the formation of the Union in 1910, the state-owned lines in the 4 provinces (7,577 miles) were amalgamated into one state undertaking, which also took over the control of the harbours—the South African Railways and Harbours Administration.

Government-owned lines operated by the administration at 31 March 1971 totalled 13,742 miles, of which 2,726 miles were electrified. Passenger journeys, 1970–71, 552m.; goods traffic (1970–71), 120·8m. tons.

ROADS. The railway administration operated road motor services over a route mileage of 32,909 at 31 March 1971; during that year 13·3m. passengers were conveyed and 4·2m. tons of goods were carried.

There were at 1 Oct. 1971, 320,000 km of rural roads, of which some 1,300 km of national roads and 30,700 km. of provincial roads were tarred.

Motor vehicles in operation in 1968 included 1,415,000 passenger cars, 373,000 commercial vehicles, 29,000 buses and 112,000 motor cycles.

SHIPPING. The 4 main ports are Durban, Cape Town, Port Elizabeth and East London. Smaller ports are Mossel Bay, Port Nolloth, Walvisbay and Lüderitz. During 1970–71 a total of 21,241 commercial vessels, whaling boats and fishing boats (including Suez-diverted boats) entered these ports, which handled 49·7m. tons of cargo (excluding Suez-diverted boats).

AVIATION. Civil aviation in South Africa is controlled by the Department of Transport, which administers the following state-owned airports: Jan Smuts Airport, Johannesburg; D. F. Malan Airport, Cape Town; Louis Botha Airport, Durban; J. B. M. Hertzog Airport, Bloemfontein; J. G. Strydom Airport, Windhoek; Ben Schoeman Airport, East London; H. F. Verwoerd Airport, Port Elizabeth; B. J. Vorster Airport, Kimberley; J. G. H. van der Wath Airport, Keetmanshoop; Upington Airport. At 13 other airports the Department provides air navigation services.

South African Airways, as the national air carrier, operate scheduled international air services within Africa and to Europe, South America, the USA and Australia. Twenty-three other lines also operate scheduled international air services; they include BOAC, PANAM, KLM, SAS, TAP, Swissair, Olympic Air, El-Al, Qantas, Alitalia, SABENA, Lufthansa, DETA, Air Rhodesia, Iberia, DJA UTA, LUXAIR, Lesotho Airways, Swazi Air, Air Malawi, Air Madagascar. Trek Airways operate international non-scheduled flights.

South African Airways, Pacair, Avne, Margate Air Services, Protea Airways, National Airways, The John Andrew Co., Avex Air, Commercial Air Services Ltd, Suidwes Lugdiens and Namakwaland-lugdiens operate scheduled air services within South Africa.

During 1970–71 South African Airways carried 3,656,424 passengers and 56,308,000 tons of freight and mail.

POST. On 31 March 1971 there were in South Africa (including South West Africa) 3,863 post and telegraph offices. In 1970–71 post office turnover amounted to R1,096m.

In 1971 the international telex switchboard enabled telex subscribers in South Africa to communicate with telex subscribers in 112 countries. Some 3,650 teleprinters were in use in 1967. There were 199 automatic telephone exchanges, 22,590 trunk (long-distance) lines in operation in 1971. There were 1,553,825 telephone stations and 18,884 public call offices.

The South African Broadcasting Corporation had, in 1971, 2,014,311 listeners' licences.

BANKING. Statistics of the South African Reserve Bank,[1] July 1971, are as follows (in R1m.):

Liabilities		Assets	
Notes in circulation	568·9	Gold coin and bullion	340·8
Deposits:		Foreign assets	78·1
Bankers	189·3	Domestic Bills discounted	100·3
Government and others	306·8	Loans and advances	322·0

[1] In Dec. 1920, under the South African Currency and Banking Act, 1920, a Central Reserve Bank was established at Pretoria. It commenced operations in June 1921, and began to issue notes in April 1922. The bank has branches in Pretoria (Head Office), Johannesburg, Cape Town, Durban, Port Elizabeth, East London, Bloemfontein, Pietermaritzburg and Windhoek.

Ratio of legal reserve to liabilities to the public was 36·3% on 31 May 1971.

The number of depositors in the post office savings bank at the end of March 1970 was 1,664,828, and the amount standing to their credit R149,987,664.

WEIGHTS AND MEASURES. Prior to 1969 the imperial system of weights and measures was generally used in the country. However, during 1969 the Weights and Measures Act was amended to provide for the gradual change-over to the metric system of weights and measures.

PROVINCE OF THE CAPE OF GOOD HOPE

Kaapprovinsie

HISTORY. The colony of the Cape of Good Hope was founded by the Dutch in the year 1652. Britain took possession of it from 1795 to 1803 and again in 1806, and it was formally ceded to Great Britain by the Convention of London, 13 Aug. 1814. Letters patent issued in 1850 declared that in the colony there should be a Parliament which should consist of the Governor, a Legislative Council and a House of Assembly. On 31 May 1910 the colony was merged in the Union of South Africa, thereafter forming an original province of the Union.

ADMINISTRATION. At the provincial council election in Oct. 1970 the following parties were returned: Nationalists, 36; United Party, 18.

Cape Town is the seat of the provincial administration.

Administrator: A. H. Vosloo.

The province is divided into 109 magisterial districts and 91 divisional council divisions. Each division has a council of at least 6 members (15 in the Cape Division) elected quinquennially by the owners or occupiers of immovable property. The duties devolving upon divisional councils include the construction and maintenance of roads and bridges, local rating, vehicle taxation (except motor vehicle taxation) and preservation of public health.

There are 173 municipalities, each governed by a mayor and councillors. Municipal elections are held biennially. There are also 73 village management boards and 9 local boards.

AREA AND POPULATION. The following table gives the population of the Cape of Good Hope[1] (area 278,380 sq. miles) at the last census:

		All races		Whites		Non-Whites

[1] Excluding Walvis Bay (434 sq. miles).
[2] Preliminary.
[3] Excludes Bantu; figures are not yet available.

Of the non-White population in 1970, 21,617 were Asians, 4,235,376 were Bantu and 1,751,546 Coloureds. The great majority are engaged in agricultural or domestic employments.

Chief towns, with White population (1970): Uitenhage, 31,283; Stellenbosch, 24,954; Worcester, 20,054; Paarl, 19,919; Grahamstown, 11,800 (1967).

PROVINCE OF NATAL

HISTORY. Natal was annexed to Cape Colony in 1844, placed under separate government in 1845, and on 15 July 1856 established as a separate colony. By this charter partially representative institutions were established, and in 1893 the colony obtained responsible government. The province of Zululand was annexed to Natal on 30 Dec. 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed in Jan. 1903. On 31 May 1910 the colony was merged in the Union of South Africa as an original province of the Union.

ADMINISTRATION. At the provincial council elections in March 1965 there were returned: United Party, 16; Nationalists, 8; independent, 1.

The seat of provincial government in Natal is Pietermaritzburg.

Administrator: W. Havemann.

AREA AND POPULATION. The province (including Zululand, 10,375 sq. miles) has an area of 33,578 sq. miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to White persons. The province is divided into 45 magisterial districts.

The returns of the total population at the census were:

EDUCATION. The Natal Provincial Administration controls primary and secondary technical and vocational education for Whites. Higher technical and vocational education for all races is provided by the central government. *See also* pp. 1295–96.

Whites (1971). There were 297 government and aided schools with 94,191 pupils; 3 teacher-training colleges with 996 students; 35 private schools with 3,380 pupils.

Coloureds (1969). There were 56 government and aided schools with 657 teachers and 18,866 pupils; 1 teacher-training college with 48 students; 1 private school with 1 teacher and 30 pupils; 1 vocational school with 302 pupils.

Bantu (1967). There were 1,935 schools with 7,613 teachers and 429,502 pupils.

Asians (1969). There were 304 government and aided schools with 4,903 teachers and 134,844 pupils; 2 private schools with 840 pupils; 1 teacher-training school with 41 teachers and 612 students.

FINANCE. In 1970–71 revenue amounted to R52m. and expenditure to R99·7m.

AGRICULTURE. Sugar and citrus growing are of major importance. On the coast and in Zululand there are vast plantations of sugar-cane (about 800,000 acres), producing, in 1967, 15,547,000 tons. Cereals of all kinds (especially maize), fruits, vegetables, the *Acacia molissima* (the bark of which is much used for tanning purposes) and other crops are produced. Large areas are being afforested.

INDUSTRY. Natal is highly industrialized. Metallurgical, chemical, paper, rayon and food-processing plants include iron and steel foundries, petrol, refineries, pulp-mills, explosives and fertilizer plants, milk- and meat-canning factories.

MINING. The province is rich in mineral wealth, particularly coal. For figures of mineral production, *see* p. 1302.

PROVINCE OF THE TRANSVAAL

HISTORY. The Transvaal was one of the territories colonized by the Boers who left the Cape Colony during the Great Trek in 1831 and following years. In 1852, by the Sand River Treaty, Great Britain recognized the independence of the Transvaal, which, in 1853, took the name of the South African Republic. In 1877 the Republic was annexed by Great Britain, but the Boers took up arms towards the end of 1880. In 1881 peace was made and self-government, subject to British suzerainty and certain stipulated restrictions, was restored to the Boers. The London Convention of 1884 removed the suzerainty and a number of these restrictions but reserved to Great Britain the right of approval of the Transvaal's foreign relations, excepting with regard to the Orange Free State. In 1886 gold was discovered on the Witwatersrand, and this discovery, together with the great influx of foreigners which it occasioned, gave rise to many grave problems. Eventually, in 1899, war broke out between Great Britain and the Transvaal. Peace was concluded on 31 May 1902, the Transvaal and the Orange Free State both losing their independence. The Transvaal was governed as a crown colony until 12 Jan. 1907, when responsible government came into force. On 31 May 1910 the Transvaal became one of the four provinces of the Union.

ADMINISTRATION. At the provincial council election in Oct. 1970 there were returned: National Party, 54; United Party, 19.

The seat of provincial government is at Pretoria, which is also the administrative capital of the Republic of South Africa.

Administrator: S. G. J. van Niekerk.

AREA AND POPULATION. The area of the province is 109,621 sq. miles, divided into 53 districts. The following table shows the population at each of the last censuses:

	All races			Whites		Non-Whites

EDUCATION. All education for Whites except that of universities is under the provincial authority. The province has been divided for the purposes of local control and management into 21 school districts. Instruction in government schools, both primary and secondary, is free. The medium of instruction is the home language of the pupil. The teaching of the other language begins at the earliest stage at which it is appropriate on educational grounds. Both languages are taught as examination subjects to every pupil.

Whites (1971). There were 909 public schools with 17,922 teachers and 426,074 pupils; 4 teacher-training colleges with 8,334 students; 109 private schools with 1,620 teachers and 33,579 pupils.

Coloureds (1969). There were 67 state and state-aided schools with 1,160 teachers and 35,176 pupils; 1 teacher-training college with 267 students; 4 private schools with 761 pupils; 1 vocational school with 412 pupils.

Asians (1969). There were 65 public schools with 924 teachers and 21,952 pupils; 1 teacher-training college with (in 1967) 25 teachers and 243 students.

Bantu (1967). There were 2,072 public and private schools with 16,749 teachers and 943,023 pupils.

FINANCE. In 1970–71 revenue amounted to R336,525,159 and expenditure to R323,827,484

AGRICULTURE. The province is in the main a stock-raising country, though there are considerable areas well adapted for agriculture, including the growing of tropical crops.

INDUSTRY. The province has iron and brass foundries and engineering works, grain-mills, breweries, brick, tile and pottery works, tobacco, soap and candle factories, coach and wagon works, clothing factories, etc.

MINING. For mineral production, *see* p. 1302. Gold output in 1967 was 19,591,000 oz. worth R492,978,000.

PROVINCE OF THE ORANGE FREE STATE

Oranje-Vrystaat

HISTORY. The Orange River was first crossed by Europeans in the middle of the 18th century. Between 1810 and 1820, settlements were made in the southern parts of the Orange Free State, and the Great Trek greatly increased the number of settlers during and after 1836. In 1848 Sir Harry Smith proclaimed the whole territory between the Orange and Vaal rivers as a British possession called the 'Orange River sovereignty'. However, in 1854, by the Convention of

Bloemfontein, British sovereignty was withdrawn and the independence of the country was recognized.

During the first 5 years of its existence the Orange Free State was much harassed by incessant raids by the Basutos. These were at length conquered, but, owing to the intervention of the British Government, the treaty of Aliwal North incorporated only a part of the territory of the Basutos in the Orange Free State.

On account of the treaty with the South African Republic, the Orange Free State took a prominent part in the South African War (1899–1902) and was annexed on 28 May 1900 as the Orange River Colony. Crown colony government continued until 1907, when responsible government was introduced. On 31 March 1910 the Orange River Colony was merged in the Union of South Africa as the province of the Orange Free State.

ADMINISTRATION. At the provincial council election in Oct. 1970 there were returned 25 Nationalists.

The seat of provincial government is at Bloemfontein. There are 68 municipalities and 8 village management boards.

Administrator: G. F. van L. Froneman.

AREA AND POPULATION. The area of the province is 49,866 sq. miles; it is divided into 34 administrative and 57 magisterial districts. The census population has varied as follows:

	All races			Whites		Non-Whites

EDUCATION. *Whites.* Primary, secondary and vocational education and the training of primary teachers are controlled and financed by the Provincial Administration. The province is divided into 11 school board areas.

Education is free in all public schools up to the university matriculation standard. Attendance is compulsory between the ages of 7 and 16, but exemption may be granted in special cases. The home language of the pupil is the medium of instruction.

There were, in 1970, 257 government and aided schools with 72,829 pupils and 4,022 teachers, and 2 private schools with 240 pupils and 18 teachers.

Coloureds (1969). There were 44 government and aided schools with 267 teachers and 7,508 pupils.

Bantu (1967). There were 1,404 schools with 4,067 teachers and 246,842 pupils.

FINANCE. In 1969–70 revenue (excluding subsidies from central government) amounted to R19·17m. and expenditure to R65·51m.

AGRICULTURE. The province consists of undulating plains, affording excellent grazing and wide tracts for agricultural purposes. The rainfall is moderate. The country was mainly devoted to stock-farming, but now a rapidly increasing quantity of grain is being raised, especially in the eastern districts.

INDUSTRY. The more important manufacturing industries in the province are the oil-from-coal factory (as well as industries based on its by-products) at Sasolburg; fertilizer, agricultural implement, blanket and woollen products, clothing, hosiery, cement and pharmaceutical factories, grain-mills and brick, tile and pottery works.

MINING. For mineral statistics, *see* p. 1302. The production of the goldfields in the province has increased tremendously since 1951, when the output was 18,545 oz. valued at £230,186. The output in 1961 was 7,235,647 oz. valued at R181,320,401.

SOUTH WEST AFRICA

Suidwes-Afrika

HISTORY. The territory (excluding Walvis Bay and certain islands) was proclaimed a German protectorate in 1884, but was surrendered to the Forces of the Union of South Africa on 9 July 1915 at Khorab. The administration was vested in the Government of the Union of South Africa by mandate of the League of Nations dated 17 Dec. 1920. In 1921 the Governor-General delegated certain of his functions to the Administrator of the Territory, who assisted by an Advisory Council and, from 1925, by an Executive Committee and the Legislative Assembly.

On 18 July 1966 the International Court of Justice decided, by the President's casting vote, that Ethiopia and Liberia had no legal right in applying for a decision on the international status of South West Africa.

ADMINISTRATION. The South West Africa Affairs Amendment Act, 1949, abolished the Advisory Council and the nominated members of the Legislative Assembly. All 18 members of the Assembly are now elected by the registered voters of the Territory. The election held on 20 April 1970 returned 18 Nationalists.

The Territory is represented in the South African House of Assembly by 6 members elected by the registered voters of the Territory, and in the Senate by 4 Senators, of which number 2 are elected by the members of the Legislative Assembly and the representatives of the Territory in the House of Assembly, and 2 nominated by the President of the Republic. One of the nominated Senators is selected mainly on the ground of his acquaintance with the conditions of the coloured races of South West Africa.

On 13 Oct. 1966 the security and apartheid laws of the Republic of South Africa were extended to South West Africa, retrospective to 1950. On 2 Oct. 1968 the South African government announced the formation of a 42-member Legislative Council for Ovamboland.

The seat of the administration is Windhoek. The country is divided into 22 districts controlled by magistrates.

Administrator: B. J. van der Walt.

AREA AND POPULATION. The total area of the Territory, including the Caprivi-Zipfel, is 317,836 sq. miles (823,145 sq. km); this figure includes that of Walvis Bay, administered by South West Africa, 434 sq. miles (1,124 sq. km).

The country is bounded on the north by Portuguese West Africa (Angola) and Zambia, on the west by the Atlantic Ocean, on the south and southern portion of the eastern boundary by the Cape Province, and on the remainder of the eastern boundary by Botswana and Zambia. There are 3 main regions: the Namib, an extremely arid and desolate desert region stretching along the entire coastline to a width of between 80 to 130 km. The major portion of the Namib receives an annual rainfall of less than 50 mm. per annum; the Central Plateau is the region lying to the east of the Namib. It varies in altitude between 1,000 and 2,000 metres and offers a diversified landscape of rugged mountains, rocky outcrops, sand-filled valleys and plains. It covers approximately 50% of the total area; the Kalahari covers the eastern, north-eastern and northern areas of South West Africa. The dominant feature of this region is its thick cover of terrestrial sands and limestones and its near-total lack of surface water.

The rainfall increases steadily from less than 50 mm. in the west and south-west up to 600 mm. in the Caprivi Strip.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambesi, which forms the eastern boundary of the Caprivi-Zipfel, the Kwando or Mashi, which flows through the Caprivi-Zipfel from the north between the Okavango and the Zambesi, and the Orange River in the south, are the only permanently running streams. But there is a system of great, sandy, dry river-beds throughout the country, in which water can generally be obtained by sinking shallow wells. In the Grootfontein area there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water in the country.

On 13 Oct. 1964 and 29 Jan. 1969 the Republic of South Africa and Portugal signed agreements on the common use of the Kunene River.

Owing to the difficulty of satisfactorily controlling that part of the Caprivi-Zipfel, east of the line running due south from Beacon 22, situated west of the Kwando (or Mashi) River, the control of this area was in Aug. 1939 transferred to the Union Department of Native Affairs.

The population at the census 1960 and 1970 was:

	1960	*1970*
Ovambos	239,363	342,455
Whites	73,464	90,658
Damaras	44,353	64,973
Hereros	35,354	32,853
Namas	34,806	49,577
Kavangos	27,871	49,203
East Caprivians	15,840	28,275
Coloureds	12,708	25,009
Basters	11,257	21,909
Bushmen	11,762	6,467
Tswana and others	9,992	18,400
Kaokolanders	9,234	16 474
	526,004	746,328

The population grew at a rate of 3·7% per annum between 1960 and 1970.

The Ovambos are a Bantu race and are both agriculturists and owners of stock. They still possess tribal organization to its full extent.

The Hereros are a pastoral people who formerly owned enormous herds of cattle. Wars with Namas and Germans destroyed their tribal organization.

Under the Union and Republic administration, reserves have been set apart and they have considerably increased in numbers and in animal wealth.

The Bergdamaras or Damara are also of Bantu origin. They were alternatively the slaves of the Hereros and the Namas, whose language they now speak, in pre-European days.

The Namas consist of 2 distinct sections: one, the Hamitic, whose remnants are found in the central portions of the country, being of pure native extraction, is thought to have migrated from the region of the Central African lakes in prehistoric times; the other, the Khoisan, is composed of tribes whose members are descended from persons born in the Cape a couple of centuries ago with an admixture of European and Nama blood.

The Bushmen are among the oldest inhabitants of southern Africa.

In the centre of the country just south of the Windhoek district is the Rehoboth Gebiet, occupied by a race known as the Basters, who are of mixed Nama–European descent and whose ordinary language is Afrikaans.

A commission of inquiry, appointed by the South African Government, in 1964 recommended the establishment of 'homeland areas' for the non-White groups. All these areas should be governed by legislative councils, headed by executive committees; franchise should be granted to males and females over 18 years who qualify for citizenship in their respective homelands.

On 17 Oct. 1968 and 22 Oct. 1970 respectively the first sessions of the Legislative Councils of Ovambo (42 members) and Kavango (30 members) were opened.

EDUCATION (1971). *Whites.* There were 83 schools, 1,155 teachers and 22,253 pupils.

Coloureds (1970). There were 56 schools with together 406 teachers and 12,270 pupils.

Bantu (1970). There were 424 schools with 2,243 teachers and 95,302 pupils.

HEALTH (1971). There are 156 hospitals and clinics, of which 117 serve the indigenous and Coloured population groups, 22 serve all population groups and 17 the White population group. The ratio of beds per population was 9 per 1,000 and the ratio of doctors to population was 1 per 4,500 inhabitants (excluding the Eastern Caprivi). Nursing staff numbered 2,080.

FINANCE. The revenue and expenditure (in R1,000) were:

	1965–66	*1966–67*	*1967–68*	*1968–69*	*1969–70*
Revenue	71,816	79,389	88,466	88,948	53,818
Expenditure	69,925	70,181	79,431	85,825	54,476

AGRICULTURE. South West Africa is essentially a stock-raising country, the scarcity of water and poor rainfall rendering agriculture, except in the northern and north-eastern portions, almost impossible. Generally speaking, the southern half is suited for the raising of small stock, while the central and northern portions are better fitted for cattle. Livestock (1969): 2·8m. cattle, 5·2m. sheep, 1·8m. goats, 75,308 (1967) horses, mules and donkeys. In 1969, 244,174 head of cattle and 283,024 head of small stock were exported.

In 1968–69, 31·4m. lb. of butter and 161,779 lb. of factory cheese were manufactured.

The production of karakul pelts is of increasing importance. In 1969, 3,739,200 pelts, worth R22,210,848, were exported.

FISHING. The total catch in 1969 was 954,082 short tons.

MINING. Mineral export/sales amounted to R139,381,475 in 1969. Diamonds, which constitute the principal production, are mainly recovered from alluvial terraces on a 60-mile stretch along the coastline from the Orange River mouth northward.

COMMERCE. The statistics concerning the external trade of South West Africa are included in those of the Republic of South Africa.

The bulk of the direct imports into the country is landed at Walvis Bay.

Total trade between South West Africa and UK, in £1,000 sterling (British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	21,344	24,464	26,429	26,052	23,342
Exports and re-exports from UK	2,135	1,478	1,639	1,883	1,656

RAILWAYS. The South West Africa system connects with the main system of the South African Railways at De Aar. The total length of the line inside South West Africa is 1,645 miles of 3 ft 6 in. gauge.

ROADS. In 1970 there were 3,372 km of trunk roads, 8,933 km. of main roads, 19,552 km of district roads and 25,298 km of proclaimed farm roads. In the same year there were 59,792 registered motor vehicles.

SHIPPING. In 1969–70 Walvis Bay harbour handled 1,441,089 tons of cargo.

AVIATION. The Territory is served by regular air services of South African Airways. In 1969–70, 62,448 passengers and 885 tons of freight were conveyed between South Africa and South West Africa.

POST. At 31 March 1970 there were 94 post offices and postal agencies, and 1,219 private bag services distributed by rail or road transport.

There were 11,860 circuit miles of trunk lines, 76,565 miles of carrier circuits, 96,333 miles of telegraph circuits and 26,410 miles of farm telephone lines; 73 telegraph offices, 122 telephone exchanges, 31,677 telephones. There are 13 post-office and 1,091 licensed radio stations in operation.

In 1970, 47,061 wireless licences were issued.

A post office savings bank was established in 1916. The number of accounts open at 31 March 1966 was 40,529 with a credit of R3,625,261. Savings certificates of a value of R200 are also issued. The balance due to holders as at 31 March 1966 amounted to R314,400.

BANKING. Barclays Bank International, Volkskas Bank, Standard Bank, Netherlands Bank, Trust Bank and South African Reserve Bank have branches in the Territory.

SOUTHERN YEMEN

Between August and October 1967 the 17 sultanates of the Federation of South Arabia (*see* MAP in the STATESMAN'S YEAR-BOOK, 1965–66) were overrun by the forces of the National Liberation Front (NLF). The rulers were deposed, resigned or fled. At the same time the rival organization of FLOSY (Front for the Liberation of Occupied South Yemen) fought a civil war against NLF and harassed the British forces and civilians in Aden. In November the UAR withdrew its support from FLOSY, and with the backing of the army the NLF took over throughout the country.

The last British troops left Aden on 29 Nov., and on 30 Nov. the Southern Yemen People's Republic was proclaimed and the name subsequently changed

to the People's Democratic Republic of Yemen. A bloodless *coup d'état* occurred on 22 June 1969 when President Qahtan Muhammad as-Shaabi was deposed.

Chairman of Presidential Council: Salem Rubayyi.
Prime Minister: Ali Nasser Mohamed.
Foreign Affairs: Mohamed Salah Aulaqi.

AREA AND POPULATION. The Republic covers an area of approximately 61,890 sq. miles (160,300 sq. km). The population is estimated at about 1·5m. The capital is Aden. The main towns are Aden (population, 250,000), Shaikh Othman (30,000), Mukalla (25,000) and Little Aden (9,500).

The island of **Kamaran** in the Red Sea (area 70 sq. miles) was in British occupation from 1915 to 1967, when the inhabitants opted in favour of remaining with the Republic.

The island of **Perim** was first occupied by the French in 1738. In 1799 the British took formal possession but evacuated the island the same year. It was re-occupied by the British in Jan. 1851 and was later used as a coaling station. In Nov. 1967 the inhabitants opted in favour of remaining with the Republic.

EDUCATION. There were 961 schools in 1970–71.

CINEMAS (1965). There were 14 cinemas with a seating capacity of about 13,000.

FINANCE. Currency. The currency is the South Arabian *dinar* (SA£), divided into 1,000 *fils*, on parity with the £ sterling. Coins: 50, 25, 5, 1 *fils*; notes: 10, 5 and 1 *dinar*, 500 and 250 *fils*.

Budget. The budget of the Republic (in £ sterling) for financial years ending 31 March was as follows:

	1965–66	*1966–67*[1]	*1968–69*[1]	*1969–70*[1]	*1970–71*[1]
Revenue	13,834,732	18,675,725	11,000,000	14,000,000	13,000,000
Expenditure	13,840,452	18,967,184	18,000,000	19,000,000	18,000,000

[1] Estimates.

DEFENCE. Until the Republic became independent, Britain was responsible for financing, training and equipping the army.

Army. The army, about 11,000 strong, is being reconstructed with Soviet aid. All British officers were dismissed in Feb. 1968.

Navy. The navy comprise 3 inshore minesweepers given by Britain and 15 small patrol boats built in Britain.

Air Force. Formed in 1967, the air force received as initial equipment 4 Jet Provost armed trainers, 4 C-47 transports (1 since lost), 6 Beaver light communications aircraft and 6 Sioux (Bell 47) light helicopters. Four BAC 167 Strikemaster light attack aircraft have since been delivered. Additional aircraft have been requested from the USSR and about 12 MiG-17 jet fighter-bombers have been received.

AGRICULTURE. Agriculture is the main occupation of the people. This is largely of a subsistence nature, sorghum, sesame and millet being the chief crops, and wheat and barley widely grown at the higher elevations. Of increasing importance, however, are the cash crops which have been developed since the Second World War, by far the most important of which is the Abyan long-staple cotton, now the country's major export.

Owing to paucity of rainfall, cultivation is largely confined to fertile valleys and flood plains on silt, built up and irrigated in the traditional manner. These traditional methods are being augmented and replaced by the use of modern earth-moving machinery and pumps. Irrigation schemes with permanent installations are in progress.

There is a thriving fisheries industry, which is the Republic's major export after cotton.

COMMERCE. Trade is mainly transhipment and entrepôt, the port serving as a centre of distribution to and from neighbouring territories. Transit trade is mainly in cotton piece-goods, grains, coffee, hides and skins, and cheap consumer goods.

In 1966 imports totalled £102m.; exports and re-exports, £67·92m.

Total trade (in £1,000 sterling) between Republic of Yemen and UK (British Board of Trade returns):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	13,825	10,611	6,811	14,619	9,626	5,882
Exports and re-exports from UK	13,444	9,626	8,196	6,754	4,987	5,292

SHIPPING. Because of its favourable geographical position and its efficient service to ships, Aden used to be one of the busiest oil-bunkering ports in the world, handling some 550 ships a month.

ROADS. There are 650 miles of roads, to be increased by 500 miles by 1974. Registered motor vehicles in 1965 numbered 16,789.

AVIATION. Nine airlines used to operate scheduled services: Alyemda, Air-India, East African Airways Corporation, Ethiopian Airlines, Ghana Airlines, Middle East Airlines, United Arab Airlines, Sudan Airways, Yemen Airlines.

POST. The automatic telephone system provided service to about 9,410 subscribers in 1970.

Radio telephone services were available with London (with extensions to Europe and America), Kenya (with extensions to Tanzania and Uganda), Bombay, French Territory of Afars and Issas, Bahrain and Addis Ababa.

BANKING. The leading bank is the National Bank of Yemen. All foreign banks have been nationalized.

British Ambassador: A. R. H. Kellas, CMG.
Ambassador in Britain: Fadhle Ahmed Sallami.

SPAIN

Estado Español

GOVERNMENT AND CONSTITUTION. The Spanish State was established by Gen. Franco on 1 Oct. 1936. For a short account of the Civil War in Spain, 17 July 1936 to 1 April 1939, *see* The Statesman's Year-Book, 1939, pp. 1325–6. On 30 Jan. 1938 the first civil government was proclaimed, with Gen. Franco, possessing dictatorial powers, at its head. It was, on 30 Oct. 1969, reconstituted as follows:

Leader (Caudillo) of Spain, Chief of the State, C.-in-C. of the Armed Forces, Prime Minister and Head of the National Movement: Gen. Francisco Franco Bahamonde (born 4 Dec. 1892).

Vice-President of Government and Under-Secretary of the Presidency: Vice-Adm. Luis Carrero Blanco.

Foreign Affairs: Gregorio López Bravo de Costro.

Justice: Antonio Maria Oriol y Urquijo.

Army: Gen. Juan Castañón de Mena.

Navy: Adm. Adolfo Baturone Colombo.
Finance: Alberto Monreal Luque.
Interior: Tomás Garicano Goñi.
Public Works: Gonzalo Fernandez de la Mora.
Education and Science: José Luis Villar Palasi.
Industry: José Maria López de Letona y Núñez del Pino.
Agriculture: Tomás Allende y García-Baxter.
Air: Gen. Julio Salvador y Diaz-Benjumú.
Labour: Licinio de la Fuentes y de la Fluentes.
Commerce: Enrique Fontana Codina.
Information and Tourism: Alfredo Sanchez Bella.
Housing: Vicente Mortes Alfonso.
Without portfolio: Laureano López Rodó (*Economic and Social Development Plan*), Torcuato Fernandez Mirand (*Secretary-General of the Movement*), Enrique Garcia del Ramal Cellalbo (*Sindicatos*).

On 31 March 1947 Gen. Franco announced that Spain is to become a monarchy, with a regency council and himself as the head of state. In July 1969, Prince Don Juan Carlos de Borbon was sworn in as successor to the Head of State and bears the title of HRH Prince of Spain until such time as he becomes King. On 6 July 1947 the 'Law of Succession' was approved by a referendum; out of a total of 17,178,812 electors, 14,145,163 voted for, and 722,656 against it; 351,744 votes were invalid.

National flag: Red, yellow, red (horizontal).
National anthem: Marcha grandera.

On 19 April 1937 the various political groups in the Nationalist Movement were united by Gen. Franco into one single political party, under the title *Falange Española Tradicionalista y de las Juntas de Ofensiva Nacional Sindicalistas*, comprising the *falange española* created on 29 Oct. 1933 by José Antonio Primo de Rivera, eldest son of the general who was Dictator of Spain from 1923 to 1930, and the traditionalists.

The constitutional regulations contained in the Law of the Cortes, the Succession Act, the Fuero of the Spaniards, the Fuero of Labour, etc. (*see* THE STATESMAN'S YEAR-BOOK, 1966–67, pp. 1425 f.) were consolidated and partly modified by the 'Organic Law of the Spanish State' (*La Ley Orgánica del Estado Español*), unanimously approved by the Cortes on 22 Nov. 1966 and ratified by a national referendum on 14 Dec. 1966.

The Organic Law distinguishes the executive powers of the Head of State (*Jefe del Estado*) and those of a Premier (*Presidente del Gobierno*), who is to be chosen by the Head of State from a list of 3 names submitted by the Council of the Realm; the Premier's term of office will be 5 years, though he may be removed earlier by the Head of State on the proposal of the Council of the Realm but not by the Cortes.

'The Head of the State directs the government apparatus (*gobernación*) of the Kingdom by means of the Council of Ministers. . . . In the absence or illness of the Chief of State, his functions will be assumed by the Heir to the Throne if over 30 years of age, or by the Council of Regency.'

The Council of the Realm consists of 16 members, 10 of them elected by the Cortes; the President of the Cortes is its chairman.

The National Council consists of 1 elected councillor for each province, 40 councillors appointed by the Head of State, 12 councillors elected by the Cortes to represent 'basic structures of the nation' (family, local corporations, trade unions), 6 councillors appointed by the Prime Minister and a secretary-general appointed by the Head of State.

The Cortes are composed of the members of the Government; the national councillors; the presidents of the supreme court of justice, of the council of the realm, of the supreme military tribunal, of the court of exchequer and of the national economic council; 150 representatives of the trade unions; representatives of the municipalities and provincial councils elected by their respective

corporations; 100 deputies (2 from each province) elected by the heads of families (men or women); and some 30 representatives of the universities, learned and professional societies, chambers of commerce, etc.

Religious liberty is proclaimed as having State-guaranteed protection by means of a legal guardianship which at the same time safeguards morals and the public order. Trade unions are no longer subject to control by the Falange; there will be *sindicatos* of business-owners, technicians or workers, respectively.

LOCAL GOVERNMENT. The provinces are constituted by the association of municipalities (9,202 in 1960). All municipalities are autonomous in their respective spheres, and at their heads stands the *Ayuntamiento*. The municipal councils are elected by the heads of family. The *Alcalde* or Mayor is appointed by the Minister of the Interior in municipalities of over 10,000 inhabitants, and elsewhere by the Civil Governors. The *Diputaciones Provinciales* have entire jurisdiction over their own province and are their sole administrators. Each island of the Canaries has a corporation known as *Cabildo Insular*, to rule their special interests; the Balearic Islands have the same provincial administration as the mainland. Each province of Spain has its own Assembly, the *Diputación Provincial*.

The reconstruction of devastated regions is under the care of the *Instituto de la Vivienda* and by the *Banco de Crédito a la Reconstrucción*, whose duty is to grant and administer loans approved for reconstructing buildings, and the *Banco de Crédito Agrícola* and *Banco de Crédito Industrial* with regard to industries, agriculture, commerce and mining, and merchant vessels.

AREA AND POPULATION. Continental Spain has an area of 492,592 sq. km, and including the Balearic and Canary Islands 504,879 sq. km (194,883 sq. miles).

The growth of the population has been as follows:

Census year	Population	Rate of annual increase	Census year	Population	Rate of annual increase
1860	15,655,467	0·34	1940	25,877,971	0·98

[1] 1960.

In 1960 there were 14,763,388 males and 15,667,310 females.

By decree of 21 Sept. 1927 the islands which form the Canary Archipelago were divided into 2 provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, Palma, Gomera and Hierro, and that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos. The area of the islands is 7,273 sq. km; population (1 Jan. 1959), 908,718.

Places under Spanish sovereignty in Morocco are: Alhucemas, Ceuta, Chafarinas, Melilla and Peñón de Vélez.

The following were the registered populations of the principal towns at 31 Dec. 1968:

Town	Population	Town	Population	Town	Population
Albacete	84,074	Hospitalet	216,435	Palma de Mallorca	208,127

RELIGION. Catholicism is again established as the religion of the State. Religious bodies have recovered their legal status; confiscated property has been returned; allowances to clergy are again paid by the State; divorce is suppressed; cemeteries are brought back to ecclesiastical jurisdiction. There are 10 metropolitan sees and 64 suffragan sees, the chief being Toledo, where the Primate resides.

A concordat was signed in Rome on 27 Aug. 1953 to replace the concordat of 1851, which the Republic had denounced in 1931.

There are about 26,000 Protestants, with 200 churches and chapels, outside which no public ceremonies are permitted. There is no liberty for propaganda, and the circulation of Holy Scripture, except in annotated Roman Catholic editions, is forbidden. Several churches were closed in 1958 and 1959. The British and Foreign Bible Society was, on 10 March 1963, allowed to resume its activities.

The first synagogue since the expulsion of the Jews in 1492 was opened in Madrid on 2 Oct. 1959. The number of Jews is estimated at about 1,000.

EDUCATION. Spain is divided into 12 educational districts, with the universities as centres. Primary education is compulsory and free. The *Frente de*

Juventudes (Youth Front) was created by law of 6 Dec. 1940; it comprises 3 sections (educational, labour, rural) and had, in 1958, 1,494,413 members. There is also the University Militia for army training under conscription.

In 1967–68 there were 118,786 primary schools attended by 4,179,000 pupils, with 22,800 teachers, including (in 1964–65) 9,775 private schools (10,042 teachers, 358,528 pupils) and 15,853 church schools (16,371 teachers, 686,068 pupils). Secondary education is conducted in 3,748 middle schools, with 59,900 teachers and 1,089,100 pupils. For higher education, there are 96 centres with 150,000 pupils and 9,906 teachers. There are 13 universities, attended (1965–66) by 125,771 students, with 3,078 teachers. The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, Zaragoza, Pamplona and La Laguna (Canaries). There is, besides, a medical and science faculty at Cádiz in connexion with the University of Deville.

In 1960, 3,158,850 persons over 10 years of age (14·24%) could not read or write. A literacy test for all Spaniards born after 31 Dec. 1946 was introduced in 1963, to be able to vote, occupy administrative posts or obtain government contracts.

CINEMAS (1970). There were 8,363 cinemas with a seating capacity of 4,938,000.

NEWSPAPERS (1969). There appeared 116 daily newspapers with a total daily circulation of about 5·2m. copies. Thirteen of them were published in Madrid and 10 in Barcelona; all must be printed in Castilian.

JUSTICE. Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed of the *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Division High Courts); 50 *Audiencias Provinciales* (Provincial High Courts); 579 *Juzgados de Primera Instancia* (Courts of First Instance), and 9,203 *Juzgados Municipales, Comarcales y de paz* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President (appointed by the Government) and various judges distributed among 6 chambers: 1 for trying civil matters, 3 for administrative purposes, 1 for criminal trials and 1 for social matters. The *Tribunal Supremo* has disciplinary faculties; is court of cassation in civil criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the State, and in social matters resolves in the last instance all cases involving over 100,000 pesetas.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters.

The *Audiencias Provinciales* try and pass sentence in first instance on all cases filed for delinquency. The jury system is in operation except for military trials.

The *Juzgados Municipales* try small civil cases and petty offences. The *Juzgados Comarcales* deal with the same charges, but their jurisdiction embraces larger districts.

Military cases are tried by the *Tribunal Supremo de Justicia Militar*.

The prison population was, on 31 Dec. 1968, 12,176, including 593 women.

Police. The Minister of the Interior (*Gobernación*) controls the armed police, the secret police and the para-military *Guardia Civil*.

SOCIAL WELFARE. Schemes of wide social range include the Labour Charter (*Fuero del Trabajo*) of 9 March 1938, for a better distribution and remuneration of the working classes, with uninterrupted Sunday and feast-day wages. The law of Family Subsidy (*Subsidio Familiar*), which came into force on 1 March 1939, makes all working people contribute 1% of their earnings, plus an additional 6% from the employers, in a system of social insurance which entitles all families with from 2 to 12 children under 14 years of age to a proportional monthly allowance ranging from 60 to 4,500 pesetas, with an additional 3,000

pesetas for each child in excess of 12 (2 Sept. 1955). Married workers receive an additional bonus. Since 1949, old age pensions and health and maternity insurances have been added; workers contribute 1% and employers 5%. A decree of 22 Feb. 1941 established state loans on marriage to help large families, and the institution known as *Auxilio Social*, the funds of which are derived among other channels from a fortnightly public collection throughout the country, for supplying food and clothing to needy persons and the maintenance of nurseries and infirmaries. A national health insurance for all workers is now also in operation.

By a law dated 27 Feb. 1908 the *Instituto Nacional de Previsión* was founded for the purpose of granting old age pensions and administering a system of social insurance. The family-allowance and health-insurance schemes, described above, have been incorporated in the *Instituto*. In 1966, 2,032m. pesetas were paid out in family subsidies to 3,861,600 persons; 1,415·m. pesetas were paid out in sickness benefits; 6,792m. pesetas for old age pensions, and 3,340·4m. pesetas in injury benefits.

FINANCE. Currency. The *peseta* of 100 *céntimos* had the nominal value of a pre-war franc, 25·22 *pesatas* to the £ sterling. The exchange value of the peseta in Oct. 1970 was 166 = £1; 70 = US$1.

Bank-notes of 1,000, 500, 100, 50, 25, 5 and 1 *peseta* and coins of 5 and 10 *céntimos* (aluminium, tin and copper), 1 *peseta* (copper and aluminium), 5, 25, 50 *pesetas* (nickel and copper) and 100 *pesetas* (silver) are in circulation. In Oct. 1968 the circulation of bank-notes was 209,196m. *pesetas* and of coins, 9,736m. *pesetas*.

Budget. Revenue and expenditure in 1m. pesetas:

	1964/65	*1966*	*1967*	*1968*	*1969*	*1970*

The total state debt (including credits to foreign countries) on 1 Jan. 1967 was 222,292·3m. pesetas, of which 10,179·1m. pesetas were Treasury bonds.

DEFENCE. On 26 Sept. 1953 the US and Spain signed three agreements covering the construction and use of military facilities in Spain by the US, economic assistance, and military end-item assistance. These agreements were renewed for another 5 years on 26 Sept. 1963. The American naval and air base at Rota (near Cádiz) is connected by pipelines with the American bomber bases at Morón de la Frontera (near Seville), Torrejón (near Madrid) and Zaragoza.

A further agreement was signed on 6 Aug. 1970 replacing the one signed in 1953 which was due to expire on 26 Sept 1970 having been extended for 18 months in 1969. The agreement will expire in 1975 but could be extended for a further period of 5 years.

Length of service is 16 months in the army, 24 months in the navy and 18 months in the air force.

Army. The Army was reorganized by a decree published on 24 July 1939 to be constituted by 8 army corps in the Peninsula and 2 in Morocco, in addition to the 2 *Comandancias Generales* in the Balearic and Canary Islands as heretofore. A decree of 30 Aug. 1939 created the High General Staff of the Army as the highest military authority.

On 1 Jan. 1944 a slight reorganization was made by withdrawing from the 2nd Región Militar the eastern provinces of Granada, Málaga and Almería, which were to form the 9th Región Militar. After this reorganization there were 8 army corps attached to the 8 original military regions; 1 Región Militar, the 9th, with 1 division only and the Capitanías Generales on the Balearic and Canary Islands as heretofore.

The army corps are as follows: I, Madrid, 2 divisions; II, Sevilla, 2 divisions; III, Valencia, 2 divisions; IV, Barcelona, 2 divisions; V, Zaragoza, 2 divisions; VI, Burgos, 2 divisions; VII, Valladolid, 2 divisions; VIII, La Coruña, 2 divisions; 9th Región Militar, 1 division. There are also 1 armoured division with M-47 and M-48 tanks, 2 mechanized infantry divisions, 2 mountain divisions, 1 cavalry brigade, 1 parachute brigade and 1 battalion with surface-to-air missiles.

Army personnel is about 500 generals, 40,000 officers and 180,000 other ranks.

In Africa the army corps are as follows: IX (Ceuta), 2 divisions; X (Melilla), 2 divisions. Total strength in Africa, about 32,000 men.

Navy. Particulars of the principal ships:

Completed	Name	Standard displacement Tons	Armour *Belt* In.	Armour *Turrets* In.	Principal armament	Shaft horse-power	Speed Knots

1936	Canarias	10,670	2	1	8 8-in.; 8 4·7-in. A.A.	90.000	33

The anti-aircraft cruiser *Méndez Núnez* was stricken from the list in 1963 and the cruisers *Almirante Cervera*, *Galicia* and *Miguel de Cervantes* in 1964–66.

There are 3 submarines, 2 midget submarines, 18 destroyers, 4 frigates, 5 corvettes, 6 frigate minelayers, 13 minesweepers, 12 coastal minesweepers, 1 patrol vessel, 3 torpedo boats, 17 motor launches, 10 coastguard patrol vessels, 1 training ship, 5 survey ships, 5 patrol craft, a river patrol boat, 3 landing ships, 8 landing craft, 3 oilers, 3 transports, 2 tenders, a boom defence vessel and 15 tugs.

Ships under construction include 5 frigates of USA design and 4 submarines of French design,

Shipbuilding is mainly carried on at the dockyards at El Ferrol and Cartagena, Cádiz having a smaller share in it.

There are naval wireless telegraphic stations at Cádiz, Barcelona, Mahón, Pontevedra, Cartagena and E. Ferrol.

Barcelona, Bilbao, Seville and Cádiz are the chief naval yards.

In 1971 naval personnel totalled 52,300 officers and ratings, including marines.

Air Force. The Air Force is organized as an independent service, dating from 1939. It comprises air regions (with HQ at Madrid, Seville and Zaragoza), an overseas air zone (Canary Islands) and a separate Air Defence Command which controls interceptor squadrons (including USAF elements) and the control and

warning radar network and Tactical and Transport Commands. Strength is about 33,000 personnel and more than 200 combat aircraft.

The *Aviación Táctica* has 2 fighter-bomber squadrons of Spanish-built Northrop SF-5s, 2 light bomber squadrons equipped with obsolete Spanish-built Heinkel He 111 bombers, 2 squadrons of HA-200D Saeta light attack jet aircraft of Spanish design and manufacture, and 1 aero-naval co-operation wing with 3 P-3B Orion and about 7 HU-16B Albatross anti-submarine aircraft. A further 25 HA-220 light attack aircraft, evolved from the HA-200, are being built for counter-insurgency operations. Air Defence Command has 1 squadron of Mirage III-Es, 3 squadrons of F-86F Sabres and 1 squadron of F-104G Starfighters. Further Sabre squadrons are being re-equipped with Mirages and F-4C Phantoms, as is the F-105G squadron. Two transport wings operate a total of more than 100 C-130 Hercules, C-54s, C-47s, Caribou and Spanish-built CASA Azors.

American-built T-34 and T-6 piston-engined aircraft are used for basic training, together with HA-200 Saeta twin-jet training aircraft. American-built T-33A and F-86F jet aircraft and 2-seat versions of operational types are used as advanced trainers.

PRODUCTION. A 4-year development plan, 1963–67, envisaged a total investment of 355,000m. pesetas. The second development plan, 1968–71, provides 552,700m. pesetas, of which 466,900m. represent real investment and 85,800m. loans.

The economically active population numbered 12,592,800 at the end of 1969. Of these, 3·8m. were occupied in agriculture and fishing, 3·35m. in manufactures, 1·32m. in trade, 2·18m. in public and personal services.

AGRICULTURE. Spain is mainly an agricultural country. In 1969 the total value of agricultural produce was 254m. pesetas; of livestock, 174·1m.; of forestry, 18·7m. Land under cultivation in 1967 (in 1,000 hectares) included: Cereals, 7,286; vegetables, 875; potatoes, 754. In 1970, 261,844 tractors and 32,220 harvesters were in use.

In 1967, 1,584,000 hectares were under vines; in 1970 production of wine was 25m. hectolitres. The area of onions in 1967 was 33,000 hectares, yielding 843,000 tons. Production of oranges and manderines in 1970 was 2,411,000 tons. other products are esparto (41,477 tons in 1964), flax, hemp and pulse. Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Murcia, Alicante and other provinces; 27 tons were produced in 1969. Spain produced in 1968, 8,951 tons of honey and 500 tons of beeswax. Beer factories produced 10·8m. hectolitres in 1969.

Tobacco crop in 1970 was 25,000 tons; sugar-cane (1969), 420,000 tons.

Livestock. The number of farm animals in 1970 was estimated as follows (in 1,000): Horses, 282; mules, 533; asses, 368; cows, 4,282; sheep, 17,005; goats, 2,551; pigs, 7,621.

FISHERIES. The most important catches are those of sardines, tunny fish and cod. The total catch amounted in 1968 to 1,184,500 tons, representing a value of 21,611·3m. pesetas. In the tinned fish industry there were, in 1970, 550 factories,

producing 88,010 tons. The Spanish fishing fleet in 1969 consisted of 14,160 vessels of 642,061 tons.

MINING. Spain is rich in minerals. The production of the more important minerals in 1970 were as follows (in 1,000 metric tons):

Anthracite	2,872	Iron ore	..	Tin ore (1968)	2
Coal	7,815	Lead ore	103	Zinc ore	89
Lignite	2,827	Manganese ore	10	Wolfram ore (1968)	1·4
Copper blister	39·8	Potash	3,937	Silver	115
Copper refined	82·8	Sulphur	..	Gold (1965)	276 kg

In June 1964 oil was struck about 40 miles north of the city of Burgos.

In 1964, 332,200 workers were employed in the mining and metallurgical industries. In 1965 the total value of the mining production was 21,998m. pesetas; of metallurgical production, in 1966, 108,732m. pesetas. In 1967 Spain produced 2·69m. tons of pig-iron and 4·33m. tons of steel ingots and castings. A uranium plant to supply the material for nuclear energy was inaugurated at Andujar in Andalusia in Feb. 1960.

INDUSTRY. The manufacture of cotton and woollen goods is important, principally in Catalonia. In 1966 there were 4,732 textile factories in operation, with 53,669 looms and 2,378,000 spindles, employing 209,850 workmen. Production, in 1,000 metric tons (1970): Silk yarn, 23; wool yarn, 37; cotton (yarn, 93; fabrics, 84), rayon fabrics, 23. 275 paper-mills produced in 1970, 600,832 tons of writing, printing, packing and cigarette paper. The production of cork in 1966 was 58,400 tons. The production of cement reached 16,536,000 tons in 1970.

Spanish shipyards launched 749,537 BRT in 1970. In 1970, 729,977 motor vehicles were built, including 451,303 passenger cars.

POWER. Electric power-stations in 1968 had a total installed capacity of 14m. kw., of which 8·5m. was hydro-electric. The total output (1970) amounted to 55,901m. kwh. Gas production in 1970 was 717m. cu. metres.

TOURISM. In 1970, 24·1m. foreigners visited Spain.

LABOUR. The economic policy is centred on vertical syndicates (trade unions) created under the Charter of Labour on 8 Aug. 1939, replacing the former local and provincial syndicates. The law of 23 June 1941 classified these syndicates into 26 branches of production, each working within its own respective economic sphere, without interrupting their unity or formation. The individual is replaced by the producing concern as a whole, made up of the capitalists, managers, experts and all those rendering some sort of labour, whether intellectual or manual. The vertical syndicate is invested with authority and hierarchy. The appointments are made from top to bottom. At the top stands the National Delegate of Syndicates, who is responsible for his conduct to the Minister who appoints him. Production, wages, prices and the distribution of domestic and foreign merchandise are controlled, and legislation has been adopted requiring government permission for the establishment of new industries.

The daily minimum wage of workers is 96 pesetas (from 1 Oct. 1967).

COMMERCE. Foreign trade of Spain (Peninsula, Baleares, Canaries, Ceuta, Melilla) (in 1m. pesetas):

	1965	*1966*	*1967*	*1968*	*1969*
Imports	181,128	215,444	211,828	246,547	296,306
Exports	57,989	75,213	84,659	111,244	133,012

In 1969 the most important items of import were (in 1m. pesetas): Manufactures, 164,821; animal and vegetable oils and fats, 53,565; food, drink and tobacco, 38,685; mineral fuels and lubricants, 37,065. The main items of exports were: Manufactured goods, 74,319; food, drink, tobacco, 42,480.

In 1969 the main supplying countries were (in 1m. pesetas): USA, 50,956; West Germany, 39,634; France, 30,067; UK, 22,481; Italy, 17,711. The main

receiving countries were (in 1m. pesetas): USA, 19,957; West Germany, 14,291; France, 12,836; UK, 11,962; Italy, 6,880.

Of the 66·84m. litres of sherry exported in 1969, 36·9m. went to the UK. In 1969, 86·71m. litres of wine were exported.

Total trade between Spain and UK, in £1,000 sterling (British Board of Trade returns):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	61,774	73,593	98,616	98,774	108,490	125,102
Exports and re-exports from UK	101,555	92,474	98,751	118,567	123,169	145,315

In Dec. 1948 special exchange rates were established to facilitate Spanish exports to the sterling and dollar countries, Belgium, Denmark, Netherlands, Portugal, Sweden and Switzerland.

SHIPPING. The merchant navy in 1970 contained 2,857 vessels of a gross tonnage of 3,581,000

In 1968, 96,286 (1967: 93,810) ships entered Spanish ports, carrying 1,926,300 (1967: 1,854,000) passengers and discharging 73,459,000 (1967: 64m.) tons of cargo; 95,871 (1967: 93,683) ships cleared, carrying 1,985,800 (1967: 1,813,000) passengers and loading 48,697,000 (1967: 35·7m.) tons of cargo.

ROADS. In 1965 the total length of highways and roads in Spain was 138,670 km, of which 55,336 km were macadamized. Number of motor cars was 3,969,000 in 1969.

RAILWAYS. The total length of the railways in 1969 was 17,458 km, of which two-thirds are of 5ft 6in. gauge. There are 3,811 km of lines electrified. On 1 Feb. 1941 the Spanish railways, of broad gauge only, passed into state ownership; they are under a board known as the *Red Nacional de Ferrocarriles Españoles* (RENFE). The gauge of the principal Spanish railways has, for strategic reasons, been kept different from that of France; passengers therefore must change trains at the frontier stations except by certain trains having variable gauge axles. Number of passengers carried in 1969 by government-owned lines was 158·9m.; freight carried was 29·54m. tons. A 10-year modernization plan (1964–73) is to cost 62,000m. pesetas.

AVIATION. The most important Spanish airline is 'Iberia'; it maintains a regular service with Tangier, Morocco, the Balearic and Canary Islands, Lisbon, Switzerland, London, Buenos Aires, Venezuela, Cuba, Canada and USA. There are 37 civilian and 7 military airports.

In 1969, 209,772 aircraft entered Spain, carrying 8·6m. passengers and 62,727 metric tons of merchandise; 8·73m. passengers and 70,949 metric tons of merchandise left Spain by air.

POST. The receipts of the post office in 1970 were 6,280m. pesetas; expenses, 6,050m. pesetas. There were 13,024 post offices and 4,569,000 telephones, nearly all privately operated.

The length of telegraph lines in 1970 was 40,025 km; number of telegraph offices, 10,903; receipts, 1,141m. pesetas; expenses, 2,301m. pesetas.

The 'Compañía Nacional de Telegrafía sin Hilos' holds the government concession for the public service with ships, and between the Peninsula and the Canary Islands, and the international service with England, Italy, France, Switzerland and America, as well as various special press services. The National Radio Service 'Redera' operates a broadcasting station at Arganda, 15 miles from Madrid.

The overseas radio-telegraph circuits are operated in Spain mainly by Transradio Española, SA. Under an agreement with Cable and Wireless, Ltd, London, Transradio Española lease and operate the Bilbao end of the Bilbao–Great Britain cable and the Barcelona end of the Barcelona–Marseilles cable.

In 1970 there were 207 radio stations and 3 television stations.

BANKING. On 1 Jan. 1922 the Bank of Spain came under the Bank Ordinance Law, according to which the Government participate in its net profits.

In 1963 the Banco Central set up the Banco de Fomento (capital, 225m. pesetas) for long-term financing; the new bank is to absorb the Banco Central's investment company (Hispana de Inversiones), after which its capital is to be increased by 75m.

On 30 Dec. 1970 the gold and foreign currency holdings of the Bank of Spain amounted to 114,477m. pesetas (paper). A decree of 11 July 1941 established the voluntary nationalization of foreign banks in Spain, and the transference and amalgamation of the business of national banks.

Gold reserves at 30 Dec. 1967 consisted of: Revalued gold of Bank of Spain, 3,185·2m. pesetas (paper); authorized gold acquisition, 180·8m. pesetas; treasury gold, 1,335·5m. pesetas (paper); current accounts of institute of foreign exchange, 62,422m. pesetas; gold in current accounts, 16,455m. pesetas.

Savings bank deposits (Popular Savings Banks) in Spain, 31 Dec. 1970, amounted to 325,661m. pesetas. Post office savings banks opened on 12 March 1916. Deposits, 31 Dec. 1967, amounted to 37,965m. pesetas; private banks saving deposits, 564,468m. pesetas.

By a decree of 20 Nov. 1941 the post office savings bank opens an account with an initial entry of 1 peseta for every Spanish child born.

WEIGHTS AND MEASURES. On 1 Jan. 1859 the metric system of weights and measures was introduced. They are: The *quintal* = 220·4 lb. avoirdupois; the *libra* = 1·014 lb. avoirdupois; the *arroba*, for wine = $3\frac{1}{2}$ Imperial gallons; for oil = $2\frac{3}{4}$ Imperial gallons; the *square vara* = 1·09 vara = 1 yard; the *fanega* = $1\frac{1}{2}$ Imperial bushels.

PROVINCE IN AFRICA

In Jan. 1958 the territory of 'Spanish West Africa' was divided into the provinces of Ifni and Spanish Sahara; both were under the jurisdiction of the commanding officer of the Canary Islands. The former colony of *Equatorial Guinea* became the independent Republic of Equatorial Guinea on 12 Oct. 1968 and the province of Ifni was returned to Morocco on 30 June 1969.

Trade of the Spanish territories with UK (British Board of Trade returns in £1,000 sterling):

	Imports to UK			Exports from UK		
	1969	*1970*	*1971*	*1969*	*1970*	*1971*
Canary Islands	16,225	18,034	25,516	15,715	19,526	22,433
North Africa	4	—	—	500	498	18

The establishment of new foreign enterprises of any kind in the territories of Spanish West Africa has been prohibited by a presidential order of 27 Nov. 1950. Foreign enterprises already established may continue their activities, but without extending the scope or increasing the capital. Foreign oil companies, however, have been authorized to prospect in the province of Sahara; no oil had been struck by the end of 1968 and oil prospecting has been discontinued.

The **Province of Spanish Sahara** consists of 2 districts: Sekia El Hamra (82,000 sq. km) and Rio de Oro (184,000 sq. km). Area 266,000 sq. km (102,680 sq. miles). The population consists of some 10,000 Spanish civilians, about 15,000 Spanish soldiers and perhaps 30,000–50,000 nomadic Saharans. The capital is El Aaiún (population, 4,000–5,000). The strip between 27° 40′ N. and Wad Draa was ceded by Spain to Morocco on 10 April 1958. Strong pressure was brought, in 1970, by Morocco, Mauritania and Algeria for a referendum to be conducted by Spain in the province. A Saharan nationalist party claims the independence of the country from Spain.

In 1968 there were 73 primary schools with 2,446 pupils and 2 secondary schools with 776 pupils.

Rich phosphate deposits were discovered in 1963 and port facilities were inaugurated in 1967 at Villa Cisneros and Playa de El Aaiún (20 km from the capital) but (1972) no export of phosphate has taken place.

Tourism (16,000 visitors from Las Palmas in 1968) and fishing are of growing importance.

Internal revenue is negligible; expenditure, 1969, 250m. pesetas. Imports, 1968, 210·35m. pesetas; exports are negligible.

Governor-General: Gen. José María Pérez de Lema y Tejero.

THE DEMOCRATIC REPUBLIC OF THE SUDAN

Jamhuryat es-Sudan Al Democratia

CONSTITUTION AND GOVERNMENT. The Sudan was proclaimed a sovereign independent republic on 1 Jan. 1956. On 19 Dec. 1955 the Sudanese parliament passed unanimously a declaration that a fully independent state should be set up forthwith, and that a Council of State of 5 should temporarily assume the duties of Head of State. The Co-domini, the UK and Egypt, gave their assent on 31 Dec. 1955.

For the history of the Condominium and the steps leading to independence, *see* THE STATESMAN'S YEAR-BOOK, 1955, pp. 340–41.

National flag: Black, white, red (horizontal) with green triangle at the masthead.

On 17 Nov. 1958 the Army took over the government. The Council of State and the cabinet were dismissed, parliament and all political parties were declared dissolved, and the provisional constitution was suspended. The supreme authority was vested in the Supreme Council of the Armed Forces under Lieut.-Gen. Ibrahim Abboud.

On 25 Oct. 1964 President Abboud dissolved the Supreme Council and dismissed the Cabinet. On 30 Oct. President Abboud appointed a civilian Cabinet with Ser al-Khatm Khalifa as Prime Minister.

On 15 Nov. 1964 President Abboud resigned as chief of state and supreme commander. In conformity with the provisional constitution of 1956 a 5-member Council of Sovereignty replaced the presidency.

On 8 July 1965 the Constituent Assembly elected Ismail El-Azhari as President of the Supreme Council. Following a crisis in the coalition Cabinet the Prime Minister, Mohammed Ahmed Mahgoub resigned on 23 April 1969. The Government was taken over by a 10-man Revolutionary Council on 25 May 1969 under the Chairmanship of Col. Jaafar M. al Nemery.

Prime Minister and Minister of Defence: Babikr Awadalla.
Deputy Prime Minister and Minister of Justice: Sayed Babiker Awadalla.
Foreign Affairs: Sayed Farouk Abu Eisa.

On 9 Dec. 1965 the Constituent Assembly proscribed the Communist Party.

LOCAL GOVERNMENT. The Sudan is divided into 9 provinces and 84 local government areas. In each province there is a province administration set up under the Provincial Administration Act, 1960, and in each local government area there is a local government authority set up under the Local Government Act, 1951.

A Province Administration is composed of the commissioner, the province council and the province authority. The commissioner is the chairman of the province authority and the head of all government officials in the province. The province council, warranted by the Council of Ministers, may be composed of *ex-officio* members, members elected by and from local government authority panels and members appointed by the Government. A province council has competence to pass the province budget and has supervisory powers over local government authorities. The province authority is composed of the head representatives of the various central government ministries in the province. Its main functions is the execution of the province council decisions. A local government authority is either a local government council warranted by the Council of Ministers (59 areas) or a government official (25 areas). A local government council is two-thirds elected by residents in the area and one-third appointed by the Minister.

AREA AND POPULATION. The Sudan covers an area of 967,500 sq. miles (2·5m. sq. km). The Eritrea–Sudan frontier and the frontier with the Chad and Central African Republics have been delimited and demarcated, as also has the greater part of the frontier with Ethiopia.

The population according to the 1955–56 census was 10,262,674. The estimate for 1968 was 14·77m.

The population consists mainly (two-thirds to four-fifths) of Moslem Arabs, and Nubians in the north and Nilotic and Negro tribes in the south.

Area (in sq. miles) and population of provinces (Jan. 1961 estimate), with inhabitants of provincial capitals (Jan. 1964 estimate) were as follows:

Province	Area	Population	Capital	Inhabitants
Bahr El Ghazal	82,530	1,157,016	Wau	11,000
Blue Nile	54,880	2,397,528	Wad Medani	57,000
Darfur	191,650	1,538,712	El Fasher	30,000
Equatoria	76,495	1,049,664	Juba	15,000
Kassala	131,528	1,097,376	Kassala	49,000
Khartoum	8,097	584,472	Khartoum	135,000
Kordofan	146,930	2,051,616	El Obeid	60,000
Northern	184,200	1,013,880	El Dammer	7,000
Upper Nile	91,190	1,037,736	Malakal	11,000

The capital is Khartoum. Other important cities are: Omdurman (154,000), Khartoum North (53,000), Port Sudan (57,000), Atbara (45,000), Kosti (30,000).

RELIGION. The population of the 6 northern provinces is almost entirely Moslem (Sunni), the majority of the 3 southern provinces is pagan. There are small Christian communities, with 2 Coptic Bishops, a Greek Orthodox metropolitan, an Anglican bishop and assistant bishop, 4 Roman Catholic bishops and Greek Evangelical, Evangelical and Maronite congregations. In 1962 Protestants numbered about 95,000. Some of the foreign missionaries were expelled from the southern provinces in March 1964.

EDUCATION (1964–65). Private kindergartens had 2,210 pupils; government elementary schools, 315,189 boys and 151,684 girls; private elementary schools, 6,025 boys and 5,475 girls; government intermediate schools, 34,304 boys and 6,777 girls; private intermediate schools, 20,917 boys and 6,366 girls; government secondary schools, 13,506 boys and 2,449 girls; private secondary schools, 7,640 boys and 1,577 girls. Higher technical training was given to 839 boys and 68 girls, higher vocational training to 230 boys; teachers' training colleges had 1,733 male and 577 female students. Khartoum University had over 5,098 students in 1969–70.

HEALTH. In 1970 the Ministry of Health maintains 93 hospitals, 1,766 dispensaries and dressing stations, 73 health centres (with together 12,085 beds) and 1,108 doctors.

JUSTICE. The judiciary is a separate and independent department of state directly and solely responsible to the Supreme Council of State. The general administrative supervision and control of the judiciary is vested in the Chief Justice.

Civil Justice is administered by the courts constituted under the Civil Justice Ordinance, namely the High Court of Justice—consisting of the Court of Appeal and Judges of the High Court, sitting as courts of original jurisdiction—and Province Courts—consisting of the Courts of Province and District Judges. The law administered is 'justice, equity and good conscience' in all cases where there is no special enactment. Procedure is governed by the Civil Justice Ordinance.

Justice in personal matters for the Moslem population is administered by the Mohammedan law courts, which form the Sharia Divisions of the Court of Appeal, High Courts and Kadis Courts; President of the Sharia Division is the Grand Kadi. The religious law of Islam is administered by these courts in the matters of inheritance, marriage, divorce, family relationship and charitable trusts.

Criminal Justice is administered by the courts constituted under the Code of Criminal Procedure, namely Major Courts, Minor Courts and Magistrates' Courts. Serious crimes are tried by Major Courts, which are composed of a President and 2 members and have the power to pass the death sentence. Major Courts are, as a rule, presided over by a Judge of the High Court appointed to a Provincial Circuit or a Province Judge. There is a right of appeal to the Chief Justice against any decision or order of a Major Court, and all its findings and sentences are subject to confirmation by him.

The President of the Supreme Council of the Armed Forces has power to commute a capital sentence. The Chief Justice has power to remit any case subject to confirmation by him to the Court of Criminal Appeal composed of the Chief Justice and 2 Magistrates of the first class, one of whom has to be a Judge of the High Court.

Lesser crimes are tried by Minor Courts consisting of 3 Magistrates and presided over by a Second Class Magistrate, and by Magistrates' Courts consisting of a single Magistrate or a bench of lay magistrates. In Provinces in which circuits of the High Court exist the High Court Judge, in other cases the Province Judge, exercises an appellate jurisdiction and a general supervision over these courts. The greater part of the criminal law is codified in the Sudan Penal Code.

Local Courts, constituted under the Native Courts Ordinance, 1932, and the Chiefs Courts Ordinance, 1931, administer civil and criminal justice in accordance with the native custom and deal with offences against specific ordinances; they work to some extent parallel with the state courts. Appeals lie to members of the state judiciary and *ex-officio* magistrates, and local courts are subject to supervision by them.

Juvenile Offences are dealt with by the 2 juvenile delinquent courts, constituted under the Code of Criminal Procedure, at Wad Medani and Omdurman.

All legislative enactments, ordinances and regulations (previously printed in 4 vols.) have been reprinted (in 11 vols.) in English. A committee is undertaking its translation into Arabic.

FINANCE. Currency. The monetary unit is the Sudanese pound (£S) divided into 100 piastres and 1,000 milliemes. Sudanese bank-notes of £S10, £S5, £S1, 50 and 25 piastres and Sudanese coins of P. 10, 5, 2; m/ms 10, 5, 2, 1 are in circulation. Currency in circulation at 29 Feb. 1968 totalled £S44·5m.

Budget. Revenue and expenditure in Sudanese pounds for financial years ending 30 June:

	1967–68[1]	*1968–69*[1]	*1969–70*[1]	*1970–71*[1]	*1971–72*
Revenue	91,866.077	113,500,000	142,000,000	158,000,000	189,000,000
Expenditure	85,659,317	100,000,000	..	113,000,000	178,000,000

[1] Estimates.

The chief sources of revenue in 1965–66 were indirect taxation from custom duties on imports and royalties on exports (£S34,680,440) and profits on trading concerns, railways, shares on cotton schemes (£S15,114,270). The main items of expenditure were education (£S6,462,830), public works (£S3,883,666), health (£S4,833,160), communications (£S6,469,786), agriculture (£S4,195,376) and defence (£S14,129,602).

The total external debt of the country at the end of 1964 was £S44,751,000.

DEFENCE. The Army is organized in 13 infantry battalions, 1 armoured regiment and 2 artillery regiments. The equipment used to be British, but is being replaced by German guns, rifles and cars. Total strength, 26,500.

A Navy was established in 1962 with a nucleus of 4 patrol boats built in Yugoslavia. Since then 2 more patrol boats, 2 landing craft, an oiler, a water carrier and a survey ship have been acquired from Yugoslavia.

The Air Force is being built up with Soviet assistance. About 16 MiG-21 supersonic fighters are reported to have been delivered in 1970, as initial equipment for 2 combat squadrons, with small numbers of An-12 and An-24 turboprop transports. Earlier equipment in service includes about 13 armed Jet Provost

trainers, 3 piston-engined Provost trainers, 3 Pembroke light transports, 3 Fokker Troopship transports and 10 Mi-8 helicopters.

PLANNING. The 10-year plan 1961/62–1970/71 envisaged a total expenditure on social and economic development of £S565·4m. A draft 5-year plan for 1970–75 is under discussion and envisages government expenditure of £S215m. and investment by the private sector of £S170m.

AGRICULTURE. In the Sudan, a predominantly agricultural country, cotton is by far the most important cash crop on which the Sudan depends for earning foreign currency. The two types of cotton grown in the Sudan are: (*a*) long staple sakellaridis and sakel types (derivatives of sakellaridis), grown in Gezira, White Nile, Abdel Magid and private pump schemes; (*b*) short staple, mainly American types, in Equatoria and Nuba Mountains, generally by rain cultivation.

Total production of all types in 1969–70 was 1·25m. bales.

Other agricultural products include groundnuts, sesame, dates, hides and skins, melonseeds, oil-cakes, dura, pulses, seed oil, castor seed, camels, cattle and sheep.

The Rural Water Supplies and Soil Conservation Board, set up in Oct. 1944, was in May 1956 replaced by the Land Use and Rural Water Development Board and an executive department.

Livestock (1970): Cattle, 12·3m.; sheep, 10·3m.; goats, 7·2m.

FORESTRY. The forests of the Sudan, their extent and dominant species are approximately as follows: (1) desert, 728,800 sq. km; (2) semi-desert, 491,000 sq. km (*Acacia Tortilis, Maerua crassifolia*); (3) woodland savannah: (*a*) low rain, 691,000 sq. km (*Acacia melifera, Acacia seyal, Acacia senegal, cambretum*), (*b*) high rain, 347,000 sq. km (*Anogeissus, Khaya, Isoberlinia*); (4) flood region, 246,000 sq. km (*Papyrus*); (5) montane vegetation, 6,000 sq. km (*Podocarpus, Olea*).

The types 2 and 3 (*a*) are the only local sources of fuel (firewood and charcoal). More than 20m. cu. metres of firewood are consumed annually.

The average annual production of sawn timber is 1m. cu. ft, which constitutes about 50% of the Sudan requirements of sawn timber and includes all the sleeper requirements of Sudan Railways and the Sudan Gezira Board. Different tree species of softwood are used for afforestation to produce the future demand of the Sudan of softwood. In 1962 nearly 13,000 acres were afforested.

Gum arabic, mainly hashab gum from *Acacia senegal*, is the sole forest produce exported from the Sudan on a major scale. About 50,000 tons (95% of the total world supply) are exported annually, fetching about £S6m. It ranks as the second cash crop to cotton. The bulk of gum production originates from Kordofan, Darfur, Kassala and Blue Nile Provinces.

A forest research and education institute has been established by the Sudan Government in co-operation with the United Nations Special Fund.

MINING. The following minerals are known to exist in the Sudan: gold, graphite, sulphur, chromite (20,500 metric tons in 1965), iron-ore, manganese-ore, copper-ore, zinc-ore, fluorspar, natron, gypsum and anhydrite, magnesite, asbestos, talc, halite, kaolin, white mica, coal, diatomite (kiesel guhr), limestone and dolomite, pumice, lead-ore, wollastonite, black sands, vermiculite pyrites.

Gold is being exploited on a small scale at Deweishat (south of Wadi Halfa) and at Birkateib (in Kassala Province); alluvial gold is occasionally exploited in Southern Fung and Equatoria. Total gold production in 1963, 900 troy oz. Iron-ore has been smelted in the past, on a very limited scale and by primitive methods, in the Eastern and Southern Provinces. Iron-ore mining in the northern Red Sea hills started in 1965, and some 30,000 tons were exported to Europe in the first year.

Copper at Hofrat en Nahas was mined in the 19th century; the mine has been leased to foreign interests for exploitation. A few thousand tons of medium-grade

manganese-ore have been shipped annually since 1956. Mining and processing of white mica, as an industry, is beginning to be established. Vermiculites, mined near Sinkat in Kassala Province, is beginning to find its way into foreign markets. Salt pans at Port Sudan supply the whole needs of the country, and considerable quantities of salt are exported annually; output, 1962, 57,870 metric tons. Mining of chromite from the Ingessena Hills, southern Blue Nile Province, commenced in 1962. Quartz and marble for glass and tile manufacture is being quarried in the Red Sea Hills. Marble is quarried for cement manufacture in Atbara (Northern Province) and Rabak on the White Nile.

An asbestos deposit in Qala El Nahal in Kassala province is being examined by a foreign concern.

COMMERCE. Total trade for calendar years, in £S:

	1966	*1967*	*1968*	*1969*	*1970*
Imports[1]	77,456,697	74,329,149	89,709,233	92,475,767	108,337,508

RAILWAYS. The main railway lines run from Khartoum to El Obeid *via* Wad Medani, Sennar Junction, Kosti and El Rahad (701 km); El Rahad to Nyala *via* Abu Zabad, Babanousa and Ed-Daein (698 km); Sennar Junction to Kassala *via* Gedaref (455 km) and to Roseires *via* Singa (220 km); Kassala to Port Sudan *via* Haiya Junction and Sinkat (550 km); Khartoum to Wadi Halfa *via* Shendi, El Dammer, Atbara, Berber and Abu Hamad Junction (924 km); Abu Hamad to Karima (248 km); Atbara to Haiya Junction (271 km); Babanousa to Wau (444 km). The main flow of exports and imports is to and from Port Sudan *via* Atbara and Kassala. The total length of line open for traffic was 4,752 km as at 31 July 1969. The gauge is 3 ft. 6 in.

SHIPPING. Supplementing the railways are regular river steamer services of

the Sudan Railways, between Karima and Dongola, 319 km; from Khartoum to Kosti, 319 km; from Kosti to Juba, 1,436 km, and from Kosti to Gambeila, 1,069 km. Port Sudan is the country's only seaport; it is equipped with 13 berths.

ROADS. Roads in Northern Sudan, other than town roads, are only cleared tracks mostly impassable directly after rain. In Upper Nile Province motor traffic is limited mostly to the months Jan.–May. In Equatoria and Bahr El Ghazal Provinces there are a number of good gravelled roads with permanent bridges which can be used all the year round, though minor roads become impassable after rain.

Notes on Motoring in the Sudan is obtainable from the Under Secretary, Ministry of Interior, Khartoum, or the Sudan Embassy in London, to whom application should be made for permission to motor through the Sudan.

AVIATION. Sudan Airways is a government-owned airline, with its headquarters in Khartoum, operating domestic and international services. The latter include services to Asmara, Addis Ababa, Aden, Jiddah, Cairo, Athens, Rome, Frankfurt, London, Beirut, Nairobi and Entebbe. In 1964 Sudan Airways carried 104,824 passengers and 1,541,857 kg of mail and freight.

POST AND TELECOMMUNICATIONS (1965). There are 129 permanent post and telegraph offices, 23 travelling post and telegraph offices, 1 branch office and 167 agencies. There are 27 wireless telegraph and 99 radio-telephone stations, 130 telephone exchanges (36 of them automatic) and 340 telephone call boxes; number of telephones in 1971 was 46,371 (29,438 in Khartoum). There are 2 transmitting stations and 10 radio-beacon stations.

BANKING. The Bank of Sudan opened in Feb. 1960 with an authorized capital of £S1·5m. as the central bank of the country; it has the sole right to issue currency. Its foreign reserves stood at £S23·4m. as at 29 Feb. 1968. All foreign banks were nationalized in 1970.

The post office savings bank had 114,902 depositors each with an average balance of £S56 as at Dec. 1963.

CONSTITUTION AND GOVERNMENT. The fundamental laws of the kingdom are: 1, the Constitution (*Regeringsformen*) of 6 June 1809 (modified in 1969); 2, the Parliament Act (*Riksdagsordningen*) of 22 June 1866 (modified in 1909, 1921, 1949 and 1969; 3, the law of Royal Succession of 26 Sept. 1810, and 4, the law on the Freedom of the Press of 5 April 1949 (replacing the Press Act of 1812). The King must be a member of the Lutheran Church.

Parliamentary government was finally established in 1917. Beginning 1971, the Diet (*Riksdag*) consists of one chamber. (A two-chamber Diet worked until the end of 1970.) The new unicameral Diet consists of 350 members directly elected by universal suffrage, for a period of 3 years. Every man and woman who has reached the age of 19 years not later than the calendar year preceding election year and not under wardship has the right to vote and to stand for election.

The manner of election to the Diet is proportional. The country is divided into 28 constituencies. In these constituencies 310 members are elected. The remaining 40 seats constitute a nation-wide pool intended to give absolute proportionality to parties that receive at least 4% of the votes. A party receiving less than 4% of the votes in the country is, however, entitled to participate in the distribution of seats in a constituency, if it has obtained at least 12% of the votes cast there.

A state subsidy is given to all political parties which have obtained at least one seat in the Diet at the last election. The subvention (24·5m. kr. in 1970–71) is distributed in the ratio of 70,000 kr. per seat. Furthermore a municipal subsidy may be decided by the commune councils and the county councils. The subsidy is distributed in a fixed ratio per seat in the council.

The Diet, elected 20 Sept. 1970, has 163 Social Democrats, 58 Liberals, 41 Conservatives, 71 Centre Party and 17 Communists.

The executive power is in the hands of the King, who acts on the advice of a Council of State, the head of which is the Prime Minister.

The Social Democrat Cabinet, appointed on 14 Oct. 1969, was composed as follows in Oct. 1970.

Prime Minister: Olof Palme.

Foreign Affairs: Torsten Nilsson. *Justice:* Lennart Geijer. *Defence:* Sven Andersson. *Social Affairs:* Sven Aspling. *Communications:* Bengt Norling. *Finance:* Gunnar Sträng. *Education:* Ingvar Carlsson. *Agriculture:* Ingemund Bengtsson. *Commerce:* Kjell Olof Feldt. *Industry:* Krister Wickman. *Interior and Health:* Eric Holmqvist. *Civil Service:* Svante Lundkvist. *Without Portfolio:* Sven-Eric Nilsson, Mrs Alva Myrdal, Mrs Camilla Odhnoff, Sven Moberg, Bertil Löfberg, Carl Lidbom.

All the members of the Council of State are reponsible for the acts of the Government.

Public administration in Sweden is characterized by a unique degree of functional decentralization. The Ministries are not really administrative agencies. They prepare bills for the *Riksdag*, issue general directives and make higher appointments, but, as a rule, do not take individual administrative decisions. The routine administrative work is attended to by the central boards (*centrala ämbetsverk*). Each board's sphere of activity depends partly on its organization which is decided by the appropriations granted by the Riksdag. The King-in-Council often asks the boards' opinion on proposed measures.

National flag: Yellow cross on blue.

National anthem: Du gamla, du fria, du fjällhöga nord (words by R. Dybeck, 1844; folk-tune).

The official language is Swedish. The capital is Stockholm.

LOCAL GOVERNMENT. For administrative purposes Sweden is divided into 24 counties (*län*), in each of which the central government is represented by a county administration board (*ländstyretse*). The governor *landhövding*) is chairman of the board, which in addition to the governor has 10 members. The governor and 5 other members nominated by the Government and the remainder by the county council.

Local government is based on the municipal laws of 18 Dec. 1953 and, for the capital, of 1 March 1957; and the levying of local taxes on a special law. According to the municipal laws Sweden is divided into communes in which all men and women who have reached the age of 19 not later than the year before election year, and not under wardship, are entitled to elect the commune council. These councils are named *Kommunfullmäktige*. The earlier distinction between rural districts, boroughs and towns was abolished in 1971. Ecclesiastical affairs in all parishes with more than 1,000 inhabitants are dealt with by church councils (*Kyrkofullmäktige*); smaller parishes may make the same arrangement. The number of communes has, since 1952, been reduced from 2,500 to 464 and it is estimated that the number will be 270 in Jan. 1974. Each county, except Gotland, which consists of only one commune, has a county council (*Landsting*) elected by men and women who enjoy municipal suffrage. The *Landstings* chiefly administer the health service and regional vocational schools. All elections are conducted on the proportional system.

RELIGION. The overwhelming majority of the population belong to the Evangelical Lutheran Church, which is the established national church. There were 13 bishoprics (Uppsala being the metropolitan see) and 2,566 parishes at the beginning of 1970. The clergy are chiefly supported from the parishes and the proceeds of the Church lands. The nonconformists mostly still adhere to the National Church. The largest denominations, on 1 Jan. 1969, were: Swedish Missionary Society, 86,918; Pentecost Movement, 90,000; Evangelical National Missionary Society, 28,222; Salvation Army, 36,721; Swedish Baptist Church, 26,717; Alliance Missionary Society, 13,811; Methodists, 9,095; Örebro Missionary Society, 19,292. There were also about 50,000 Roman Catholics (under a Bishop resident at Stockholm), about 20,000 Orthodox Catholics and about 13,000 Jews.

Parliament and Convocation (*Kyrkomötet*) decided in 1958 to admit women to ordination as priests.

EDUCATION. In 1970–71 Sweden had 6 state universities, at Uppsala (founded in 1477) with 18,911 students, in the faculty of theology 790, law 1,576, medicine 1,413, arts 5,639, pharmacy 737 (of which higher course 417), social sciences 5,967, natural sciences 3,089; Lund (founded in 1668), with 22,460 students, in the faculty of theology 583, law 3,186, medicine 1,617, odontology 520, arts 4,948, social science 6,729, natural sciences 2,619 and technology 2,742; Göteborg (founded as private university in 1889; state university in 1954) with 16,966 students, in the faculty of medicine 1,487, odontology 457, arts 4,818, social sciences 8,170 and natural sciences 2,579; Stockholm (founded as private university in 1877; state university in 1960) with 26,007 students, in the faculty of law 2,945, arts 8,399, social sciences 12,091 and natural sciences 3,457 students; Umeå (founded in 1963) with 7,049 students, in the faculty of medicine 672, odontology 300, arts 1,404, social sciences 3,314 and natural sciences 1,631 students, and

Linköping (founded in 1970) with 3,060 students, in the faculty of medicine 126, arts 817, social sciences 1,064, natural sciences 499 and technology 618 in autumn term 1970. In 1967–68 there were established 4 affiliated universities (of which Linköping became state university in 1970): in Örebro, 1,781 students, in the faculty of arts 610, social sciences 839 and natural sciences 290, in Växjö 1,542 students, in the faculty of arts 577, social sciences 782 and natural sciences 217 and in Karlstad 1,442 students, in the faculty of arts 594, social sciences 750 and natural sciences 134 in autumn term 1970. There is also in Stockholm a state faculty of medicine (founded in 1810) with 2,255 students and a dental college with 527 students. In Stockholm and Göteborg there are also academies of commerce with 2,696 students. The institute of technology in Stockholm had 5,775; that in Göteborg, 4,623, and the institute of agriculture in Uppsala 749 students. The college of veterinary medicine had 343; the college of forestry, 258; 2 institutes of physical education, 457; 3 institutes of physiotherapy, 487; the teachers' university colleges in Stockholm, Malmö, Göteborg, Uppsala, Linköping and Umeå, 1,991; and the schools of social work and public administration in Stockholm, Göteborg, Lund, Umeå and Örebro, 4,525 students. The journalist's university colleges in Stockholm and Göteborg had 464 students. At the academy of art school and the college of music in Stockholm there were 768 pupils.

In 1970–71 there were 640,000 pupils in primary education (grade 1–6 in comprehensive schools and all grades in public primary schools). Secondary education at the lower level (grades 7–9 in comprehensive schools and all remaining grades in older secondary schools) comprised 332,400 pupils. In secondary education, the higher stage, there were 232,000 pupils (full-time courses). Part-time courses in vocational schools had 91,700 pupils. People's colleges had 13,600 pupils. There are also teacher-training colleges, military, navigation, agricultural and other special schools; besides institutions and schools for the deaf, blind and mentally deficient.

CINEMAS (1970). There were 1,374 cinemas.

NEWSPAPERS (1970). There were 149 daily newspapers with a total circulation of 4·55m.

JUSTICE. The administration of justice is entirely independent of the Government. The *Justitiekansler*, or Chancellor of Justice (a royal appointment) and the *Justitieombudsmän* (Judical Commissioners appointed by the Diet), exercise a control over the administration. In 1968 a reform was carried through which meant that the offices of the former *Justitieombudsman* (Ombudsman for civil affairs) and the *Militieombudsman* (Ombudsman for military affairs) were turned into one sole institution with 3 Ombudsmen, each styled *Justitieombudsman*. They exert a general supervision over all courts of law, the civil service, military laws and the military services. In 1970 they received altogether 3,090 cases; of these, 457 were instituted on their own initiative and 2,606 on complaints. They dismissed 787 cases, investigated 1,433 without taking direct action, offered criticisms in 672 cases, instituted 3 prosecutions and made 6 proposals to government.

The *Riksåklagaren* (a royal appointment) is the chief public prosecutor.

The kingdom has a Supreme Court of Judicature and is divided into 6 high-court districts and 108 district-court divisions (*tingsrätter*).

These district courts (or courts of first instance) deal with both civil and criminal cases. More serious criminal cases are generally tried by a judge and a jury (*nämnd*) of 4–5 members (lay judges); petty cases are tried by the judge alone. Civil cases are tried as a rule by 3 to 4 judges or in minor cases by 1 judge. Disputes of greater consequence relating to the Marriage Code and the Code relating to Parenthood and Guardianship are tried by a judge and a *nämnd*. From 1972 cases concerning real estate are tried by the district courts. When trying those cases the district court is presided over by a judge and 4 members (*fastighetsdomstol*).

In trials by *nämnd* the judge decides the case except when the majority of the *nämnd* (at least 4 members of 5 or 3 members of 4) differs from him, in which case the deision of the *nämnd* prevails.

Persons of poor or moderate means may be provided with the services of lawyers in civil and criminal proceedings from special state-aided legal aid centres, and may also be granted costs for their proceedings. Moreover, the community may bear the cost of free legal advice to poor persons by private lawyers in cases not brought before a court.

There were 74 penal and correctional institutions for delinquents, with 4,664 male and 120 female inmates on 31 Dec. 1970. Besides, there were 22 institutions with 895 places for children and juveniles in need of care owing to viciousness, maladjustment or delinquency.

SOCIAL WELFARE. The social security schemes are greatly expanding. Supported by a referendum, the Diet in 1958 and 1959 decided that the national pensions should be increased successively until 1968 and supplementary pensions paid from 1963. These pensions are of invariable value. In 1969 the Diet decided that as from 1 July 1969 an increment to the basic pension was to be paid to persons without supplementary pensions, and this amount is to be successively increased in a 10-year period. The basic and supplementary pensions consist of old-age and family pensions, as well as pensions paid to the disabled. The financing of the supplementary system is based on the current-cost method.

The most important social welfare schemes are described in the conspectus below.

Type of scheme	Introduced	Scope	Principal benefits
Sickness insurance (compulsory—current law, 1962)	1955	All residents	Hospital fees, about 75% of private doctors' fees, district physicians and doctors in hospitals charge the insured person only 7kr. for full medical treatment, some reimbursement of cost of transportation as well as costs of physiotherapy, convalescent care, etc., medicines at reduced prices or free of charge. During sickness daily allowance of 6–52 kr. plus children's supplement (1–3 kr. a day). There is generally no maximum benefit period.
Employment injury insurance (compulsory—current law, 1954)	1910	All employed persons	Medical treatment, medicine and medical appliances, hospital care, sickness benefit 6–52 kr. plus children's supplement 1–3 kr. a day (first 90 days covered by sickness insurance), disability annuities, funeral benefit and survivor's pensions.
Unemployment insurance (current law, 1956)	1934	Members of recognized unemployment insurance societies (about 60% of all employees)	Up to 50 kr. per day plus 2 kr. for each child.

Type of Scheme	Introduced	Scope	Principal benefits
Basic pensions (current law, 1962)			
Old-age	1913	All citizens	Payable from the age of 67 or, at a reduced rate, from the age of 63. 9,728 kr. per annum for married couples, 6,144 kr. for others (including the special increment of 768 kr. and 384 kr. respectively for those without supplementary pension); about half of them receive municipal housing supplement.
Disability	1913	All citizens	Payable before the age of 67. Full pension: the same amount as concerning old-age pension (*see above*).
Survivors	1948	All citizens	Widow's pension is payable before the age of 67. The pension is 6,144 kr. (including the special increment of 384 kr.) but less for those who have become widows before the age of 50 and have no child below 16. Many of them receive municipal housing supplements. Child pension is payable before the age of 16. The pension amounts to 1,600 kr. (fatherless or motherless) and 2,240 kr. (orphans).
Supplementary pensions (current law, 1962)			
Old-age	1960	All gainfully occupied persons	Payable from the same age as the basic pension (*see above*). The pension is in principle 60% of the insured person's average annual earnings during the best 15 years except an amount corresponding to the basic pension and subject to a ceiling.
Disability	1959	All gainfully occupied persons	Payable before the age of 67. Full pension corresponds in principle to supplementary old-age pension.
Survivors	1959	All gainfully occupied persons	Payable to widow and children, before the age of 19, of a deceased person as a certain percentage of the deceased's supplementary pension.
Maternity insurance (compulsory—current law, 1962)	1955	All child-bearing women	Maternity hospital fee and cost of transportation. 1,080 kr. (1,620 for twins, etc.). Employed women may receive 1–46 kr. a day up to 180 days.
Children's allowances[1]	1948	All children below 16	1,200 kr. per annum.
		Children at school 16–18	100 kr. per month during school-courses. Children at school (16–20 years) living more than 6 km from school may receive supplementary allowance of 40–125 kr. per month.

[1] In addition to old-age pension and disablement pension children's supplement is paid (up to 1 600 kr. for each child).

Total social expenditure, including also hygiene, care of the sick and social assistance, amounted to 26,435m. kr. in 1970, representing 20% of the net national income.

FINANCE. Currency. The Swedish *krona*, of 100 *öre*, averaged in 1970 of the value of approximately 12·44 kr. to the £ sterling and 5·19 kr. to the US$.

Gold coins do not exist as a currency. National bank-notes for 5, 10, 50, 100, 1,000 and 10,000 kr. are legal means of payment, and the bank is formally bound to exchange them for gold on presentation, but the obligation to redemption is suspended.

DEFENCE. A Supreme Commander is, under the King, in command of the three services. He is assisted by the Defence Staff under a chief of staff.

The military forces are recruited on the principle of national service, supplemented by voluntarily enlisted personnel who form the permanent cadres for training purposes.

Liability to service commences at the age of 18, and lasts till the end of the 47th year. From 1966 the period of training is 330–643 days, depending on the service and the conscripts' particular duties. Training is performed in a first period of 251–450 days at a training centre, and later on in 5 periods of 15–32 days each in combat units. Some conscripts receive additional training of about 10 months to become officers in the reserve.

In 1966 a new territorial organization was introduced, consisting of 6 military commands (each under a general officer commanding) which took over some of the tasks previously dealt with by the naval and air-area commands.

Army. The C.-in-C. of the Royal Swedish Army has at his disposal the Army Staff under a chief of staff.

The peace-time Army consists for training purposes of 15 infantry, 3 cavalry, 8 armour, 7 artillery, 6 AA, 3 engineer, 3 signal and 4 Army Service Corps units, most of which are called 'regiments' (*regementen*), each usually consisting of several battalions.

The Army is organized and equipped with regard to the varying geographical and climatic conditions of the country. The Home Guard (*Hemvärnet*) raised during the War continues to be in force.

Sweden's ground forces can be said to consist of a standing Army which for the most part is on indefinite leave, but which on short notice can be ready for action. One of the basic principles of the Swedish system of mobilization is the local recruitment of as many units as possible. Efforts are also made to decentralize as much as possible the storage of equipment and supplies.

The active personnel of the Army comprises about 12,000 officers, warrant officers and n.c.o.s.

Navy. There are 3 Naval Bases: those of the southern, eastern and western coast.

The cruiser *Göta Lejon*, completed in 1947, with a displacement of 8,200 tons, belt armour of 5 in., 7 6-in. guns, 6 21-in. torpedo tubes, 100,000 shaft h.p. and a speed of 33 knots was purchased by Chile in 1971.

There are 22 submarines, 8 destroyers, 6 anti-submarine frigates, 2 minelayers, 18 coastal minesweepers, 17 inshore minesweepers, 42 torpedo boats, 1 submarine depot ship, 23 patrol launches, 9 mining tenders, 8 tenders, 8 surveying vessels, 5 icebreakers, 1 oiler, 1 communication ship, 1 salvage vessel, 57 landing craft, 2 sail training ships, 1 supply ship and 3 water carriers.

The coast artillery defence areas are those of the Stockholm archipelago, Blekinge, Gothenburg, Gotland and Norrland. There are 5 coastal artillery regiments. The active personnel of the navy and coast artillery in 1971 totalled about 16,000 officers and men including conscripts.

Air Force. The C.-in-C. of the Royal Swedish Air Force has at his disposal the Air Staff under a chief of staff. Directly subordinate to the C.-in-C. of the Air Force are also the Inspectors of Air Base Control and Reporting Services, and of Flying Safety. Technical matters are managed by the Air Materiel Department (formerly Air Force Board) which is the Air Force section of the Materiel Administration of the Swedish Armed Forces.

The combat units consist of 9 fighter-interceptor and 4 ground-attack wings (*flottiljer*), each with 2–3 squadrons of 12–15 aircraft, together with 5 reconnaissance squadrons (*divisioner*). Total peace-time strength of the combat units is 37 squadrons with about 650 first-line aircraft.

Standard night- and all-weather-fighters are the Swedish-built Saab J35A/D Draken (7 squadrons) and J35F Draken (13 squadrons). The 4 ground-attack wings (10 squadrons) are equipped with A32 Lansen aircraft, which are being replaced progressively with Saab AJ37 Viggens from 1971. There are also 2 reconnaissance squadrons of Draken and Lansen (Saab S35 and S32), and transport and helicopter formations. Six Bloodhound surface-to-air missile squadrons are operational. Some ground-attack reconnaissance squadrons have the Sk60B/C versions of the Saab-105 twin-jet light multi-purpose aircraft. The Sk60A version is the Air Force's standard advanced trainer (with attack

capability), to which pupils progress after initial training on piston-engined Sk50 Safirs (being replaced with Scottish Aviation Bulldogs). Other trainers in service include the Sk16 (T-6), and Sk35C Draken.

The active personnel consists of about 2,500 officers and warrant officers, 300 n.c.o.s and technicians and 6,500 civilians (technicians, meteorologists, etc.).

AGRICULTURE. According to the farm register which is revised annually the following data was provided in 1970. The number of farms in cultivation, of more than 2 hectares of arable land, was 155,364; of these there were 111,848 of 2–20 hectares; 40,940 of 20–100 hectares; 2,576 of above 100 hectares. Of the total land area of Sweden (41,140,600 hectares), 3,032,393 hectares (except kitchen gardens and fruit gardens) were arable land, 141,769 hectares cultivated pastures and 22,794,000 hectares forests.

[1] Figures refer to holdings of over 2 hectares of arable land.

Area of rotation meadows for pasture was (in 1,000 hectares): 1968, 237; 1969, 222; 1970, 237.

Total dairy production of milk (in 1,000 metric tons): 1968, 3,308; 1969, 3,139; 1970, 2,955. Butter production in the same years was (in 1,000 metric tons): 66, 63, 42; and cheese, 59, 58, 60.

Livestock, 1970: Cattle, 1,925,628; sheep, 334,616; pigs, 2,073,559.

Number of farm tractors in 1970, 181,517.

The number of pelts produced in 1970 was as follows: Fox, 13,000; mink, 1·7m.

FORESTRY. Nearly 23·5m. hectares or 55% of the total land area are covered with forests. The total amount of standing timber is estimated at 2,300m. cu. metres with bark; 85% of this volume consists of coniferous wood (pine and spruce). Half of the forest area is privately owned, the other half is equally divided between public authorities (Crown, Church, communities, etc.) and joint-stock companies. The total cut in 1970 was 60m. cu. metres solid volume (without bark); of these 23m. were coniferous timber, 33m. pulpwood, 3m. fuel wood. In 1968 and in 1969 the total cut was 49 and 53m. cu. metres respectively.

In 1970 there were over 900 saw-mills with 5 or more workers, the total production of which—representing some 90% of the country's total production—amounted to 12m. cu. metres sawn and planed wood. The production of the 100 pulp-mills in Sweden in 1970 amounted to 8·1m. metric tons pulp (dry weight). There was an export of approximately 4·2m. cu. metres of roundwood; exports of sawn coniferous wood amounted to 6·9m. cu. metres, of plywood (including blockboards) to 4,900 metric tons and of pulp 3·8m. metric tons.

FISHERIES. In 1970 the total value of the catches of the sea fisheries was estimated at 211m. kr.; of this sum, 154m. kr. came from Göteborg, Bohus and Halland.

MINING. Sweden is one of the leading exporters of iron ore. The largest deposits are found north of the polar circle in the area of Kiruna and Gällivare–Malmberget. The ore is exported *via* the Norwegian port of Narvik and the Swedish port of Luleå. There are also important resources of iron ore in southern Sweden (Bergslagen). The most important fields are Grängesberg and Strässa and the ores are shipped *via* the port of Oxelösund. Some of the southern

deposits have, in contrast to the fields in North Sweden, a low phosphorus content.

There are also some deposits of copper, lead and zinc ores especially in the Boliden area in the north of Sweden. These ores are often found together with pyrites. Non-ferrous ores, except zinc ores, are used in the Swedish metal industry and barely satisfy domestic needs.

The total production of iron ores amounted to 31·5m. tons in 1970 and exports to 28m. tons. The production of copper ore was 114,100 tons, of lead ore 108,200 tons, of zinc ore 167,500 tons.

There are also deposits of raw materials for aluminium not worked at present. In southern Sweden there are big resources of alum shale, containing oil and uranium.

MANUFACTURING. The most important sector of Swedish manufacturing is the production of metals, metal products, machinery and transport equipment, covering almost half of the total value added by manufacturing. Production of high-quality steel is an old Swedish speciality. A large part of this production is exported. The production of ordinary steel is also steadily increasing but is still short of domestic demand. The total production of steel amounted to 5m. tons in 1969, 28% of which was high-quality steel. There is also a corresponding production of other metals (aluminium, lead and copper) and rolled semi-manufactured goods of these metals.

These basic metal industries are an important basis for the production of more developed metal products, machinery and equipment, which are to a large extent sold on the world market, *i.e.*, hand tools, mining drills, ball-bearings, turbines, pneumatic machinery, refrigerating equipment, machinery for pulp and paper industries, etc., sewing machines, machine tools, office machinery, high-voltage electric machinery, telephone equipment, cars and trucks, ships and aeroplanes.

Another important manufacturing sector is based on Sweden's forest resources. This sector includes saw-mills, plywood factories, joinery industries, pulp- and paper-mills, wallboard and particle board factories, accounting for about 15% of the total value of manufacturing.

A fast increasing sector is the chemical industry, especially the petro-chemical branch. Minerals industries include production of building materials, decorative arts products of glass and china.

ELECTRIC ENERGY. Sweden is rich in water power resources. The total electric energy production in 1970 was 60,645m. kwh. About 68% of this energy was produced in hydro-electric plants. All the economically harnessable water-power resources will soon have been developed and the new plants in the 1970s will probably be based on thermal power, mainly nuclear.

SHIPPING. The Swedish mercantile marine consisted on 1 Jan. 1971 of 763 vessels of 4·63m. gross tons (only vessels of at least 100 gross tons, and excluding fishing vessels and tugs). Stockholm and Göteborg, with together 361 vessels of 3·4m. gross tons in Jan. 1971 are the two largest ports.

Vessels entered from and cleared for foreign countries, exclusive of passenger liners and ferries, with cargoes and in ballast, in 1970, as follows (only vessels of at least 20 net tons included): With cargoes, 39,208 of 38·2m. net tons; in ballast, 20,448 of 25·9m. net tons.

ROADS. On 1 Jan. 1971 there were 97,959 km of public roads, of which 27,166 km were surfaced. Motor vehicles on 31 Dec. 1970 included 2,287,709 passenger cars, 154,645 buses and lorries and 41,305 heavy motor cycles.

AVIATION. Commercial air traffic is maintained in (1) Sweden and other parts of the world by Scandinavian Airlines System (SAS), of which AB Aerotransport (ABA = Swedish Air Lines) is the Swedish partner (DDL = Danish Air Lines and DNL = Norwegian Air Lines being the other two); (2) only within Sweden by Linjeflyg AB. Scandinavian Airlines System have a joint paid-up capital of about Sw. kronor 643·7m. Capitalization of ABA, Sw. kronor 238m., of which 50% is owned by the Government and 50% by private enterprises. Capitalization of Linjeflyg, Sw. kronor 11·4m., of which 50% is owned by SAS and 50% by ABA.

In scheduled air traffic during 1970 the total number of km flown was 51·9m.; passenger-km, 2,449m.; goods, 97,559,000 ton-km; mail, 13·4m. ton-km. These figures represent the Swedish share of the SAS traffic (Swedish domestic and three-sevenths of international traffic) and the Linjeflyg traffic.

RAILWAYS. At the end of 1970 the total length of railways was 12,203 km, of which 11,544 km belonged to the State; 7,520 km were electrified. In 1970 the number of passengers on the railways was 64m.; weight of goods, including Lapland ore, 71m. metric tons.

POST. The length of telegraph circuits in Jan. 1970 was 1,087,000 km. The circuits of the telephone had a length of 19·55m. km. Early in 1971 there were 4,505,802 instruments employed in the telephone service.

Number of combined radio and television reception fees paid on 30 June 1971 was 2,599,811, of which 218,630 included extra fees for colour television; radio reception fees paid, 311,082.

The overseas radio-telegraph and radio-telephone services are conducted by the Swedish Telecommunications Administration.

The number of post offices at the end of 1970 was 2,565. For receipts of the post and telecommunication services see the section on FINANCE.

BANKING. The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for 3 years by the Diet, except the chairman, who is designated by the King. The bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution. The note circulation is fixed at 13,000m. kr. Since 1904, only the Riksbank has the right to issue notes. On 31 Dec. 1970 its note circulation amounted to 11,319m. kr.; its combined gold and net foreign-exchange holdings (including surplus value of gold) totalled 3,624m. kr.

There are 16 commercial banks. On 31 Dec. 1970 their total deposits amounted to 43,098m. kr.; domestic bills and loans to 34,860m. kr.

The savings-banks statistics (exclusive of post office) are as follows, at the end of the year:

	1965	*1966*	*1967*	*1968*	*1969*	*1970*

SWITZERLAND

Schweiz—Suisse—Svizzera

HISTORY. On 1 Aug. 1291 the men of Uri, Schwyz and Unterwalden entered into a defensive league. In 1353 the league included 8 members and in 1513, 13. Various territories were acquired either by single cantons or by several in common, and in 1648 the league became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution, and out of the lands formerly allied or subject increased the number of cantons to 19. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, France, Great Britain, Portugal, Prussia, Russia, Spain and Sweden, and the Federal Pact, which included 3 new cantons, was accepted by the Congress of Vienna. In 1848 a new constitution was passed without foreign interference. The 22 cantons set up a Federal Government (consisting of a Federal Parliament and a Federal Council) and a Federal Tribunal. This constitution, in turn, was on 29 May 1874 superseded by the present constitution.

CONSTITUTION AND GOVERNMENT. Switzerland is a republic. The highest authority is vested in the electorate, *i.e.*, all Swiss citizens of over 20. This electorate—besides electing its representatives to the Parliament—has the voting power on amendments to, or on the revision of, the constitution. It also takes decisions on laws and international treaties if requested by 30,000 voters or 8 cantons (facultative referendum), and it has the right of initiating constitutional amendments, the support required for such demands being 50,000 voters (popular initiative).

The Federal Government is supreme in matters of peace, war and treaties; it regulates the army, the railway, telecommunication systems, the coining of money, the issue and repayment of bank-notes and the weights and measures of the republic. It also legislates on matters of copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zürich and at Lausanne, 2 federal universities and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests and the construction of national highways and railways. By referendum of 13 Nov. 1898 it is also the authority in the entire spheres of common law. In 1957 the Federation was empowered to legislate on atomic energy matters and in 1961 on the construction of pipelines of petroleum and gas.

National flag: A white cross on red.
National anthem: Trittst im Morgenrot daher (words by Leonard Widmer, 1808–68; tune by Alberik Zwyssig, 1808–54); adopted by the Federal Council in 1962.

The legislative authority is vested in a parliament of 2 chambers, a *Ständerat*, or Council of States, and a *Nationalrat*, or National Council.

The *Ständerat* is composed of 44 members, chosen and paid by the 22 cantons of the Confederation, 2 for each canton. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land, Appenzell into Ausser-Rhoden and Inner-Rhoden, and Unterwalden into Obwalden and Nidwalden. Each of these 'half-cantons' sends one member to the State Council.

The *Nationalrat*—after the referendum taken on 4 Nov. 1962—consists of 200 National Councillors, directly elected for 4 years, in proportion to the population of the cantons, with the proviso that each canton or half-canton is represented by at least one member. The members are paid from federal funds at the rate of 70 francs for each day during the session.

In 1971 the 200 members were distributed among the cantons[1] as follows:

Zürich (Zurich)	35	Schaffhausen (Schaffhouse)	2
Bern (Berne)	31	Appenzell—Outer- and Inner-Rhoden	3
Luzern (Lucerne)	9	St Gallen (St Gall)	12
Uri	1	Graubünden (Grisons)	5
Schwyz	3	Aargau (Argovie)	14
Unterwalden—Upper and Lower	2	Thurgau (Thurgovie)	6
Glarus (Glaris)	1	Ticino (Tessin)	8
Zug (Zoug)	2	Vaud (Waadt)	16
Fribourg (Freiburg)	6	Valais (Wallis)	7
Solothurn (Soleure)	7	Neuchâtel (Neuenburg)	5
Basel (Bâle)—town and country	14	Genève (Genf)	11

[1] The name of the canton is given in German, French or Italian, according to the language most spoken in it, and alternative names are given in brackets.

At the elections held on 30 Oct. 1971 the following parties were returned to the National Council: Social Democrats, 46; Radicals, 49; Christian-Democratic People's Party, 44; Peasant Party, 23; Independents, 13; Democrats and Protestant Party, 3; Liberal Democrats, 6; Communists, 5; Republicans, 7; Action Party, 4.

Council of States (1971): Catholic Conservatives, 18; Radicals, 13; Socialists, 4; Peasant Party, 3; Independents, 1; Liberals, 2; Democrats and Protestant Party, 3.

A general election takes place by ballot every 4 years. Every citizen of the republic who has entered on his 20th year is entitled to a vote, and any voter, not a clergyman, may be elected a deputy. Laws passed by both chambers may be submitted to direct popular vote, when 30,000 citizens or 8 cantons demand it; the vote can be only 'Yes' or 'No'. This principle, called the *referendum*, is frequently acted on.

Women's suffrage, although advocated by the Federal Council and the Federal Assembly, was on 1 Feb. 1959 rejected, but in a subsequent *referendum*, held on 7 Feb. 1971, women's suffrage was carried.

The chief executive authority is deputed to the *Bundesrat*, or Federal Council, consisting of 7 members, elected from 7 different cantons for 4 years by the *Vereinigte Bundesversammlung*, *i.e.*, joint session of both chambers. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either House, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Federal Council (called President of the Confederation) and the Vice-President are the first magistrates of the Confederation. Both are elected by the Federal Assembly for one calendar year and are not immediately re-eligible to the same offices. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

President of the Confederation for 1972: Nello Celio (Ticino), born 1914.
Vice-President of the Federal Council for 1972: Roger Bonvin (Valais), born 1909.

The 7 members of the Federal Council—each of whom has a salary of 110,000 francs per annum, while the President has 122,000 francs—act as ministers, or chiefs of the 7 administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

The Federal Council is composed as follows (from 1 July 1968):

Foreign Affairs: Pierre Graber (Vaud), Social Democrat.
Interior: Hanspeter Tschudi (Basel), Social Democrat.
Justice and Police: Kurt Furgler (St. Gallen), Catholic Conservative.
Military: Rudolf Gnägi (Bern), Peasant and Middle Class Party.
Finance: Nello Celio (Ticino), Radical.
Agriculture and Industry: Ernst Brugger (Zürich), Radical.
Transport, Communications and Energy: Roger Bonvin (Valais), Catholic Conservative.

Local Government. Each of the cantons and demi-cantons is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; all cantonal governments, though different in organization (membership varies from 5 to 11, and terms of office from 1 to 5 years), are based on the principle of sovereignty of the people.

In all cantons a body chosen by universal suffrage, usually called *der Grosse Rat*, or *Kantonsrat*, exercises the functions of a parliament. In all the cantonal constitutions, however, except those of the cantons which have a *Landsgemeinde*, the referendum has a place. By this principle, where it is most fully developed, as in Zürich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revisions of the constitution, must be submitted to the popular vote. In Appenzell, Glarus and Unterwalden the people exercise their powers direct in the *Landsgemeinde*, *i.e.*, the assembly in the open air of all male citizens of full age. In all the cantons the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. In most cantons there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungsstatthalter*) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons (French names given in brackets), the French in 5 (Fribourg, Vaud, Valais, Neuchâtel and Genève, for which the German names are given in brackets), the Italian in one (Ticino). In 1970, 64·9% spoke German, 18·1% French, 11·9% Italian, 0·8% Romansch and 1·4% other languages; counting only Swiss nationals, the percentages were 74·5, 20·1, 4, 1 and 0·4. On 8 July 1937 Romansch was made the fourth national language; it is spoken mostly in Graubünden.

At the end of 1970 the population figures of the principal towns (and their '*agglomérations*' or conurbations) were as follows: Zürich, 422,600 (675,100); Basel, 212,900 (373,400); Geneva, 173,600 (321,100); Bern, 162,400 (259,200); Lausanne, 137,400 (219,200); Winterthur, 92,700 (105,600); St Gallen, 80,900; Luzern, 69,900 (148,900); Biel, 64,300 (89,300); La Chaux-de-Fonds, 42,300.

The number of foreigners resident in Switzerland in 1970 was 982,887. The number of Swiss resident outside Switzerland on 31 Dec. 1970 was 164,164: in France, 32,158; West Germany, 23,417; USA, 17,861; Italy, 12,743; Canada, 10,380; UK, 8,194; Argentina, 4,245; Austria, 4,216; South Africa, 4,168; Spain, 4,164; Brazil, 3,571.

RELIGION. There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The Society of Jesus and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious order whose action is dangerous to the State, or interferes with the religious peace. The foundation of new convents or religious orders is forbidden.

According to the census of 1 Dec. 1970 Roman Catholics numbered 3,097,000 (49·4%) of the population); Protestants, 2,992,000 (47·7% and others, 181,000 (2·9%). In 1960 Protestants were in a majority in 10 of the cantons and Catholics in 12. Of the more populous cantons, Zürich, Bern, Vaud, Neuchâtel and Basel (town and land) were mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholics are under 6 Bishops, viz., of Basel (resident of Solothurn), Chur, St Gallen, Lugano, Lausanne–Geneva–Fribourg (resident at Fribourg) and Sitten (Sion), all of them immediately subject to the Holy See. The Old Catholics have a theological faculty at the university of Bern.

EDUCATION. Education is administered by the cantons. Before the year 1848 most of the cantons had organized a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory for the whole country (the school age varying in the different cantons) and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free.

In most cantons there are also secondary schools for youths of from 12 to 15, gymnasia, higher schools for girls, teachers' seminaries, commercial and administrative schools, trade schools, art schools, technical schools, schools for the instruction of girls in domestic economy and other subjects, agricultural schools, schools for horticulture, for viticulture, for arboriculture and for dairy management. There are also institutions for the blind, the deaf and dumb and feebleminded.

There are 7 universities in Switzerland. These universities are organized on the model of those of Germany, governed by a rector and a senate, and divided into 4 faculties of theology, jurisprudence, philosophy and medicine. In 1970–71 the Federal Institute of Technology at Zürich (founded in 1855) had 496 teachers and 6,776 matriculated students; the Federal Institute of Technology at Lausanne, independent of the university since 1946, had 1,455 students; the St Gall School of Economics and Social Sciences, founded in 1899, had 132 teachers and 1,597 matriculated students.

These numbers are exclusive of 'visitors', but inclusive of women students.

CINEMAS (1970). There were 586 cinemas with a seating capacity of 214,650.

NEWSPAPERS (1970). The number of daily newspapers was estimated to be 118 with a combined circulation of 2·5m.

SOCIAL INSURANCE. The Federal Insurance Law against illness and accident, of 13 June 1911, entitles all Swiss citizens to insurance against illness; foreigners may be admitted to the benefits. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled to declare insurance obligatory for certain classes or to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees. In 1969 the 840 societies insuring against illness had 5,952,600 members.

Unemployment insurance is based upon the federal law of 22 June 1951, which lays down the rules on which public or private insurance organizations have to work, and fixes the subsidies paid by the Federation to these organizations. In a number of cantons unemployment insurance is compulsory for all wage-earners with low incomes; in other cantons the regulation is left to the communes. At 30 Sept. 1970 there existed 153 public and private unemployment insurance organizations with a total membership of 537,269.

Insurance against accident is compulsory for all officials, employees and workmen of all the factories, trades, etc., which are under the federal liability law. The Swiss Accident Insurance Institution commenced operations on 1 April 1918.

On 6 July 1947 a federal law was accepted by a referendum, providing compulsory old age and widows and widowers insurance for the whole population, as from 1 Jan. 1948. In 1969 the number of normal pensioners was 837,733, the number of interim pensioners, 254,733. On 1 Jan. 1960 the old-age insurance scheme was extended to cover invalidity. In 1969, 87,784 invalids received a regular annuity and 50,438 invalids an interim annuity.

JUSTICE. The Federal Tribunal (*Bundes-Gericht*), which sits at Lausanne, consists of 26–28 members, with 11–13 supplementary judges, appointed by the Federal Assembly for 6 years and eligible for re-election; the President and Vice-President serve for 2 years and cannot be re-elected. The President has a salary of 100,000 francs a year, and the other members 90,000 francs. The Tribunal has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 8,000 francs; between parties who refer their case to it, the value in dispute being at least 20,000 francs; in such suits as the constitution or legislation of cantons places within its authority; and in many classes of railway suits. It is a court of appeal against decisions of other federal authorities, and of cantonal authorities applying federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into 4 chambers: Chamber of Accusation, Criminal Chamber (*Cour d'Assises*), Federal Penal

Court and Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid 70 francs a day when serving.

On 3 July 1938 the Swiss electorate accepted a new federal penal code, to take the place of the separate cantonal penal codes. The new code, which abolished capital punishment, came into force on 1 Jan. 1942.

By federal law of 5 Oct. 1950 several articles of the penal code concerning crime against the independence of the state have been amended with a view to reinforcing the security of the state.

FINANCE. Currency. The *franc* of 100 *Rappen* or *centimes* is the monetary unit. By law of 17 Dec. 1952, which came into force on 20 April 1953, the value of the franc was fixed at 0·20322 gramme of fine gold. On 10 May 1971 there was a revaluation to 0·21759 gramme of fine gold. The legal gold coins are 20- and 10-franc pieces; cupronickel coins are 5, 2, 1 and ½ franc, 20, 10 and 5 centimes; bronze, 2 and 1 centime.

On 31 Dec. 1969 the coin in circulation (of francs of nominal value) was as follows: 511,095 silver coins of 737·34m.; 1,530,732 nickel and cupro-nickel coins of 680·516m. and 237,307 bronze coins of 3·064m.; total, 2,155,861 coins of 1,321·28m.

Budget. Revenue and expenditure of the Confederation, in 1,000 francs, for calendar years:

	1966	*1967*	*1968*	*1969*	*1970*	*1971*

DEFENCE. There are fortifications in all entrances to the Alps and on the important passes crossing the Alps and the Jura. Large-scale destructions of bridges, tunnels and defiles are prepared for an emergency.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 50th year for soldiers and of the 55th year for officers. The first 12 years are spent in the first line, called the *Auszug*, or *Élite*, the next 10 in the *Landwehr* and 8 in the *Landsturm*. The unarmed *Hilfsdienst* comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 118 days for infantry, engineers, artillery, etc., and 132 days for cavalry. The subsequent trainings, called 'repetition courses', are 20 days

annually; but after going through 8 courses further attendance is excused for all under the rank of sergeant. The *Landwehr* men are called up for training courses of 13 days every 2 years, and the *Landsturm* men have to undergo a refresher course of 13 days.

The army is divided into 3 armoured divisions, 3 infantry divisions, 3 frontier divisions, 3 mountain divisions, 18 horse cavalry squadrons and into frontier-, fortress- and territorial brigades, organized in 4 army corps.

The administration of the Swiss Army is partly in the hands of the Cantonal authorities, who can promote officers up to the rank of captain. But the Federal Government is concerned with all general questions and makes all the higher appointments.

In peace-time the Swiss Army has no general; only in time of war the Federal Assembly in joint session of both Houses appoints a general.

The Swiss infantry are armed with the Swiss automatic rifle and with machine-guns, bazookas and mortars. The field artillery is armed with a Q.F. shielded 10·5 Bofors and field howitzers of 10·5 cm calibre. The heavy artillery is armed with guns of 10·5 cm and howitzers of 15 cm calibre. The armoured troops are equipped with the light French AMX, the British Centurion and a modern Swiss tank.

The Air Force consists of 3 regiments, made up of 21 first-line squadrons with 375 aircraft. The fighter squadrons are equipped with Mirage IIIS supersonic interceptor/ground-attack (2 squadrons), Mirage IIIRS fighter/reconnaissance (1 squadron), Venom ground-attack (13 squadrons) and Hunter interceptor (5 squadrons) aircraft. Bloodhound surface-to-air missile batteries are operational. Training aircraft are Pilatus P-2 and P-3 and Vampire; there are also a number of communications and transport aircraft and helicopters. Personnel numbers 5,000 regulars, 5,000 conscripts and 40,000 reservists.

There are 10 very small lightly armed patrol boats on Lake Constance.

AGRICULTURE. Of the total area of the country of 4,128,790 hectares, about 1,007,710 hectares (24·4%) are unproductive. Of the productive area of 3,121,090 hectares, 980,650 hectares are wooded. The agricultural area, in 1969, consisted of 260,400 hectares arable land (including vineyards), 106,751 hectares artificial meadows, 693,371 hectares permanent meadow and 1,079,630 hectares pasture land. In 1969 there were 149,306 farms with a total area of 1,079,599 hectares. The gross value of agricultural products was estimated at 3,953m. in 1966, 4,224m. in 1967, 4,195m. in 1968, 4,187m. in 1969.

In 1969, 175,315 hectares were planted with cereals, of which 98,841 hectares were wheat; rye, 11,328; barley, 31,256; potatoes, 31,528; sugar-beet, 8,520; vegetables, 6,993; tobacco, 728. Production, 1969 (in 1,000 metric tons): Wheat, 350; rye, 43; barley, 132; potatoes, 979; sugar-beet, 392; tobacco, 2·4. Milk production (in 1m. quintals): 1955, 28·3; 1960, 31·1; 1965, 31·2; 1968, 33·2; 1969, 32·1; 1970, 32.

The fruit production (in 1,000 metric tons) in 1969 was: Apples, 530; pears, 180; cherries, 44; plums, 44; apricots, 15; nuts, 7.

Wine is produced in 18 of the cantons. In 1970 Swiss vineyards (11,900 hectares) yielded 1,267,000 hectolitres of wine, valued at 278,669,000 francs.

Livestock, 1970: 49,660 horses, 292,400 sheep, 74,707 goats (1966), 1,822,700 cattle (including 869,000 cows), 1,871,000 pigs, 6·3m. poultry.

FORESTRY. Of the forest area of 962,677 hectares, 50,841 were owned by the Federation or the cantons, 630,447 by communes and 281,389 by private persons or companies in 1970. The utilization of timber, in 1970 was 3,401,852 cu. metres, of which 274,500 in state-owned, 2,354,000 in communal and 772,900 in private forests.

MINING. There are 2 salt-mining districts; that in Bex (Vaud) belongs to the canton, but is worked by a private company, and those at Schweizerhalle,

Rheinfelden and Ryburg are worked by a joint-stock company formed by the cantons interested. The output of salt of all kinds in 1970 was 333,492 metric tons. At Sargans (St Gallen) and Herznach (Aargau) iron ore and manganese ore were mined; output (in 1,000 metric tons) 1960, 125; 1965, 113. Since 1966 the mine of Gonzen (at Sargans) and since 1967 Herznach are closed.

INDUSTRIES. The chief food producing industries, based on Swiss agriculture, are the manufacture of cheese, butter, sugar and meat. The production in 1970 was (in tons): Cheese, 86,100; butter, 29,300; sugar, 53,300; meat, 330,100. There are 61 breweries, producing in 1970, 4·73m. hectolitres of beer. Tobacco products in 1970: Cigars, 757m.; cigarettes, 29,230m.

Among the other industries, the manufacture of textiles, wearing apparel and footwear, chemicals and pharmaceutical products, bricks, glass and cement, the manufacture of basic iron and steel and of other metal products, the production of machinery (including electrical machinery and scientific and optical instruments) and watch and clock making are the most important. In 1970 there were 11,954 factories with 879,889 workers. Of these 59,990 were working in textile industries, 62,809 in the manufacture of textile goods and footwear, 64,701 in chemical works, 28,324 in the manufacture of clay products, glass and glass products, cement and cement products, 120,873 in manufacture of metal products, 267,445 in the manufacture of machinery and 76,809 in watch and clock making and in the manufacture of jewellery.

Production in 1969 was: Cotton yarn pure and mixed, 40,702 metric tons; woven cotton fabrics pure and mixed, 160·9m. metres, rayon and acetate filament yarn, 11,892 metric tons; rayon and acetate staple, 200 metric tons; footwear, 13m. pairs; cement, 4,797,250 metric tons; raw aluminium, 91,490 metric tons; chocolate, 60,698 metric tons. 52,607,700 watches and clocks were exported.

POWER. In 1969–70 Switzerland had electrical power-plants with a capacity of 30m. kw., of which 3·8m. kw. were in thermo-electric plants. The total production of energy amounted to 33,173m. kwh. in 1969–70 (Oct.–Sept.); 29,330m. kwh. were generated by hydro-electric plants. Gas is manufactured in 45 gas-works. The production, in 1970, was 396m. cu. metres; coke production amounted to 189,023 metric tons, and tar production to 10,191 metric tons.

TOURISM. Tourism is an important industry. In 1970, 3,455,983 Swiss and 6,839,859 foreigners (including 628,410 British) visited Swiss holiday resorts. The tourist trade earned 1,860m. francs in 1969 and 2,060m. francs in 1970.

LABOUR. According to the census of population, 1970, the total working population amounted to about 3m., of which 7·6% were active in agriculture and forestry, 48·3% in manufacture and construction and 44·2% in services. In all non-agricultural sectors there were (1965) 248,605 establishments (including 594 being shut down) with 2,368,264 occupied persons, divided in 195,467 occupants and 2,172,797 employees. The number of apprentices among them was 137,056 (40,722 commercial, 96,334 industrial).

The main groups show the following numbers of gainfully occupied persons: Agriculture and forestry, 252,392; food processing, 128,140; textiles, 166,451, chemical industry, 57,703; metalwork, 191,783; engineering, 301,424; watch-making, 76,443; construction, 321,476; wholesale trade, 107,824; retail trade, 211,016; banking and insurance, 62,847; transport and postal services, 149,480; catering, 151,923.

In 1970 the foreign labour force with permit of temporary residence was 659,485 in Aug. 1970 and 624,425 in April 1971. Of the number recorded in Aug. 371,814 were Italians, 112,636 Spaniards, 52,975 Germans, 41,486 Frenchmen and 19,925 Austrians. 151,556 were construction workers, 125,545 metal-workers and mechanics, 100,357 housekeepers, cooks and waiters and 15,806 agricultural and forestry workers.

The Swiss Federation of Trade Unions had, in 1970, a membership of 436,669. Other organizations of employees had about 475,000 members.

COMMERCE. The special commerce, excluding gold (bullion and coins) and silver (coins), was (in 1m. Swiss francs) as follows:

	1965	*1966*	*1967*	*1968*	*1969*	*1970*
Imports	15,929	17,005	17,786	19,924	22,734	27,873
Exports	12,861	14,204	15,165	17,349	20,009	22,140

RAILWAYS. Railway history in Switzerland begins in 1847. In 1969 the length of the Swiss federal railways was 2,913 km, of which 2,897 km were electrified. The operating receipts amounted to 1,719,413,000 francs; operating expenses, 1,352,389,000 francs. Traffic was 43·3m. metric tons and 231·15m. passengers.

ROADS. There are 18,076 km of main roads, including 493 km of 'national roads' for motor cars only. There is a postal autobus service, which, in 1966, carried 35,256,000 passengers. Motor vehicles, as of 30 Sept. 1970, numbered 2,192,692, including 1,239,314 private cars, 249,615 trucks, 668,656 motor cycles, 5,542 buses and 29,565 agricultural tractors and special cars.

SHIPPING. A merchant marine was created by a decree of the Swiss Government dated 9 April 1941, the place of registry of its vessels being Basel. On 31 Dec. 1970 it consisted of 31 vessels with a total of 209,151 GRT. In 1969, 8,620,322 metric tons of goods entered and 304,504 metric tons left the port of Basel.

AVIATION. In 1970 civil aviation on domestic and international routes carried 6,857,765 passengers, 215,571 metric tons of mail, freight and luggage, and flew 140,563,000 km.

The air transport organization Swissair (founded in 1931) in 1970 flew 1,149m. ton-km, carrying 3,927,864 passengers. Swissair is a mixed enterprise with a capital of originally 14m. francs, raised to 375m. in 1970. Its fleet consisted of 39 aircraft on 31 Dec. 1970.

POST. In 1970 there were in Switzerland 4,100 post offices. There were 3,025,779 telephones, all integrated in one dial system.

Wireless communication is furnished by 3 main medium-wave stations and one short-wave station. There are 3 television studios and 100 transmitters. All stations are operated by the Federal Post, Telephone and Telegraph (PTT) services. Radio-telegraph circuits are operated by Radio Suisse SA. radio-telephone circuits by the PTT. Radio licences, 1970, 1,851,612; television licences, 1,273,893.

The total expenditure of the PTT in 1970 was 2,761m. francs, the total gross receipts 2,776m. francs.

BANKING. The National Bank, with headquarters divided between Bern and Zürich, opened on 20 June 1907. It has the exclusive right to issue bank-notes. On 31 Dec. 1970 the condition of the bank was as follows (in 1m. francs): Gold, 11,821·3; foreign exchange, 8,441·1; discounts and advances, 705·3; securities, 156; notes in circulation, 13,106; deposits, 8,391·8.

In 1969 there were 1,632 banking institutions with total assets of 166,812m. Swiss francs. They included 28 cantonal banks (43,555m. francs), 5 big banks (74,248m.), 97 mortgage banks (18,406m.), 64 other local banks (5,581m.), 108 savings banks (6,681m.), 1,197 mutual credit banks (4,417m.) and 180 other (19,505m.).

On 31 Dec. 1968 the total amount of savings deposits in Swiss banks was 33,675m. francs, with 9m. depositors.

National Bank: Bulletin mensuel.—Das schweizerische Bankwesen. Yearly. From 1920

WEIGHTS AND MEASURES. The metric system of weights and measures was made compulsory by the federal law on 3 July 1875 and since 1 Jan. 1887 only metric units have been legal. By the federal law of 24 June 1909 the international electric units were also adopted.

SYRIA

al-Jamhouriya al Arabia as-Souriya

HISTORY. For the history of Syria from 1920 to 1946 *see* THE STATESMAN'S YEAR-BOOK, 1957, pp. 1408 f. For the union with Egypt concluded on 1 Feb. 1958, *see* THE STATESMAN'S YEAR-BOOK, 1961, pp. 1527 ff. On 28 Sept. 1961 a national revolution broke out, and on 5 Oct. President Nasser acknowledged the dissolution of the union. Syria was re-admitted to the United Nations (13 Oct.) and the Arab League.

GOVERNMENT. On 8 March 1963 a National Council of Revolution seized power, probably in collusion with the revolutionary junta in Iraq and President Nasser of Egypt.

On 23 Feb. 1966 the government of President Gen. Al-Hafiz was overthrown by the 'Provisional National Leadership' of the Baath Party. They appointed Dr Nureddin al-Atassi as head of state and Dr Yussif Zeayen as prime minister.

Lieut.-Gen. Hafez al Assad seized power on 13 Nov. 1970 and formed a cabinet on 21 Nov. A provisional Constitution was published and on 16 Feb. 1971 a People's Council of 173 members was nominated by presidential decree. Lieut.-Gen. Assad was sworn in as President on 14 March 1971.

President: Lieut.-Gen. Hafez al Assad.
Foreign Affairs: Mahmoud Ayoubi.

AREA AND POPULATION. Syria is bounded by the Mediterranean and the Lebanese Republic on the west, by Israel and Jordan on the south, by Iraq on the east and by Turkey on the north. The frontier between Syria and Turkey (Nisibim-Jeziret ibn Omar) was settled by the Franco-Turkish agreement of 22 June 1929.

The administrative districts of Syria consist of the *mohafazets* of Damascus, Hama, Homs, Dera'a, Aleppo, Lattakia, Deir-ez-Zor, Sweida, Hassakeh, Raqqa, Idlib, Kunaitra and Tartous.

The area of Syria is 185,680 sq. km (71,772 sq. miles), of which 35,000 sq. km have been surveyed. The census of 20 Sept. 1960 gave a total population of 4,565,121, showing about 10% less than the estimates. Estimate (1971) 6m. The principal towns, with population in 1960, are: Damascus, 557,252; Aleppo, 425,467; Homs, 137,217; Hama, 97,390; Lattakia, 67,604; Deir-ez-Zor, 42,036.

Arabic is the official language.

RELIGION. The population is composed mainly of Moslems, of whom there were 3,286,243 in 1954. The majority are Sunni Moslems (2,702,531); there were also 15,193 Shiites and 38,106 Ismailis. The Druzes number 117,804 and the Alawites, 409,514. Christians number 489,731, of whom 172,873 are Greek Orthodox, 57,344 Greek Catholics, 111,648 Armenian Orthodox, 52,758 Syrian Orthodox, 19,889 Armenian Catholics, 14,393 Protestants, 17,010 Maronites, 20,013 Syrian Catholics, 6,880 5,570 Chaldeans, Latins, 11,348 Nestorians and 5 Assyrians. There are also 31,899 Jews and 3,095 Yezides.

EDUCATION. The Syrian University was founded in 1924, although the faculties of law and of medicine had existed previously. In 1968 the University of Damascus comprised 12 faculties and the University of Aleppo comprised 8 faculties. Students 1968 numbered 32,509 in these 2 institutions, with a teaching staff of 479.

In 1968, 4,881 primary schools had 21,228 teachers and 767,895 pupils; 641 secondary schools, 8,509 teachers and 214,516 pupils; vocational schools, 641 teachers and 5,764 pupils; teacher-training colleges, 522 teachers and 6,277 students.

NEWSPAPERS (1964). There are 2 national daily newspapers in Damascus; local dailies appear in Hama, Homs, Aleppo and Lattakia.

HEALTH. In 1968 there were 1,787 physicians and 4,887 beds in government hospitals.

FINANCE. Currency. The monetary unit is the Syrian £, divided into 100 *piastres*. The official rate of exchange, which is only applied to transactions with distributing oil companies and for calculating import statistics, is £Syr.10·75 to £ sterling and £Syr.2·19 to US$1.

In March 1968 total currency in circulation amounted to £Syr.1,278m.

Budget. The ordinary budget for the calendar year 1970 balanced at £Syr.2,780m., for 1969 at £Syr.2,200m.

A 5-year development plan for 1960/61–1964/65 incorporated many of the features in the 7-year expenditure development project of 1955 and the 10-year plan of 1958 (*see* THE STATESMAN'S YEAR-BOOK, 1958, p. 1426, and 1961, p. 1541). The total expenditure in the second 5-year plan was estimated at £Syr.4,955m. About 13·1% of the total cost was to be spent on Euphrates project, 6·2% on irrigation and land reclamation, 8·8% on agriculture, 8% on industry and mining, 12·4% on power and fuel, 18% on transport and communications, 25·8% on public utilities, 7·7% on services, etc.

DEFENCE. The post of Commander-in-Chief of the Army and the Armed Forces, abolished on 12 Sept. 1965, was re-established on 23 Feb. 1966.

On 4 Nov. 1966 a defence agreement was signed with the United Arab Republic, providing for a joint defence council and a joint military command (to be assigned to the UAR chief of staff).

On 28 April 1964 Syria abrogated the military union pact with Iraq.

Army. The Army is composed of about 75,000 trained men, the gendarmerie of 5,000, the Bedouin Control Force of about 1,000 and the civil police of 1,800. Equipment and technical advisers are being supplied increasingly by the USSR including (in 1970) 150 T-34 and 700 T-54/55s medium tanks.

Navy. The Navy includes 2 minesweepers, 3 patrol vessels, 8 missile boats and 15 torpedo boats.

Air Force. The Air Force has been re-equipped with Soviet assistance following its losses in the June 1967 war. It is believed to have about 12,000 personnel and up to 210 first-line jet combat aircraft, made up of 100 MiG-21 supersonic interceptors, 40 Su-7 supersonic fighter-bombers and 70 MiG-17 fighter-bombers. Training units have Russian Yak-18 and Yak-11 piston-engined primary and intermediate trainers. There are also transport and helicopter units.

AGRICULTURE. Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil and in cattle breeding. In 1967 the cultivated area was 3,337,914 hectares, of which 538,003 are irrigated; in 1967, 891,000 hectares were under wheat and 631,000 hectares under barley. The total cultivable area is 8·63m. hectares, including 450,299 hectares of forest and 5,390,242 hectares of pasture.

The Agrarian Reform Law of 1958, as modified by 1963, allows proprietors a maximum of 15–50 hectares of irrigated land and 80 hectares of uncultivated land, taking into account irrigation possibilities, rainfall, size of families, etc.

Yield of principal crops, 1968 (in 1,000 metric tons): Wheat, 600; barley, 512; olives, 112; tobacco, 8·5; lentils, 48·3; millet, 37·4: sugar-beet, 166.

Area under cotton, 1968, 288,400 hectares; crop (1970–71) ginned, 149,000 metric tons.

Livestock, 1968: 4,847,000 sheep, 779,000 goats, 6,400 camels, 63,000 horses, 273,000 cattle, 235,000 asses, 65,000 mules.

MINING. Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. Search for petroleum in the Lattakia and Deir ez Zor regions continues. A branch of the Iraq Petroleum Company's oil pipeline from Kirkuk crosses Syria between Makaleb in the east and Nahr el Kebir valley in the west. The Iraq Petroleum Company has constructed a new pipeline from Kirkuk to the small fishing port of Banias (south of Lattakia), which came into use in April 1952; the Trans-Arabian Pipeline Company's line to Sidon crosses southern Syria. Another pipeline is being constructed from the Karachouk oilfield *via* Homs to the port of Tartous.

On 8 Dec. 1955 the Syrian Parliament ratified a Supplemental Convention concluded with the Iraq Petroleum Company. By the terms of the Convention, Syria will receive an annual payment of approximately £6·5m. sterling as transit dues and a sum of £8·5m. in settlement of claims for back payment. Oil has been discovered in the Jezirah region. Crude oil production (1970), 5m. bbls.

Phosphate deposits have been discovered at two places near al-Shargiya. Production will begin in 1972. There are indications of ead, copper, antimony, nickel, chrome; gypsum is widely distributed. Manganese ore was mined before 1914. Sodium chloride and bitumen deposits are being worked. There is abundance of good calcareous building stone and basalt. Deposits of natural gas have been discovered in the Jezirah.

INDUSTRY. The most important industries are flour, oils, soap, cement, tanning, tobacco, textiles, knitwear, glassware, spinning, sugar, margarine, hosiery, footwear and brassware. Limited nationalization of certain basic industries was decreed in March 1963. On 3 Jan. 1965, 22 companies were completely nationalized, the owners of 61 companies were allowed to keep a quarter share and those of 24 companies to retain a tenth of their property.

Industrial production in 1968 included (in 1,000 metric tons): Cement, 91·7; sugar, 83; cotton yarn, 17; vegetable oil, 22·9; woollen fabrics, 1,440; manufactured tobacco, 4; salt, 29·7; cottoncake, 94. In addition, 1·9m. pairs of shoes were manufactured and 8,979 refrigerators assembled.

COMMERCE. In April 1965 a state trading company (SIMEX) was set up to handle the nationalized imports and exports.

Trade in calendar years in £Syr.1m. was as follows:

	1963	*1964*	*1965*	*1966*	*1967*	*1968*
Imports	896·0	898	812	1,103	1,099	1,193
Exports	720·9	673	644	661	591	673

In 1967 both imports and exports of Syria declined and the trade deficit improved slightly. Imports fell by 9%, to £Syr.1,009m., and exports dropped by 11%, to £Syr.591m. The trade deficit, at £Syr.418m., was £Syr.24m. smaller than in 1966.

Total trade of Syria with UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	1,037	479	494	1,235	489	757
Exports and re-exports from UK	7,004	5,282	5,021	7,183	5,995	7,409

SHIPPING. Following the separation of Syria from the common customs union with the Lebanon in March 1950, Syria has made improvements at Lattakia Port and issued regulations providing for the transit through that port of much of Syria's imports and the bulk of her exports. The amount of cargo discharged there in 1968 was 14,349,632 NRT and the amount loaded 14,287,758 NRT. A deep water harbour at Lattakia is being built by a Yugoslav firm. Tartous remains a fishing port and Banias is used as an oil terminal and loading port by the Iraq Petroleum Co., Ltd.

RAILWAYS. In Syria the following railways are open (in addition to those listed under LEBANON (p. 1125): Standard gauge from Aleppo to Meidan-Ekbes (Turkish frontier), 72 miles; Aleppo to Tel-Kotchek (Iraq frontier), 325 miles; narrow gauge from Damascus to El Hammé, 120 miles; Damascus to Dera'a (Jordan frontier) 80 miles. Two lines have recently been constructed: a standard gauge from Akari to Tartous, 42 km, and from Aleppo to Tabka, 148 km, which is part of the Al-Jezirah to Lattakia line.

ROADS. In 1968 there were 6,936 km of asphalted roads, 1,184 km of paved non-asphalted road and 1,184 km of levelled roads. The first-class roads are capable of carrying all types of modern motor transport and are usable all the year round, while the second-class roads are usable during the dry season only, *i.e.*, for about 9 months. The Nairn Transport Company operate a trans-desert pullman motor coach service between Damascus and Baghdad. The motor vehicles registered at the end of 1968 totalled 49,998, including 6,102 motor cycles, 1,557 buses, 27,999 cars and 8,926 goods vehicles.

POST. An automatic telephone system has been installed in Damascus, Aleppo, Homs, Hama and Lattakia. Number of telephones (1971), 114,590; of these, nearly 49,768 were in Damascus and 23,042 in Aleppo.

BANKING. The Central Bank has the sole right of issuing currency. Other banks were nationalized in March 1963, namely, the Omaya Bank and its subsidiary, the Popular Mortgage Bank; the Orient Arab Bank; the Bank of Syria and Overseas; the Agricultural Bank; the Arab World Bank.

WEIGHTS AND MEASURES. A decree dated 22 Aug. 1935 makes the use of the metric system legal and obligatory throughout the whole of the country. In outlying districts the former weights and measures may still be in use. They are: 1 *okiya* = 0·47 lb.; 6 *okiyas* = 1 *oke* = 2·82 lb.; 2 *okes* = 1 *rottol* = 5·64 lb.; 200 *okes* = 1 *kantar*.

THAILAND

Prades Thai, or Muang-Thai

On 24 June 1939 the President of the Council of Ministers issued a declaration that the name of the country, hitherto known as Siam, should henceforward be Thailand, and of the people and nationality, Thai.

REIGNING KING. Bhumibol Adulyadej, born 5 Dec. 1927, younger brother of King Ananda Mahidol, who died on 9 June 1946. King Bhumibol married on 28 April 1950 Princess Sirikit, and was crowned 5 May 1950. Children: Princess Ubol Ratana (born 5 April 1951), Prince Vajiralongkorn (born 28 July 1952), Princess Sirindhorn (born 2 April 1955), Princess Chulabhorn (born 4 July 1957).

AREA AND POPULATION. The area of Thailand is 514,000 sq. km (198,250 sq. miles).

The census taken on 1 April 1970 (preliminary figures) gave a population of 34,152,000 (17,002,000 males, 17·15m. females), of whom 30·4% lived in the Central region, 35·2% in the North-east region, 12·5% in the South region, 21·9% in the North region. Of the 1960 population, 1·6% were Chinese.

Bangkok is the capital (metropolitan population 1960, 2·3m.; city population (31 May 1968), 2·04m.). Other important towns are Thonburi (540,300) and Chiengmai (66,000).

CONSTITUTION AND GOVERNMENT. Until 24 June 1932 Siam was an absolute monarchy. On that date a *coup d'état* was effected and a Provisional Constitution Act was promulgated on 27 June. This was replaced by the constitution of 10 Dec. 1932, which in turn was superseded by new constitutions on 10 May 1946 and 23 March 1949, decreed by the leaders of successive *coups d'état* in 1947, 1951, 1957 and 1958.

An interim constitution was decreed on 28 Jan. 1959. It provided for the appointment by the Government of a constituent assembly of 240 members to draft a permanent constitution; this was promulgated in June 1968. According to this, the sovereign power emanates from the Thai people and is exercised by the King through Parliament, the Council of Ministers and the courts of law. The rights and freedoms of the people in religious belief, properties, speech, writing, publication, education and peaceful assembly are recognized and guaranteed. Parliament is to be composed of a Senate and a House of Representatives. Senators are appointed by the King; their number shall be equal to three-fourths of the total membership in the House of Representatives, who are elected on the basis of one member per 150,000 population in each province. Membership in the Senate lasts 6 years and that in the House of Representatives 4 years. The King appoints the Prime Minister and 15–30 other Ministers of State, who may not be members of either House and who must be collectively responsible to Parliament.

The first general election for the members of the House of Representatives under the new constitution was held on 10 Feb. 1969. There were 219 seats and the Government-support-party, the Saha Pracha Thai (United Thai People) gained 75 seats, the Prachatipat (Democrats) 57, Independents 72 and other minor parties 15.

On 11 March 1969 the King appointed Field Marshal Thanom Kittikachorn as prime minister and minister of defence.

Minister for Foreign Affairs: Dr Thanat Khoman.

National flag: Red, white, blue, white, red (horizontal, the blue band being twice as wide as the white or red ones).

LOCAL GOVERNMENT. For purposes of administration Thailand is divided into 71 provinces (*changwads*), each under the control of a *changwad* governor. The *changwads* are subdivided into 509 districts (*amphurs*) and 27 sub-districts (*king amphurs*), 5,036 communes (*tambons*) and 44,606 villages (*moobans*). Local legislative and executive bodies with limited powers are being established with functions, procedure and method of election closely modelled on those of the central Assembly.

RELIGION. The prevailing religion is Buddhism. In 1960 there were 24,563,523 Buddhists, 1,025,569 Moslems, 150,053 Christians, 461,317 Confucianists, 3,483 Hindus, 35,238 others and 13,979 professing no religion.

EDUCATION. Primary education is compulsory for children between the ages of 7–14 and free in local and municipal schools. In 1968 there were 69 kindergartens with 906 teachers and 22,624 pupils; 25,887 primary schools with 126,831 teachers and 4,408,194 pupils; 464 secondary schools with 10,370 teachers

and 187,659 pupils (not including private schools); 35 teachers' training colleges with 2,293 teachers and 31,580 students. In 1970 there were 9 universities: Chulalongkorn University (1917), Thammasat University (1934), Universities of Medical Science, Agriculture and Fine Arts; Ramkamhaeng University (1971); all in Bangkok; Chiengmai University (1964), the University of the North-East in Khon Kan (1966), and Prince of Songkhla University (1968) in the South. There were also 201 vocational schools with together 5,768 teachers and 63,922 students.

The literacy of the population 10 years of age and over was 70·8% in 1960 (53·7% in 1947).

CINEMAS (1967). There were 414 cinemas with a seating capacity of 152,700.

NEWSPAPERS. There are 18 daily newspapers in Bangkok, including 3 in English and 5 in Chinese, with a combined circulation of more than 500,000. There are 37 weekly papers in the provinces.

HEALTH. In 1970 there were 297 general hospitals, including 9 mental hospitals, with together 25,142 beds. There were also 157 health centres and 94 private maternity clinics. In 1965 there were 4,323 physicians, 414 dentists and 1,294 pharmacists.

JUSTICE. The judicial power is exercised in the name of the King, by (*a*) courts of first instance, (*b*) the court of appeal (*Uthorn*) and (*c*) the Supreme Court (*Dika*). The King appoints, transfers and dismisses judges, who are independent in conducting trials and giving judgement in accordance with the law.

Courts of first instance are subdivided into 20 magistrates' courts (*Kwaeng*) with limited civil and minor criminal jurisdiction; 85 provincial courts (*Changwad*) with unlimited civil and criminal jurisdiction; the criminal and civil courts with exclusive jurisdiction in Bangkok and Thonburi; the central juvenile court for persons under 18 years of age in Bangkok and Thonburi.

The court of appeal exercises appellate jurisdiction in civil and criminal cases from all courts of first instance. From it appeals lie to Dika Court on any point of law and, in certain cases, on questions of fact.

The Supreme Court is the supreme tribunal of the land. Besides its normal appellate jurisdiction in civil and criminal matters, it has semi-original jurisdiction over general election petitions. The decisions of Dika Court are final. Every person has the right to present a petition to the Government who will deal with all matters of grievance.

FINANCE. Currency. The unit of currency is the *baht*, formerly called in English the *tical*, which is divided into 100 *satang*. Silver coins have gone out of circulation. Only nickel, copper, tin and bronze coins are now minted, in denominations of 1 *baht*, 50, 25, 10 and 5 *satang*. Currency notes, first issued in 1902, now comprise 5, 10, 20, 100 *baht* notes.

In March 1971 the total amount of coins in circulation was 709m. baht and 14,161m. baht of notes.

The currency law is based on the Currency Act of Aug., B.E. 2501 (1958). The 1971 rate of exchange is about 50·4 baht to £1 and 21 baht to US$1.

Budget. Revenue and expenditure in 1m. baht (fiscal years, Oct.–Sept.):

Budget(actual)	*1965–66*[2]	*1966–67*[2]	*1967–68*[2]	*1968–69*[1]	*1969–70*[1]	1970–71[1]
Revenue	12,524	13,321	16,259	17,529	19,020	21,800
Expenditure[1]	15,050	17,940	21,130	23,324	27,299	28,645

[1] Includes both current and capital expenditure. [2] Estimates.

Ordinary expenditures in 1971 (in 1m. baht) provided 5,381 for defence; 1,227 for general administration; 7,732 for economic services, 3,384 for social services, 5,191 for education.

Revenue in 1970–71 derived from taxes and duties, 19,660; sales and charges, 431; government enterprises, 569.

In March 1971 the national internal debt was 21,090·8m. baht. External debt in Feb. 1971 totalled 3,689·4m. baht, including US$129·3m. and DM 99m.

DEFENCE. Under the Ministry of Defence Organization Act of 1960 the Ministry of Defence has assumed the Supreme Command and the control of the Army, Navy and Air Force with the advice of the Defence Council headed by the Minister of Defence. The National Defence College, the Armed Forces Staff College and the Military Preparatory School serve the education of officers. Each service has its own C.-in-C., service council, schools of arms and Command and General Staff College.

Under the Military Service Act of 1954 every able-bodied man between the ages of 21 and 30 is liable to serve 2 years with the colours; 7 years in the first reserve; 10 years in the second reserve; 6 years in the third reserve.

Army. The Army is organized in 3 infantry divisions and 1 separate regimental combat team. Peace-time strength is 110,000.

Navy. In 1971 the Navy included 1 destroyer escort, 4 frigates, 1 escort minesweeper, 1 survey ship, 2 coastal minelayers, 4 coastal minesweepers, 17 patrol vessels, 15 patrol boats, 7 landing ships, 9 landing craft, 2 transports, 4 oilers, 2 water carriers and 2 tugs. Naval personnel totalled 2,000 officers and 13,000 men. The Marine Corps numbered 400 officers and 6,000 men. There is a Royal Naval Academy at Paknam.

There is a small naval air arm, equipped with obsolescent piston-engined Firefly reconnaissance-fighters and Helldiver bombers.

At the mouth of the Chao Praya River are the Paknam forts. The naval dockyard has been reconstructed; a large new graving dock is under consideration.

Air Force. The Royal Thai Air Force has been reorganized with the assistance of a US Military Air Advisory Group. It has 6 combat wings (each 1–3 squadrons of 16 aircraft), equipped with single squadrons of F-5A/B and F-86F and F-86L Sabre jet fighter-bombers and 6 squadrons of T-28D and T-6 armed piston-engined aircraft (being supplemented by 16 OV-10C Broncos) for security duties. There are also RT-33A jet reconnaissance aircraft, transport units equipped with HS 748, C-123 Provider, Caribou, C-54, C-47 and C-45 aircraft, training units with Chipmunk primary, T-6 and T-37 intermediate and T-33A advanced trainers, and helicopters for assault and rescue duties. First-line strength is about 140 aircraft. Total strength is about 23,000 officers and men and 250 aircraft.

PRODUCTION. A National Economic Council, responsible for planning, was set up by parliament in 1950. This was in 1959 replaced by a new office of the National Economic Development Board.

According to the 1960 census, 82·3% of the economically active population 11 years of age and over (13,772,104 persons) were engaged in agriculture, forestry, hunting and fishing, and 3·4% in manufacturing.

AGRICULTURE. The chief produce of the country is rice, which forms the national food and the staple article of export. The area under paddy is about 18m. acres. With the completion of the Chao Phya dam located near Chai-nat in 1957 the irrigable area in the Central Plain had by 1962 been extended to about 8,409,000 Rai (3,363,600 acres). Additional projects now under construction will bring the irrigable lands to the total of about 11,605,900 Rai (4,642,360 acres). Tank irrigation projects which were designed to ensure water supply for upland crop cultivation, especially in the north-eastern part, irrigate 325,418 Rai (130,167 acres).

Output of the major crops in 1969 was (in 1,000 metric tons): Paddy, 13,346; maize, 1,407; sugar-cane, 3,847; coconuts, 1,111·2; groundnuts, 180·5; cotton, 128·3; kenaf, 388·7; tobacco, 71·1; sesame, 22; castor beans, 42·6.

Livestock, 1967 (in 1,000 heads): Elephants, 11·5; horses, 181; buffaloes, 7,061; cattle, 5,172; swine, 4,143; fowl, 45,589.

FORESTRY. About 60% of the land area of Thailand is under forest. In the north, mixed deciduous forests with teak (*Tectona grandis, Linn.*), growing in mixture with several other species, predominate. In the north-eastern section hardwood of the *Dipterocarpus* species, especially *Shorea obtusa* and *Pentacme Siamensis, Kurz* exist in most parts. In all other regions of the country tropical evergreen forests are found, with the well-known timber of commerce, Yang (*Dipterocarpus alatus, Roxb* and *Dipterocarpus* spp.) as the outstanding crops. Most of the teak timber exploited in northern Thailand is floated down to Bangkok. Some of them, however, are exported through the Salween into Burma.

About one-third of the teak-forest area is being exploited by the Forest Industry Organization, and the remaining two-thirds is to be worked by timber company lessees and other private enterprises.

Output of main foresty products in 1969 was (in 1,000 cu. metres): Teak, 296·4; yang, 470·6; other woods, 1,606·5; firewood, 875·8; charcoal, 440·8.

Rubber production (in 1,000 metric tons), 1955, 133·3; 1960, 170·8; 1965, 217; 1966, 220; 1967, 219; 1968, 259; 1969, 281·8.

FISHERY. In 1969 the catch of sea fish was 1·28m. metric tons and of fresh-water fish, 92,000 metric tons.

MINING. The mineral resources are extensive and varied, including cassiterite (tin ore), wolfram, scheelite, antimony, coal, copper, gold, iron, lead, manganese, molybdenum, rubies, sapphires, silver, zinc and zircons. By far the most important are tin and wolfram. Ore output in 1970 (in metric tons): Tin, 29,731; wolfram, 1,378; lead, 3,034; antimony, 5,544; manganese, 23,868; iron, 22,523; fluorite, 406,639; gypsum, 144,250; lignite, 399,871.

INDUSTRY. Production of manufactured goods in 1970 included 2·6m. metric tons of cement, 406,639 metric tons of sugar, 52·7m. gunny bags, 30,876 metric tons of paper, 15,291 metric tons of tobacco, 3·88m. kilolitres of petroleum products.

TOURISM. In 1970 about 485,366 foreigners visited Thailand, including 159,216 from USA and 36,977 from UK.

TRADE UNIONS. The Thai National Trade Union Congress is a member of the International Confederation of Free Trade Unions.

COMMERCE. The foreign trade (in 1m. baht) was as follows:

	1964	*1965*	*1966*	*1967*	*1968*	*1969*
Imports (c.i.f.)	14,253·4	15,433	18,504	22,188	24,103	26.248
Exports (f.o.b.)	12,339·2	12,941	14,099	14,166	13,679	14,792

Distribution of trade by countries in 1968 (in 1m. baht):

	Imports (c.i.f.)	Exports (f.o.b.)		Imports (c.i.f.)	Exports (f.o.b.)
Japan	8,274	2,874	UK	1,673	435
Hong Kong	428	921	West Germany	2,021	621
Indonesia	178	181	Netherlands	456	967
Malaysia	204	1,038	Italy	592	191
Singapore	282	1,181	France	400	129
USA	4,512	1,789	Taiwan	579	515

In 1968 the main items of imports were (in 1m. baht): Motor vehicles, 1,871 (1966); iron and steel, 1,303; industrial machinery, 1,526 (1966); petroleum products, 1,992; electric machinery, 402.

In 1968 exports of rice were 1·07m. metric tons (3,775m. baht); rubber, 252,220 metric tons (1,816m. baht); maize, 1·48m. metric tons (1,556m. baht); tin, 24,017 metric tons (1,510m. baht); teak, 29,446 cu. metres (169m. baht); jute and kenaf, 289,478 metric tons (674m. baht); tapioca products, (888,854 metric tons (772m. baht).

Total trade between Thailand and UK (British Board of Trade returns) in £1,000 sterling:

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	5,363	5,889	5,705	5,509	6,705
Exports and re-exports from UK	22,269	28,285	30,976	32,112	32,104

SHIPPING. In 1969, 1,685 vessels of 6,986,571 NRT entered and 1,732 of 4,914,197 NRT cleared the port of Bangkok.

The port of Bangkok, about 30 km from the mouth of the Chao Phya River, is capable of berthing ocean-going vessels of 10,000 gross tons and 28 ft draught. Bangkok is now a port of entry for Laos, and goods arriving in transit are sent up by rail to Nong Khai and ferried across the river Mekhong to Vientiane.

In 1965 there were 3 Thai steamship companies: Thai Navigation Co. Ltd (4 vessels); Thai Maritime Navigation Co. Ltd (3 vessels); Thai Lines Ltd (10 vessels). There are also 40 foreign steamship lines serving the port.

RAILWAYS. In 1969 there were 3,765 km of state railways open to traffic.

The nothern line runs from Bangkok to Chieng Mai (741 km), the extreme northern terminus. The southern line (990 km) runs from Bangkok down the Peninsula to the frontier station of Padang Besar, where it connects with the Malayan railway from Penang, and to Singapore. Another line (214 km) branching off from Haad Yai on the southern line runs along the east coast of the peninsula to Su-gnai Kolok, where it connects with the Malayan railway line. There are branch lines (totalling 190 km) to Song Khla, Nakon-Sithammrat, Kan Tang and Tha-Kanon. The extensions of the north-eastern line (264 km) from Nakhon Ratsima (Korat) to Nong Khai (360 km) and from Kaeng Koi to Buayai (250 km) have been completed. The Nakhon Ratsima–Ubol line (311 km) has been completed as far as Ubol Rat Thani. The eastern line (255 km) runs from Makkasan to Aran Pradet on the Cambodian frontier. The northern and southern railway systems are linked by a railway bridge over the Menam Chao Phya, and both systems terminate in Bangkok. All state railways are under one management. Gross receipts of the state railways in 1968–69 were 903·3m. baht and expenditure of 843·2m. baht.

ROADS. In 1969 the length of highways and provincial roads open to traffic was 15,612 km, of which 8,735 km were concrete or asphalt-surfaced. Motor vehicles registered in 1968 included 145,105 passenger cars, 118,061 buses and lorries, 159,168 motor cycles.

AVIATION. Thai Airways Co. Ltd (TAC), established in 1947, is the sole Thai air transport enterprise, with authorized capital of 300m. baht. The Company operates 11 domestic routes and 3 international routes. On 24 Aug 1959 Thai Airways and the Scandinavian Airlines System set up a new company, Thai International Airways, to operate the international air services from Thailand. A new private airline, the Air-Siam Air Co., inaugurated its services in 1969, flying freight and also a twice-weekly passenger service from Bangkok to Los Angeles.

During 1971 there were 33 foreign scheduled airlines operating through Bangkok: Air France, Air India, Air Vietnam, Alitalia, BOAC, Civil Air Transport, Cathay Pacific Airways Ltd, Garuda Indonesian Airways, Japan Air Lines Co. Ltd, KLM, Lufthansa, Malayan Airways Ltd, PANAM, Philippine Air Lines, Qantas Empire Airways Ltd, Royal Air Lao, SAS, Swissair, Union of Burma Airways, United Arab Airlines, Cie de Transports Aériens Intercontinentaux, Trans-World Airlines.

POST. In 1971 there were 425 post offices proper, 315 licensed and Amphur post offices and 462 railway-station post offices. In 1967, the length of telegraph lines was 21,203 km. There were, in 1971, 152,959 telephones, of which 118,809 were in Bangkok.

A ground satellite station at Sriracha, Chon Buri was completed in 1968. It provides a 24-hour service for telecommunications to all parts of the world and also receives and transmits live television programmes to and from other countries. The second station, at the same site, was opened in April 1970 and covers the Indian Ocean.

BANKING. In 1942 the Bank of Thailand was established under the Bank of Thailand Act, B.E. 2485 (1942) and began operations on 10 Dec. 1942, with the functions of a central bank. The Bank was organized on similar lines to the Bank of England, having its banking activities entirely separate from the management of the note issue. The Bank also took over the note issue previously performed by the Treasury Department of the Ministry of Finance. Although the entire capital is owned by the Government, the Bank is an independent body. Its gold and foreign-exchange reserves, at the end of May 1971, amounted to US$785m.

In Jan. 1966 the Agricultural Bank and the Provincial Bank merged in the Krung Thai Bank (capital 105m. baht, of which 80% is owned by the government).

Banks incorporated under Thai law include the Bangkok Bank Ltd, the Bangkok Bank of Commerce Ltd, the Bank of Asia for Industry & Commerce Ltd, the Bank of Ayudhya Ltd, Bangkok Metropolitan Bank Ltd, the Laem Thong Bank Ltd, the Siam City Bank Ltd, the Siam Commercial Bank Ltd, Thai Development Bank Ltd, the Thai Farmers Bank Ltd, Thai Danu Bank Ltd, the Thai Military Bank Ltd, the Union Bank of Bangkok Ltd and the Wang Lee Chan Bank Ltd. Foreign banks include the Chartered Bank, the Hongkong and Shanghai Banking Corporation, the Indian Overseas Bank Ltd, the Mercantile Bank Ltd, Banque de l'Indochine, Sze Hai Tong Bank Ltd, Bank of Canton Ltd, Bank of China Ltd, the National Handelbank N.V., Bank of America, N.T. & S.A., the Mitsui Bank Ltd and the Bank of Tokyo Ltd.

The commercial Thai banks had, in 1968, 535 branches in Thailand and 11 abroad; only Mae Hongson province has no commercial bank services. The deposits held by commercial banks in March 1968 amounted to 20,753·5m. baht.

The Government Savings Bank, which was established as an independent organization in 1947, originated in 1913 when the Government Savings Office was established.

WEIGHTS AND MEASURES. The metric system was made compulsory by a law promulgated on 17 Dec. 1923. The actual weights and measures prescribed by law are: Units of weight: 1 *standard picul* = 60 kg; 1 *standard catty* ($\frac{1}{100}$ picul) = 600 grammes; 1 *standard carat* = 20 centigrammes. Units of length: 1 *sen* = 40 metres; 1 *wah* ($\frac{1}{20}$ sen) = 2 metres; 1 *sauk* ($\frac{1}{4}$ wah) = 0·50 metre; 1 *keup* ($\frac{1}{2}$ sawk) = 0·25 metre. Units of square measure: 1 *rai* (1 sq. sen) = 1,600 sq. metres; 1 *ngan* ($\frac{1}{4}$ rai) = 400 sq. metres; 1 *sq. wah* ($\frac{1}{100}$ ngan) = 4 sq. metres. Units of capacity: 1 *standard kwien* = 2,000 litres; 1 *standard ban* ($\frac{1}{2}$ kwien) = 1,000 litres; 1 *standard sat* ($\frac{1}{50}$ ban) = 20 litres; 1 *standard tanan* ($\frac{1}{20}$ sat) = 1 litre.

Legislation passed in 1940 provided that the calendar year shall coincide with the Christian year, and that the year of the Buddhist era 2484 shall begin on 1 Jan. 1941. (The New Year's Day was previously 1 April.) The years B.E. 2512–2513 therefore correspond to A.D. 1969 and 1970.

TUNISIA

Al-Djoumhouria Attunusia

CONSTITUTION AND GOVERNMENT. Tunisia is a sovereign independent republic. The monarchy was abolished by the Constituent Assembly on 25 July 1957. The National Assembly was elected on 8 Nov. 1959 when all 90 seats were won by the Neo-Destour Socialist party.

The constitution of the republic was promulgated on 1 June 1959. The President and the National Assembly are elected simultaneously by direct universal suffrage for a period of 5 years. The President cannot be re-elected more than 3 times consecutively. An amendment to the constitution in 1969 gives the Prime Minister power to act as President in case of a sudden vacancy of the Presidency.

President of the Republic and Head of Government: Habib Bourguiba (elected 25 July 1957, re-elected 8 Nov. 1959, 8 Nov. 1964 and 2 Nov. 1969).

The Ministry consists of 15 Ministers and 6 Secretaries of State.

Prime Minister: Hedi Nouira.
Foreign Affairs: Mohamed Masmoudi. *Defence:* Hassib Ben Ammar.

By decree of 21 July 1959 the country was divided into 13 *gouvernorats*, each subdivided into *délégations*, *communes* and *cheikhats*.

The official language is Arabic.

Flag: Red with a white circle in the middle, on which is a 5-pointed red star encircled by a red crescent.

AREA AND POPULATION. The boundaries are on the north and east the Mediterranean Sea, on the west Algeria and on the south Libya. The area is about 164,150 sq. km (63,362 sq. miles), including that portion of the Sahara which is to the east of the Djerid, extending towards Ghadamès.

At the census of 3 May 1966 there were 4,457,862 inhabitants (2,267,915 males and 2,189,947 females). Estimate (1969) 4·73m.

The estimated populations of the *gouvernorats* were as follows as at 3 May 1966 (in 1,000): Tunis and suburbs (789), Bizerta (325), Béja (317), Jendouba (253), Le Kef (307), Kassérine (210), Gafsa (315), Médénine (237), Gabès (204), Sfax (424), Kairouan (277), Sousse (511), Nabeul (317).

Tunis, the capital, had, on 3 May 1966, 642,384 inhabitants; Sfax, 249,991; Bizerta, 95,023; Sousse, 82,666; Kairouan, a holy city of the Moslems, 82,299; Gabès, 76,356; Béja, 72,034; Djerba, 65,533; Médenine, 39,218; Hammam-Lif, 22,161.

VITAL STATISTICS (1969). Births, 194,940; deaths, 52,872; marriages, 33,764.

RELIGION. The constitution recognizes Islam as the state religion. There are about 20,000 Roman Catholics, under the Archbishop of Carthage. The Greek Church, the French Protestants and the English Church are also represented.

EDUCATION. All education was in 1956 made dependent on the Ministry of National Education. The 208 independent koranic schools have been nationalized and the distinction between religious and public schools has been abolished. All education is free from primary schools to university. A teachers' training college (*école normale supérieure*) was established in 1955. There are also a high school of law, a centre of economic studies, a school of engineering, 1 medical school, a faculty of agriculture and an institute of business administration.

In 1970–71 primary schools had 964,206 pupils; secondary, technical and vocational schools had 183,928 pupils; higher education mainly at the University of Tunis had 14,050 students.

CINEMAS (1968). There were 108 cinemas with a seating capacity of 41,895.

NEWSPAPERS. There are 2 Arabic and 2 French daily newspapers.

SOCIAL WELFARE. In 1970 there were 89 hospitals (12,654 beds). The registered medical personnel in Tunisia comprised 864 doctors (374 Tunisians and 490 foreigners), 233 pharmacists, 65 dentists and 42 veterinaries. A system of social security was set up in 1950 (amended 1963, 1964 and 1970).

JUSTICE. The Government has abolished the multiple jurisdictions of religious (shara'ic and rabbinic) tribunals. These have been integrated into the civil courts so as to form a single three-level jurisdiction (courts of primary jurisdiction, courts of appeal and the High Court).

A Personal Status Code was promulgated on 13 Aug. 1956 and applied to Tunisians from 1 Jan. 1957. This raised the status of women, made divorce subject to a court decision, abolished polygamy and decreed a minimum marriage age.

FINANCE. Currency. On 1 Nov. 1958 a new currency, the *dinar*, divided into 1,000 *millimes*, was established. The *dinar* equals £0·80; US$1 = 520 *millimes*. The Central Bank of Tunisia is the note-issuing agency. Note circulation, 31 Dec. 1996, was 182·2m. *dinars*.

The issue consists of coins of 1, 2, 10, 20, 50 and 100 *millimes*, and notes of 500 *millimes*, 1 *dinar*, 5 and 10 *dinars*.

Budget (in 1,000 dinars). Ordinary receipts and expenditure for calendar years balanced as follows: 1964, 68,300; 1965, 86,000. Budget estimates, 1966, revenue, 100,500; expenditure, 135,500. The budget for 1967 balanced at 108,100; 1968, 124,000; 1969, 130,000; 1970, 146,500; 1971, 154,000.

DEFENCE. A Tunisian National Army was created in 1956. It consisted in 1971 of about 20,000 officers and men. Selective military service is 1 year. Officer-cadets are being trained in France. Defence expenditure in 1971 was 10·5m. dinars.

The army consists of 7 infantry battalions, 1 mixed squadron (including M.41 tanks) and 1 artillery group.

The navy consists of 1 corvette, 3 patrol vessels, 10 patrol boats and a tug.

The air force has a single squadron of 12 F-86 jet fighters, 14 Saab-91D Safir primary trainers, delivered by Sweden in 1960–61, 12 T-6 Texan advanced trainers, supplied by France in 1963, 8 Italian-built M.B. 326 armed jet trainers, of which delivery began in 1965, 12 French-built Alouette II/III helicopters and 3 Flamant light transports.

PLANNING. A 4-year development plan, 1956–68, was approved by parliament 28 May 1965. It envisaged an annual average rate of growth of 6·5% and investments amounting to 455m. dinars, of which 280m. was to be financed by domestic savings and the rest by foreign aid.

AGRICULTURE. Tunisia may be divided into 5 districts—the north, characterized by its mountainous formation, having large and fertile valleys (*e.g.*, the

valley of the Medjerdah and the plains of Mornag, Mateur and Béja); the north-east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons and tangerines; the Sahel, where olive trees abound; the centre, the region of high table lands and pastures, and the desert of the south, famous for its oases and gardens, where dates grow in profusion.

The chief industry is agriculture, and large estates predominate. Of the total area of 15,583,000 hectares, about 9m. hectares are productive, including 2m. under cereals, 3·6m. used as pasturage, 900,000 forests and 1·3m. uncultivated.

MINING. Mineral production (in 1,000 metric tons) in 1969 (and 1970): Phosphate, 2,600 (3,021); iron ore, 950 (744); lead ore, 38 (36); zinc ore, 17 (21).

Processed minerals (in 1,000 metric tons) in 1970: Simple superphosphates, 33·8; triple superphosphates, 382; hyperphosphates, 34·5; lead (1969), 23·9; iron ore (1969), 515.

INDUSTRY. Major modern plants include a sugar refinery in Béja (47,000 metric tons in 1965), a cellulose plant in Kassérine (19,033 metric tons in 1968), a petroleum refinery in Bizerta and a steel plant at Menzel Bourguiba which in 1966 turned out 92,000 tons of pig-iron, 25,000 tons of steel and 30,000 tons of finished products. There is a marble work plant and a tyre factory at Mégrine.

TOURISM. In 1970, 385,365 tourists visited Tunisia, not counting ships' passengers in transit.

POWER. The electricity, gas and water services, formerly run by a French company, were nationalized on 26 Nov. 1959 and are now run by the Société Tunisienne d'Electricité et du Gaz.

Electrical energy generated was 793·8m. kwh. in 1970, of which 680·1m. was produced by STEG.

TRADE UNIONS. The Union Générale des Travailleurs Tunisiens was placed under government control in Aug. 1965. There are 4 other unions.

COMMERCE. The customs union with France was repealed on 5 Sept. 1959. The imports and exports for calendar years (in 1,000 dinars) were as follows:

	1964	*1965*	*1966*	*1967*	*1968*	*1969*	*1970*
Imports	110,845	129,062	131,224	137,087	110,484	134,563	160,396
Exports	57,304	62,916	73,690	78,360	82,831	86,960	95,804

In 1969 imports totalled 1·78m. metric tons; exports totalled 4·99m. metric tons. Exports to France in 1969 totalled 23·2m. dinars, and imports from France,

45·5m. dinars. Imports from USA were valued at 21·5m. dinars in 1969 (20·9m. in 1965).

In 1969 exports of iron ore totalled 567,000 metric tons; lime phosphates, 1·8m.; hyperphosphates, 69,500.

Total trade between Tunisia and UK (British Board of Trade returns, in £1,000 sterling) was:

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	2,234	3,733	2,835	2,487	1,993
Exports and re-exports from UK	1,754	2,697	3,520	4,306	4,816

SHIPPING. The main port is Tunis, and its outer port is Tunis-Goulette. These two ports and Sfax, Sousse and Bizerta are directly accessible to ocean-going vessels. The port of La Skhirra, in the south, is used for the shipping of Algerian and Tunisian oil.

In 1970, 7,073 ships of 13,124,000 tons entered Tunisian ports.

ROADS. In 1964 there were 15,692 km of roads, of which 6,713 km were main roads.

Number of motor vehicles, 1970, included 62,280 private cars, 34,891 commercial cars, 9,808 motor cycles and 19,661 tractors.

RAILWAYS. In 1968 there were 2,298 km of railways, owned by the state Société Nationale des Chemins de Fer Tunisiens. Traffic in 1969 was 14·5m. passengers and 5·9m. metric tons of freight.

AVIATION. The national airline is 'Tunis-Air'. The main airport is at Tunis-Carthage. In 1969, 326,700 passengers arrived and 340,600 departed.

POST. There were, in 1971, 76,370 telephones, of which 32,198 were in Tunis. There were, in 1966, 381 post offices, and a wireless transmitting station. Wireless sets in use at 31 Dec. 1969 were 256,600. Television began in 1966 and in 1970 there were 93,000 sets.

BANKING. In 1966 there were 14 banks operating in Tunisia, including 3 French and 1 British banks. Bank deposits amounted to 182·2m. dinars at 31 Dec. 1969.

WEIGHTS AND MEASURES. The metric system of weights and measures has almost entirely taken the place of those of Tunisia, but corn is still sold in *kaffis* and *wibas*. The *kfiz* (of 16 *wiba*, each of 12 *sa'*) = 16 bushels. The *ounce* = 31·487 grammes; the multiples of the ounce are the various denominations of the *R'lal*, which contains from 16 to 42 oz.

The principal measure of length is the *pik*: the *pik Arbi* for linen = 0·5392 yd; the *pik Turki* for silk = 0·7058 yd; the *pik Andoulsi* for cloth = 0·7094 yd.

TURKEY

Türkiye Cumhuriyeti

HISTORY. The Turkish War of Independence (1919–22), following the disintegration of the Ottoman Empire, was led and won by Mustafa Kemal (Atatürk) on behalf of the Grand National Assembly which first met in Ankara on 23 April 1920. On 20 Jan. 1921 the Grand National Assembly voted a constitution which declared that all sovereignty belonged to the people and vested all power, both executive and legislative, in the Grand National Assembly. The name 'Ottoman Empire' was later replaced by 'Turkey'. On 1 Nov. 1922 the Grand National Assembly abolished the office of Sultan and Turkey became a republic on 29 Oct. 1923.

On 27 May 1960 the Turkish Army, directed by a National Unity Committee under the leadership of Gen. Cemal Gürsel, overthrew the government of the Democratic Party. The Grand National Assembly was dissolved and party activities were suspended. Party activities were legally resumed on 12 Jan. 1961.

CONSTITUTION AND GOVERNMENT. The constitution of 9 July 1961 has consolidated the modernizing reforms: the abolition of the Caliphate and of old-style religious education (1924), the prohibition of oriental headgear (1925), the suppression of the dervish orders (1925), the introduction of the Western civil code, ending polygamy (1926), the substitution of the Latin for the Arabic alphabet (1928), the abolition of old-style titles (1934) and the prohibition of clerical garb (1934). Religious courts were abolished in 1924, Islam ceased to be the official state religion in 1928, women were given the franchise and western-style surnames were adopted in 1934.

Thirty-five Articles of the 1961 Constitution were amended in Sept. 1971 and 9 temporary articles added.

Legislative power is vested in the Grand National Assembly, executive power in the President of the Republic and the Council of Ministers, judicial power in independent courts. The President of the Republic is elected by the National Assembly and the Senate in joint session for a 7-year term; he is not re-eligible.

Turkish men and women are entitled to vote at the age of 21 and to become deputies at the age of 30. Secret ballot was introduced by law on 10 July 1948.

Elections held on 12 Oct. 1969 resulted in the following composition of the National Assembly: Justice Party, 259; Republican People's Party, 144; Reliance Party, 15; Union Party, 8; New Turkey Party, 6; Nation Party, 6; Turkish Labour Party, 2; National Action Party (formed from former Republican Peasants Nation Party), 1; Independents, 9. Total, 450.

The Senate (150 members elected by direct vote, 15 nominated by the President of the Republic, and 18 life senators, formerly members of the National Unity Committee) is composed of: Justice Party, 93; Republican People's Party, 34; Reliance Party, 9; Nation Party, National Action Party, New Turkey Party, 1 each; Independents, 9, and vacant, 2.

National flag: A white crescent and star on red.

National anthem: Korkma! Sönmez bu şafaklarda yüzen al sancak (words by Mehmed Akif Ersoy; tune by Zeki Güngör; adopted 12 March 1921).

Past Presidents of the Republic: Mustafa Kemal Atatürk (29 Oct. 1923–10 Nov. 1938), İsmet İnönü (11 Nov. 1938–21 May 1950), Celâl Bayar (22 May 1950–27 May 1960), Cemal Gürsel (26 Oct. 1961–27 March 1966).

President of the Republic: Cevdet Sunay (elected 28 March 1966) by 461 out of 532 votes).

The Coalition Cabinet was in April 1972 constituted as follows:

Acting Prime Minister and Minister of Defence: Ferit Melen.

Ministers of State: Doğan Kitaplı, Ali İhsan Göğüş, İlyas Karaöz, İlhan Öztrak. *Justice:* Suat Bilge. *Interior:* Ferit Kubat. *Foreign Affairs:* Ümit Halûk Bayülken. *Finance:* Sait Naci Ergin. *National Education:* İsmail Arar. *Public Works:* Mukadder Öztekin. *Commerce:* Naim Talû. *Health and Social Welfare:* Dr Cevdet Aykan. *Customs and Monopolies:* Haydar Özalp. *Agriculture:* Orhan Dikmen. *Communications:* Rıfkı Danışman. *Labour:* Ali Rıza Uzuner. *Industry and Technology:* Mesut Erez. *Power and Natural Resources:* Nezih Devres. *Tourism and Information:* Erol Yılmaz Akçal. *Housing and Reconstruction:* Serbülent Bingöl. *Rural Affairs:* Necmi Sönmez. *Forests:* Selâhattin İnal. *Youth and Sports:* Adnan Karaküçük.

LOCAL GOVERNMENT. The constitution of 1921 provided for the administrative division of the country into *İl*, province (now 67 in number), divided into *İlçe* (district), sub-divided in their turn into *Bucak* (township or commune). At the head of each İl is a Vali representing the Government. Each İl has its own elective council.

The İlçe is regarded as a mere grouping of Bucaks for certain purposes of general administration. The Bucak or commune is an autonomous entity and possesses an elective council charged with the administration of such matters as are not reserved to the State.

According to the municipal law passed in 1930, Turkish women have the right to be electors and to be elected at municipal elections.

AREA AND POPULATION. The Treaty of Peace between the Allied Powers and Turkey, which was signed at Lausanne on 24 July 1923, defined the European frontier of the new Turkey and to some extent her Asiatic frontiers. This treaty was ratified by the Grand National Assembly in Ankara on 23 Aug. 1923 and entered into force 6 Aug. 1924.

The Treaty of Lausanne and the conventions attached to it provided for the

demilitarization of zones adjoining the European frontier, the Dardanelles and the Bosphorus, subject to the right to maintain a garrison at İstanbul, for the demilitarization of İmroz, Bozcaada (Tenedos) and Tavşan Islands, as well as the islands in the Sea of Marmora with one exception and for a special administrative regime in İmroz and Bozcaada.

On 10 July 1936 a new Straits Convention was signed at Montreux (ratified on 9 Nov. 1936) to take the place of the 1923 Convention, whereby Turkey obtained the right of re-militarizing the zone of the Straits, and this area was re-occupied by Turkish troops on 21 July 1936. The International Commission of the Straits ceased to function on 30 Sept. 1936.

By an agreement between the Turkish and French Governments concluded at Ankara on 23 June 1939, the Sanjak of Alexandretta (the Hatay) was incorporated in the Turkish Republic.

The area of Turkey (including lakes) is 780,576 sq. km (301,302 sq. miles). Area in Europe (Trakya), 23,721 sq. km; population, 1965, 2,655,768. Area in Asia (Anadolu), 756,855 sq. km; population, 1965, 28,735,653.

The census population of Turkey is given as follows:

	Males	Females	Total	Increase %
1927	6,563,879	7,084,391	13,648,270	—

The population of towns of over 70,000 inhabitants was as follows in 1970:

İstanbul	2,247,630	Erzurum	134,655	Antalya	95,185
Ankara	1,208,791	Samsun	134,272	Kırıkkale	91,694

Kayseri	167,696	Adapazarı	101,590	Manisa	70,022
Diyarbakir	138,657	Urfa	100,231		

The population of Turkey according to 'mother tongue' (1965 census) comprises 28,317,579 Turks, 2,180,721 Kurds, 365,971 Arabs, 57,337 Circassians, 48,143 Greeks, 32,484 Armenians, 32,334 Georgians, 23,715 Lazes and 9,124 Spanish-speaking Jews.

RELIGION. Freedom of religion is guaranteed by the constitution. Although Islam is no longer the official state religion of Turkey, Moslems form 98·92% of the population. The administration of the Moslem religious organizations is in charge of the Presidency of Religious Affairs, attached to the Prime Minister's office. Under the imperial system the non-Moslem communities were recognized as organized communities or *millets*, the heads of which exercised spiritual as well as civil functions; their authority is now purely ecclesiastical. The Turkish Republic is a secular state.

İstanbul is the seat of the Œcumenical Patriarch, who is the head of the Orthodox Church in Turkey. The Armenian Church (Gregorian) is ruled by a Patriarch in İstanbul who is subordinate to the Katholikos of Etchmiadzin, the spiritual head of all Armenians. The Armenian Apostolic Church is ruled by the Patriarch of Cilicia. The Chaldeans (Nestorian Uniats) have a Bishop at Mardin. The Syrian Uniats have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch (residence, Damascus). Greek Uniats (Byzantine Rite) have as their Ordinary in İstanbul, the Titular Bishop of Gratianopolis. The Latins have an Apostolic Delegate in İstanbul and an Archbishop in İzmir, but their Patriarch of İstanbul is titular and non-resident. There is a Grand Rabbi (Hahambaşı) in İstanbul for the Jews, who are nearly all Sephardim.

At the 1965 census there were in Turkey 31,391,421 Moslems, 73,725 Orthodox, 69,526 Gregorians, 25,833 Roman Catholics, 22,983 Protestants, 14,758 other Christians (unspecified), 18,267 Jews, 14,661 adherents of other religions, 1,212 without religion and 602 undeclared or unknown.

A law passed in Dec. 1934 forbids the wearing of clerical garb except in places of worship and during divine service. The constitution forbids the political exploitation of religion or any impairment of the secular character of the republic.

In lieu of religious formulae, all citizens take oaths on their honour.

EDUCATION. Elementary education is compulsory and co-educational and, in state schools, free. All children from 7 to 12 are to receive primary instruction, which may be given in state schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The state schools are under the direct control of the Ministry of Education. They include primary schools, secondary or middle schools, and *lycées* or secondary schools of a superior kind. There are also training schools for male and female teachers, and technical schools. There are 3 universities in İstanbul, Robert College became Bosphorus University in 1971, 3 in Ankara (including the Middle East Technical University designed to meet the technical needs of the whole Middle East), the Aegean University in İzmir, Atatürk University in Erzurum (opened in Nov. 1957) and the Black Sea Technical University in Trabzon. The important non-Moslem communities in İstanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Education.

Literacy of the population of 6 years and over was 10·6% in 1927, 19·2% in 1935, 29% in 1945, 40·9% in 1955, 39·5% in 1960, 48·7% in 1965, 49% in 1970.

Religious instruction in schools, hitherto prohibited, was made optional in elementary and middle schools in May 1948. There are many training schools for Moslem clergy as well as a Faculty of Theology in Ankara.

Statistics for 1970–71	Number	Teachers	Students

On 1 Nov. 1928 the Grand National Assembly voted a law for the adoption of Latin characters as from 1 Dec. 1928. The publication of books in Arabic characters was forbidden after 1 Jan. 1929.

NEWSPAPERS (1969). Of the 443 daily newspapers in the Turkish language 55 appear in İstanbul and 22 in Ankara. There are also 2 dailies published in Greek, 1 in French, 2 in Armenian and 1 in English.

HEALTH. Public health is the responsibility of the Ministry of Health and Social Welfare, established in 1920; social insurance for workers comes under the Workers' Insurance Institution attached to the Ministry of Labour. A law promulgated in 1961 and being implemented from 1963 provides for the nationalization of the health services within 15 years. In 1970, 1·31m. workers and employees were covered by social insurance, including free medical care.

In 1970 there were about 14,000 doctors and nearly 80,000 beds in some 746 hospitals.

The counterpart of the Red Cross in Turkey is the Red Crescent Society founded in 1877.

JUSTICE. The unified legal system consists of: (1) justices of the peace (single judges with limited but summary penal and civil jurisdiction): (2) courts of first instance (single judges, dealing with cases outside the jurisdiction of (3) and (4)); (3) central criminal courts (a president and 2 judges, dealing with cases where the crime is punishable by imprisonment over 5 years); (4) commercial courts (3 judges).

The Court of Cassation sits at Ankara.

The Council of State is the highest administration tribunal; it consists of 5 chambers. Its 31 judges are nominated from among high-ranking personalities in politics, economy, law, the army, etc. The Military Court of Cassation in Ankara is the highest military tribunal.

The Constitutional Court, set up under the constitution, can review and annul legislation and try the President of the Republic, Ministers and senior judges. It consists of 15 regular and 5 alternate members.

The Civil Code and the Code of Obligations have been adapted from the corresponding Swiss codes. The Penal Code is largely based upon the Italian Penal Code, and the Code of Civil Procedure closely resembles that of the Canton of Neuchâtel. The Commercial Code is based on the German.

FINANCE. Currency. The Turkish *Lira* (TL) is divided into 100 *kuruş* (*piastres*). Coins in general circulation are of the following values: 5, 10, 25 and 50 *kuruş*; 1 and 2½ *Lira*. Bank-notes in circulation are as follows: 5, 10, 20, 50, 100, 500 and 1,000 *Lira*.

The value of the Turkish Lira is 36 to £1 and 14 to US$1. The Turkish Lira was devalued by 66·6% on 10 Aug. 1970.

Budget. Estimates of revenue and expenditure (in TL1,000) for financial years 1 March–28/29 Feb.:

	1966–67	*1967–68*	*1968–69*[1]	*1969–70*[1]	*1970–71*[1]
Revenue	15,583,000	18,601,321	20,712,211	24,497,364	36,292,900
Expenditure	16,475,702	18,322,015	21,612,211	25,696,976	37,092,900

[1] Estimates.

The excess of expenditure over revenue is to be met through internal loans and administrative savings during the financial year.

In June 1971 the public debt (excluding interest) totalled TL29,400m. and US$2,109m. The internal debt was TL25,285m.

DEFENCE. Several bills for the reorganization of the armed forces were passed in June 1949 by the Grand National Assembly. One of these placed all organizations connected with national defence under the authority of the Minister of National Defence. Another created a Supreme Council of National Security, under the chairmanship of the Prime Minister, with the object of co-ordinating the resources of the country in case of war. Besides the Minister of National Defence and the Chief of the General Staff, the heads of economic Ministries are members of this council.

Military service in Army, Air Force and Navy is 18 months for officers and 20 months for other ranks. Men are called up when they reach the age of 20. The average number of men liable to be called up is 175,000 every year. The strength of the forces is about 514,000 officers and men. The total number that could be mobilized is estimated at over 2m.

Army. The land forces contain 13 infantry divisions (1 mechanized), 1 armoured division and 4 armoured brigades (M-48 tanks), 1 armoured cavalry brigade, 3 mechanized infantry brigades, 2 parachute battalions. The units are largely equipped with 10·5 cm, 15·5 cm and 20·3 cm howitzer guns. Ground forces have been assigned to the South-Eastern Command of NATO, of which İzmir is the headquarters. Total strength, 514,000; trained reservists, 450,000.

Navy. The Navy includes 10 submarines, 10 destroyers, 1 minelayer, 9 escort minesweepers, 6 coastal escorts, 6 coastal minelayers, 13 coastal minesweepers, 6 patrol vessels, 11 torpedo boats, 3 inshore minesweepers, 42 coastal craft, 2 repair ships, a large training ship (*ex*-yacht), a submarine rescue ship, 4 oilers, 6 boom defence vessels and 2 tenders.

The naval bases are at Gölcük in the Gulf of İzmit, at İskenderun and at İzmir.

Personnel strength in 1971 was 2,760 officers and 34,470 men.

Air Force. The Air Force is under the control of the General Staff and, operationally, under 6 ATAF. It is organized as 3 tactical air forces, with F-5s equipping 4 fighter-bomber, 4 interceptor and 1 reconnaissance systems; F-100 Super Sabres in 4 fighter-bomber squadrons; F-84F Thuderstreaks and RF-84F Thunderflash reconnaissance aircraft in 2 squadrons; F-104G Starfighters in 2 fighter-bomber squadrons; and 2 squadrons of *ex*-USAF Convair F-102A supersonic interceptors, plus Nike-Ajax and Nike-Hercules surface-to-air missile batteries. The transport units are equipped with Transall C-160, C-130 Hercules, C-54, C-47 and C-45 aircraft. Training types include T-33A and supersonic T-38A Talon advanced trainers, Harvard intermediate and T-34 Mentor primary trainers. Personnel strength is about 55,000, with 230 combat aircraft.

DEVELOPMENT. The first 5-year development plan, 1963–67, provided for investments of TL68,000m. (at 1965 prices); TL64,000m. were invested, the gross national product increasing at the rate of 6·7% per annum. The external financing amounted to US$1,350m.

The second 5-year plan (1968–72) sets out to achieve an annual growth of 7%; external financing amounting to US$1,716m.

AGRICULTURE. The number of people engaged in agriculture in 1967 was 9,903,000.

In 1969, 247,310 sq. km were cultivated land, 159,070 sq. km of it sown and 88,240 sq. km fallow; vineyards, fruit orchards and olive groves occupied 30,120 sq. km; forest occupied 182,730 sq. km.

The soil for the most part is very fertile; the principal products are cotton, tobacco, cereals (especially wheat), figs, silk, olives and olive oil, dried fruits, liquorice root, nuts, almonds, mohair, skins and hides, furs, wool, gums, canary seed, linseed and sesame. The principal tobacco districts are Samsun, Bafra, Çarsamba, İzmit and İzmir. Two-thirds of the exports of leaf tobacco goes to the USA. The principal centre for silk production is Bursa. The production of olive oil, mainly confined to the Ils of Aydın and Balıkesir, is very important (160,000 metric tons in 1968). Sugar production (refined) in 1970 was 517,000 metric tons. Agricultural production (in metric tons) in 1970 included 3·6m. grapes, 50,000 figs, 567,000 oranges and lemons, 250,000 hazelnuts, 620,000 apples (1969), 680,000 olives, 585,000 onions (1969), 1·93m. potatoes (1969).

Turkey produced 3,900 metric tons of flax fibre and 7,000 tons of hemp fibre in 1967. Cotton production in 1970 was 407,000 metric tons. Agricultural tractors numbered 94,407 in 1969.

Area (in 1,000 hectares) and yield (in 1,000 metric tons) of principal crops:

	1964		*1966*	*1968*	*1970*
	Area	*Yield*	*Yield*	*Yield*	*Yield*
Wheat	7,870	8,400	9,715	9,520	10,000

On 7 June 1945 the Grand National Assembly passed the Land Reform Bill under which large tracts of agricultural land are being distributed to peasants without land or with insufficient for their subsistence.

Livestock, 1969, 36,351,000 sheep, 15·3m. ordinary goats, 4,931,000 Angora goats, 13·1m. cattle, 1,938,000 asses, 1·1m. horses, 1·18m. buffaloes.

In 1969 Turkey produced 47,000 metric tons of wool and 8,000 tons of mohair.

FORESTRY. On 8 Feb. 1937 a new forest law was voted, providing for state control of all forests, including those under private ownership. It contains measures for planting, protection against fire, marauders and insects, and lays down penalties for infringements of its clauses. The most wooded Ils are Kastamonu, Aydın, Bursa, Bolu, Trabzon, Konya and Balıkesir. Of the forest land, 10,417,560 hectares, belonged to the State in 1951. In 1969 (provisional) total forest land was 18·27m. hectares. In 1967 the value of forest products was TL1,497m.

FISHING. On 25 Aug. 1964 Turkey extended her waters in which she has exclusive fishing rights to 12 nautical miles.

MINING. The Turkish provinces, especially those in Asia, are reported rich in minerals. Turkey is one of the four principal producers of chrome in the world.

Production of principal minerals (in 1,000 metric tons) was:

	1965	*1966*	*1967*	*1968*	*1969*
Coal (S and P)	7,006	4,889 (S)	7,457	4,769	4,684

(S) State; (P) Private enterprise.

Production of bauxite started in 1966 with 32,000 tons.

Of the Government organizations producing these ores, Zonguldak coal mines operates under the Turkish State Coal Exploitation; while the copper mines at Murgul and Ergani, the Eastern chromite mines, Keçiborlu sulphur, Emet colemanite, Küre pyrite and cupriferous pyrite, Keban argentiferous lead mines operate under the Etibank.

Oil is being produced in Garzan and Raman by the Turkish Petroleum Company. Under the oil law of 14 Oct. 1954 private companies can explore and produce oil. Three private companies (2 of them foreign) produced 1,737,000 tons in 1967. The 3 refineries refined 5·5m. tons of crude oil in 1967. The oil pipeline Batman–İskenderun (494 km) was opened on 4 Jan. 1967.

INDUSTRY. Production in 1967 included: 700m. metres of cotton fabrics, 27m. metres of woollen fabrics, 127,000 tons of cotton yarns, 24,000 tons of

woollen yarns, 4·25m. metric tons of cement, 116,241 metric tons of paper (1969). Industrial plants number about 30,000.

In 1970 Turkey produced 1·03m. tons of pig-iron, 1·31m. tons of steel ingots, 411,714 tons of sheets, 995,619 of rolled products and 1·54m. tons of coke. There are steel works at Karabük, Ereğli and İskenderun.

POWER. The potential hydro-electric power in Turkey is estimated at 56,000m. kwh. In 1970 the electrical power plants (hydro-electric or thermal) had a total installed capacity of 2,292m. kw. and produced 8,617m. kwh.

TOURISM. A tourist industry is developing. The number of foreign tourists was 626,398 in 1969.

LABOUR AND SOCIAL SECURITY. On 27 June 1945 a Ministry of Labour was set up, superseding the Department of Labour under the control of the Ministry of Economic Affairs. According to the strikes and lock-outs law, which came into effect on 24 Aug. 1963, strikes and lockouts may be declared only after due effort has been made to negotiate and after the local authorities as well as the Ministry of Labour have been informed.

Conditions of work are regulated by the Labour Act of 12 Aug. 1967, which covers all places of work, employing more than 3 persons, outside agriculture. Children under 16 must not be employed for more than 8 hours a day, and employment should not impede school attendance. The Act provides for annual paid holidays of 12–24 working days and regulates overtime payment.

Free public employment exchanges began to operate, under the general control of the Ministry of Labour, in 1946.

In 1967 Turkey's labour force numbered 13·74m., of which 72·3% were engaged in agriculture and 10·4% in manufacturing industries.

The trade-union movement began in 1947. There are 4 national confederations (including Türk-İş and Disk) and 6 federations. There are 35 unions affiliated to Türk-İş and 17 employers' federations affiliated to Disk.

Employment, 1970: Manufacturing, 462,000; construction, 112,000; transport, communications and warehousing, 77,000; mining, 64,000; services, 199,000. There were 157,466 mnaufacturing firms, 236,995 trading establishments and 580,635 service establishments.

SHIPPING. In 1969 Turkish Maritime Lines and private companies had a gross tonnage of 766,000, of which 35 vessels were cargo and tankers, and 20 were passenger liners. The main ports in order of tonnage capacity are: İstanbul, İzmir, Samsun, Mersin, İskenderun and Trabzon.

Ports built or extended since 1950 are İskenderun, Ereğli, Trabzon, Samsun,

Mersin, Zonguldak, Giresun, Hopa, Antalya and Bandirma. New facilities have been provided at Haydarpaşa, Salıpazari, Hopa, Yarımca and İzmir.

ROADS. Turkey had, in 1967, 58,792 km of national highways, of which 15,100 were hard surfaced. In 1969 there were registered 356,900 motor vehicles, including 137,000 passenger cars and 35,500 buses.

RAILWAYS. The total length of railway lines in 1970 was 7,985 km, all state-owned; 28 km are electrified. In 1969 Turkish railways carried 5,520m. ton-km.

AVIATION. The State Airways Administration, formed in 1938, has been converted into the mixed company Turkish Airlines (Türk Havayolları Anonim Ortaklığı); BOAC became a partner in July 1957. It conducts foreign services to Athens, Beirut, Brussels, Amsterdam, Munich, Rome, Frankfurt, Vienna, London, Paris, Belgrade, Nicosia and Tel-Aviv. In 1968 Turkish Airlines carried 770,232 passengers, 1·08m. kg of mail and 14·1m. kg of freight. İstanbul or Ankara are connected with all the principal countries by 27 national airlines.

POST. Number of telephones in 1971 was 576,943; İstanbul, 203,851; Ankara, 92,023.

In 1970 there were 3,125,981 licensed (and over 1m. unlicensed) wireless sets.

BANKING. The Turkish banking system is composed of the Central Bank of the Republic of Turkey (Merkez Bankası) and 45 other banks. Thirteen (including the Central Bank) are established by special laws.

The 13 banks established by special laws carry out specialized banking activities beside their general banking transactions. Five of them are state economic enterprises whose capital is owned wholly by the State. They include: Ziraat Bankası (rural credits, capital: TL1,500m.), Sümerbank (textiles, etc., capital: TL1,500m.), Etibank (mining, energy, capital: TL500m.), İller Bankası (urban works, capital: TL1,200m.), İstanbul Emniyet Sandığı (savings bank). Six of them are joint-stock companies; the majority of their share capital is owned by the public sector. They include: the Emlâk Kredi Bankası (housing, capital: TL1,000m.), Denizcilik Bankası (shipping, capital: TL1,500m.), Türkiye Vakıflar Bankası (investments of pious foundations, funds, capital: TL50m.), Türkiye Halk Bankası (small business, capital: TL50m.); Türkiye Öğretmenler Bankası (teachers' housing, capital: TL30m.), T. C. Turizm Bankası (tourism, capital: TL300m.).

The development banks are: Devlet Yatırım Bankası (investment credits to state economic enterprises, capital: TL1,000m.), Türkiye Sınaî Kalkınma Bankası (investment credit to the private sector, capital: TL50m.), Sınaî Yatırım ve Kredi Bankası (industrial medium-term credit, capital: TL40m.).

Of the 31 commercial banks, 5 are foreign banks established in Turkey, and one is a bank whose capital is shared by a foreign bank.

The total deposits with banks at 31 Dec. 1970 amounted to TL36,246m., and total credits to TL51,570m., excluding the State Investment Bank.

WEIGHTS AND MEASURES. The metric system came into force on 1 Jan. 1934. On 24 May 1928 the Grand National Assembly made European numerals obligatory as from 1 June 1929.

On 1 March 1917 the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar, while as from 26 Dec. 1925 it was decided finally to adopt the Gregorian calendar alone, the Turkish civil year 1342 becoming 1926.

UNION OF SOVIET SOCIALIST REPUBLICS

Soyuz Sovyetskikh Sotsialisticheskikh Respublik

POST-REVOLUTION HISTORY. Up to 12 March 1917 the territory now forming the USSR (together with that of Finland, Poland and certain tracts ceded in 1918 to Turkey, but less the territories then forming part of the German, Austro-Hungarian and Japanese empires—East Prussia, Eastern Galicia, Transcarpathia, Bukovina, South Sakhalin and Kurile Islands—which were acquired during and after the Second World War) was constituted as the Russian Empire. It was governed as an autocracy under the Tsar, with the aid of Ministers responsible to himself and a State Duma with limited legislative powers, elected by provincial assemblies chosen by indirect elections on a restricted franchise.

On 12 March 1917 a revolution broke out. The Duma parties, the same day, set up a Provisional Committee of the State Duma, while the factory workmen and the insurgent garrison of Petrograd elected a Council (Soviet) of Workers' and Soldiers' Deputies. Soviets were also elected by the workmen in other towns, in the Army and Navy and, as time went on, by the peasantry. On 15 March 1917 the Tsar abdicated, and the Provisional Committee, by agreement with the Petrograd Soviet, appointed a Provisional Government and, on 14 Sept., proclaimed a republic. However, a political struggle went on between the supporters of the Provisional Government—the Mensheviks and the Socialist-Revolutionaries—and the Bolsheviks, who advocated the assumption of power by the Soviets. When they had won majorities in the Soviets of the principal cities and of the armed forces on several fronts, the Bolsheviks organized an insurrection through a Military-Revolutionary Committee of the Petrograd Soviet. On 7 Nov. 1917 the Committee arrested the Provisional Government and transferred power to the second All-Russian Congress of Soviets. This elected a new government, the Council of People's Commissars, headed by Lenin.

On 31 Jan. 1918 the third All Russian Congress of Soviets issued a Declaration of Rights of the Toiling and Exploited Masses, which proclaimed Russia a Republic of Soviets of Workers', Soldiers' and Peasants' Deputies; and on 10 July 1918 the fifth Congress adopted a Constitution for the Russian Socialist Federal Soviet Republic. In the course of the civil war other Soviet Republics

were set up in the Ukraine, Belorussia and Transcaucasia. These first entered into treaty relations with the RSFSR and then, in 1922, joined with it in a closely integrated Union.

CONSTITUTION. Constituent Republics. The Union of Soviet Socialist Republics was formed by the union of the RSFSR, the Ukrainian Soviet Socialist Republic, the Belorussian Soviet Socialist Republic and the Transcaucasian Soviet Socialist Republic; the Treaty of Union was adopted by the first Soviet Congress of the USSR on 30 Dec. 1922. In May 1925 the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in Dec. 1929 the Tadzhik Autonomous Soviet Socialist Republic were declared constituent members of the USSR, becoming Union Republics.

At the 8th Congress of the Soviets, on 5 Dec. 1936, a new constitution of the USSR was adopted. The Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of the Union. At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic, previously autonomous republics within the RSFSR, were proclaimed constituent republics of the USSR.

In Sept. 1939 Soviet troops occupied eastern Poland as far as the 'Curzon line', which in 1919 had been drawn on ethnographical grounds as the eastern frontier of Poland, and incorporated it into the Ukrainian and Belorussian Soviet Socialist Republics. In Feb. 1951 some districts of the Drogobych Region of the Ukraine and the Lublin Voivodship of Poland were exchanged.

On 31 March 1940 territory ceded by Finland was joined to that of the Autonomous Soviet Socialist Republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic, which was admitted into the Union as the 12th Union Republic. On the 16 July 1956 the Supreme Soviet of the USSR adopted a law altering the status of the Karelo-Finnish Republic from that of a Union (constituent) Republic of the USSR to that of an Autonomous (Karelian) Republic within the RSFSR.

On 2 Aug. 1940 the Moldavian Soviet Socialist Republic was constituted as the 13th Union Republic. It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (44,290 sq. km, ceded by Rumania on 28 June 1940), except for the districts of Khotin, Akerman and Ismail, which, together with Northern Bukovina (10,440 sq. km), were incorporated in the Ukrainian Soviet Republic. The Soviet–Rumanian frontier thus constituted was confirmed by the peace treaty with Rumania, signed on 10 Feb. 1947. On 29 June 1945 Ruthenia (Sub-Carpathian Russia, 12,742 sq. km) was by treaty with Czechoslovakia embodied in the Ukrainian Soviet Socialist Republic.

On 3 Aug. 1940 Estonia, Latvia and Lithuania were incorporated in the Soviet Union as the 14th, 15th and 16th Union Republics. The change in the status of the Karelo-Finnish Republic has reduced the number of Union Republics to 15.

After the defeat of Germany it was agreed by the governments of the UK, the USA and the USSR (by the Potsdam declaration) that part of East Prussia should be embodied in the USSR. The area (11,655 sq. km), which includes the towns of Königsberg (renamed Kaliningrad), Tilsit (renamed Sovietsk) and Insterburg (renamed Chernyakhovsk), was joined to the Russian Soviet Federal Socialist Republic by decree of 7 April 1946.

By the peace treaty with Finland, signed on 10 Feb. 1947, the province of Petsamo (Pechenga), ceded to Finland on 14 Oct. 1920 and 12 March 1946, was returned to the Soviet Union. On 19 Sept. 1955 the Soviet Union renounced its treaty rights to the naval base of Porkkala-Udd and on 26 Jan. 1956 completed the withdrawal of the forces from Finnish territory.

In 1945, after the defeat of Japan, the southern half of Sakhalin (36,000 sq. km) and the Kurile Islands (10,200 sq. km) were, by agreement with the Allies, incorporated in the USSR.[1]

[1] However, Japan asks for the return of the Etorofu and Kunashiri Islands as not belonging to the Kurile Islands proper. The Soviet Government informed Japan on 27 Jan. 1960 that the Habomai Islands and Shikotan would be handed back to Japan on the withdrawal of the American troops from Japan.

GOVERNMENT. The Soviet Union is a socialist state of workers and peasants, the political units of which are the Soviets of Working People's Deputies. All central and local authority is vested in these Soviets.

The economic foundation of the USSR is the socialist system of economy and the socialist ownership of the means of production. There are two forms of socialist property: (1) state property (property of the whole people); (2) co-operative and collective farm (*Kolhoz*) property (property of individual collective farms and property of co-operative associations). The land, mineral deposits, waters, forests, mills, factories, mines, railways, water and air transport, banks, means of communication, large state-organized agricultural enterprises, such as state farms (*Sovhozy*), machine-repair stations and the like, as well as municipal enterprises and the principal dwelling-house properties in the cities and industrial localities, are state property, but the land occupied by collective farmers is secured to them in perpetuity so long as they use it in accordance with the laws of the country. The members of the *Kolhozy* may have small plots of land attached to their dwellings for their own use. Peasants unwilling to enter a Kolhoz may retain their individual farms, but they are not allowed to employ hired labour. The right of personal property of citizens in their income from work and in their savings, in their dwelling-houses and auxiliary household economy, their domestic furniture and utensils and objects of personal use and comfort, as well as the right of inheritance of personal property of citizens, are protected by law. The constitution recognizes the right of all citizens to work, rest, leisure, education and maintenance in old age, sickness or incapacity, without distinction of sex, race or nationality, and lays down that any direct or indirect restriction of the rights of, or conversely, the establishment of direct or indirect privileges for, citizens on account of their race or nationality, as well as the advocacy of racial or national exclusiveness or hatred and contempt, is punishable by law. The franchise is enjoyed by all citizens of the USSR, including members of the Armed Forces, who have reached the age of 18, irrespective of sex, with the exception of the insane and of persons convicted by court of law to sentences including deprivation of rights. Candidates for election to the Supreme Soviet of the USSR must be 23 years of age, and to the Supreme Soviets of the Union Republics and Autonomous Republics 21; for all regional and other local authorities the minimum age for candidates is 18. A member of any Soviet may be recalled by a decision of a majority of his or her electors if he or she fails to give satisfaction (law on procedure for this, 30 Oct. 1959).

The USSR consists of 15 Union Republics, each inhabited by a major nationality which gives its name to the Republic. These are divided into 120 territories and regions, and these again into 3,030 districts and 1,943 towns and 3,576 urban settlements (1 Jan. 1971). Within the districts there are 40,866 rural districts (usually each including a number of villages). The territories and regions also include a number of smaller nationalities, forming their own self-governing units—20 Autonomous Republics, 8 Autonomous Regions and 10 National Areas.

The highest legislative organ is the Supreme Soviet of the USSR. It consists of 2 chambers with equal legislative rights, elected for a term of 4 years: the Soviet of the Union and the Soviet of Nationalities.

The Soviet of the Union is elected by the citizens of the USSR on the basis of 1 deputy for every 300,000 of the population. The Chamber elected on 14 June 1970 consists of 767 members (*Chairman*, A. P. Shitikov).

The Soviet of Nationalities is elected by the citizens of the USSR, voting by Union and Autonomous Republics, Autonomous Regions and National Areas on the basis of 32 (from June 1966) deputies from each Union Republic, 11 deputies from each Autonomous Republic, 5 deputies from each Autonomous Region and 1 deputy from each National Area. The Chamber elected on 14 June 1970 consists of 750 members (*Chairman*, Y. S. Nasriddinova).

Each chamber has 12 standing committees: planning and budget; industry; transport and communications; building; agriculture; health and social welfare; education, science and culture; trade and services; draft legislation; foreign affairs; youth affairs; natural environment.

The highest executive and administrative organ is the Council of Ministers (called People's Commissars before 16 March 1946); they are appointed by the Supreme Soviet.

The Presidium of the Supreme Soviet of the USSR is elected at a joint session of both chambers of the Supreme Soviet and consists of the chairman, 15 vice-chairmen (one from each of the Union republics), 20 members and the secretary. It acts as the supreme state authority between sessions of the Supreme Soviet and is accountable to the latter for all its activities.

Deputies are elected by the voters on the basis of universal, equal and direct suffrage by secret ballot. The only legal political party is the Communist Party; non-members are classed as non-party citizens. Candidates up to the present have been selected at a preliminary 'constituency electoral consultation' (selection conference), to which organizations which have put forward nominations send delegates, who discuss the various nominees. As a consequence, so far, a single candidate has been arrived at in each constituency, whose name has appeared on the ballot paper, to be struck out or approved by a cross as the voter desires. This procedure, however, is not laid down by the constitution, and may be altered. At the election held on 14 June 1970, 153,172,213 electors voted. The Supreme Soviet elected on that day consists of 1,096 Communist and 421 non-party deputies; 463 were women, 481 manual workers in industry and state farms. and 282 collective farmers.

On 1 Feb. 1944 each of the constituent republics of the Union was given the right to have separate Commissariats (now Ministries) for Defence and Foreign Affairs. After the death of Stalin, 5 March 1953, a number of Ministries comprising different branches of trade, engineering, transport and electricity were merged into single Ministries. In 1957 the number of Ministries in the central government was reduced from 52 to 19, and in Dec. 1959 to 15; but in Oct. 1964 it was again increased to 47, in Aug. 1966 to 48 and in 1968 to 56.

The Council of Ministers, in July 1970, included 11 vice-chairmen, the Premiers of the 15 Union Republics, the head of the Central Statistical Department, the chairmen of 7 commissions of the Presidium of the Council of Ministers (4 of them vice-chairmen of the Council), of the Committee for People's Control, State Planning Committee, the Agricultural Technique Organization and of 7 other State Committees; 58 Ministers; and the chairman of the State Bank.

Soon after the adoption of the 1936 constitution all the constituent republics of the Union held their Soviet congresses, at which they adopted their own constitutions based in all essentials on the constitution of the Union, but adapted where necessary to national and local requirements. Article 14 of the constitution reserves to the central government the spheres of war and peace, diplomatic relations, defence, foreign trade, state security, economic planning, education, criminal and civil codes, etc. The right of the constituent republics to withdraw from the Union is expressly recognized.

The 20 Autonomous Republics include 16 in the RSFSR, 1 in Azerbaijan, 2 in Georgia, 1 in Uzbekistan. Five Autonomous Regions are in the RSFSR, 1 each in Georgia, Azerbaijan, Tadzhikistan; all 10 National Areas are in the RSFSR.

The Autonomous Republics are governed by their own Supreme Soviet and Council of Ministers: the regions and territories, districts, towns and rural areas have their own Soviets, elected for a term of 2 years. In June 1971, 8,873 deputies were elected to the Supreme Soviets of Union and of Autonomous Republics: 3,182 (35·8%) were women, 2,997 (33·7%) non-Party, 2,687 (30·3%) industrial workers and 1,710 (29·3%) collective farmers. To the regional, district and other local Soviets 2,145,837 deputies were elected. 992,636 of them women (45·8%), 1,201,864 non-Party (55·5%), 790,340 (36·5%) industrial workers and 623,405 (28·8%) collective farmers.

In Nov. 1970 there were over 44,000 rural and urban Soviets with 1·5m. deputies, 1·7m. voluntary co-opted members participating in their standing committees and 43,000 women were chairmen or secretaries of Soviets.

State flag: Red, with sickle and hammer in gold in the upper corner near the staff, and above them a 5-pointed star bordered in gold.

National anthem: Soyuz nerushimy respublik svobodnykh (words by S. Mikhalkov and El-Registan; music by A. V. Alexandrov; 1944).

The Presidium of the Supreme Soviet may, within the framework of the constitution, issue edicts (*ukaz*) interpreting existing legislation or amending it, subject to ratification subsequently by the Supreme Soviet.

Legislation by decree and executive authority is vested in the Council of Ministers. The Council of Ministers is responsible to the Supreme Soviet of the USSR and in the intervals between sessions to the Presidium of the Supreme Soviet.

President of the Presidium of the Supreme Soviet of the USSR: Nikolai Viktorovich Podgorny (Aug. 1966).
Secretary of the Presidium: M. P. Georgadze.
Chairman of the Council of Ministers: Alexei Nikolayevich Kosygin (Oct. 1964).
First Vice-Chairman: K. T. Mazurov, D. S. Polyansky.
Minister of Defence: Marshal A. A. Grechko. *Minister of Foreign Trade:* N. S. Patolichev. *Minister for Foreign Affairs:* A. A. Gromyko.

COMMUNIST PARTY. According to the rules adopted by the 22nd Congress of the Party on 31 Oct. 1961, the Communist Party of the Soviet Union 'unites, on a voluntary basis, the more advanced, politically more conscious section of the working class, collective-farm peasantry and intelligentsia of the USSR', whose principal objects are to build a Communist society by means of gradual transition from Socialism to Communism, to raise the material and cultural level of the people, to organize the defence of the country and to strengthen ties with the workers of other countries.

The Party is built on the territorial-industrial principle. The supreme organ is the Party Congress. Ordinary congresses are convened not less than once in 4 years. The Congress elects a Central Committee which meets at least every 6 months, carries on the work of the Party between congresses, and guides the work of central Soviet and public organizations through Party groups within them.

The Central Committee forms a Political Bureau to direct the work of the Central Committee between plenary meetings, a Secretariat to direct current work and a Commission of Party Control to consider appeals against decisions about expulsion. Similar rules hold for the Regional, Territorial and Republican Party organizations.

Over 370,000 primary Party organizations exist in mills, factories, state machine and tractor stations and other economic establishments, in collective farms, units of the Soviet Army and Navy, in villages, offices, educational establishments, etc., where there are at least 3 Party members. On 1 March 1971 over 40% of the members were industrial workers, 15% were collective farmers and 45% office and professional workers. 21% were women.

The Central Committee elected by the 24th Congress in April 1971 consisted of 245 members and 155 candidate members.

In April 1971 the Political Bureau of the Central Committee consisted of the following members: L. I. Brezhnev, V. V. Grishin, A. P. Kirilenko, A. N. Kosygin, F. D. Kulakov, D. A. Kunayev, K. T. Mazurov, A. Y. Pelshe, N. V. Podgorny, D. S. Polyansky, M. A. Suslov, V. V. Shcherbitsky, P. E. Shelest, A. N. Shelepin, G. I. Voronov; and the following alternate members: Y. V. Andropov; P. N. Demichev, P. M. Masherov, V. P. Mzhavanadze, S. R. Rashidov, D. F. Ustinov.

Secretariat: L. I. Brezhnev (*First Secretary*); P. N. Demichev; I. V. Kapitonov; K. F. Katushev; A. P. Kirilenko; F. D. Kulakov; B. N. Ponomaryov; M. S. Solomentsev; M. A. Suslov; D. F Ustinov.

Chairman of the Commission of Party Control: A. Y. Pelshe.
Vice-Chairman: Z. T. Serdyuk.

In April 1971 the Communist Party had 14·5m. members. Membership of the Young Communist League was 28m.

The Communist International (the Comintern), founded on the initiative of the Russian Communist Party in 1919, was dissolved on 15 May 1943. In Oct. 1947 a Communist Information Bureau (Cominform) was set up in Belgrade to serve the Communist parties of Bulgaria, Czechoslovakia, France, Hungary, Italy, Poland, Rumania, USSR and Yugoslavia. On 28 June 1948 Yugoslavia was expelled from the Cominform and the bureau was transferred to Bucharest. The Cominform was on 17 April 1956 declared dissolved.

AREA AND POPULATION. The total area of the Soviet Union in April, 1956 was 22·4m. sq. km (8·65m. sq. miles). The census population on 15 Jan. 1959 was 208·8m. (94m. males and 114·8m. females; 99·8m. urban, 109m. rural). Estimated population on 1 Jan. 1960 was 212·3m. (95·9m. males, 116·4m. females; 103·7m. urban, 108·6 rural); 1966, 232m. (125m. urban, 107m. rural); on 1 July 1967, 235·5m. (108·1m. males, 127·4m. females; 129·1m. urban, 106·4m. rural). The census population on 15 Jan. 1970 was 241·7m. (111·3m. males, 130·4m. females; 136m. urban, 105·7 rural). The increase of 36m. in urban population between 1959 and 1970 was due to a natural increase of 19·6m., an influx of over 16m. from the countryside and the transformation of rural areas with a population of 5m. into urban areas. The natural increase in the rural areas exceeded 18m., but for the reasons stated the net rural population declined by 3m. Estimated population on 1 Jan. 1972, 246·3m.

Regions, towns, streets, factories, schools, etc., named after Stalin were renamed in Nov. 1961 when Stalin's body was removed from the Lenin–Stalin tomb in Red Square in Moscow. Similarly, in Jan. 1962 towns bearing the names of Molotov, Voroshilov, Kaganovich and Malenkov were renamed.

The areas (in 1,000 sq. km) and census population (in 1m., in Jan. 1970) of the constituent republics are as follows (capitals in brackets):

Constituent Republics	Area	Population	Constituent Republics	Area	Population
RSFSR (Moscow)	17,075	130·7	Lithuania (Vilnius)	65	3·2
Ukraine (Kiev)	604	47·5	Kirgizia (Frunze)	198	3·0
Kazakhstan (Alma-Ata)	2,715	13·1	Tadzhikistan (Dushanbe)	143	3·0
Uzbekistan (Tashkent)	450	12·3	Latvia (Riga)	64	2·4
Belorussia (Minsk)	208	9·1	Armenia (Yerevan)	30	2·5
Georgia (Tbilisi)	70	4·7	Turkmenistan (Ashkhabad)	488	2·2
Azerbaijan (Baku)	87	5·2	Estonia (Tallin)	45	1·4
Moldavia (Kishinev)	34	3·6			

Nationalities. The most numerous nationalities at the 1970 census were: 129m. Russians, 40·8m. Ukrainians, 9·2m. Uzbeks, 9·1m. Belorussians, 5·9m. Tatars, 5·3m. Kazakhs, 4·4m. Azerbaijanians, 3·6m. Armenians, 3·2m. Georgians, 2·7 Lithuanians, 2·7m. Moldavians, 2·2m. Jews, 2·1m. Tadzhiks, 1·8m. Germans, 1·7m Chuvashes, 1·5m. Kirgiz, 1·5m. Turkmenians, 1·4m. Latvians, 1·3m. Mordovians, 1·2m. Bashkirs, 1·2m. Poles, 1m. Estonians, The great majority (in each case 84–99%) indicated the language of their nationality as their native tongue; exceptions were the Bashkirs (66%), Poles (33%) and Jews (17·7%).

Estimated losses of population in the Second World War, 20m., of which 7m. were military losses.

The following tables show the growth of the population in Russia:

1897 (Russian Empire)	126,900,000	1939 (census)	170,600,000
1913 (Russian Empire)	170,900,000	1959 (census)	208,826,000
1913 (present frontiers)	159,200,000	1970 (census)	241,748,000

RELIGION. With the Revolution the Orthodox Church lost its position as the dominant religion and all religions were placed on an equal footing. Article 124 of the 1936 constitution of the USSR reads as follows: 'With the aim of ensuring freedom of conscience for the citizens, the Church in the USSR is separated from the State and the school from the Church, and freedom of religious worship and anti-religious propaganda is permitted to all citizens.'

By decree of 23 Jan. 1918 the Orthodox Church was disestablished; its property, together with that of all other denominations, was nationalized. The congregations themselves have to maintain their churches and clergy, regardless of confession or denomination, and may organize a minimum of 20 persons, which may request and receive the use of a church building, free of charge, except for maintenance, insurance, land taxes, etc. About two-thirds of all the churches have been closed. Religious instruction may be given in private, but otherwise only in church classes. The income of religious communities is not subject to taxation.

Relations between the religious communities of all creeds and the Government are maintained through a Council for Religious Affairs (*Chairman*, V. A. Kuroyedov).

The Russian Orthodox Church, represented by the Patriarchate of Moscow, had, in 1967, 30m. regular worshippers. There are still many Old Believers, whose schism from the Orthodox Church dates from the 17th century. The Russian Church is headed by the Patriarch of Moscow and All Russia, assisted by the Holy Synod, which has 6 members—the Patriarch himself and the Metropolitans of Krutitsy (Moscow), Leningrad and Kiev *ex officio*, and 3 bishops alternating for 6 months in order of seniority from the 3 regions forming the Moscow Patriarchate. In 1967 there were 20,000 places of worship (54,000 before the Revolution). Religious instruction in classes for persons under 18 is forbidden. The Patriarchate of Moscow maintains jurisdiction over a few parishes of Russian Orthodox abroad, at Tehran, Jerusalem, East Germany, France (1 archbishop), England, North and South America (2 bishops).

After the Russian Orthodox Church the next Christian community in importance are the Armenians; their Catholicos (Patriarch), whose seat is at Etchmiadzin, is head of all the Armenian (Gregorian) communities throughout the world.

The Georgian Church has its own organization under a Catholicos (Patriarch).

Protestantism is represented chiefly by the Evangelical Christian Baptists, with over 512,000 baptized adult members and some 5,000 churches: the Lutheran (350,000 in Estonia, 600,000 in Latvia) are concentrated mainly in the Baltic States, the Reformed in the Transcarpathian Region of the Ukraine (70,000).

The Roman Catholics are most numerous in Lithuania and the western Ukraine. There are only 4 bishops now in office. In 1946 some 3·5m. Uniates in the USSR withdrew their allegiance to Rome and came under the jurisdiction of the Orthodox Patriarchate in Moscow.

The Moslems, mainly Sunnis, are divided into 4 administrative regions; 3 of them (Central Asia, European Russia and Siberia, Northern Caucasus) headed by a Mufti; the largest (Transcaucasia, with its centre at Baku) by a Shaikh-ul-Islam.

The Armenian-Gregorian and the Roman Catholic churches and the Moslems of Central Asia maintain theological colleges.

There are various Jewish communities, the chief being in Moscow and Kiev. The Central Buddhist Council of the USSR is headed by a Lama with communities in Buryatia, Tuva, Kalmykia and in the national (minority) areas of the Chita and Irkutsk regions.

EDUCATION. Education is free and compulsory from 7 to 15/16. Co-education was reintroduced in all schools on 1 Sept. 1954. There are 3 types of schools—those with a 4-year, an 8-year and an 11-year curriculum; the school-leaving age had been raised to 17 in all large towns and industrial settlements by the end of 1955. Under a law of 24 Dec. 1958 general polytechnical education is to last 8 years (*i.e.*, until the age of 15 or 16) and thereafter is to be combined for 2 years with work in production (except for the specially artistically gifted who go to art schools). Instruction is given in more than 100 languages.

In 1970–71 there were 190,000 primary and secondary schools. Pupils in primary, secondary, technical, etc., schools numbered 49·4m. (7,796,000 of them in the 16–18 age-groups) and the teachers 2·6m. There were 15,731 schools providing a 10-year secondary education for 4m. workers and peasants who had already begun earning their living.

At the end of 1940 labour reserve schools (both vocational and industrial) were organized, admitting applicants from 14 to 17 years of age. From 1959 onwards these and other technical schools were reorganized as town and rural professional and technical schools. Between 1940 and 1970 they trained 22m. skilled workers. In 1970 about 1·6m. graduated from such schools, including 464,000 for agriculture; another 794,000 agricultural mechanics were trained in state and collective farms. Over 5,350 vocational training schools existed in 1971.

In 1970, 8·1m. children of from 3 to 7 years of age attended 83,100 kindergartens. Children in boarding schools numbered 887,000 in 1970.

In 1970–71 there were 4,223 technical colleges with 4·4m. students, and 805 universities, institutes and other places of higher education, with 4·6m. students (including 2·34m. taking correspondence or evening courses).

Among the 52 university towns are: Moscow, Leningrad, Kharkov, Odessa, Tartu, Kazan, Saratov, Tomsk, Kiev, Sverdlovsk, Tbilisi, Alma-Ata, Tashkent, Minsk, Gorky and Vladivostok. On 1 Jan. 1971 there were 927,700 scientific workers in places of higher education, research institutes and Academies of Sciences.

The Academy of Sciences of the USSR has 693 members and corresponding members. Total learned institutions under the USSR Academy of Sciences number 234, with 35,115 scientific staff. Fourteen of the Union Republics have their own Academies of Sciences, with scientific staff numbering 36,175. On 1 Jan. 1971 there were 99,427 post-graduate students.

An Academy of Pedagogical Sciences had 15 research institutes with 1,353 staff.

In Nov. 1970 there were employed in the national economy 6·9m. specialists with a completed higher education and 10m. with a completed secondary technical education.

In 1970–71 about 79·5m. people were studying at schools, colleges and training or correspondence courses.

CINEMAS (Jan. 1971). There were 147,100 permanent and 9,900 mobile cinemas.

NEWSPAPERS. In 1970, 8,694 newspapers with a total circulation of 141m. copies were published in 57 languages of the USSR.

HEALTH. All health services are free of charge; but private practice exists. Health is administered by the Ministry of Health of the USSR, which supervises the work of the Health Ministries of the Union Republics and the Autonomous Republics.

In 1944 an Academy of Medical Sciences was formed; it has under its direct control 36 research institutes. In all, there were, in 1966, 368 medical research institutions. Smallpox and malaria have been virtually eliminated.

In 1970–71, 98 institutes and medical faculties had a total of 329,800 students taking a 6-year course.

In 1971 there were 26,234 civil hospitals with 2,663,000 beds. There were 1·18m. infants in day nurseries and another 1·4m. in the crèche-sections of kindergartens. 617,000 doctors (excluding dentists) were in the health service. All confinements in towns and 75% in the country were in hospital.

There were 37,400 clinics and dispensaries.

The death rate in the USSR in 1970 was 8·2 per 1,000, and the birth rate 17·4 per 1,000. Infant death rate was 25 (per 1,000 live births) in 1970, compared with 273 in 1913, 184 in 1940 and 81 in 1950.

Social insurance is administered by the trade unions, through social insurance councils elected in places of work and social insurance sub-committees of factory committees: about 5m. volunteers are engaged in this work. 10m. people were sent to sanatoria or rest homes by the unions in 1970. There were over 41m. pensioners in 1970. 12m. collective farmers were receiving state-aided pensions in 1969.

Total number of sanatoria in 1970 was 2,233, with 440,000 beds; in addition, there were 1,839 'one-night' or 'one-day' sanatoria, with 118,000 beds. There were 845 rest homes with 224,000 beds.

State expenditure (in 1m. new roubles) on health services proper, 1960, 4,800; 1966, 7,100; 1967, 7,451; 1968, 8,100; 1969, 8,600; 1970, 9,300

Between 1950 and 1970, 41,318,000 apartments (in towns) and houses (in rural areas) were built. In 1970, 2·3m. apartments and houses were built.

JUSTICE. The basis of the judiciary system is the same throughout the Soviet Union, but the constituent republics have the right to introduce modifications and to make their own rules for the application of the code of laws. The Supreme Court of the USSR is the chief court and supervising organ for all constituent republics and is elected by the Supreme Soviet of the USSR for 5 years. Supreme Courts of the Union and Autonomous Republics are elected by the Supreme Soviets of these republics, and Territorial, Regional and Area Courts by the respective Soviets, each for a term of 5 years.

Court proceedings are conducted in the local language with full interpreting facilities as required. All cases are heard in public, unless otherwise provided for by law, and the accused is guaranteed the right of defence.

Laws establishing common principles of criminal legislation, criminal responsibility for state and military crimes, judicial and criminal procedure and military tribunals were adopted by the Supreme Soviet on 25 Dec. 1958 for the courts both of the USSR and the constituent Republics.

The Law Courts are divided into People's Courts and higher courts. The People's Courts consist of the People's Judge and 2 Assessors, and their function is to examine, as the first instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Regional Court, and those of the highest importance at the Supreme Court. The Regional Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. Special chambers of the higher courts deal with offences committed in the Army and the public transport services.

People's Judges and rota-lists of Assessors are elected directly by the citizens of each constituency: judges for 5 years, assessors for 2; they must be over 25 years of age. Should a judge be found not to perform his duties conscientiously and in accordance with the mandate of the people, he may be recalled by his electors.

The People's Assessors are called upon for duty for 2 weeks in a year. The People's Assessors for the Regional Court must have had at least 2 years' experience in public or trade-union work. The list of Assessors for the Supreme Court is drawn up by the Supreme Soviet of the republic.

The Labour Session of the People's Court supervises the regulations relating to the working conditions and the protection of labour and gives decisions on conflicts arising between managements and employees, or the violation of regulations.

Disputes between State institutions must be referred to an arbitration commission. Disputes between Soviet State institutions and foreign business firms may be referred by agreement to a Foreign Trade Arbitration Commission of the All-Union Chamber of Commerce.

The Procurator-General of the USSR is appointed for 7 years by the Supreme Soviet. All procurators of the republics, autonomous republics and autonomous regions are appointed by the Procurator-General of the USSR for a term of 5 years. The procurators supervise the correct application of the law by all state organs, and have special responsibility for the observance of the law in places of detention. The procurators of the Union republics are subordinate to the Procurator-General of the USSR, whose duty it is to see that acts of all institutions of the USSR are legal, that the law is correctly interpreted and uniformly applied; he has to participate in important cases in the capacity of State Prosecutor.

Capital punishment was abolished on 26 May 1947, but was restored on 12 Jan. 1950 for treason, espionage and sabotage, on 7 May 1954 for certain categories of murder, in Dec. 1958 for terrorism and banditry, on 7 May 1961 for embezzlement of public property, counterfeiting and attack on prison warders and, in particular circumstances, for attacks on the police and public order volunteers and for rape (15 Feb. 1962) and for accepting bribes (20 Feb. 1962).

In view of criminal abuses, extending over many years, discovered in the security system, the powers of administrative trial and exile previously vested in the security authorities (M.V.D.) were abolished in 1953; accelerated procedures for trial on charges of high treason, espionage, wrecking, etc., by the Supreme Court were abolished in 1955; and extensive powers of protection of persons under arrest or serving prison terms were vested in the Procurator-General's Office (1955). Supervisory commissions, composed of representatives of trade unions, youth organizations and local authorities, were set up in 1956 to inspect places of detention.

Further reforms of the civil and criminal codes were decreed on 25 Dec. 1958. Thereby the age of criminal responsibility has been raised from 14 to 16 years; deportation, banishment and deprivation of citizenship have been abolished; a presumption of innocence is not accepted, but the burden of proof of guilt has been placed upon the prosecutor; secret trials and the charge of 'enemy of the people' have been abolished.

FINANCE. Currency. As from 1 Jan. 1961 the gold content of the rouble was raised from 0·222 168 to 0·987 412 gramme. The official exchange rates are 82·9 kopeks = US$1, and (from Nov. 1967) 2·16 roubles = £1.

The gold holdings of the USSR were, in Dec. 1955, estimated at about 200m. fine oz. (US$7,000m.), or about 20% of the world total of monetary gold.

The currency in circulation is: (1) State Bank notes in denominations of 10, 25, 50 and 100 roubles; (2) Treasury notes in denominations of 1, 3 and 5 roubles;

(3) cupro-nickel coins in denominations of 10, 15, 20 and 50 kopeks and 1 rouble; (4) cupro-zinc coins in denominations of 1, 2, 3 and 5 kopeks.

Budget. Revenue and expenditure in 1,000m. new roubles for calendar years:

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Revenue	106,297	117,161	130,800	140,033	156,703	166,300
Expenditure	105,577	115,242	128,500	138,531	154,600	165,100

The 1971 budget allotted 77,000m. roubles to the national economy, 17,900m. to defence and 58,000m. to social and cultural services.

The social insurance budget, which is controlled by the Central Council for Trade Unions and its affiliated bodies, was 17,290m. roubles in 1970 and 18,600m. roubles in 1971.

The national income was assessed (in 1,000m. roubles) at 137 in 1959, 193·5 in 1960, 152·9 in 1961, 164·6 in 1962, 168·8 in 1963, 181·3 in 1964, 193·5 in 1965, 207·4 in 1966, 225 in 1967, 244 in 1968, 261·9 in 1969, 289·6 in 1970.

Income tax was abolished on 1 Oct. 1961 for earnings up to 60 roubles per month and reduced for earnings between 61 and 70 roubles; in Dec. 1967 further cuts of 25% were made for earnings from 61 to 80 roubles.

Davies, R. W., *The Development of the Soviet Budgetary System.* CUP, 1958

Investments and Credits. Capital investment (1970) was 82,000m. roubles, including 72,700m. by State and co-operative enterprises, 7,700m. by collective farms and 1,600m. by individuals (on housing). Taking 1913 as 100, the physical volume of industrial production within the present territory of the USSR was 769 in 1940 and 9,200 in 1970.

The debts contracted by the tsarist régime, *i.e.*, before 1917, have been repudiated by the Soviet Government.

After the Second World War the USSR has become one of the biggest creditor countries in the world. Between 1955 and Jan. 1970 economic aid in the form of 2% or 2½% loans to be repaid, as a rule, over 12 years has been advanced for 1,593 industrial and agricultural enterprises in Socialist countries and 700 enterprises in developing countries; the latter including loans (in 1m. old roubles): India, 2,500m.; Egypt, 2,300m.; Iraq, 550m.; Afghánistán, 480m.; Indonesia, 443m.; Argentina, 400m.; Ethiopia, 400m.; Guinea, 140m.; Cuba, US$100m. 69% of aid is for industrial development.

Berliner, J. S., *Soviet Economic Aid in Underdeveloped Countries.* New York, 1958

DEFENCE. On 26 Feb. 1946 the control of the Soviet Armed Forces was unified under a single Ministry of the Armed Forces. On 25 Feb. 1950 the Defence Ministry was divided into a War Ministry and a Navy Ministry; on 15 March 1953 a single Ministry of Defence was reconstituted.

In 1955 the Air Defence Command and in 1960 the Strategic Rocket Forces were established as the 4th and 5th 'branches' of the armed forces beside the army, navy and air force.

The direction of Party and political work in the Armed Forces is exercised by the Central Committee of the Communist Party of the Soviet Union through the chief political directorate of the Ministry of Defence. The chiefs of the political departments of military commands, fleets and armies must be Party members of 5 years' standing and the chiefs of political departments of divisions and regiments Party members of 3 years' standing. Nearly 90% of the officers are members of the Communist Party or Young Communist League, and 45% have had an engineering and technical education.

Military service begins at the age of 19 (or 18 for graduates of secondary schools). Active service lasts 2 years for privates in the Army and M.V.D. troops, 3 years for n.c.o.s in the Army and M.V.D. troops and for privates and n.c.o.s in the Air Force, 4 years for privates and n.c.o.s in the Coastal Defence, 5 years for ratings in the Navy. Reserve service lasts up to the ages of 35, 45 or

50 years according to fitness, family status and other considerations. Conscientious objection is treated as a criminal offence. Students in places of higher education are freed from military service, but receive military instruction.

In Jan. 1960 Prime Minister Khrushchov quoted the following figures of the armed forces of the Soviet Union: 1927, 586,000; 1937, 1,433,000; 1941, 4,207,000; May 1945, 11,365,000; 1948, 2,874,000; 1955, 5,763,000; 1959, 3,623,000; 1960, 2,423,000. The reduction, according to Khrushchov, was mainly due to the switch-over to rocket and nuclear weapons.

The estimated expenditure on defence (in 1m. new roubles) for 1961 was 9,255; 1962, 13,410; 1963, 13,300; 1966, 13,400; 1967, 14,500; 1968, 16,700; 1969, 17,702; 1970 (estimate), 17,900.

Eastern Security Treaty. On 14 May 1955 the USSR, Albania, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland and Rumania signed in Warsaw a 20-year treaty of friendship and collaboration, after the USSR had (on 7 May) annulled the 20-year treaties of alliance with the UK (1942) and France (1944).

The main provisions of the treaty are as follows:

ARTICLE 4. In case of armed aggression in Europe against one or several States party to the pact by a State or group of States, each State member of the pact . . . will afford to the State or States which are the object of such aggression immediate assistance . . . with all means which appear necessary, including the use of armed force. . . . These measures will cease as soon as the Security Council takes measures necessary for establishing and preserving international peace and security.

ARTICLE 5. The contracting Powers agree to set up a joint command of their armed forces to be allotted by agreement between the Powers, at the disposal of this command and used on the basis of jointly established principles. They will also take over agreed measures necessary to strengthen their defences.

ARTICLE 9. The present treaty is open to other States, irrespective of their social or Government regime, who declare their readiness to abide by the terms of the treaty in order to safeguard peace and security of the peoples.

ARTICLE 11. In the event of a system of collective security being set up in Europe and a pact to this effect being signed—to which each each party to this treaty will direct its efforts—the present treaty will lapse from the day such a collective security treaty comes into force.

It is estimated (1971) that the armed forces of the Warsaw pact countries total 4·36m., including 3·3m. Russians, compared with 5·7m. NATO forces.

Marshal Grechko was from July 1960 to April 1967 C.-in-C. of the united Armed Forces, with headquarters in Moscow. He was succeeded by Marshal I. I. Yakubovsky in 1967.

In 1962 Albania was no longer invited to the Warsaw Pact meetings, without being formally expelled.

Two (or 3) Soviet divisions are stationed in Poland, 22 divisions in East Germany, 2 divisions and 2 air divisions in Hungary.

Army. The Army was, in 1970, thought to consist of about 157 divisions, of which some 100 are of combat readiness, numbering about 2m. men.

The mechanized and tank divisions are equiped with the T34 medium tank, mounting an 85-mm gun, and with the Stalin III heavy tank, mounting a 122-mm gun. The T34 and T54 are being replaced by the T62 medium tank mounting a 115-mm gun. Rocket units are stated to be 'the main force' of the Army.

In addition to the Soviet Army, there are some 350,000 security and border troops.

Navy. There are 5 shipyards in and near Leningrad; Black Sea yards are at Nikolaiev and Sevastopol, new shipyards are at Molotovsk in the White Sea region and at Komsomolsk on the Amur.

The completion of a through canal system between the Baltic and White Seas and the opening of regular traffic *via* the North-East Passage (during the ice-free season) have enabled the Soviet Government to transfer tonnage between the Baltic and Far East.

The principal surface ships of the Soviet Navy are as follows:

Completed	Name	Standard displacement Tons	Armour *Belt* In.	Armour *Guns* In.	Principal armament	Shaft horsepower	Speed Knots

[1] *Dzerzhinski* has only nine 6-in. guns—3 triple turrets, 'x' turret having been replaced by a twin guided missile launcher.

There are also 95 nuclear-powered submarines, 310 conventional submarines, 12 missile armed cruisers, 40 missile armed destroyers, 6 gun armed destroyers, 120 escorts, 250 coastal escorts, 330 minesweepers, 140 missile patrol boats, 200 torpedo-boats, 100 amphibious ships, 100 amphibious craft, and thousands of support ships, auxiliaries and service craft.

The Minister of Defence stated that the main force of the navy consisted of submarines, primarily nuclear-powered and armed with nuclear rockets.

Estimated number of personnel (1971), 50,000 officers and 450,000 men.

Air Force. The Soviet Air Force was believed to consist, in 1971, of over 500,000 officers and men, nearly 10,000 first-line aircraft and a large number of second-line, transport and training aircraft. To supplement an increasing number of long-range rocket missiles (1,500 ICBM, 700 MRBM/IRBM), the DA strategic bomber force is estimated to have still 90 Tupolev Tu-95 ('Bear')[1] 4-turboprop bombers, 40 Myasishchev Mya-4 4-jet bombers and flight-refuelling tankers ('Bison') and 700 Tupolev Tu-16 ('Badger') and supersonic Tupolev Tu-22 ('Blinder') twin-jet bombers. All 4 types are used also by the Naval Air Force for long-range maritime reconnaissance; the Tu-16, Tu-95 and Tu-22 can carry air-to-surface guided self-propelled missiles and all 4 types have provision for flight refuelling.

The FA tactical air forces, under local army command in the field, have an estimated total of 4,750 ground attack and reconnaissance aircraft, including twin-jet Yakovlev Yak-28 ('Brewer') multi-purpose combat aircraft, single-jet Sukhoi Su-7B ('Fitter') and MiG-21 ('Fishbed') fighter-bombers and diminishing numbers of older types such as the twin-jet MiG-19 ('Farmer') and single-jet MiG-17 ('Fresco'). The PVO defence command has an estimated total of 3,000 jet interceptors, consisting primarily of MiG-21, MiG-19, Sukhoi Su-9 ('Fishpot') and Yak-28P ('Firebar') fighters. The twin-jet Tu-28 ('Fiddler') fighter, armed with long-range missiles, the Sukhoi Su-11 ('Flagon') twin-jet all-weather fighter and

[1] For convenience Soviet aircraft and missiles are usually referred to by invented English names in non-Soviet military writings.

Mach 3 MiG-23 ('Foxbat') have re-equipped some squadrons. Early warning and fighter-control duties are performed by radar-carrying adaptations of the Tu-114 turboprop transport ('Moss'). Very large numbers of surface-to-air guided missiles are operational, including the 'Guild', 'Guideline', 'Goa' and 'Ganef', the long-range 'Griffon' and the 'Galosh' which is deployed around Moscow and is claimed to have anti-missile capability. The more modern 'Gainful' missile system, for defence against low-flying aircraft, had also entered service by the early 1970s.

Soviet Air Force transport squadrons have an estimated total of 1,500 aircraft, consisting primarily of An-12 ('Cub') 4-turboprop transports, Il-18s ('Coot') and An-24s ('Coke'), with a few very large An-22s ('Cock'), a variety of older and smaller types and many helicopters, including the turbine-powered Mi-6, Mi8 and Mi-10 flying crane. Training aircraft include the piston-engined Yak-18 primary trainer, the Czech-built L-29 Delfin jet basic trainer and versions of operational types such as the MiG-21, MiG-15, Su-7, Yak-28 and Tu-22.

Naval Air Force. Under the control of the various naval commands, *i.e.*, Baltic, Black Sea and Pacific, the Naval Air Force has an estimated 500 land-based maritime patrol bombers and many flying-boats. Primary offensive aircraft are the Tu-16 ('Badger') twin-jet bomber, able to carry long-range air-to-surface missiles, the supersonic twin-jet Tu-22 ('Blinder') reconnaissance bomber and the Beriev M-12 ('Mail') maritime patrol amphibian. Tu-95 ('Bear') and Myasishchev ('Bison') 4-engined bombers, as well as the Tu-16 and Il-38 ('May'), are used for long-range over-water reconnaissance. Anti-submarine helicopters, notably the Ka-25 ('Hormone'), are carried by some naval vessels, including 2 helicopter carriers.

PLANNING. Planning is based on public ownership in industry and trade, and on mixed public and collective (co-operative) ownership in agriculture. The first plan drawn up by Gosplan (the State Planning Commission) was the 'Goelro' drawn up in 1920. This was to be the basis for the economic development of the country and for the construction of a system of electrical power plants with an aggregate capacity of 1·75m. kw., in the course of 15 years. By 1927–28 the capacity of the electrical stations in operation was already 1,792,000 kw. with an output of 5,160m. kwh.

In 1925 Gosplan started to draw up annual plans for the national economy, and in 1927–29 undertook to draw up the first 5-year plan, which was to have run from 1 Oct. 1928 to 30 Sept. 1933. It was considered completed in Dec. 1932, when 93·7% of the planned industrial output for the 5 years had been carried out. Stress was laid on the development of the heavy industries, particularly in the outlying areas rich in natural resources and inhabited by the national minorities.

The second 5-year plan ran from 1933 to 1937. It aimed at strengthening the defensive capacity of the Soviet Union, and more stress was laid than in the first 5-year plan on increasing the output and improving the quality of consumer goods. About one-half of the total investments in new heavy industrial constructions was allocated to the eastern areas. By the end of 1937 the plan for large-scale industry was overfulfilled by 4%, but the target for the light industries and consumer goods was not reached.

The third 5-year plan, 1938–42, envisaged an average annual increase in output of 13·5%, but that of the means of production was to be 15·2% and the means of consumption 11%; stress was to be laid on war industry. During the first 3½ years, industrial output was increasing annually by an average of 13%. In the Urals, the Volga area, Siberia and Central Asia industrial output increased during 1938–40 by about 50%. One of the richest grain-growing areas of the Soviet Union was created in the eastern part of the country. Capital construction

amounted in value to a total of 130,000m. roubles; more than one-third fell to the eastern areas. The plan was interrupted in June 1941, when Hitler attacked the USSR. The whole of the national economy was switched to help the war effort, and whole industries were shifted from the western areas to the east.

For details of the fourth 5-year plan, 1946–50, *see* THE STATESMAN'S YEAR-BOOK, 1952, pp. 1424 f. The 1950 target of the gross output of industry was exceeded by 2%.

On 10 Oct. 1952 the 19th Congress of the Communist Party issued directives for the fifth 5-year plan, 1951–55; for details *see* THE STATESMAN'S YEAR-BOOK, 1953, pp. 1435–36. During Sept. and Oct. 1953 the Government issued a number of decrees to stimulate the development of agriculture, the output of consumer goods and the expansion of the home trade. For details of these decrees, *see* THE STATESMAN'S YEAR-BOOK, 1955, pp. 1448–50.

The directive for the sixth 5-year plan, 1956–60, was adopted by the 20th Congress of the Communist Party on 25 Feb. 1956; for details *see* THE STATESMAN'S YEAR-BOOK, 1958, p. 1472.

In May 1955 Gosplan was reorganized to consist of 2 state commissions for long-term planning (Gosplan) and for current planning (Goseconomcommissya); at the same time a committee was set up to improve the application to industry of advance science and technology (Gostekhnika).

Between 1954 and 1956 considerable changes were made in planning methods. In March 1954 collective farms were given greater authority over planning their own output, only the quantities required by the State in fixed deliveries being determined beforehand, and voluntary sales by contract. In 1955 they were authorized to make changes in their statutes, which had followed a fixed model since 1935. In 1955–57 over 15,000 industrial establishments in various basic industries, previously controlled by the Union Government, and later a number of entire light industries were turned over to the Constituent (Union) Republics. By 1962 they controlled from 95 to 100% of all industrial output.

In 1957 a comprehensive plan for decentralization of management of industry was initiated. Industrial establishments responsible for about 71% of all Soviet industrial output were turned over to Economic Councils set up in 104 (in 1963: 47) economic administrative areas. These in 1962 controlled 73% of all industrial production. The Ministries previously responsible for the industries concerned were either abolished or transformed into purely planning and supervisory bodies. The State Committee for current planning was abolished, and Gosplan was given wider powers.

In consequence of this change a 7-year plan for 1959–65 was adopted by the 21st Congress of the Communist Party in Feb. 1959. Industrial output was to increase by 80%; it was in fact, in 1965, 84% above that of 1959. Capital investments would roughly equal the total for 1917–58: special attention was to be given to mechanization of agriculture and arduous industrial labour, automation and new technological processes, and housing. Diesel or electric traction of railway freight was to rise to 85%. Real incomes were to rise 40%, the 7-hour day (6 hours for miners) became general in 1960 and the 40-hour week in 1961, and introduction of the 35-hour week (30 hours for miners) began in 1964.

In Oct. 1965 the regional and Republic Economic Councils were abolished and also 28 Ministries for various branches of industry (17 Union-Republican, *i.e.*, corresponding to similar Ministries in the Union Republics, and 11 all-Union).

A 20-year plan was adopted by the 22nd Congress of the Communist Party on 31 Oct. 1961. Compared with 1960, by 1980 the output is to be increased as follows: Electric power, ninefold; steel, fourfold; oil, fivefold; coal, double; machinery, tenfold; fertilizers, ninefold; cement, fivefold; textiles, treble; leather footwear, double; grain, double; milk, treble; meat, fourfold. Two new iron and steel centres are to be developed in Kazakhstan and in Kursk region. A single deepwater system is to link the main inland waterways in the European USSR. Some rivers in northern Asia are to be diverted south for irrigation purposes. A 6-hour day for a 6-day week or 35 hours for a 5-day week were to be achieved by 1970. Housing, water, gas, heating, public urban transport and school meals were

to be free by 1980. These and cognate measures are to provide 'the material and technical basis of communism'.

The 23rd Congress of the Communist Party in April 1966 adopted 'directives' for a 5-year plan for 1966–70. Under these, power output was to reach 830,000–850,000m. kwh., oil 345–355m. tons, coal 665–675m. tons, steel 124–129m. tons, mineral fertilizers 62–65m. tons, machine-tools 220,000–230,000, cars 700,00–800,000, tractors 600,000–625,000, paper 5–5·3m. tons, cement 100–105m. tons, fabrics 9·5–9·8m. sq metres, leather footwear 610–630m. pairs, meat 5·9–6·2m. tons, butter 1·2m. tons, sugar 9·8–10m. tons. The average annual output of grain was to increase 30% over 1964–65. 7,000 km of new railway line, 63,000 km of new motor roads and 35–40new airports were to be built; marine tonnage was to be increased by 50%.

On 24 Nov. 1971 Premier Kosygin reported on the 9th Five-Year Plan at the Supreme Soviet. It provided for an increase in electric power output to 1,065,000m. kwh., oil to 496m. tons; gas, 320,000m. cu. metres; steel, 146m. tons; coal, 695m. tons; mineral fertilisers, 90m. tons; tractors, 575,000; passenger cars, 1·26m., and lorries, 750,000. A new feature is that, while output of these and other means of production is to increase by 46·3%, output of consumption goods is to grow by 48·6%. Grain output is to rise to 195m. tons in 1975, meat approximately 16m. tons; milk 100m. tons; textiles 11,000m. sq. metres; leather footwear 830m. pairs. Average wages are to increase by 22%, incomes of collective farmers 30–35%, and the average of real incomes by 31%. 3,400 miles of new railway tracks are to be built and 3,700 miles electrified, with 17,000 miles of new oil pipelines, and 40% more cargo carried by sea. 580m. sq. metres of new housing (over 16m. flats and houses) are to be built.

By mid-1970, 42,000 industrial plants had been transferred to the new system of decentralized cost-accounting: they produced 93% of total output of Soviet industry and 95% of its total profit.

Council for Mutual Economic Aid (SEV: Soviet Ekonomicheskoy Vzaimopomoshchi), known in the West as COMECON, was founded in Moscow on 25 Jan. 1949, 'to strengthen the economic collaboration of the socialist countries and to co-ordinate their economic development on the basis of equal rights of all member states by organizing the exchange of economic and technical experience and rendering mutual aid'. Founding members were Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania and USSR. The German Democratic Republic was admitted in 1950, Mongolia in 1962; Albania left COMECON in Oct. 1961. Yugoslavia, Cuba, North Korea and North Vietnam are represented by observers.

The Council is the supreme body; its recommendations must be unanimous and can be put into effect only by inter-governmental agreements. The Executive Committee, set up in June 1962, is composed of permanent delegates from each member country; its functions are the co-ordination of national economic development plans, investments and policy on trade with, and payments to, capitalist countries and supervision of collaboration on scientific and technical research. The Executive Committee has a Planning Bureau (set up in 1962) and Standing Committees (first created in 1956, numbering 17 in 1962). A joint Bank for Economic Co-operation was established on 1 Jan. 1964 with a capital of 300m. convertible roubles. An International Investment Bank began operations in Moscow on 1 Jan. 1971.

In July 1971 the 25th session of the CMEA adopted a 'Programme of Socialist economic integration', worked out over 2 years by the members on the basis of their experience in co-ordinating national economic plans for the years 1971–75. The Programme, covering a period of 15–20 years, deals with

co-operation in output of oil, gas, cellulose, iron and steel, asbestos, mineral fertilisers, large lorries, containers and agricultural machinery.

The Secretariat is in Moscow; *Secretary-General:* N. V. Fadeyev (USSR).

AGRICULTURE. The Soviet Union, up to about 1928 predominantly agricultural in character, has become an industrial–agricultural country. Of the gross social product, industry and transport accounted for 42·1% in 1913 and 79% in 1968; agriculture for 57·9% in 1913 and 15·3% in 1968. Of the total state land fund of 2,227·5m. hectares, agricultural land in use in 1970 amounted to 607m., state forests and state reserves to 1,120m. hectares.

The total area under cultivation (including single-owner peasant farms, state farms and collective farms) was (in the same territory) 118·2m. hectares in 1913, 129·7m. in 1933, 223·5m. in 1962, 222·9m. in 1966, 223·5m. in 1970.

Collective farms on 1 Nov. 1969 possessed 357·1m. hectares, of which 109·8m. were under crops of various kinds; state farms and other state agricultural undertakings possessed 687·8m. hectares, of which 111·3m. were under crops; manual and clerical workers held 3·6m. hectares as allotments.

In Nov. 1969 the Third Congress of collective farmers adopted a new model constitution, considerably enlarging the planning powers of collective farms and making payments to their members a priority.

Since 1969 conferences of collective farms have elected 2,346 district collective farm councils with 75,000 members, to study and co-ordinate local experience in methods and finance.

Produce marketed (after consumption by collective farmers) was, in 1m. metric tons, for the present area of the USSR:

	1967	*1968*	*1969*	*1970*
Grain	63·2	75·2	63·2	80·5
Raw cotton[1]	6·0	6·0	5·7	6·9
Sugar-beet	81·6	84·2	65·3	71·4
Potatoes	18·0	18·3	17·7	18·5
Vegetables	12·0	11·4	12·2	13·4

Meat[2] and fats	8·4	8·7	8·8	9·4
Milk and milk products	44·7	46·4	46·1	48·0
Eggs (1,000m.)	16·9	18·1	19·5	22·1

[2] Slaughter weight.

Since 1954 grain crops have been measured in 'barn crop' (*i.e.*, net quantities delivered to barns) and not in 'gross harvest' or 'biological yield' (*i.e.*, calculated as growing crops) as previously. Average annual crops (in 1m. tons): 1909–13, 72·5; 1946–50, 64·8; 1951–55, 88·5; 1956–60, 121·5; 1961–65, 130·3; 1966–70, 167·5. Output of grain in 1971 was 181m. tons. Other produce (in 1m. tons) in 1970; Raw cotton, 6·9; sunflower, 6·1; meat (slaughter weight), 12·3; milk, 82·9; sugar-beet, 78·3; 40,740m. eggs.

In Dec. 1963 collective farms comprised 99·7% of all peasant holdings. In 1970 they produced 49% of all marketed grain, cotton 77%, sugar-beet 91%, potatoes 31%, vegetables 35%, meat 42%, milk 53%, eggs 23%.

Between 1953 and 1 Jan. 1971 the number of collective farms was reduced, mainly by amalgamation and partly by transformation into state farms, from 93,300 to 33,600, their cultivated area falling from 132m. hectares to 99·1m. The number of state farms rose in the same period from 4,857 to 14,994, their cultivated area from 15·2m. hectares to 91·7m. Over 5,300 state farms had been transferred to a decentralized cost-accounting basis by the end of 1970.

State purchases in 1970 (in 1m. tons; 1969 figures in brackets): Grain, 73·3 (55·5); sugar-beet, 71·4 (65·3); cotton, 6·9 (5·7); milk, 45·7 (43·8).

By 1961, in the collective farms 99% of the ploughing of the areas under grain, cotton and sugar-beet and 97–98% of the sowing under these crops (57% under potatoes) were mechanized; 95% of their areas under grain and 56% under sugar-beet were harvested by combines.

Rural electrical stations in 1940 had a capacity of 265,000 kw.; in 1970, 4m. kw. 99·8% of collective farms and 99·8% of state farms were using electric power in 1970. In 1970 agriculture consumed 38,552m. kwh. of electric power.

Investments in agriculture in 1970 were 10,800m. roubles by the State and 6,500m. by collective farms.

In 1913 the total of irrigated land was 4m. hectares; in 1953, 11m.; in 1970, 11·1m. The total of land drained was 8·4m. hectares in 1956 and 10·2m. in 1970.

In 1913, 188,000 tons of mineral fertilizers were used; in 1950, 5·3m. tons, and in 1970, 45·6m. On 1 Jan. 1971 there were 4·3m. tractors (calculated on 15 h.p. basis), 623,000 grain combine harvesters and 1,206,000 lorries in the countryside. Under the 5-year plan (1971–75) agriculture is to receive 1·7m. tractors and 550,000 grain combines.

An All-Union Academy of Agricultural Sciences, founded in 1929 has regional branches in Siberia and Central Asia and 58 research institutes.

Livestock. Livestock (1 Jan. 1971), in 1m. heads: Cattle, 99·2 (including 41 milch cows); pigs, 67·5; sheep, 137·9. Since 1957 the enumeration of livestock is being made on 1 Jan. instead of 1 Oct., *i.e.*, after the winter sales and slaughtering for the market.

Percentage of farm production in 1970:

	All grain	Cotton	Sugar-beet	Potatoes	Vegetables	Meat	Milk	Eggs	Wool
State	46	23	8	14	36	32	28	33	42
Collective	53	77	92	21	26	33	36	14	39

FORESTRY. On the 747m. hectares of forest land of the USSR, a large portion is administered and worked by the State, and the other, about 39m. hectares in extent, is granted for use to the peasantry free of charge.

The largest forest areas are 515m. hectares in the Asiatic part of the USSR, 51·4m. along the northern seaboard, 25·4m. in the Urals and 17·95m. in the north-west.

On 24 Oct. 1948 a plan was published for planting crop-protecting forest belts, introducing crop rotation with grasses and building of ponds and water reservoirs in the steppe and forest-steppe areas of the European part of the USSR. By the middle of 1952 some 2·6m. hectares had been planted with shelter-belt trees and 13,500 ponds and reservoirs had been built. The planting of the shelter belts in the Kamyshin–Volgograd and Byelgorod–Don areas has in the main been completed. A Volga forest belt has been planted along 1,200 km of railway. Re-afforestation was completed in 1970 on an area of 2·3m. hectares.

PRODUCTION. The organization of industry in the USSR is based on state ownership and control, administered by a separate Ministry for each large industry.

Under the successive 5-year plans, large-scale modern industrial works have been constructed, namely: 1st, over 1,500; 2nd, 4,500; 3rd (up to June 1941), 3,000; war-time, 3,500 (apart from reconstruction of destroyed plants); 4th, 6,200; 5th, 3,200; 6th (1956–58), 2,700; 7-year plan (1959–65), 5,470; 8th (1966–70), 1,870.

MINING. Miners are trained in 6 mining, 3 oil and 1 peat institutes, the mining faculties of 17 higher educational establishments, oil faculties of 2 industrial institutes and a peat faculty at the Belorussian Polytechnical Institute.

The Soviet Union is rich in minerals. Soviet scientists claim that it contains 58% of the world's coal deposits, 58·7% of its oil, 41% of its iron ore, 76·7% of its apatite, 25% of all timber land, 88% of its manganese, 54% of its potassium salts and nearly one-third of its phosphates.

Estimated output (in metric tons) in 1962: Copper, 634,900; zinc, 399,000; lead, 363,000; tungsten, 10,500; antimony, 5,980; silver, 27m. fine oz. Output in 1963: Baryte, 199,500; magnesium, 31,745; aluminium, 961,400; manganese ore

(1970), 6·8m.; graphite, 54,000; bauxite, 4·3m.; asbestos, 1·3m.; phosphate rock, 3·7m. (plus 7·4m. apatite); chromite, 1·23m.; gold, 12·5m. fine oz.; molybdenum, 12·5m. lb.; cadmium (1956), 160.

Output of iron and steel in the USSR (in 1m. tons):

	Pig-iron	Ingot steel	Rolled steel		Pig-iron	Ingot steel	Rolled steel
1913	4·2	4·2	3·5	1955	33·3	45·3	35·3

1950	19·2	27·3	20·9	1970	85·9	115·9	80·6

Coal production (in 1m. metric tons) was 29·1 in 1913, 64·4 in 1932, 165·9 in 1940, 261·1 in 1950, 513 in 1960, 594 in 1968, 608 in 1969, 624 in 1970.

The main centre of the atomic industry is at Ust-Kamenogorsk in the Altai mountains. Uranium deposits are being worked near Taboshar (south-east of Tashkent), Adizhan (in the Tynya-Muyan Mountains), Slyudianka (near Lake Baikal), on the Kolyma River and in Southern Armenia.

Output of natural gas reached 197,945m. cu. metres in 1970; oil, 353m. tons.

OIL. In the 1930s practically all Soviet oil came from the Caucasian fields, of which the Baku fields yielded 75–80% and the Grozny and Maikop fields between them 15%. Since then, the distribution has considerably changed. The Ural–Volga area, the 'Second Baku', has 4 large centres in operation, at Samarska Luka (Kuibyshev), Tuimazy (Bashkiria), Ishimbaev (Bashkiria) and Perm. A large new oilfield has been developed in the Trans-Volga area of the Saratov region. The USSR is now the second-largest oil-producer in the world after the USA (*see* pp. xxiii f.).

The total length of pipeline on 1 Jan. 1939 was 4,212 km, divided as follows: Baku–Batumi, 1,717 km; Grozny–Mahach-Kala, 150 km; Grozny–Armavir–Tuapse, 618 km; Armavir–Trudovaya, 488 km; Guriev–Orsk, 845 km, and other, 394 km. One pipeline (1,700 km) was completed in 1955, connecting Tuimazy in Bashkiria with the refineries of Omsk. In 1957 the Almetyevsk–Gorky pipeline (580 km) and 479 km of the Stavropol–Moscow pipeline were completed. At the end of 1970 there were 37,400 km of pipeline, through which (in 1970) were conveyed 339·9m. tons of oil.

The construction of the 'Druzhba' pipeline of about 4,600 km from the oilfields near Kuibyshev to Poland and the German Democratic Republic (northern branch) and to Czechoslovakia and Hungary (southern branch)—separating in Belorussia—begun in 1960, was completed in 1965.

In 1970 the USSR exported 95·8m. metric tons of crude oil and oil products.

INDUSTRY. Output of some heavy industries was as follows:

The process of industrial mechanization and the installation of automatic remote control is being pushed ahead. About 90% of Soviet pig-iron and 87%

of the steel is produced in fully automatic furnaces. All hydro-electric plants (in terms of capacity) are fully automatic. Coal production in open-cast mines has been completely mechanized; hydraulic mining is coming into general use. Coal-cutting and underground haulage had been over 99% mechanized by the end of 1962 (loading on inclined seams 56%); peat-cutting, 100%, and loading, nearly 80%; timber-cutting, 98%; haulage to loading centres, 93%, and despatch, 97%.

Output in some consumer industries was as follows:

Since 1945 the cotton industry has expanded, especially in the Urals, Central Asia and Siberia. Large mills have been built at Kamyshin, Kherson, Barnaul, Engels, Alma-Ata, Chernigov and Frunze.

In 1970 the eastern regions (Urals, Siberia, Far East and Central Asian Republics) accounted for 51% of the coal output, 25% of the oil, 37% of the pig-iron, 41% of the steel and 41% of electric power.

New industrial enterprises that went into production in 1970 included power station at Vladivostok, Grodno, in Estonia, Murman region, Stavropol territory and elsewhere; coalmines at Sahalin and in Lvov, Voroshilovgrad, Dnepropetrovsk and other regions; steel plants at Novo-Lipetsk, Chelyabinsk, Karaganda; chemical works at Mogilev, Novogorod, Rustavi, Djambul; textile factories at Chernovtsy, Orenburg, Dubossary; mechanized dairies at Omsk and Zheleznovodsk. In 1970 the total length of long-distance gas pipelines reached 67,500 km. Construction of a 530-km natural gas pipeline from Doliny (Ukraine) to Bratislava (Czechoslovakia) and reconstruction of a line to Poland began in 1965. An aluminium plant (Achinsk) and a zinc works (Almalyk) went into production in 1970.

A natural-gas pipeline from Gazli, near Khiva, to Voskresensk, near Moscow (2,750 km), with a capacity of 10,500m. cu. metres per annum, began operating in Oct. 1967.

ELECTRICITY. Many hydro-electrical power stations are being constructed. The Irkutsk station (4,500m. kwh. output per annum) is in operation; Bratsk (4·5m. kw. capacity) was completed in 1967. Krasnoyarsk (6m. kw. capacity) and Sayano-Shushenskaya (in eastern Siberia) are under construction; the 10th turbine at Krasnoyarsk raised its capacity to 5m. kw. in 1970.

The Kremenchug power station (625,000 kw. capacity) was completed in Nov. 1960, rendering the Dnieper navigable for large vessels from Kanev to the Black Sea (over 800 km). Two power-stations in Central Asia are under construction: at Nurek on the Amu-Darya (2·7m. kw.) and at Toktogul in the Syr-Darya basin (1·2m. kw.).

Total installed capacity of electrical plants in 1938 was 8·7m. kw. and 166·2m. kw. in 1970. Industry consumes about 70% of the total electricity. Over 35,000 small rural power stations have been closed in recent years owing to supply from State stations becoming available, but there are still 65,000 operating in the countryside.

An atom-driven power station, with a capacity of 5,000 kw., was put into operation at Obninsk (Kaluga region) on 27 June 1954; the Novo-Voronezh station (210,000 kw.) began operating in Dec. 1964, and at Beloyarsk (1m. kw.) in 1965. A station on the Gulf of Finland (2m. kw.) is nearing completion. Other such stations are being built at Kirovsk in the north; Novy Uzen, on the Caspian; Bilibino, Shevchenkovo and elsewhere.

At 19 thermal power stations new generating sets of 300,000 kw. each were installed in 1970 and others begun with capacity of up to 1·2m. kw. New stations completed under the 8th 5-year plan totalled 54m. kw. capacity.

The integrated power grid of European USSR had a capacity of 80m. kw. in 1968. A Central Siberian grid (20m. kw.) is being set up.

A unified power grid ('Mir') with all the Socialist countries of eastern Europe was built up between 1962 and 1967.

TRADE UNIONS AND LABOUR. Trade unions are organized on an industrial basis, all workers, whether manual or brain, in every branch of a given industry being eligible for membership of the same union.

Since 1933 the trade unions have carried out the functions of the former Labour Commissariat; they control and supervise the application of labour laws, introduce new labour laws for approval by the Government and administer social insurance and factory inspection. Social insurance is non-contributory. The All-Union Congress has met at irregular intervals; the 14th Congress met in 1968 and the 15th in 1972.

In 1944 there were 176 unions. This number was reduced by amalgamation of unions to 22 in 1958, but increased to 25 in 1968; membership in 1971, 93m. (including wage-earners in collective farms). Contributions range from 0·5 to 1% of wages.

Chairman, Central Council of Trade Unions: A. N. Shelepin.

The average number of industrial and clerical workers engaged (1970) in the whole national economy of the Soviet Union was 90·2m. The 7-hour day (6 hours for miners underground and other heavy trades) was generally in operation by the end of 1960. The average working week in 1970 was 39·4 hours and the working day in industry 6·93 hours. The 5-day week (without reduction of total working hours) was introduced in 1967.

New 'Fundamentals of Labour Legislation', intended to codify and extend labour laws adopted in the last 40 years, were adopted by the Supreme Soviet in July 1970. They lay down, *inter alia*, the right to receive wages irrespective of the income of the enterprise concerned, the right to free vocational and advanced technical training; the right to form trade unions without state registration; the right of trade unions to participate in and supervise management and planning, labour legislation, safety regulation and housing, fixing of working conditions and wages, etc. Pensioners in Jan. 1971 numbered 41m., including 37m. old age, invalid, widows; over 4m. war pensioners; 12m. were collective farmers.

COMMERCE. Retail home trade takes three forms—state, co-operative and the free market, *i.e.*, sales by individual collective-farm members and by the collective farms of their surplus products, after having fulfilled their statutory deliveries and made their regular allocations to their members.

In Dec. 1970 the consumer co-operative societies had a membership of 60m. and did over 29% of the retail trade of the USSR. They were organized in 14,900 societies, employing 2·7m. workers, with 299,000 rural shops, 73,000 catering establishments, 13,000 bakeries and 460 canneries. Their central union is affiliated to the International Co-operative Alliance. Retail trade by the State and co-operatives totalled 155,200m. roubles in 1970; by collective farm markets (agricultural produce), 4,300m. roubles.

Foreign trade is organized as a state monopoly. Importation and exportation of goods are effected under licences issued by the Ministry for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government. The right of purchasing goods for importation, and that of selling Soviet exports abroad, is vested in Trade Delegations and representatives of the appropriate state corporations in foreign countries.

There are 29 state import and export organizations, including chartering and tourist corporations (one, Vostokintorg, dealing with Mongolia, Sinkiang and Afghánistán). The Central Union of Consumers' Societies (Centrosoyuz) is also authorized to conduct foreign trade operations.

For foreign trade up to 1938 *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1465. The Central Statistical Department of the USSR estimates that, in comparable prices, the volume of foreign trade in 1938 was less than one-third that of 1913, but was in 1970, 5·7 times as large as in 1913. Exports in 1970 were valued at 11,520m. roubles (7,530m. to the Socialist countries), and imports at 10,565m. roubles (6,880m. from the Socialist countries).

Russia's imports of fuel and raw materials, between 1913 and 1970, declined from 50·8 to 24%, of machinery and equipment increased from 16·6 to 35·1%; imports of manufactured consumer goods increased from 10·3 to 18·3%.

Main items of exports in 1970:

Oil (1 m. tons)	66·8	Vegetable oil (1,000 tons)	372·0
Coal (1m. tons)	24·5	Tractors (1,000)	28·3
Iron ore (1m. tons)	36·1	Lorries (1,000)	34·9
Iron and rolled metal (1m. tons)	11·8	Motor cars (1,000)	83·8

RAILWAYS. The length of railways in Jan. 1971 was 135,200 km (1913: 58,500). By the end of 1970, 110,100 km of main-line railways had changed to electric and diesel traction, and 96·5% of railway freights went by these means In 1970, 65% of all goods traffic and 48% of passenger transport went by rail (in 1913, 57% and 91% respectively). The Moscow–Donetz, Leningrad–Leninakan and Moscow–Baikal lines have been electrified.

There are 43 main railway systems which may be grouped as follows:

In the west: Estonian (1,388 km), Latvian (3,100 km) and Lithuanian (2,100 km), Kalinin (2,064 km, Moscow–Orsha and Moscow–Zilupe, centre at Smolensk), Belorussian (5,800 km), October (Moscow–Leningrad, centre Leningrad, 3,857 km), Lvov (south-western Ukraine, 4,257 km), South-western (centre Kiev–western Ukraine and southern Belorussia, 3,888 km), Moscow–Kiev (centre Kaluga–western Russia, eastern Belorussia, north-Ukraine, western 3,821 km).

In the north: Northern (Moscow and north European Russia, centre Yaroslavl, 3,750 km), Pechora (centre Kotlas: north-eastern European Russia, 1,953 km), Kirov (Murmansk–Petrozavodsk–Volhovstroi, centre Petrozavodsk, 3,587 km).

In the European south: Moscow–Kursk–Donbass (centre Moscow, 3027 km), Southern (centre Kharkov: eastern Ukraine, south-eastern Russia, 3,304 km), South-Eastern (centre Voronezh: Ukraine–Urals, Rostov–Penza regions, 2,579 km), Odessa (south-eastern Ukraine–south-western Moldavia, centre Odessa, 3,839 km), Moldavian (Kishinev, 1,200 km), Stalin (centre Dnepropetrovsk, links this heavy-industry area with the Black Sea coast, 3,298 km), North Caucasus (centre Rostov-on-Don, 3,391 km), Ordzhonikidze (links northern Caucasus Autonomous Republics with Caspian coast, centre Ordzhonikidze, 1,708 km). Donetz (centre Donetsk, served the Donetz coalfield, 2,862 km). The entire route from Leningrad to Simferopol (Crimea) was electrified during 1970.

In eastern European Russia: Moscow–Ryazan (centre Moscow, 2,089 km), Kazan (centre Kazan, links Volga with Urals, 2,783 km), Gorky (Moscow–Ryazan–north-eastern Russia, centre Gorky, 1,543 km), Ufa (links Bashkir and Tartar Republics and northern Volga regions, centre Ufa, 1,866 km), Kuibyshev (centre Kuibyshev, links Volga regions with Urals, 2,012 km), Volga (centre Saratov, links it with Volgograd and Astrakhan, 3,149 km).

In the Urals and western Asia: Sverdlovsk (centre Sverdlovsk, links northern Urals with western Siberia, 4,000 km), South Urals (centre Chelyabinsk, links eastern regions of Russia in Europe with northern Kazakhstan, 2,875 km), Orenburg (centre Orenburg, links southern Urals with Siberia, 3,150 km), Omsk (centre Omsk, links western Siberia with northern Kazakhstan and Altai, 2,050 km), Tomsk (centre Novosibirsk, links western Siberia, Kemerovo coalfield and Altai, 3,039 km).

In south-western Asia: Transcaucasian (centre Tbilisi, links Black Sea coast with Yerevan, 1,887 km), Azerbaidjan (centre Baku, 1,650 km).

In Central Asia: Tashkent (centre Tashkent, links Tadjik, Uzbek, Kirgiz and Kazakh republics with Orenburg, 2,420 km), Ashkhabad (centre Ashkhabad, links Caspian coast and Turkmen Republic with Uzbekistan, 2,647 km), Kazakh (centre Alma-Ata, 9,000 km). The 334-km Guriev–Astrakhan railway, across the Caspian desert, began operating on 1 Jan. 1971, shortening the route from Central Asia to the Caucasus by nearly 700 km.

In central and eastern Siberia: Krasnoyarsk (centre Krasnoyarsk, a part of Trans-Siberian line but with new branches serving the Khakass and Tuva republics, 1,279 km), East Siberia (centre Irkutsk, serves Irkutsk region and Buryat Republic with link to Mongolian People's Republic, 1,696 km), Transbaikal (centre Chita, part of Trans-Siberian line but serving Buryatia and linked with China and Mongolia, 3,320 km). The Abakan–Taishet line, connecting the South-Siberian and main Trans-Siberian lines and linking the Bratsk and Kuznetzk industrial areas (640 km), began operating in 1964 with electric traction.

A line from Khrebtovaya, on the Taishet–Zena railway in East Siberia, to Ust-Ilimskaya on the Angara (215 km) has been opened, as the first section of a new North Siberian main line.

In the Far East: Far Eastern (centre Habarovsk, serves Maritime regions, 1,712 km), Amur (centre Blagoveshchensk, part of Trans-Siberian line, serves the Amur valley, 2,468 km), South Sahalin (centre Yuzhno-Sahalinsk, 752 km).

SHIPPING. In 1967 the Soviet mercantile marine comprised 1,350 vessels of 11m. tons deadweight, of which 80% were built between 1957 and 1966. By the end of 1971 the tonnage was 16·2m. tons.

Freights carried were: In 1913 (present frontiers), 15·1m. tons; in 1940, 31·2m. tons; in 1950, 33·7m. tons, and in 1970, 161·9m. tons; 32·5m. passengers were carried. The Soviet share in world marine tonnage was 2% in 1960 and 6·6% in 1971.

The North Sea route affords convenient communication between the European USSR and the Far East along the Soviet coast, for the produce of the basins of the Obi, Yenissei, Lena and Kolyma rivers.

The length of navigable rivers and canals in exploitation was (1970) 144,500 km, of which the length of floatable rivers is 83,800 km. There are several thousand miles of canals and other artificial waterways; among them the Baltic and

White Sea Canal (235 km), the Moscow–Volga Canal (130 km). Goods turnover on inland waterways was 28,900m. ton-km in 1913, 35,900m. in 1940, 45,900m. in 1950 and 174,000m. in 1970; freight carried rose from 35·1m. tons in 1913 to 357·8m. tons in 1970.

The Volga–Don Shipping Canal was opened for traffic in 1952. The Volga–Don waterway from Volgograd to Rostov is 540 km long, of which the Volga–Don canal comprises 101 km. The canal has transformed the section of the river from Kalach, where the Don is joined by the Volga–Don canal, to Rostov into a deep-water highway suitable for big Volga shipping. The canal links the White, Baltic, Caspian, Azov and Black Seas into a single water transport system. In Oct. 1964 the 2,430-km Baltic–Volga waterway, linking Klaipeda on the Baltic to Kahovka at the mouth of the Dnieper and suitable for 5,000-ton vessels, was begun. Reconstruction of the 18th-century Mariinsky canal system in north-west Russia was completed, providing a through waterway from Leningrad to Rybinsk (on the Upper Volga) and cutting the passage of freight from 18 to $2\frac{1}{2}$ days.

In 1962 a canal was completed across the Kara-Kum desert in southern Turkmenistan (replacing an earlier project for a more costly scheme across the north of the republic). The canal, from Bussag on the river Amu-Darya to Archnan, north-west of Ashkhabad, through the Murgab oasis, 820 km long, supplies water to an area exceeding 200,000 hectares, suitable for cotton, fruit, vineyards and livestock. An extension to the Caspian (500 km) is under construction.

An irrigation canal system (250 miles), bringing water from Kahovka on the Dnieper to North Crimea, is nearing completion. Work on diverting water from the Pechora and Vychegda rivers (flowing into the White Sea) south to the Volga is in progress. Work has begun on a 300-mile canal which will supply water from the Irtysh to Karaganda in Central Kazakhstan, irrigating over 150.000 acres; the first 37 miles were opened in 1965 and another 45 miles in Dec. 1967.

ROADS. By 1941 there were over 1·5m. km of constructed roads, of which 143,000 km were suitable for motor traffic. The total length of motor roads in 1970 was 511,600 km. Road freights by lorry amounted to 859m. tons in 1940 and 14,623m. tons in 1970. Passengers carried were 590m. in 1940 and 26,365m. in 1970. In 1970, 17,171 inter-urban bus routes had a total length of 2,118,200 km.

AVIATION. In 1970 total length of internal airlines in the USSR was approximately 596,000 km; 71m. passengers were carried. The Central Asian Airways in some instances provide the only means of communication across the desert and mountainous regions of the local republics. An 8,500-km air service was opened in Feb. 1941 between Moscow and Anadyr (Eastern Siberia), through Archangel, Igarka, Khatanga, Tiksi Bay and Cape Schmidt, *i.e.*, along the entire course of the Northern Sea Route. There are also other Arctic airlines, *e.g.*, Igarka–Gulf of Kozhevnikov; Igarka–Dickson Island; Yakutsk–Tiksi Bay; Yakutsk–Viluisk; Yakutsk–Verkhoiansk.

Direct air services are maintained throughout the year between Moscow and the capitals of all Soviet republics as well as London, New York, Montreal, Tokyo, Delhi, Rangoon, Belgrade, Peking, Pyongyang, Ulan Bator, Kabul, Tirana, Paris, Warsaw, Prague, Budapest, Bucharest, Sofia, Vienna, Berlin, Helsinki, Stockholm, Copenhagen, Djakarta and Dakar.

Soviet air services reach 57 countries, and 20 foreign lines have regular services to the USSR, including BEA, KLM, SAS, Air France, SABENA, Air India, PANAM.

POST. In Dec. 1970 the number of post, telegraph and telephone offices was 81,000 and of telephones 11m.

The international radio-telecommunications services are operated by the Ministry of Communications of the USSR. The Great Northern Telegraph Co., Ltd, of Denmark, operate cables connecting Denmark with Leningrad, whence connexion is made by means of a trans-Siberian landline with Vladivostok. From the latter place the Great Northern Telegraph Co. owns cables connecting with Japan, China and Hong Kong. Direct radio and telephone communication with India is provided for in an agreement concluded in 1955.

At the end of 1970 there were 1,233 television and rediffusion centres, and 34·8m. television sets.

BANKING. The State Bank began operations on 16 Nov. 1921. By an edict of 7 April 1959 a number of specialized banks for planned long-term investments, which had existed since 1932, were abolished. The State Bank, in addition to short-term credits, effects long-term investments in agriculture and in individual rural house-building. The Bank for Financing Capital Investments (*Stroibank*) covers industry, transport, urban housing schemes and public utilities and individual house-building in towns.

Deposits in 78,300 savings banks were over 46,600m. new roubles to the credit of 80m. depositors at 1 Jan. 1971.

WEIGHTS AND MEASURES. The metric system has been in use since 1 Jan. 1927.

The Gregorian Calendar was adopted as from 14 Feb. 1918.

RUSSIAN SOVIET FEDERAL SOCIALIST REPUBLIC (RSFSR)

Rossiskaya Sovietskaya Federativnaya Sotsialisticheskaya Respublika

The RSFSR adopted its present constitution at the 17th Extraordinary All-Russian Congress of Soviets in Jan. 1937. Since then slight alterations have been introduced in the constitution from time to time.

President, Presidium of the Supreme Soviet: M. A. Yasnov.
Chairman, Council of Ministers: G. I. Voronov.
Foreign Minister: A. Rodionov.

A special bureau of the Central Committee of the Communist Party of the USSR has been set up for the RSFSR.

The RSFSR consists of:

(1) *Territories:* Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Primorye, Stavropol.

(2) *Regions:* Amur, Archangel, Astrakhan, Belgorod, Briansk, Chelyabinsk, Chita, Gorki, Irkutsk, Ivanovo, Kaluga, Kalinin, Kaliningrad, Kamchatka, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Novgorod, Novosibirsk. Omsk, Orel, Orenburg Penza, Perm, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Voronezh, Yaroslavl.

(3) *Autonomous Soviet Socialist Republics:* Bashkir, Buryat, Checheno-Ingush, Chuvash, Daghestan, Kabardino-Balkar, Kalmyk, Karelian, Komi, Mari, Mordovian, North Ossetia, Tatar, Tuva, Udmurt, Yakut.

(4) *Autonomous Regions:* Adygei, Karachayevo-Cherkess, Gorno-Altai, Jewish, Khakass.

(5) *National Areas:* Aginsky Buryat, Chukot, Evenki, Khanty-Mansi, Komi-Permyak, Koryak, Nenetz, Taimyr (Dolgano-Nenetz), Ust-Ordynsky Buryat, Yamalo-Nenetz.

The Supreme Soviet, elected in June 1971, consisted of 894 deputies (1 per 150,000 population); 66·8% were Communists and 34·6% women.

On 13 June 1971, 1,092,653 deputies were elected to local authorities; 515,631 (47·2%) were women, 619,141 (56·7%) non-Party and 678,435 (62·1%) industrial workers and collective farmers.

AREA AND POPULATION. The RSFSR occupies over 76% of the total area of the USSR stretching from the Far North to the Black Sea in the south and from the Far East to Kaliningrad in the west. 82·8% of its population in Jan. 1970 were Russians, the rest being 38 national minorities such as the Tartars, Jews, Mordovians, Chuvashis, Bashkirs, Poles, Germans, Udmurts, Buryats, Mari, Yakuts and Ossetians. The 2 principal cities are Moscow, the capital, with a population (est. Jan. 1971) of 7·17m. (without suburbs, 7,050,000), and Leningrad, the second capital, 4m. (without suburbs, 3,563,000). Among other important large towns are Gorki, Rostov-on-Don, Volgograd, Sverdlovsk, Novosibirsk, Chelyabinsk, Kazan, Omsk and Kuibyshev.

The RSFSR has a variety of climates (ranging from arctic to sub-tropical) and of geographical conditions (tundra, forest lands, steppes and rich agricultural soil). It also contains great mineral resources: iron ore in the Urals, the Kerch Peninsula and Siberia; coal in the Kuznetz Basin, Eastern Siberia, Urals and the sub-Moscow Basin; oil in the Urals, Azov–Black Sea area and Bashkiria. It also has abundant deposits of gold, platinum, copper, zinc, lead, tin and rare metals.

The RSFSR produces about 70% of the total industrial and agricultural output of the Soviet Union. Industrial and office workers averaged 54·4m. in 1970.

EDUCATION. In 1970–71 there were 25·4m. pupils in 104,066 primary 7-year and secondary schools, technical schools and other secondary educational establishments; 2,671,700 students in 457 higher educational establishments (including correspondence students) and 2,606,200 students in 2,423 technical colleges of all kinds (including correspondence students). There were 4·1m. children attending 51,676 kindergartens. There were, on 1 Jan. 1971, 631,111 scientific staff in 2,527 learned and scientific institutions.

In 1957 a Siberian branch of the Academy of Sciences was organized, in charge of all scientific research institutions from the Urals to the Pacific.

There is an Academy of Municipal Economy (with 5 research institutions and a staff of 421).

Newspapers. In 1970 there were 4,445 newspapers, 4,160 of them in Russian, with a circulation of 93,715,000 and 91,372,000 respectively.

HEALTH. Doctors at the end of 1970 numbered 378,400, and hospital beds 1·47m. (133,400 in 1913 and 482,000 in 1940); 1·57m. infants in crèches.

FINANCE. Revenue and expenditure balanced as follows (in 1m. new roubles): 1963, 27,862; 1964, 29,293; 1965, 31,635; 1966, 33,162; 1967, 27,696; 1968, 28,737; 1969, 32,193; 1970, 41,146 (with a balance of 761m.).

Annual planned investments in the national economy rose from 14,762m. roubles in 1956 to 44,427m. in 1970.

COMMUNICATIONS. Length of railways on 1 Jan. 1971, was 77,550 km, inland waterways 123,900 km, hard-surface motor roads 221,500 km.

BASHKIRIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area 143,600 sq. km (55,430 sq. miles), population (Jan. 1971) 3,838,000 Capital, Ufa. Bashkiria was annexed to Russia in 1557. It was constituted as an Autonomous Soviet Republic on 23 March 1919. 254 deputies were elected on 13 June 1971.

There are expanding chemical, coal, steel, electrical engineering, timber and paper industries. There were 636 collective farms and 106 state farms in 1970. Bashkiria is the second largest oil producer in USSR.

In 1970 there were over 5,000 schools with 925,400 pupils. There is a state university and a branch of the USSR Academy of Sciences. There were 62,200 students in technical colleges and 42,700 receiving higher education.

In Jan. 1971 there were 3,460 doctors and 35,595 hospital beds.

BURIAT AUTONOMOUS SOVIET SOCIALIST REPUBLIC

The Buriat Republic, situated to the south of the Yakut Republic, adopted the Soviet system on 1 March 1920. This area was penetrated by the Russians in the 17th century and finally annexed from China by the treaties of Nerchinsk (1689) and Kyakhta (1727).

The area is 351,300 sq. km (135,650 sq. miles). The population (Jan. 1971) was 817,000. Capital, Ulan-Udé. The name of the Republic was changed from 'Buriat-Mongol' on 7 July 1958.

137 deputies were elected on 13 June 1971.

The main industries are coal, timber, building materials, fisheries, sheep and cattle farming. In 1970 there were 63 state and 77 collective farms. Gold, molybdenum and wolfram are mined.

In 1970 there were over 700 schools with 199,700 pupils, 16 technical colleges with 21,500 students and 2 higher educational institutions with 20,200 students.

At the end of 1970 there were 1,467 doctors and 9,600 hospital beds.

CHECHENO-INGUSH AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 19,300 sq. km (7,350 sq. miles); population (Jan. 1971), 1,084,000 Capital, Grozny. After 70 years of almost continuous fighting, the Chechens and Ingushes were conquered by Russia in the late 1850s. In 1918 each nationality separately established its 'National Soviet' within the Terek Autonomous Republic, and in 1920 (after the Civil War) were constituted areas within the Mountain Republic. The Chechens separated out as an Autonomous Region on 30 Nov. 1922 and the Ingushes on 7 July 1924. In Jan. 1934 the two regions were united, and on 5 Dec. 1936 constituted as an Autonomous Republic. This was dissolved in 1944, but reconstituted on 9 Jan. 1957: 232,000 Chechens and Ingushes returned to their homes in the next 2 years.

149 deputies were elected on 13 June 1971.

The Republic has one of the major Soviet oilfields: also a number of large engineering works, chemical factories, building materials works and food canneries. There is an expanding timber, woodworking and furniture industry. In 1970 there were 54 state and 51 collective farms.

There were, in 1970, 464 schools with 278,200 pupils, 10 technical colleges with 14,800 students and 2 places of higher education with 12,800 students.

In 1970 there were 75 hospitals.

CHUVASH AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 18,300 sq. km (7,064 sq. miles); population (Jan. 1971), 1,237,000 Capital, Cheboksary. The territory was annexed by Russia in the middle of the 16th century. On 24 June 1920 it was constituted as an Autonomous Region, and on 21 April 1925 as an Autonomous Republic.

153 deputies were elected on 13 June 1971.

Like most of the Autonomous Republics, Chuvashia before 1914 was a region of primitive agriculture, with a certain development of the timber industry. Today it has several big railway repair works, an expanding electrical and other engineering industry, building materials, chemicals, textiles and food industries; timber felling and haulage are largely mechanized. There are 321 collective farms and 46 state farms. Grain crops account for nearly two-thirds of all sowings and fodder crops for nearly a quarter. Fruit and wine-growing are a developing branch of agriculture.

In 1970 there were 865 schools attended by 291,200 children, 22 technical colleges with 21,600 students and 3 places of higher education with 12,600 students.

There were 2,013 doctors and 12,000 hospital beds.

DAGESTAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 50,300 sq. km (19,416 sq. miles); population (Jan. 1971), 1,457,000. Capital, Mahachkala. Over 30 nationalities inhabit this republic apart from Russians; the most numerous are the Avartsy, Dargintsy, Lezginy, Kumyki, Laki, Tabasarany and Azerbaidjanis. Annexed from Persia in 1723, Dagestan was constituted an Autonomous Republic on 20 Jan. 1921.

181 deputies were elected on 13 June 1971.

There are large engineering, oil, chemical, woodworking, textile, food and other light industries. Agriculture is very varied, ranging from wheat to grapes, with sheep farming and cattle breeding; in 1970 there were 376 collective farms and 167 state farms. A chain of power stations is under construction in the Sulak River (total capacity 2·5m. kw.).

In 1970 there were 1,665 schools with 398,900 pupils, 26 technical colleges with 23,100 students and 4 higher educational establishments with 20,400 students; and a branch of the USSR Academy of Sciences. Doctors numbered 2,977 and hospital beds 7,300.

On 14 May 1970 an earthquake rendered 35,668 families homeless, destroyed school buildings and hospitals. By 1 Nov. considerable progress had been made in rehousing and classes were restarted in 170 new and repaired schools.

KABARDINO-BALKAR AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 12,500 sq. km (4,825 sq. miles); population (Jan. 1971), 600,000. Capital, Nalchik. Kabarda was annexed to Russia in 1557. The Republic was constituted on 5 Dec. 1936.

142 deputies were elected on 13 June 1971.

Main industries are ore-mining, timber, engineering, coal, food processing, timber and light industries, building materials. Grain, livestock breeding, dairy farming and wine-growing are the principal branches of agriculture. There were, in 1970, 35 state and 75 collective farms.

In 1970 there were 320 schools with 141,600 pupils, 9,700 students in technical colleges and 9,000 students receiving higher education; over 1,200 doctors and 5,000 hospital beds.

KALMYK AUTONOMOUS SOVIET SOCIALIST REPUBLIC

The Kalmyks migrated from western China to Russia (Nogai Steppe) in the early 17th century. The territory was constituted an Autonomous Region on 4 Nov. 1920, and an Autonomous Republic on 22 Oct. 1935; this was dissolved in 1943. On 9 Jan. 1957 it was reconstituted as an Autonomous Region and on 29 July 1958 as an Autonomous Republic once more.

118 deputies were elected on 13 June 1971.

Area, 75,900 sq. km (29,300 sq. miles); population (Jan. 1971), 267,000. Capital, Elista (52,000).

Main industries are fishing, canning and building materials. Cattle breeding and irrigated farming (mainly fodder crops) are the principal branches of agriculture. In 1970 there were 64 state and 23 collective farms.

In 1970 there were 68,100 pupils in 242 schools, 5,500 students in technical colleges and 2,500 at a pedagogical institute; 540 doctors and 2,960 hospital beds.

KARELIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Before 1917, Karelia (then known as the Olonetz Province) was noted chiefly as a place of exile for political and other prisoners.

After the November Revolution of 1917, Karelia formed part of the RSFSR. In June 1920 a Karelian Labour Commune was formed and in July 1923 this was transformed into the Karelian Autonomous Soviet Socialist Republic (one of the autonomous republics of the RSFSR). On 31 March 1940, after the Soviet–Finnish war, practically all the territory (with the exception of a small section in the neighbourhood of the Leningrad area) which had been ceded by Finland to the USSR was added to Karelia and the Karelian Autonomous Republic was transformed into the Karelo-Finnish Soviet Socialist Republic as the 12th republic of the USSR. In 1946, however, the southern part of the Republic, including its whole seaboard and the town of Viipuri (Vyborg) and Keksholm, was attached to the RSFSR. In 1956 the status of the Republic was changed (*see* p. 1391).

Karelia is chiefly noted for its wealth of timber, some 70% of its territory being forest land. It is also rich in other natural resources, having large deposits of diabase, spar, quartz, marble, mica, granite, zinc, lead, silver, copper, molybdenum, tin, baryta, iron ore, etc. Karelia takes first place in the USSR for the production of mica. It has 43,643 lakes, which, as well as its rivers, are rich in fish.

Area and Population. The Karelian Autonomous Republic, capital Petrozavodsk, covers an area of 172,400 sq. km, with a population of 711,000 (Jan. 1971).

133 deputies were elected on 13 June 1971.

Education. In 1970 there were 145,100 pupils in 747 schools. There were 10,100 students in 3 places of higher education and 15,900 in 10 technical colleges.

There are in Petrozavodsk a university (2,499 students in 1961), 2 other higher institutes and a teachers' training college. A branch of the Academy of Sciences was set up in 1949.

Health. There were 1,900 doctors in 1970, and 9,925 hospital beds.

Agriculture. There were 12 collective farms and 56 state farms in 1970. Livestock on 1 Jan. 1971 included 84,000 cattle, 46,000 pigs, 69,000 sheep and goats.

Industry. The Republic has some 25 large-scale enterprises, such as timber-mills, paper-cellulose works, mica, chemical plants, electrical stations and furniture factories. Output, 1970: Timber, 15·8m. cu. metres; paper and cellulose, 1,208,000 tons; power, 2,509m. kwh.; canned fish, 8·97m. tins.

The construction of the White Sea–Baltic Canal had a powerful influence on the economic development of Karelia. New refrigerating plants, cellulose factories and timber industry equipment began working in 1970.

Communications. A railway between Petrozavodsk and Suoyarvi connects the capital and the Murmansk Railway with the main railway line Sortavala–Vyborg. A railway line was also laid between Kandalaksha and Kuolayarvi. Length of track, 1,600 km.

KOMI AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 415,900 sq. km (160,540 sq. miles); population (Jan. 1971), 974,000. Capital, Syktyvkar (131,000). Annexed by the princes of Moscow in the 14th century and occupied by British and American forces in 1918–19, the territory was constituted as an Autonomous Region on 22 Aug. 1921 and as an Autonomous Republic on 5 Dec. 1936.

156 deputies were elected on 13 June 1971.

There are large coal, oil, timber, gas, asphalt and building materials industries; light industry is expanding. Livestock breeding (including dairy farming) is the main branch of agriculture. There were 39 state and 25 collective farms in 1970.

In 1970 there were 215,300 children in 789 schools, 7,900 students receiving higher education, 18,100 students in 13 technical colleges; and a branch of the Academy of Sciences.

There were 2,639 doctors and 14,000 hospital beds.

MARI AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 23,200 sq. km (8,955 sq. miles); population (Jan. 1971), 687,000. Capital, Yoshkar-Ola. The Mari people were annexed to Russia, with other people of the Kazan Tartar Khanate, when the latter was overthrown in 1552. On 25 Nov. 1920 the territory was constituted as an Autonomous Region, and on 5 Dec. 1936 as an Autonomous Republic.

120 deputies were elected on 13 June 1971.

There are over 300 modern factories. The main industries are metalworking, timber, paper, woodworking and food processing. There are 139 collective farms and 36 state farms. Over 69% of cultivated land is under grain, but flax, potatoes, fruit and vegetables are also expanding branches of agriculture, as is also livestock farming.

Estimated reserves of the Pechora coalfield are 262,000m. tons.

In 1970 there were 714 schools with 162,700 pupils, 12 technical colleges and institutes with 10,400 students and 2 higher educational establishments with 11,700 students; also 1,210 doctors and 7,750 hospital beds.

MORDOVIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 26,200 sq. km (10,110 sq. miles); population (Jan. 1971), 1·03m. Capital, Saransk. By the 13th century the Mordovian tribes had been subjugated by the Russian princes of Ryazan and Nizhni-Novgorod. In 1928 the territory was constituted as a Mordovian Area within the Middle-Volga Territory, on 10 Jan.

1930 as an Autonomous Region and on 20 Dec. 1934 as an Autonomous Republic.

146 deputies were elected on 13 June 1971.

The Republic has a wide range of industries: Electrical, timber, cable, building materials, furniture, textile, leather and other light industries. Agriculture is devoted chiefly to grain, sugar-beet, sheep and dairy farming. In 1968 there were 48 state and 320 collective farms.

There were 246,600 children at school, 15,800 students in technical colleges and 18,700 at the state university and institutes, in 1970. There were 1,500 doctors and 8,600 hospital beds.

NORTH OSSETIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 8,000 sq. km (3,088 sq. miles); population (Jan. 1971), 560,000. Capital, Ordzhonikidze (formerly Vladikavkaz). The Ossetians, known to antiquity as Alani (who were also called by their immediate neighbours 'Ossi' or 'Yassi'), were annexed to Russia after the latter's treaty of Kuchuk-Kainardji with Turkey, and in 1784 the key fortress of Vladikavkaz was founded on their territory (given the name of Terek region in 1861). On 4 March 1918 the latter was proclaimed an Autonomous Soviet Republic, and after the Civil War this territory with others was set up as the Mountain Autonomous Republic (20 Jan. 1921), with North Ossetia as the Ossetian (Vladikavkaz) Area within it. On 7 July 1924 the latter was constituted as an Autonomous Region and on 5 Dec. 1936 as an Autonomous Republic. 133 deputies were elected on 13 June 1970.

The main industries are non-ferrous metals (mining and metallurgy), maize-processing (at the Beslan Works, the largest in Europe), timber and woodworking, textiles, building materials, distilleries and food processing. There is also a prosperous and varied agriculture. In 1970 there were 20 state and 45 collective farms.

There were in 1970, 116,500 children in 261 schools, 16,000 students in technical colleges and 19,800 students in 4 higher educational establishments (pedagogical, agriculture, medical and mining-metallurgical institutes). There were over 2,000 doctors and 6,226 hospital beds in 1970.

TARTAR AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 68,000 sq. km (26,250 sq. miles); population (Jan. 1971), 3,165,000. Capital, Kazan. From the 10th to the 13th centuries this was the territory of the flourishing Volga-Kama Bulgar State; conquered by the Mongols, it became the seat of the Kazan (Tartar) Khans when the Mongol Empire broke up in the 15th century, and in 1552 was conquered again by Russia. On 27 May 1920 it was constituted as an Autonomous Republic.

207 deputies were elected on 13 June 1970.

The Republic has highly developed engineering, oil and chemical industries, while timber, building materials, textiles, clothing and food industries are also expanding. The Kama works at Naberejnye Chelny plan to produce 400,000 vehicles annually. In 1970, 588 collective and 167 state farms served a total area under crops of 3·7m. hectares.

In 1970 there were 3,492 schools with 722,600 pupils, 39 technical colleges with 47,700 students and 12 higher educational establishments with 60,300 students (including a state university). There is a branch of the USSR Academy of Sciences and a total of 39 scientific research institutions.

Doctors at the end of 1970 numbered 4,500 and hospital beds 26,200.

TUVA AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 170,500 sq. km (65,810 sq. miles); population (Jan. 1971), 235,000. Capital, Kizyl (54,000). Tuva was incorporated in the USSR as an autonomous region on 13 Oct. 1944 and elevated to an Autonomous Republic on 10 Oct. 1961. It is situated to the north-west of Mongolia, between 50° and 53° N. lat. and between 90° and 100° E. long. It is bounded to the east, west and north by Siberia, and to the south by the Republic of Mongolia. The Tuvans are a Turki people, formerly ruled by hereditary or elective tribal chiefs. (For the earlier history of the former Tannu-Tuva Republic, *see* THE STATESMAN'S YEAR-BOOK, 1946, p. 798.)

120 deputies were elected to its Supreme Soviet on 13 June 1971.

Tuva is well-watered and has much good pastoral land; 47 hydro-electric stations have been set into operation. The Tuvans are mainly herdsmen and cattle farmers, but, in 1970, 349,000 hectares were under crops. There are deposits of gold, cobalt and asbestos. The main exports are hair, hides and wool, and the imports manufactured goods and iron. There are 27 collective farms and 27 state farms. Mining, woodworking, garment, leather, food and other industries are rapidly developing.

In 1970 there were 194 schools with 59,000 pupils; 5 technical colleges with 3,570 students, and an Institute of Linguistics, Literature and History with 1,600 students; 11 newspapers (2 in Russian). There were 533 doctors and 3,340 hospital beds.

A Soviet steamer-service along the river Yenisei maintains communication with Minussinsk, in Central Siberia. Internal transport is chiefly by lorry and motor coach. There is an air service from Kizyl to Krasnoyarsk.

UDMURT AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 42,100 sq. km (16,250 sq. miles); population (Jan. 1971), 1,422,000. Capital, Izhevsk. The Udmurts (formerly known as 'Votyaks') were annexed by the Russians in the 15th and 16th centuries. On 4 Nov. 1920 the Votyak Autonomous Region was constituted (the name was changed to Udmurt—used by the people themselves—in 1932), and on 28 Dec. 1934 it was raised to the status of an Autonomous Republic.

178 deputies were elected on 13 June 1971.

Heavy industry includes the manufacture of locomotives, machine tools and other engineering products, timber and building materials. There are also light industries—clothing, leather, furniture, food, etc.

There were 68 state and 282 collective farms in 1970.

In 1970 there were 513 schools with 323,500 pupils, 20 technical colleges with 20,100 students and 5 places of higher education with 21,500 students.

There were 3,000 doctors and 14,700 hospital beds on 1 Jan. 1970.

YAKUT AUTONOMOUS SOVIET SOCIALIST REPUBLIC

The area is 3,103,000 sq. km (1,197,760 sq. miles); population (Jan. 1971), 676,000. Capital, Yakutsk (114,000). The Yakuts were subjugated by the Russians in the 17th century. The territory was constituted an Autonomous Republic on 27 April 1922.

203 deputies were elected on 13 June 1971.

The principal industries are mining (gold, tin, mica, coal) and livestock-breeding. The Soviet Trust Soyuz-Zoloto and a number of individual prospectors are working the fields. Silver- and lead-bearing ores and coal are worked; large diamond fields have been opened up. Timber and food industries are developing. There were 24 collective farms in 1970 with an area under grain of 71,000 hectares, and 49 state farms. Trapping and breeding of fur-bearing animals (sable, squirrel, silver fox, etc.) are an important source of income. A severe climate and lack of railways are serious obstacles to the economic development of the republic. There are, however, 10,000 km of roads and internal airlines totalling 10,000 km. There is an air service between Irkutsk and Yakutsk.

In 1970 there were 692 schools with 166,500 pupils; 70 were secondary schools. There are 18 technical colleges with 10,900 students, a state university and a pedagogical institute with 6,500 students and a branch of the Academy of Sciences with 15 research institutes and 539 scientific staff.

There were 1,840 doctors and 10,675 hospital beds in 1970.

ADYGEI AUTONOMOUS REGION

Part of Krasnodar Territory. Area, 7,600 sq. km (2,934 sq. miles); population (Jan. 1970), 389,000. Centre, Maikop (115,000). Established 27 July 1922.

Chief industries are timber, woodworking, food processing; but engineering is rapidly expanding. Cattle breeding predominates in agriculture. There are 41 collective and 22 state farms.

In 1970 there were 267 schools with 79,600 pupils, 6 technical colleges with 5,800 students and a pedagogical institute with 3,800 students. Regional newspapers are in Adygei and Russian. There were 790 doctors and 3,800 hospital beds.

GORNO-ALTAI AUTONOMOUS REGION

Part of Altai Territory. Area, 92,600 sq. km (35,740 sq. miles); population (Jan. 1971), 168,000. Capital, Gorno-Altaisk (35,000). Established 1 June 1922 as Oirot Autonomous Region; renamed 7 Jan. 1948.

Chief industries are gold, mercury and brown coal mining, timber chemicals and dairying. Cattle breeding predominates: pasturages and hay meadows cover over 1m. hectares, but 130,000 hectares are under crops. There are 29 collective and 26 state farms.

There are 239 primary and secondary schools with 39,600 pupils; technical colleges have 2,500 students and 1,500 students are receiving higher education. There are 188 doctors, 32 hospitals and 173 crèches and kindergartens (5,300 children).

JEWISH AUTONOMOUS REGION

Part of Habarovsk Territory. Area, 36,000 sq. km (13,895 sq. miles); population (Jan. 1971), 176,000 (Russians, 128,000; Ukrainians, 14,000; Jews, 15,000). Capital, Birobidjan (57,000). Established as Jewish National District in 1928, became an autonomous region 7 May 1934.

Chief industries are non-ferrous metallurgy, building materials, timber, engineering, textiles, paper and food processing. There are 50 factories, 136,400 hectares under crops, 51,900 cattle and 33,200 pigs. There were 22 state farms and 2 collective farms in 1968.

In 1970 there were 35,000 schoolchildren; students in technical colleges numbered 4,665. There are a Yiddish national theatre, a Yiddish weekly paper and a Yiddish broadcasting service. Doctors number 223 and hospital beds 1,835.

KARACHAYEVO-CHERKESS AUTONOMOUS REGION

Part of Stavropol Territory. Area, 14,100 sq. km (5,442 sq. miles); population (Jan. 1971), 347,000. Capital, Cherkessk (69,000). A Karachai Autonomous Region was established on 26 April 1926 (out of a previously united Karachayevo–Cherkess Autonomous Region created in 1922), and dissolved in 1943. A Cherkess Autonomous Region was established on 30 April 1928. The present Autonomous Region was re-established on 9 Jan. 1957.

Ore-mining, engineering, chemical and woodworking industries have been built up since 1917. There are 70 large factories, and a copper works and sugar factory are under construction. A large irrigation scheme, Kuban–Kalaussi, is being developed, to irrigate 200,000 hectares. Livestock breeding and grain growing predominate in agriculture; crop area is 201,000 hectares.

There are 84,400 pupils in 220 schools, 6 technical colleges with 2,100 students and 2 institutes with 1,700 students; 500 doctors and 2,650 hospital beds.

KHAKASS AUTONOMOUS REGION

Part of Krasnoyarsk Territory. Area, 61,900 sq. km (23,855 sq. miles); population (Jan. 1971), 447,000. Capital, Abakan (95,000). Established 20 Oct. 1930.

Coal- and ore-mining, timber and woodworking industries have been highly developed since 1917. The region is linked by rail with the Trans-Siberian line. Large textile and sugar factories are being built.

In 1970 about 628,000 hectares were under crops. Livestock breeding, dairy and vegetable farming are developed. There are 42 state farms and 14 collective farms.

There are 107,000 pupils in 363 schools, 7 technical colleges with 8,700 students and a pedagogical institute with 3,500 students; 630 doctors and 5,300 hospital beds. A Khakass alphabet was created after the Revolution.

UKRAINE

Ukrainska Radyanska Sotsialistichna Respublika

The Ukrainian Soviet Socialist Republic was proclaimed on 27 Dec. 1917 and was finally established in Dec. 1919. In Dec. 1920 it concluded a military and economic alliance with the Russian Soviet Federal Socialist Republic and on 6 July 1923 formed, together with the other Soviet Socialist Republics, the Union of Soviet Socialist Republics. On 1 Nov. 1939 Western Ukrain (about 88,000 sq. km) was incorporated in the Ukrainian SSR. On 2 Aug. 1940 Northern Bukovina (about 6,000 sq. km) ceded to the USSR by Rumania 28 June 1940, and the Khotin, Akkerman and Izmail provinces of Bessarabia were included in the Ukrainian SSR, and on 29 June 1945 Ruthenia (sub-Carpathian Russia), about

7,000 sq. km, was also incorporated. From the new territories 2 new regions (provinces) were formed, Chernovitz and Izmail.

The Ukrainian Soviet Socialist Republic consists of the following regions: Cherkassy, Chernigov, Chernovtzy, Crimea (transferred from the RSFSR on 19 Feb. 1954), Dniepropetrovsk, Donetsk, Ivan Franko, Khmelnitsky (formerly Kamenetz-Podolsk), Kharkov, Kherson, Kiev, Kirovograd, Lvov, Nikolaiev, Odessa, Poltava, Rovno, Sumy, Ternopol, Vinnitza, Volhynia, Voroshilovgrad, Zakarpatskaya (Transcarpathia), Zaporozhye, Zhitomir.

The Supreme Soviet, elected in 1971, consists of 484 deputies (1 per 90,000 population); 69·2% are Communists and 168 women.

At elections to regional, district, urban and rural Soviets (13 June 1971), out of 513,899 deputies returned, 222,500 (43·3%) were women, 272,321 (53%) non-Party and 369,822 (71·9%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: A. P. Lyashko (June 1969).
Chairman, Council of Ministers: V. V. Shcherbitsky.
Foreign Minister: G. G. Shevel.
First Secretary, Communist Party: P. E. Shelest.

AREA AND POPULATION. In 1938 the Ukrainian SSR covered an area of 445,000 sq. km (171,770 sq. miles); it now covers 603,700 sq. km (231,990 sq. miles).

The population in Jan. 1959 was 41,869,000. Population, Jan. 1971, 47,496,000 (75% Ukrainians, 19·4% Russians, 1·6% Jews, 1% Belorussians).

The principal towns are the capital Kiev, Kharkov, Donetsk, Odessa, Dniepropetrovsk, Lvov, Zaporozhye and Krivoi Rog.

Several Christian Churches have their adherents in the Ukraine, the chief being the Orthodox Greek Church and the Catholic Church. The Western Ukraine Uniate Church, which in 1596 had been forced by the Poles to establish unity with the Roman Church, severed this connexion in March 1946 and joined the Orthodox Church. There are also some Protestants as well as Jews and others.

EDUCATION. In 1970–71 the number of pupils in 29,902 primary, secondary and special schools was 8·45m.; 138 higher educational establishments had 806,600 students, and 760 technical colleges 797,700 students; 1·12m. children were attending 13,257 kindergartens; 3,700 crèches accommodated 452,600 infants.

The Ukrainian Academy of Sciences was established in 1919; in 1970 it had 71 institutions with 10,141 scientific staff. There is an academy of building and architecture. Total scientific staff in 740 learned institutions numbered 129,781 in 1970.

Newspapers (1970). Out of 2,618 newspapers, 2,118 were in Ukrainian, with a circulation of 20·56m. and 14·3m. respectively.

HEALTH. Doctors numbered 131,900 in 1970, and hospital beds, 511,000.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 7,887; 1964, 8,292; 1965, 9,283; 1966, 9,871; 1967, 9,900; 1968, 10,296; 1969, 10,446; 1970, 10,959.

AGRICULTURE. The Ukraine contains some of the richest land in the USSR. It raises wheat, buckwheat, beet, sunflower, cotton, flax, tobacco, soya, hops, the rubber plant kok-sagyz, fruit and vegetables, and in 1969 provided nearly a quarter of the grain production in the USSR and 58% of the sugar-beet. Nine-tenths of the grain exported from Russia came from the Ukraine. The area under cultivation was 27·9m. hectares in 1913, 27m. in 1939 before the new territories were added, and 34·1m. in 1970.

Output (in 1m. tons) in 1970 (1913 figures in brackets): Wheat, 15·6 (8); maize, 6·3 (0·87); other grains, 14·5 (14·3); sugar-beet, 46·1 (9·3); sunflower seed, 2·7 (0·07); flax, 0·09 (0·004); potatoes, 19·7 (8·5); meat and fats, 2·85 (1·1); milk, 18·7 (4·7); wool, 0·025 (0·015); 9,202m. eggs (3,005m.).

On 1 Jan. 1971 there were 21·4m. cattle, 20·7m. pigs, 8·6m. sheep, 357,000 goats. In 1949 silver-fox breeding farms were started.

On 1 Jan. 1971 there were 1,605 state farms and 9,244 collective farms.

Irrigation networks supplied 923,000 hectares of land; 1·6m. hectares were drained.

Tractors (on 15-h.p. basis) numbered 643,900 in Jan. 1971 and combine harvesters, 81,200.

INDUSTRY. Coal in the Donetz field (25,900 sq. km stretching from Donetsk to Rostov), estimated to contain 60% of the bituminous and anthracite-coal reserves of the Union, yielded, in 1961, 186·1m. metric tons—about 36% of the Union production. Large new seams have been found near Novo-Moskovsk (Dniepropetrovsk region), Kharkov, Lugansk (beyond the Don) and on the left bank of the Dnieper. Within the present frontiers of the Ukraine, coal output was 22·8m. tons in 1913, 83·8m. tons in 1940, 78m. tons in 1950 and 207·1m. tons in 1970.

Combining coal from the Donetz field with the iron-ore from the mines in Krivoi Rog has made possible the development of a large ferrous metallurgical industry in the Ukraine. Output of iron ore was 6·9m. tons in 1913, 18·9m. tons in 1940 and 111m. tons in 1970.

Manganese is also available at Nikopol.

Pig-iron output was 2·9m. tons in 1913, 9·6m. tons in 1940, 9·2m. tons in 1950 and 41·4m. tons in 1970. Steel output (in the present frontiers) was 2·4m. tons in 1913, 8·9m. in 1940, 8·4m. in 1950 and 46·6m. in 1970.

The Ukraine also contains oil, rich deposits of salt and various important chemicals. Oil output was 1m. tons in 1913 (in present frontiers), 353,000 tons in 1940 and 13·9m. tons in 1970; with 60·9m. cu. metres of natural gas.

The Ukraine has highly developed chemical and machine-construction industries producing one-fifth of the total output of machinery and chemicals in the Soviet Union. 148,000 tractors and 1,390 main-line diesel locomotives were produced in 1970.

In Northern Bukovina there are deposits of gypsum, oil, alabaster, brown coal and timber. Output of mineral fertilizers were 36,000 tons in 1913 and 11·5m. tons in 1970; cement output increased in the same years from 269,000 to 17·3m. tons (in present frontiers in both cases). Paper output in 1970 was 187,400 tons (1913: 26,900).

Consumer goods and food industries are important. Output of cotton fabrics was (in present frontiers) 4·7m. metres in 1913, 13·8m. in 1940, 20·6m. in 1950 and 248m. in 1970. Granulated sugar output in the same years was 1·1m. tons, 1·6m. tons, 1·8m. tons and 6m. tons. Leather footwear manufactured in 1940 totalled 40·8m. pairs; 1970, 145·8m.

The number of industrial and office workers at the end of 1950 was 6·9m., and the average in 1970, 16·2m. There were 1,335,000 specialists with a higher education.

During the first 5-year plan (1929–32) the Dnieper power-station was built; destroyed during the War, it was restored during the fourth plan (1946–50). Another large hydro-electric station at Kahovka began operations during the fifth plan (1951–55). Power output (in 1,000m. kwh.) increased as follows: 1913, 0·5; 1940, 12·4; 1950, 14·7; 1970, 138.

COMMUNICATIONS. The total length of railways of the Ukrainian SSR in 1970 was 22,060 km, and the navigable rivers, 4,800 km. Length of hard-surface motor roads was 90,800 km.

Airlines connect Kiev, Lvov, Chernovtsy and Odessa with Crimean and Caucasian spas, Kiev with Tbilisi, Odessa with Riga and Donetsk.

BELORUSSIA

Belaruskaya Sovietskaya Sotsialistychnaya Respublika

The Belorussian Soviet Socialist Republic was set up on 1 Jan. 1919. It forms one of the constituent republics of the USSR.

Belorussia is situated along the Western Dvina and Dnieper; it is hilly, with a general slope towards the south. It contains large tracts of marsh land, particularly to the south-west, and valuable forest land wooded with oak, elm, maple and white beech.

The Supreme Soviet, elected in 1971, consists of 425 deputies (1 per 20,000 population): 296 are Communists and 157 women.

At elections to regional, district, urban and rural Soviets (13 June 1971), of 80,648 deputies returned, 36,259 (45%) were women, 45,276 (56·1%) non-Party and 50,997 (63·2%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: F. A. Surganov.
Chairman, Council of Ministers: T. Y. Kiselyov.
Foreign Minister: A. E. Gurinovich.
First Secretary, Communist Party: P. M. Masherov.

AREA AND POPULATION. The area is 207,600 sq. km (80,134 sq. miles). The capital is Minsk. Other important towns are Gomel, Vitebsk, Mogilev, Bobruisk, Grodno and Brest. On 2 Nov. 1939 western Belorussia was incorporated with an area of over 108,000 sq. km and a population of 4·8m. The population (Jan. 1971) was 9·1m. About 81% of this population are Belorussians, 10·4% Russians, 4·3% Poles, 2% Ukrainians and 1·6% Jews.

Belorussia now comprises the following regions: Brest, Gomel, Grodno, Mogilev, Minsk, Vitebsk.

EDUCATION. In 1970–71 there were 140,000 students in 28 places of higher education and 146,100 students in 128 technical colleges. There were 21,863 scientific personnel in 185 institutions, and 235,000 specialists with a higher education employed in the national economy. The Belorussian Academy of Sciences controlled 32 learned institutions with 3,115 scientific staff. The number of children in primary, secondary and special schools was 489,000 in 1914–15, and 1·86m. in 1970–71. 198,600 children were attending 2,062 kindergartens in Jan. 1971.

Newspapers (1970). Of 175 newspapers 132 were published in Belorussian, with a circulation of 4·1m. and 1·53m. respectively.

HEALTH. In 1970 there were 23,400 doctors (900 in 1913, within present frontiers), 94,200 hospital beds (6,400 in 1913) and 26,600 cots in crèches, with another 48,200 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 1,474; 1964, 1,532; 1965, 1,661; 1966, 1,842; 1967, 2,067; 1968, 2,211; 1969, 2,499; 1970, 2,673.

AGRICULTURE. The area under cultivation (in hectares) was 4·5m. in 1913, 5·2m. in 1940 and 6m. in 1970. There were 5·4m. cattle, 4m. pigs and 663,000 sheep on 1 Jan. 1971.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Flax, 102 (33); sugar-beet, 1,019 (0); potatoes, 13,234 (4,024); meat, 685 (219); milk, 5,264 (1,429); wool, 1·2 (2·3); 1,669m. eggs (413m.).

Agriculturally, Belorussia may be divided into three main sections: Northern: growing flax, fodder, grasses and breeding cattle for meat and dairy produce; Central: potato growing and pig breeding; Southern: good natural pasture land, hemp cultivation and cattle breeding for meat and dairy produce.

At the end of 1969 there were 2,206 collective farms and 820 state farms. About 1·75m. hectares of marsh land had been drained for agricultural use, 572,000 of these for crops. This land has been found to be as rich as the soil of the Black Earth zone, and yields good harvests of grain, fodder, potatoes, kok-sagyz and other crops.

In Jan. 1971 there were 132,600 tractors and 24,500 grain combine harvesters.

INDUSTRY. Industry in this republic was almost completely destroyed during the years 1941–45. By 1956, aggregate industrial output was three times what it had been in 1940. Plants producing tip-lorries, machine-tools and agricultural machinery are prominent.

The republic also contains timber works; a match factory in Borisov; building materials, machine, pre-fabricated house construction, glass-blowing and other factories; canneries, creameries and other food industries; chemical, textiles, artificial-silk, flax-spinning and leather works.

The automobile and tractor industry produced 80,300 tractors and 29,800 lorries in 1970. Cement output, 33,000 tons in 1913, was 1,928,000 tons in 1970. Leather footwear output, 9·8m. pairs in 1940, was 37·5m. pairs in 1970. Linen fabrics, 13,000 metres in 1913, 60·9m. in 1970; woollens, 37,000 metres in 1913, 24·8 in 1970.

Particular attention has been paid to the development of the peat industry with a view to making Belorussia as far as possible self-supporting in fuel, and in 1939 local peat provided 67·5% of her total requirements of fuel. Total output in 1969 was 31m. tons (excluding collective farm output).

There are also rich deposits of rock salt. In 1951 the first sugar refinery in Belorussia was opened in Grodno; sugar output in 1970 was 180,500 tons.

Output of electricity in 1970 was 15,100m. kwh. (508m. in 1940). New power-plants have been built in Baranovichi, Grodno, Molodechno and Lida.

The number of industrial and office workers at the end of 1970 was 3·1m. and 235,000 specialists with a higher education in the national economy.

COMMUNICATIONS. There are 5,430 km of railways, 65,800 km of motor roads (25,800 km hard-surface) and 3,900 km of navigable waterways.

AZERBAIJAN

Azarbaijchan Soviet Sotsialistik Respublikasy

The 'Mussavat' (Nationalist) party, which dominated the National Council or Constituent Assembly of the Tartars, declared the independence of Azerbaijan on 28 May 1918, with a capital, first at Ganja (Elizavetpol) and later at Baku. On 28 April 1920 Azerbaijan was proclaimed a Soviet Socialist Republic. With Georgia and Armenia it formed the Transcaucasian Soviet Federal Socialist Republic. In 1936 it assumed the status of one of the Union (constituent) republics of the USSR.

The Supreme Soviet, elected in 1971, consists of 385 deputies (1 per 10,000 population); 269 are Communists and 142 women.

At elections to the Nagorno-Karabagh regional Soviet and the district, urban and rural Soviets (13 June 1971), of 45,657 deputies returned, 20,426 (44·7%) were women, 24,421 (53·5%) non-Party and 29,945 (65·6%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: K. A. Halilov.
Chairman, Council of Ministers: A. I. Ibrahimov.
First Secretary, Communist Party: G. A. Aliev.

AREA AND POPULATION. Azerbaijan covers an area of 86,600 sq km (33,430 sq. miles) and has a population (Jan. 1971) of 5,219,000. Its capital is Baku. Other important towns are Kirovabad and Sumgait (132,000). Nahichevan is the capital of the Autonomous Republic of the same name.

Azerbaijan includes the Nahichevan Autonomous Republic and the Nagorno-Karabagh Autonomous Region. Situated in the eastern area of Transcaucasia, it is protected by mountains in the west and north and washed by the Caspian Sea in the south and east. Its climate is inclined to drought.

About 74% of the population are Azerbaijan Tiurks. Other nationalities are Russians (10%), Armenians (9%) and Georgians (2·7%).

EDUCATION. In 1970–71 there were 1·44m. pupils in 5,115 elementary and secondary schools and 86,400 children attending 1,250 kindergartens. There were 79 technical colleges with 70,800 students, 13 higher educational institutions, including a state university at Baku, with 100,100 students (including correspondence students).

The Azerbaijan Academy of Sciences has 30 research institutions with 3,334, research workers. There are 130 learned and scientific institutions, with 17,082 research workers in all.

Newspapers (1970). There were 118 newspapers, 93 of them in the Azerbaijani language, with a circulation of 2·1m. and 1·7m. respectively.

HEALTH. In 1970 there were 13,100 doctors and 48,800 hospital beds. There were also 268 maternity and infant welfare centres and 300 permanent crèches for 10,600 children, with 13,600 cots in crèche-sections of kindergartens.

FINANCE (in 1m. new roubles). Estimate, 1963, 761; 1964, 820; 1965, 931; 1966, 994; 1967, 1,008; 1968, 1,105; 1969, 1,228; 1970, 1,303.

AGRICULTURE. The chief agricultural products are grain, cotton, rice, vine, fruit, vegetables, tobacco and silk. The Mexican rubber plant *grayule* has been acclimatized. A new kind of high-yielding winter wheat has been produced for use in mountainous parts of the republic.

Livestock on 1 Jan. 1971: Cattle, 1·58m.; pigs, 113,000; sheep, 4·2m.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat, 504 (315); maize, 22 (4); cotton, 336 (4); potatoes, 130 (38); tea, 9·8 (0); meat, 94 (40); milk, 478 (203); wool, 7·6 (4·1); grapes, 352; fruit, 157; 356m. eggs (94m.).

Azerbaijan has become an important cotton-growing and sub-tropical base. About 70% of cultivated land is irrigated. On the irrigated land crops of Egyptian and Sea-Island cotton are obtained. Here, too, rice and lucerne are cultivated, and in the mountain valleys there are also orchards, vineyards and silk cultures.

In the south along the coast of the Caspian, where the climate is more moist, there are tea plantations, and citrous fruits and other sub-tropical plants are grown.

In 1941 a scientific research institute for sub-tropical research was opened to develop the culture of sub-tropical plants in Azerbaijan and other parts of Transcaucasia. A forestry research institute was opened in 1949.

There were at the end of 1970, 992 collective farms, 406 state farms, 51,800 tractors and 4,100 grain combine harvesters.

INDUSTRY. The Republic is rich in natural resources: oil, iron, aluminium, copper, lead, zinc, precious metals, sulphur pyrites, limestone and salt. Iron and steel and aluminium works have been built at Sumgait.

The most important industry is the oil industry, especially in the Baku region. The output of oil was 7·7m. tons in 1913, 22·2m. tons in 1940 and 20·2m. tons in 1970. The largest producing area lies along the western shore of the Caspian Sea, north and south of Baku, where the largest refineries are located. Other wells lie west of Baku, and some have been drilled in the Caspian itself, off the Apsheron Peninsula. Baku is connected by a double pipeline with Batum on the Black Sea. All the oilfields have been electrified and are connected with Baku.

Azerbaijan has also copper, chemical, cement and building material, food, timber, salt, textiles and fishing industries. 732,600 tons of steel were produced in 1970. 1·4m. tons of cement, 133m. metres of cotton fabrics, 10·7m. pairs of leather footwear, 18·5m. metres of silk fabrics, 1·4m. tons of iron ore.

In addition to Baku, among the important industrial centres are Kirovabad, Nukha, Stepanakert, Nahichevan, Lenkoran.

In 1970 electric power output was 12m. kwh. Output of gas, which began in 1928 with 176m. cu. metres, was 5,521m. in 1970. Pipelines from Karadag to Baku and Sumgait supply gas fuel for all oil-cracking factories and most engineering works.

Synthetic rubber works (Sumgait), tyre works and a worsted combine (Baku) and a large textile combine (Mingechaur) have been built.

The number of industrial and office workers in 1970 (average for year) was 1·27m., and specialists with a higher education employed in the national economy numbered 129,000.

COMMUNICATIONS. Railway lines, apart from narrow gauge, 1,800 km. The first electrical railway (42 km) in the USSR was constructed in Azerbaijan in 1924; in 1949, 27 km was added, and the line now runs Baku–Surakhany–Sabunchi–Buzovny–Baku. The capital is also linked by rail with Tbilisi, Yerevan, Derbent, Julfa and Astara. There were, in 1970, 21,100 km of motor roads (13,400 km hard-surface) and 500 km of inland waterways.

NAHICHEVAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 5,500 sq. km (2,120 sq. miles), population (Jan. 1971), 206,000. Capital, Nahichevan (35,000). This territory, on the borders of Turkey and Iran, forms part of the Azerbaijan SSR although separated from it by the territory of Soviet Armenia. Its population, mainly Azerbaijanis, had a chequered history for 1,500 years under the ancient Persians, Arabs, Seljuk Turks, Mongols, Ottoman Turks and modern Persians before being annexed by Russia in 1828. On 9 Feb. 1924 it was constituted as an Autonomous Republic within Azerbaijan. Its Supreme Soviet, elected 13 June 1971, has 80 members.

The Republic has silk, clothing, cotton, canning, meat-packing and other factories. Nearly 70% of the people are engaged in agriculture, of which the main branches are cotton and tobacco growing. Fruit and grapes are also produced in increasing quantity. There are 68 collective and 12 state farms.

In 1970–71 there were 211 primary, 8-year and 11-year schools with 62,500 pupils. There were 1,100 pupils in 2 technical colleges.

Doctors numbered 250, and hospital beds, 1,900.

NAGORNO-KARABAGH AUTONOMOUS REGION

Populated by Armenians and Azerbaijanis, a separate khanate in the 18th century, it was established on 7 July 1923 as an autonomous region within Azerbaijan. Area, 4,400 sq. km (1,700 sq. miles); population (Jan. 1971), 152,000. Capital, Stepanakert (31,000).

Main industries are silk, wine, dairying and building materials. Crop area is 95,000 hectares; cotton, grapes and winter wheat are grown.

In 1970–71 there were 216 8-, 10- and 11-year schools and 18 schools for working youth, with over 46,000 pupils. There are a medical school, a teachers' training college and 2 agricultural schools with a total of 2,300 students; 235 doctors and 39 hospitals, with 43 polyclinics.

GEORGIA

Sakartvelos Sabchota Sotsialisturi Respublica

The independence of the Georgian Social Democratic Republic was declared at Tiflis on 26 May 1918 by the National Council, elected by the National Assembly of Georgia on 22 Nov. 1917. The independence of Georgia was recognized by the Soviet Union on 7 May 1920. On 12 Feb. 1921 a rising broke out in Mingrelia, Abhazia and Adjaria, and Soviet troops invaded the country, which, on 25 Feb. 1921, was proclaimed the Georgian Soviet Socialist Republic. At the first Transcaucasian Soviet Congress, 15 Dec. 1922, Georgia, together with Armenia and Azerbaijan, united to form the Transcaucasian Soviet Federal Socialist Republic, and a federal constitution was adopted and published 10 Jan. 1923. In 1936 the Georgian Soviet Socialist Republic became one of the constituent republics of the USSR and, like other republics of the Union, adopted a new constitution.

The Georgian Soviet Socialist Republic includes the Abhazian ASSR, the Adjarian ASSR and the South Ossetian Autonomous Region.

The Supreme Soviet, elected in 1971, consists of 400 deputies (1 per 10,000 population); 141 are women, 264 Communists.

At elections to the district, rural and urban Soviets, and that of the South Ossetian region (13 June 1971), of 48,887 deputies returned 22,623 (46·3%) were women, 26,954 (55·1%) non-Party and 31,924 (65·3%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: G. S. Dzotsenidze.
Chairman, Council of Ministers: G. D. Djavakhishvili.
First Secretary, Communist Party: V. P. Mzhavanadze.

AREA AND POPULATION. Georgia occupies the whole of the western part of Transcaucasia and covers an area of 69,700 sq. km (26,900 sq. miles). Its population on 1 Jan. 1971 was 4·73m. The capital is Tbilisi (Tiflis). Other important towns are Kutaisi, Batoumi (104,000), Sukhumi (104,000), Rustavi (102,000), Poti (42,500), Gori (33,100).

Protected from the north by the Caucasian mountains, and receiving in the west the warm, moist winds from the Black Sea, into which most of its rivers flow, Georgia is outstanding for its fine, warm climate and its natural wealth, variety and beauty It has the highest snow-capped peaks of the Caucasian mountains. Georgia contains valuable sulphur and other medicinal springs. Georgians, an ancient highly cultured people, form 66·8% of the population; Armenians, 9·7%; Russians, 8·5%; Azerbaijanis, 4·6%.

EDUCATION. In 1970–71 there were 1,036,000 pupils in 4,571 primary and secondary schools, 53,100 in 100 technical colleges and 89,300 students in 18 higher educational institutions. Tbilisi University has 15,000 students. In towns, 11 years' education is usual. In Abastuman there is an astro-physical observatory. In 1936 a branch of the Academy of Sciences of the USSR was formed in Tbilisi, and in Feb. 1941 a Georgian Academy of Sciences was opened, which in 1970 had

41 institutions with scientific staff totalling 4,157. There were in all 188 research institutions with 20,160 scientific staffs.

In 1970, 98,300 children were attending 1,417 kindergartens.

Newspapers (1970). Out of 142 newspapers, 122 were in Georgian, with a circulation of 3·06m. and 2·58m. respectively.

HEALTH. There were 17,100 doctors and 43,100 hospital beds in 1970. Permanent crèches had 11,100 cots, with 6,500 cots in crèche-sections of kindergartens.

FINANCE (in 1m. new roubles). Budget estimates, 1963, 804; 1964, 837; 1965, 945; 1966, 994; 1967, 980; 1968, 1,018; 1969, 1,154; 1970, 1229.

AGRICULTURE. There are 3 main agricultural areas: (1) The moist subtropical area along the Black Sea coast, where are cultivated tea, citrus fruits (lemons, oranges, mandarins, etc.), the tung tree (which yields special industrial oils), eucalyptus, bamboo, high-quality tobacco; (2) Imeretia (the Kutais region). where the chief cultures are grapes and silk, and (3) Kakhetia, along the Alazani (a tributary of the Kura River), famed for its orchards and wines. Land (in hectares) under cultivation was 748,000 in 1913, 896,000 in 1940, 778,000 in 1961, 737,000 in 1970.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat, 190 (158); maize, 333 (184); sugar-beet, 124 (0); fruit, 509; grapes, 579; tea in leaf, 259; meat, 104 (49); wool, 4·7 (3·4); milk, 518 (222); silk, 424; 397m. eggs (119m.); wine, 14·3m. decalitres.

In 1970 there were 1,265 collective farms working over 77% of all agricultural land, 231 state farms working nearly 23% of such land. In the Colchis area 115,000 hectares of extremely rich land have been reclaimed. There are 347,000 hectares of irrigated land. 138,700 hectares of marshland have been drained. Tractors numbered 35,400; grain combines, 1,600.

Livestock on 1 Jan. 1971: Cattle, 1·5m.; pigs, 687,000; sheep, 1,814,000.

Georgia is rich in forest lands where fine varieties of timber are grown. Area covered by forests, 2·4m. hectares.

INDUSTRY. The most important mining industry of Georgia is the exploitation of the manganese deposits, the richest of which lie in the Chiatura region, where 3m. tons of ore were produced in 1965. Manganese deposits in Georgia are calculated at 250m. tons, distributed over an area of 140 sq. km. The most important coal seams are at Tkvarcheli (deposits estimated at 250m. tons) and Tkibuli (deposits of 80m. tons). Other important minerals are baryta, the best in the USSR, fire-resisting and other clays, diatomite shale, oil, agate, marble, cement, alabaster, iron and other ores, building stone, arsenic, molybdenum, tungsten and mercury. In 1941 a goldfield was discovered. Output of coal in 1970 was 2·3m. tons (625,000 in 1940).

Since the Second World War the Transcaucasian Metallurgical Plant has been built at Rustavi (near Tbilisi) and a motor works at Kutaisi. There are modern factories for processing green tea-leaves, creameries and breweries; Georgia has also textile and silk industries.

In 1970, 703,000 tons of pig-iron, 1·41m. tons of steel, 1,143,000 tons of rolled metal were produced; also 1·45m. tons of cement, 467,000 tons of mineral fertilizer, 63·9m. metres of cotton fabrics, 38·3m. metres of silk fabrics, 14·6m. pairs of leather footwear and 40,200 tons of granulated sugar.

Georgia's fast flowing rivers form an abundant source of energy. The most powerful electric station in Transcaucasia is in Georgia on the river Kura, the Zemo-Avachal hydro-electric station of 36,000 h.p. Power output in 1970 was 9,000m. kwh. (742m. in 1940).

There were 1 49m. industrial and office workers in 1970. and 185,000 specialists with a higher education in the national economy.

COMMUNICATIONS. Length of railways in 1970 was 1,410 km. The trunk line leading from Batum through Tbilisi to Baku on the Caspian Sea has several narrow-gauge branches on Georgian territory to the coalmines of Tkibuli, to the port of Poti, to the manganese mines of Chiaturi, to the mineral springs of Borjom and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coalmine district of Alaverdi. The last branch divides in Armenia, going on the one side to Tabriz in Iran, and on the other to Erzerum in Anatolia. A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, was completed in 1946. Over two-thirds of the lines are electrified. In 1970 there were 20,900 km of motor roads, 16,400 km of them hard-surfaced.

ABHAZIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 8,600 km (3,320 sq. miles); population (Jan. 1971), 489,000. Capital, Sukhumi, 104,000. This area, the ancient Colchis, included Greek colonies from the 6th century B.C. onwards. From the 2nd century B.C. onwards, it was a prey to many invaders—Romans, Byzantines, Arabs, Ottoman Turks—before accepting a Russian protectorate in 1810. However, from the 4th century A.D. a West Georgian kingdom was established by the Lazi princes in the territory (known to the Romans as 'Lazica') and by the 8th century the prevailing language was Georgian and the name Abhazia. On 4 March 1921 a congress of local Soviets proclaimed it a Soviet Republic, and its status as an Autonomous Republic, within Georgia, was confirmed on 17 April 1930.

130 deputies were elected on 13 June 1970, 38·5% of them women.

The Abhazian coast (along the Black Sea) possesses a famous chain of health resorts—Gagra, Sukhumi, Akhali-Antoni, Gulripsha and Gudauta—sheltered by thickly forested mountains.

The republic has coal, electric power, building materials and light industries. In 1970 there were 127 collective farms and 26 state farms; main crops are tobacco, tea, grapes, oranges, tangerines and lemons.

Livestock, 1 Jan. 1971: 145,000 cattle, 72,000 pigs, 41,000 sheep and goats, and 14,000 horses.

110,800 pupils were attending 460 schools in 1970–71. There were 7 technical colleges with 3,000 students; 7,400 students were receiving higher education (including correspondence courses).

ADJARIAN AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 3,000 sq. km (1,160 sq. miles); population (Jan. 1971), 316,000. Capital, Batumi 104,000. After a history similar to that of Abhazia, it fell under Turkish rule in the 17th century, and was annexed to Russia (rejoining Georgia) after the Berlin Treaty of 1878. On 16 June 1921 the territory was constituted as an Autonomous Republic within the Georgian SSR.

90 deputies were elected on 13 June 1971, 35·6% of them women.

The republic specializes in sub-tropical agricultural products. These include tea, mandarines and lemons, grapes, bamboo, eucalyptus, etc. Livestock breeding for meat and milk is expanding. In 1970 there were 165 collective farms and 18 state farms.

There are shipyards at Batumi, modern oil-refining plant (the pipeline from the Baku oilfields ends at Batumi), food-processing and canning factories, clothing, building materials, drug factories, etc.

Health resorts are Kobuleti, Tsihis-Dari, Batumi on the coast and Beshumi in the hills. The sub-tropical climate and flora, and the combination of mountains and sea, make this republic (like Abhazia) a favourite holiday country.

In 1970 there were 426 schools with 68,800 pupils, several technical colleges with 4,200 students, a pedagogical institute and several research institutions. 2,700 students were receiving a higher education.

SOUTH OSSETIAN AUTONOMOUS REGION

This area was populated by Ossetians from across the Caucasus (North Ossetia), driven out by the Mongols in the 13th century. The region was set up within the Georgian SSR on 20 April 1922. Area, 3,900 sq. km (1,505 sq. miles); population (Jan. 1971), 100,000. Capital, Tskhinvali (31,000).

Main industries are mining, timber, electrical engineering and building materials. Crop area, chiefly grains, was 24,600 hectares in 1969; other pursuits are sheep-farming (71,600 sheep and goats) and vine-growing.

There are a pedagogical institute (2,496 students) and several technical colleges (599 students). In 1969 there were 25,600 pupils in elementary and secondary schools.

ARMENIA

Haikakan Sovetakan Sotsialistakan Respublika

On 29 Nov. 1920 Armenia was proclaimed a Soviet Socialist Republic. The Armenian Soviet Government, with the Russian Soviet Government, was a party to the Treaty of Kars (March 1921), which confirmed the Turkish possession of the former Government of Kars and of the Surmali District of the Government of Yerevan. From 1922 to 1936 it formed part of the Transcaucasian Soviet Federal Socialist Republic. In 1936 Armenia was proclaimed a constituent republic of the USSR.

The Supreme Soviet, elected in 1971, consists of 310 deputies (1 per 5,000 population); 103 are women, 205 Communists.

At elections to the district, urban and rural Soviets (13 June 1971), of 25,459 deputies returned 11,804 (46·4%) were women, 13,650 (53·6%) non-Party and 17,171 (67·4%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: N. H. Harutiunyan.
Chairman, Council of Ministers: B. A. Muradyan.
First Secretary, Communist Party: A. E. Kochinyan.

AREA AND POPULATION. Armenia covers an area of 29,800 sq. km (11,490 sq. miles). It is bounded in the north by Georgia, in the east by Azerbaijan and in the south and east by Turkey and Iran. It is a very mountainous country with but little forest land, has many turbulent rivers and a highly fertile soil, but subject to drought. In Jan. 1971 the population was 2,545,000. About 87% of the population are Armenians, the rest are Russians (2·7%), Kurds (1·5%), Azerbaijanians (5·9%), Persians and others. The capital is Yerevan. Other large towns are Leninakan and Kirovakan (110,000).

EDUCATION. In 1970–71 there were 653,000 pupils in 1,511 primary, secondary and special schools; 59 technical colleges with 47,100 students; 12 higher educational institutions with 54,400 students (including correspondence students). Erevan houses the Armenian Academy of Sciences, 43 scientific institutes, a medical institute and other technical colleges, and a state university. 33 learned institutions with 2,203 scientific staff are under the Academy of Sciences; scientific workers totalled 12,808 in 120 institutions in 1970.

In 1970 there were 874 kindergartens with 73,300 children.

Newspapers (1970). Out of 81 newspapers 72 appeared in Armenian, with a circulation of 1,117,000, and 1,032,000 respectively.

HEALTH. In 1970 there were 7,300 doctors and 21,900 hospital beds; 1,100 cots in crèches, with another 15,600 in the crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 461; 1964, 533; 1965, 604; 1966, 683; 1967, 639; 1968, 684; 1969, 824; 1970, 879.

AGRICULTURE. The chief agricultural area is the valley of the Arax and the area around Yerevan. Here there are considerable cotton plantations as well as orchards and vineries. Sub-tropical plants, such as almonds and figs, are also grown. Olive groves and pomegranate plantations occupy large areas; experiments are being made to naturalize cork oak. In the mountainous areas the chief pursuit is livestock raising. In 1913 the total cultivated area of Armenia amounted to 346,000 hectares; in 1940, 434,000; in 1961, 411,000; in 1964, 415,000; in 1968, 403,000; in 1970, 409,000.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat 171 (110); sugar-beet, 89 (0); potatoes, 267 (47); fruit, 146; grapes, 229; meat, 52 (19); milk, 363 (129); wool, 3·9 (2·3); and 238m. eggs (54m.).

Area of irrigated land in Armenia in 1970 was 252,000 hectares.

There were, in 1971, 476 collective farms, and these together with the 261 state farms tilled 99·9% of the total cultivated area. Livestock on 1 Jan. 1971 included 121,000 pigs, 666,000 cattle and 1,999,000 sheep. All the state farms and collective farms had been electrified by the end of 1960. There were 21,000 tractors and 1,600 grain and cotton combines in Jan. 1971.

INDUSTRY. Armenia contains large deposits of copper, zinc, aluminium, molybdenum and other metals. It is also rich in marble, granite, cement and other building materials. The mining of these minerals is becoming more and more important. Among other industries are the chemical, producing chiefly synthetic rubber and fertilizers, and the extraction and processing of building materials such as cement, pumice-stone, tuffs, marble, volcanic basalt and fireproof clay, ginning- and textile-mills, carpet weaving, food, including wine-making, fruit, meat-canning and creameries. Machine-tool and electrical engineering works have also been established. Among the industrial centres are Yerevan, Leninakan, Alaverdi, Kafan, Kirovakan, Daval, Megri and Oktemberyan. Output of electricity in 1970 was 6,100m. kwh. A chain ('cascade') of 8 hydro-electric stations on the river Razdan, as it falls about 3,300 ft from the mountain lake Sevan to its junction with the Arax, has been completed.

In 1970 there were produced 730,400 tons of cement, 253,000 tons of mineral fertilizers, 94·5m. metres of cotton fabrics, 12·1m. metres of silk fabrics, 10·3m. pairs of leather footwear, 16,100 tons of granulated sugar and 8m. decalitres of wine (excluding collective farm output).

There were 838,000 industrial and office workers and 82,000 specialists with a higher education working in the national economy.

COMMUNICATIONS. Length of railways in 1970, 560 km; motor roads, 8,300 km (hard surface, 5,400); airlines, 570 km.

MOLDAVIAN SOVIET SOCIALIST REPUBLIC

Respublika Sovietike Sochialiste Moldovenyaske

The Moldavian Soviet Socialist Republic, capital Kishinev, was formed by the union of part of the former Moldavian Autonomous Soviet Socialist Republic (organized 12 Oct. 1924), formerly included in the Ukrainian Soviet Socialist Republic, and the areas of Bessarabia (ceded by Rumania to the USSR, 28 June 1940) with a mainly Moldavian population. As from 2 Aug. 1940 the MSSR includes the following regions of the former Moldavian Autonomous Soviet Socialist Republic: Grigoriopol, Dubossarsk, Kamensk, Rybnitz, Slobedzeisk and Tiraspol, and the following districts of Bessarabia: Beltsk, Bender, Kagulsk, Kishinev, Orgeev and Sorok. The republic, however, is divided not into regions but into 32 rural districts, 20 towns and 33 urban settlements.

The Supreme Soviet, elected in 1971, consists of 315 deputies (1 per 10,000 population); 113 are women, 210 Communists.

At elections to the district, urban and rural Soviets (13 June 1971), of 33,477 deputies returned, 15,961 (47·7%) were women, 17,564 (52·5%) non-Party and 22,000 (65·8%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: K. F. I. Ilyashenko.
Chairman, Council of Ministers: P. A. Paskar.
First Secretary, Communist Party: I. I. Bodyul.

AREA AND POPULATION. The area is 33,700 sq. km (13,000 sq. miles). In Jan. 1971 the population was 3·6m., of whom 65% are Moldavians. Others include Ukrainians (14%), Russians (11·6%), Jews (3·3%), Bulgarians (2%). Apart from Kishinev, larger towns are Tiraspol (110,000), Beltsy (105,000) and Bendery (76,000).

EDUCATION. In 1970–71 there were 795,000 pupils in 2,167 primary, secondary and special schools, 51,700 students in 46 technical colleges and 44,800 students in 8 higher educational institutions including the state university. A Moldavian Academy of Sciences was established in 1961: it has 19 research institutions and a staff of 688. In all, there are 61 learned institutions with 5,695 scientific staff. In 1970 there were 61,700 children attending 805 kindergartens.

Newspapers (1970). There were 120 newspapers, of which 56 were in the Moldavian language, with a circulation of 1,591,000 and 1,078,000 respectively.

HEALTH. Moldavia has 800 medical centres, many district hospitals, a state medical institute and 9 medical schools with over 2,500 students. Doctors in 1970 numbered 7,400; hospital beds, 35,800; 5,400 cots in crèches, with 23,700 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 393; 1964, 435; 1965, 513; 1966, 576; 1967, 600; 1968, 626; 1969, 681; 1970, 723.

AGRICULTURE. On 1 Jan. 1971 there were 551 collective farms and 145 state farms. All ploughing and sowing is mechanized. Livestock included

(1 Jan. 1971) 905,000 cattle, 1,574,000 pigs and 1,389,000 sheep. There were 73,500 tractors and 3,400 combine harvesters.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat, 710 (526); maize, 1,387 (639); sugar-beet, 2,797 (15); sunflower seeds, 331 (9); potatoes, 297 (119); vegetables, 530; fruit, 621; grapes, 700; meat, 176 (53); milk, 792 (210); wool, 3·1 (3); 578m. eggs (275m.).

Bessarabia has an equable climate and very fertile soil. It contains nearly one-third of the vineyards of the USSR. Bessarabia is also rich in fish in the south: sturgeon, mackerel, brill.

INDUSTRY. There are canning plants, wine-making plants, woodworking and metallurgical factories, a factory of ferro-concrete building materials, and footwear and textile plants. Moldavia takes third place in the USSR in the production of wine, tobacco and food-canning. Power output in 1970 was 7,600m. kwh. Production in 1970 included 16·8m. metres of silk fabrics, 12·9m. pairs of leather footwear, 356,500 tons of granulated sugar, 946m. tins of preserves and 24·5m. decalitres of wine. Meat and dairy produce are rapidly expanding food industries.

There are lignite, phosphorites, gypsum and valuable building materials.

In 1970 there were 944,000 industrial and office workers and 79,000 specialists with a higher education working in the national economy.

COMMUNICATIONS. Length of railways, 1,070 km. There is direct air communication with Leningrad, Moscow, Kiev, Lvov and across the Black Sea. There are 10,200 km of motor roads (7,100 hard surface), and 700 km of inland waterways.

ESTONIA

Eesti Nõukogude Sotsialistlik Vabariik

The workers' and soldiers' Soviets in Estonia took over power on 8 Nov. 1917, were overthrown by the German occupying forces in March 1918, and were restored to power as the Germans withdrew in Nov. 1918, establishing the 'Estland Labour Commune'. It was overthrown with the assistance of British naval forces in May 1919, and a democratic republic proclaimed.

The secret protocol of the Soviet–German agreement of 23 Aug. 1939 assigned Estonia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR, which applied for Estonia's admission to the Soviet Union; this was effected by decree of the Supreme Soviet on 6 Aug. The incorporation has been accorded *de facto* recognition by the British Government, but not by the US Government, which continues to recognize an Estonian consul-general in New York.

The Supreme Soviet, elected in 1971, consists of 183 deputies (1 per 10,000 population); 61 are women, 122 Communists.

At elections to district, urban and rural Soviets (13 June 1971), out of 11,279 deputies returned, 5,432 (48·2%) were women, 6,626 (58·7%) non-Party and 6,950 (61·6%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: A. P. Vader.
Chairman, Council of Ministers: V. I. Klauson.
First Secretary, Communist Party: I. G. Kebin.

AREA AND POPULATION. Area, 45,100 sq. km (17,410 sq. miles); population, 1,374,000 (Jan. 1971). 68·2% are Estonians, 24·7% Russians, 1·4% Finns. The capital is Tallinn. Other large towns are Tartu (92,000), Parnu, Narva (61,000). There are 15 districts, 33 towns and 24 urban settlements.

EDUCATION. Estonia has retained an 11-year school curriculum, when it was reduced to 10 years elsewhere in the USSR. In 1970–71 pupils in 812 primary, secondary and special schools numbered 211,000. There were 22,100 students in 6 higher educational establishments, including Tartu (Dorpat) University, founded in 1632, and 24,100 students in 37 technical colleges.

The Estonian Academy of Sciences, founded in 1946, has 15 institutions with 770 scientific staff; in all, 4,707 scientists are working in 75 institutions.

In 1970 there were 42,600 children attending 564 kindergartens.

Newspapers (1970). There were 43 newspapers, 31 of them in Estonian, with a circulation of 1,027,000 and 901,000 respectively.

HEALTH. In 1970 there were 4,600 doctors and 15,100 hospital beds; 5,000 cots in crèches, with another 11,100 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles). 1963, 351; 1964, 374; 1965, 405; 1966, 431; 1967, 455; 1968, 474; 1969, 548; 1970, 548.

AGRICULTURE. Agriculture and dairy farming are the chief occupations. Area under cultivation was 697,000 hectares in 1913, 918,000 hectares in 1940 and 798,000 hectares in 1970. There were 292 agricultural and 26 fishery collectives and 171 state farms in 1970, using 27,200 tractors and 3,100 grain combines. 97% of state farms and 70% of collective farms were receiving electric power.

On 1 Jan. 1971 there were 692,000 head of cattle, 163,000 sheep, 688,000 pigs and 3·7m. poultry.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Potatoes, 1,414 (689); grains, 726 (428); vegetables, 129; meat (slaughter weight), 136 (60); milk, 1,025 (415); wool, 0·3 (0·7); 359m. eggs (67m.).

INDUSTRY. Some 22% of the territory is covered by forests which provide good material for its sawmills, furniture, match and pulp industries, as well as wood fuel. Since the end of the war, 80,000 hectares have been afforested. 850,000 hectares of marsh land had been reclaimed by 1970.

Estonia has rich high-quality shale deposits (particularly in the north-east) which are estimated at 3,700m. tons. Shale output was 1·9m. tons in 1940 and 18.9m. in 1970. Gas output (from shale and coal) increased in the same years from 1·7m. cu. metres to 581m. A factory for the production of gas from shale and a pipeline (208 km long) from Kohtla-Järve supplies shale gas to Leningrad and Tallinn. Estonian factories are now turning out agricultural and peat-digging machines, complex control and measuring instruments. The 'Volta' factory in Tallinn produces electric motors.

In the neighbourhood of Tallinn, phosphorites have been found, and in 1947 a plant for refining and for the production of superphosphates was started. Estonia also contains valuable peat deposits, and some of her electrical stations work on peat. A hydro-electric station was erected in 1955 on the Narva. There are 350 rural electric stations. Output of mineral fertilizers in 1970 was 1,326,000 tons; cement, 964,200 tons; paper, 105,000 tons; electric power, 11,600m. kwh.; cotton fabrics, 217m. metres; linen fabrics, 8·3m. metres; leather footwear, 6·9m. pairs; sawn timber, 798,000 cu. metres.

In 1970 there were 613,000 industrial and office workers and 46,000 specialists with a higher education engaged in the national economy.

COMMUNICATIONS. Length of main railways 1,200 km. of secondary lines 730 km. Estonia has 20 ports, but Tallinn handles four-fifths of the total sea-going transport. Inland waterways total 500 km; motor roads 24,400 km (hard surface, 19,700 km). Airlines link Tallinn with Moscow, Leningrad, Riga and the Estonian islands.

LATVIA

Latvijas Padomju Socialistiska Republika

In the part of Latvia unoccupied by the Germans, the Bolsheviks won 72% of the votes in the Constituent Assembly elections (Nov. 1917). Soviet power was proclaimed in Dec. 1917, but was overthrown when the Germans occupied all Latvia (Feb. 1918). Restored when they withdrew (Dec. 1918), it was overthrown once more by combined British naval and German military forces (May–Dec. 1919), and a democratic government set up.

The secret protocol of the Soviet–German agreement of 23 Aug. 1939 assigned Latvia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR, which applied for Latvia's admission to the Soviet Union on 22 July; this was effected by decree of the Supreme Soviet on 5 Aug. The incorporation has been accorded *de facto* recognition by the British Government, but not by the US Government, which continues to recognize the *Chargé d'Affaires*, Dr Anatol Dinbergs, in Washington D.C.

The Supreme Soviet, elected in 1971, consists of 310 deputies (1 per 10,000 population); 106 are women, 202 Communists.

At elections to district, urban and rural Soviets (13 June 1971), of 23,986 deputies returned, 11,566 (48·2%) were women, 13,013 (54·3%) non-Party and 15,642 (66·2%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: V. P. Ruben.
Chairman, Council of Ministers: Y. Y. Ruben.
First Secretary, Communist Party: A. E. Voss.

AREA AND POPULATION. Latvia has a total area of 63,700 sq. km (25,590 sq. miles). Population, Jan. 1971, 2·4m., of whom 57% are Letts and 30% Russians. There are 26 districts, 56 towns and 35 urban settlements.

The chief town is Riga (the capital); other principal towns are Liepāja (93,000), Daugavpils (Dvinsk) (102,000), Jelgava (Mitau) (57,000) and Ventspils (Windau).

The Latvian Lutheran Church numbered 600,000 members in 1956.

EDUCATION. In 1970–71 there were 1,203 primary, continuation and secondary schools, with a total of 357,000 pupils: 53,100 children attended 672 kindergartens. Ten places of higher education had 40,800 students, 54 technical colleges had 38,800 students; there were also 21 music and art schools, 3 teachers' training colleges and an agricultural academy. In 1946 an Academy of Sciences was opened which in 1970 had 16 research institutes and a staff of 1,475 scientific workers; there were in all 8,895 scientific workers in 121 research institutions.

Newspapers (1970). There were 82 newspapers (53 in Lettish), with a circulation of 1·26m. and 929,000 respectively.

HEALTH. There were 8,500 doctors, 28,100 hospital beds and 5,000 cots in crèches in 1970, with 13,900 cots in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 525; 1964, 553; 1965, 563; 1966, 614; 1967, 655; 1968, 691; 1969, 771; 1970, 823.

AGRICULTURE. Latvia is now no longer mainly an agricultural country. The urban population, 35% of the total in 1939, was 63% in Jan 1971.

Latvian forest lands, state and private (1,727,000 hectares), produced in 1937–38, 3,439,256 cu. metres of timber; 1970 output, 7·3m. cu. metres.

Area under cultivation was 1·4m. hectares in 1913, 2m. in 1940, 1·5m. in 1970. 1,126,000 hectares of marshland have been drained.

Cattle breeding and dairy farming are the chief agricultural occupations. Oats, barley, rye, potatoes and flax are the main crops.

After the establishment of the Soviet regime about 960,000 hectares were distributed among the landless peasants or those with very small holdings. In 1970 there were 230 state farms and 669 collective farms. In 1971 there were 46,700 tractors and 6,100 grain combine harvesters. By 1 Jan. 1964, all state farms and collective farms were using electric power.

Livestock (1 Jan. 1971): Cattle, 1,203,000 (1939: 1·3m.); sheep, 318,000 (1939: 1·5m.); pigs, 1,075,000 (1939: 891,500).

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Sugar-beet, 231 (0); potatoes, 2,328 (645); all grains, 1,323 (880); vegetables, 259; fruit, 101; meat and fats, 205 (122); milk, 1,713 (673); wool, 0·7 (1·4); 500m. eggs (136m.).

INDUSTRY. Latvia is the main producer of electric railway passenger cars and long-distance telephone exchanges in the USSR, fourth in output of paper and woollen goods, fifth of sawn timber, sixth of mineral fertilizers.

Industrial output in 1970 included 442,700 tons of steel, 269,600 tons of rolled metal, 861,900 tons of cement, 63·5m. sq. metres of cotton fabrics, 16·5m. sq. metres of linen fabrics, 12·4m. pairs of leather footwear; 217,600 tons of granulated sugar; woollens, 13·4m. metres; silks, 11·4m. metres; fish catch, 441,000 tons (1940: 12,400 tons). Electric power output was 2·7m. kwh.; radio sets, 1·85m., paper, 148,500 tons.

The peat deposits extend over 645,000 hectares or about 10% of the total area, and it is estimated that the total deposits of peat are 3,000–4,000m. tons; output, 1966, 1·7m. tons. There are also gypsum deposits; amber is frequently found in the coastal districts.

In 1970 industrial and office workers numbered 1,033,000; 76,000 specialists with a higher education were employed in the national economy.

COMMUNICATIONS. In 1970 the length of railways was 2,610 km. and motor roads, 24,200 km (hard surface, 11,100 km). Riga is the largest port in the Baltic after Leningrad.

LITHUANIA

Lietuvas Taryu Socialistine Respublika

In 1914–15 the German army occupied the whole of Lithuania. On its withdrawal (Dec. 1918) Soviets were elected in all towns and a Soviet republic was proclaimed. In the summer of 1919 it was overthrown by Polish, German and nationalist Lithuanian forces, and a democratic republic established.

The secret protocol of the Soviet–German frontier treaty of 28 Sept. 1939 assigned the greater part of Lithuania to the Soviet sphere of influence. In Oct. 1939 the province and city of Vilnius (in Polish occupation 1920–39) were ceded by the USSR. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR. A 'people's diet', elected on 14–15 July, applied for Lithuania's admission to the Soviet Union on 22 July, which was effected by decree of the Supreme Soviet on 3 Aug. and included also those parts of Lithuania which had been reserved for inclusion in Germany. This incorporation has been accorded *de facto* recognition by the British Government, but not by the US Government, which continues to recognize a Lithuanian *Chargé d'Affaires* in Washington, D.C.

The Supreme Soviet, elected in 1971, consists of 300 deputies (1 per 15,000 population); 97 are women, 203 Communists.

At elections to district, urban and rural Soviets (13 June 1971), of 29,314 deputies returned, 13,069 (44·6%) were women, 16,354 (55·8%) non-Party and 18,388 (62·7%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: M. Y. Shumauskas.
Chairman, Council of Ministers: J. A. Maniusis.
First Secretary, Communist Party: A. Y. Snechkus.

AREA AND POPULATION. The total area of Lithuania is 65,200 sq. km (25,170 sq. miles) and the population (Jan. 1971) 3·2m., of whom 80% were Lithuanians, 8·6% Russians and 7·7% Poles. The capital is Vilnius (Vilna). Other large towns are Kaunas (Kovno), Klaipéda (Memel), Šauliai (96,000) and Panevéžys (78,000). There are 44 rural districts, 92 towns and 22 urban settlements.

In 1956, the Lithuanian Lutheran Church had 215,000 members; Roman Catholics, including those in Estonia and Latvia, numbered 2·5m.

EDUCATION. In 1970-71 there were 575,000 pupils in 3,778 primary, secondary and special schools. The University of Vytautas the Great, at Káunas, was opened on 16 Feb. 1922. On 15 Jan. 1940 certain faculties were transferred to Vilnius as an independent institution to form the University of Vilnius There were 12 higher educational institutions with 57,000 students: in 81 technical colleges of all kinds there were 65,300 students. The Lithuanian Academy of Sciences, founded in 1941, had 12 institutions with a total scientific staff of 1,143; there were 106 scientific institutions with 8,978 research personnel. 60,000 children in 1970 were attending 714 kindergartens.

Newspapers (1970). Of 91 newspapers, 74 were in Lithuanian, with a circulation of 2,109,000 and 1,876,000 respectively.

HEALTH. In 1970 there were 8,700 doctors, 32,400 hospital beds and 4,100 cots in crèches, with 16,000 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 630; 1964, 693; 1965, 765; 1966, 839; 1967, 932; 1968, 1,022; 1969, 1,112; 1970, 1,186.

AGRICULTURE. Lithuania before 1940 was a mainly agricultural country, but has since been considerably industrialized. The urban population was 23% of the total in 1937 and 51% in Jan. 1971. The resources of the country consist of timber and agricultural produce. Of the total area, 49·1% is arable land, 22·2% meadow and pasture land, 16·3% forests and 12·4% unproductive lands.

Area under cultivation in 1913 was 1·9m.; in 1938, 2·7m.; in 1970, 2·3m. hectares. By 1970 over 1·61m. hectares of swamps had been drained.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): All grains, 2,099 (1,449); sugar-beet, 514 (0); flax, 12 (17); potatoes, 2,721 (1,375); vegetables, 358; fruit, 131; meat and fats, 390 (159); milk, 2,490 (832); wool, 0·4 (1·5); 701m. eggs (264m.).

By 1970 all collective and state farms had an average of 500 hectares of drained land, raising grain yields from 1·8 tons per hectare in 1966 to 2·8 in 1970.

On 1 Jan. 1971 there were 1,814,000 cattle, 2·3m. pigs, 154,000 sheep and 7,000 goats.

Forests cover 1,554,000 hectares; 70% of the forests consist of conifers, mostly pines. Peat reserves total 4,000m. cu. metres.

Between 1940 and 1947 about 575,500 hectares (about 1·4m. acres) were distributed among the landless and poor peasant farmers. In 1970 there were 73,400 tractors and 9,000 grain combines serving 1,428 collective farms and 300 state farms. Over 90% of collective farms and all state farms received electric power in 1963.

INDUSTRY. Heavy engineering, shipbuilding and building material industries are developing. Industrial output included, in 1970, 1·12m. tons of cement, 33·7m. metres of cotton fabrics, 10·6m. pairs of leather footwear, 147,800 tons of granulated sugar, 20·8m. metres of linens, 10·8m. metres of woollens, 1·31m. cu. metres of sawn timber and 102,100 tons of paper; electric power, 7·4m. kwh.

In 1970 there were 1·17m. industrial and office workers and 81,000 specialists with a higher education employed in the national economy.

COMMUNICATIONS. Length of railways. 2,000 km. Vilnius has one of the largest airports of the USSR. There are 33,500 km of motor roads (14,500 km hard surface) and 600 km of inland waterways.

SOVIET CENTRAL ASIA

Soviet Central Asia embraces the Kazakh Soviet Socialist Republic, the Uzbek Soviet Socialist Republic, the Turkmen Soviet Socialist Republic, the Tadzhik Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic.

Turkestan (by which name part of this territory was then known) was conquered by the Russians in the 1860s. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, the emir, by the agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government became definitely established in these regions. The Khan of Khiva was deposed in Feb. 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925, when the new states of Uzbekistan, Turkmenistan and Tadzhikistan and several autonomous regions were established. The remaining districts of Turkestan populated by Kazakhs were united with Kazakhstan. Kirghizia, until then part of the RSFSR, was established as a Union Republic in 1936.

KAZAKHSTAN

Kazak Soviettik Sotzialistik Respublikasy

On 26 Aug. 1920 Uralsk, Turgai, Akmolinsk and Semipalatinsk provinces formed the Kazakh Soviet Socialist Republic within the RSFSR. It was made a constituent republic of the USSR on 5 Dec. 1936. To this republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kazakhs. It consists of the following regions: Aktyubinsk, Alma-Ata, Chimkent, Dzhambul, East Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanai, Kzyl-Orda, North Kazakhstan, Pavlodar, Semipalatinsk, Taldy-Kurgan, Tselinograd, Turgai, Uralsk. The capital is Alma-Ata, formerly Verny.

Kazakhstan is bounded on the west by the Caspian Sea and the RSFSR, on the east by China, on the north by the RSFSR and on the south by Uzbekistan and Kirghizia.

The Supreme Soviet, elected in 1971, consists of 482 deputies (1 per 20,000 population); 170 are women, 319 Communists.

At elections to the regional, district, urban and rural Soviets (13 June 1971), out of 111,756 deputies returned, 50,284 (45%) were women, 65,018 (58·2%) non-Party and 72,826 (65·2%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: S. B. Niyazbekov.
Chairman, Council of Ministers: B. A. Ashimov.
First Secretary, Communist Party: D. A. Kunayev.

AREA AND POPULATION. The area of the republic is 2,715,100 sq. km (1,048,030 sq. miles). It is the next in size to the RSFSR, is far larger than all the other Central Asian Soviet Republics combined and stretches nearly 3,000 km from west to east and over 1,500 km from north to south. Population (Jan. 1971), 13·07m., of whom 51% live in urban areas. The Kazakhs form nearly 30%, Russians 43% and Ukrainians 8·3% (owing to the industrialization of the country since 1941 and the opening of virgin lands since 1945). The population includes over 100 nationalities.

The capital is Alma-Ata; other large towns are Karaganda, Semipalatinsk, Chimkent and Petropavlovsk. In all there are 77 towns, 173 urban settlements and 181 rural districts.

EDUCATION. Nearly the whole population is literate. In 1970–71 there were 3,324,000 pupils at 10,041 elementary and secondary schools; 190 technical colleges with 216,200 students, 44 higher educational institutions with 198,900 students, and 163 research institutes with 26,802 scientific personnel. The Kazakh Academy of Sciences, founded in 1945, had, in 1970, 36 institutions, the scientific staff of which numbered 3,102. 393,900 children were attending 5,111 kindergartens.

Newspapers (1970). Of 355 newspapers, 130 were in the Kazakh language, with a circulation of 4,166,000 and 1·6m. respectively.

HEALTH. In 1970 there were 28,700 doctors and 154,600 hospital beds; cots in crèches, 45,300, with 119,400 in crèche-sections of kindergartens.

FINANCE. The budget (in 1m. new roubles) balanced as follows: 1964, 3,913; 1965, 3,981; 1966, 3,990; 1967, 3,984; 1968, 4,240; 1969, 4,561; 1970, 4,682.

AGRICULTURE. Kazakh agriculture has changed from primarily nomad cattle breeding to production of grain, cotton and other industrial crops. In 1970 the crop area was 30·9m. hectares—over 14% of the total cultivated area of the USSR (1913, 4·2m.; 1940, 6·8m.).

1,338,000 hectares of land have an irrigation network.

The 'Ukrainka' winter wheat has been transformed into a spring wheat suitable for cultivation in Kazakhstan. Tobacco, rubber plants and mustard are also cultivated. Kazakhstan has rich orchards and vineyards; 18,000 hectares were under vines and 109,000 under orchards in 1970. Between 1954 and 1959, over 23m. hectares of virgin and long fallow land were opened up, 544 new state grain farms being organized for the purpose. Grain deliveries to the state were 10·5m. tons in 1960; 4·8m. in 1963; 15·4m. in 1964; 2·4m. in 1965; 17m. in 1966; 8·2m. in 1967; 11·7m. in 1968; 11m. in 1969; 13·4m. in 1970.

Kazakhstan is noted for its livestock, particularly its sheep, from which excellent quality wool is obtained. The Akharomerino is a newly developed crossbreed of merino sheep and the wild Akhar mountain ram. Livestock on 1 Jan. 1971 included 7·2m. cattle, 31·2m. sheep, 521,000 goats and 2·2m. pigs.

There were, in 1970, 449 collective farms and 1,609 state farms with 513,300 tractors and 94,500 grain combine harvesters. There were 5,293 rural power stations of 307,800 kwh. capacity.

Output of main agricultural products (1m. tons) in 1970 (1913 figures in brackets): All grains, 22·2 (2·2); cotton, 0·1 (0·015); sugar-beet, 2·2 (0); potatoes, 1·9 (0·18); vegetables, 0·8; meat, 0·9 (0·44); milk, 3·9 (11·8); 1,697m. eggs (233m.); wool, 0·9 (0·04).

INDUSTRY. Kazakhstan is extremely rich in mineral resources. Coal and tungsten in Karaganda (in the centre), oil along the river Emba (in the west), copper, lead and zinc—Kazakhstan contains about one-half of the total deposits of these three metals contained in the USSR—Iceland spar (in the south), nickel and chromium in the Kustanai and Semipalatinsk regions, molybdenum and other minerals. In 1943 big deposits of manganese were found in Eastern Kazakhstan; new coal seams were also discovered there. In South Kazakhstan new copper and bauxite deposits have been found.

Coal, oil, non-ferrous metallurgy, heavy engineering and chemical industries have brought Kazakhstan to the third place among the industrial republics of the USSR.

Coal output in 1970 was 61·6m. tons; oil output, 13·2m. tons; steel, 2,225,000 tons; rolled metal, 2,433,000 tons; cement, 5,653,000 tons; mineral fertilizers, 1,957,000 tons; cotton fabrics, 64·1m. metres; leather footwear, 27·8m. pairs; woollen fabrics, 5m. metres; granulated sugar, 176,000 tons. The Leninogorsk and Chimkent lead plants, the Balkhash, Irtysh and Karaskpai copper-smelting works and others supply the country with nonferrous metals. A meat-packing plant has been built in Semipalatinsk, a fish cannery in Guryev, a chemical plant in Aktyubinsk and a superphosphate plant in Dzhambul; 34 new industrial plants began operating in 1969. The oil industry in Emba and Aktyubinsk yields high-quality aviation oil. Iron ore output in 1970 was 18·2m. tons.

Aviation plays an important part in agriculture. About 14m. hectares were in 1970 treated from the air (destruction of pests, surface feeding of sugar-beet plantations, pollination of orchards, etc.).

Among recent enterprises are a champagne combine in Alma-Ata, a canning works for tinned milk in Pavlodar, meat-packing plants in Tselinograd, Aktiubinsk and Pavlodar, a tea-packing factory in Alma-Ata.

Electric power output in 1970 was 34,700m. kwh.

There were, in 1970, 4·65m. (average for year) industrial and office workers in the national economy and 286,000 specialists with a higher education.

RAILWAYS. A 430-km railway line between the settlements of Mointi and Chu in Kazakhstan to complete the Transkazakh trunk line, connecting Petropavlovsk, Akmolinsk, Karaganda and Balkhash, was opened in 1953. The new line links the Transkazakh trunk line with the Turkestan–Siberian railway carrying Karaganda coal to South Kazakhstan. The Akmolinsk–Pavlodar railway (438 km), a section of the South Siberian line, was opened in Dec. 1953. Other lines in operation are Dzhambul–Chalaktan, Akmolinsk–Kartaly, Uralsk–Iletsk, Guriev–Kandagach. In 1970 the total length of railways in operation was 13,700 km. Over 600 km of narrow-gauge line and 700 km. of broad-gauge line were built in the virgin lands area in 1951–57.

ROADS. In 1970 there were 109,100 km of motor roads (40,300 km hard surface).

INLAND WATERWAYS. 5,800 km. A 500-km canal to bring water from the Irtysh at Yermak, below Pavlodar, along the Shiderta, Tuzda and Nura rivers to the new industrial centre of Karaganda was begun in 1960. It is to irrigate in all 60,000 hectares and provide water for a number of new industrial towns.

TURKMENISTAN

Tiurkmenostan Soviet Sotsialistik Respublikasy

The Turkmen Soviet Socialist Republic was formed on 27 Oct. 1924 and covers the territory of the former Trans-Caspian Region of Turkestan, the Charjiui vilayet of Bokhara and a part of Khiva situated on the right bank of the Oxus. In May 1925 the Turkmen Republic entered the Soviet Union as one of its constituent republics. It is bounded on the north by the Autonomous Kara-Kalpak Republic, a constituent of Uzbekistan, by Iran and Afghánistán on the south, by the Uzbek Republic on the east and the Caspian Sea on the west.

The Supreme Soviet, elected in 1971, consists of 285 deputies (1 per 5,000 population); 100 are women, 193 Communists.

At elections to regional, district, urban and rural Soviets (13 June 1971), of 18,995 deputies returned, 8,064 (42·5%) were women, 10,847 (57·1%) non-Party and 12,849 (67·6%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: A. M. Klychev.
Chairman, Council of Ministers: O. N. Orazmuhamedov.
First Secretary, Communist Party: M. Gapurov.

AREA AND POPULATION. The principal Turkmen tribes are the Tekkés of Merv and the Tekkés of the Attok, the Ersaris, Yomuds and Goklans. All speak closely related varieties of a Turkoman language (of the south-western group of Turk languages); many are Sunni Mohammedans. The country passed under Russian control in 1881, after the fall of the Turkoman stronghold of Gök-Tépé. 66% of the population are Turkmenians, most of whom were nomads before the First World War. 14·5% are Russians living mostly in urban areas, and 8·3% Uzbeks. There are also Kazakhs (3·2%), Tartars, Ukrainians, Armenians and others.

The area of Turkmenistan is 488,100 sq. km (186,400 sq. miles), and its population in Jan. 1971 was 2,223,000.

There are 7 regions: Chardzhou Issyk-Kul, Leninabad, Maruy, Naryn, Tashauz and Turgai, comprising 34 rural districts, 15 towns and 67 urban settlements.

The capital is Ashkhabad (Poltoratsk); other large towns are Chardzhou (99,000), Maruy (Merv) (63,000), Krasnovodsk and Nebit-Dag (57,000).

EDUCATION. In 1970–71 there were 1,648 primary and secondary schools with 560,000 pupils, 5 higher educational institutions with 29,100 students, 29 technical colleges with 28,700 students, and 11 music and art schools. The Turkmen Academy of Sciences directs the work of 16 learned institutions with a staff of 688 scientists; there were 56 research institutions in all, with 3,649 research workers, in 1970. A Turkmenian State University was opened in 1951: in 1961 it had 4,180 students.

In 1970, 55,700 children were attending 684 kindergartens.

Newspapers (1970). Of 47 newspapers, 33 were in the Turkmen language, with a circulation of 696,000 and 513,000 respectively.

HEALTH. In 1970 there were 4,700 doctors, 22,600 hospital beds and 9,700 cots in crèches, with 13,000 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 416; 1964, 422; 1965, 462; 1966, 481; 1967, 520; 1968, 545; 1969, 600; 1970, 630.

AGRICULTURE. The main occupation of the people is agriculture, based on irrigation. Turkmenistan produces cotton, wool, Astrakhan fur, etc. It is also famous for its carpets, and produces a special breed of Turkoman horses and the famous Karakul sheep.

There were 331 collective farms and 49 state farms in 1970, with 50,800 tractors and 1,000 grain combines. There were 608 rural power stations.

A considerable area is under Egyptian cotton, and from it has been evolved an original Soviet long-fibred cotton.

The main grain grown is maize. Sericulture, fruit and vegetable growing are also important; dates, olives, figs, sesame and other southern plants are grown. There is fishing in the Caspian. 636,000 hectares were under cultivation in 1970 (1913, 318,000; 1940, 411,000). Wine production in 1969 was 121,700 hectolitres.

Between 1958 and 1970 the Kara-Kum Canal was extended 860 km. In 1971 the fourth section, to reach the Caspian, was begun to complete 1m. hectares of irrigated land.

Livestock on 1 Jan. 1971: Cattle, 444,000; pigs, 69,000; sheep, 4,291,000; goats, 198,000.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat, 28 (113); cotton, 869 (69); vegetables, 136; grapes, 36; fruit, 21; meat, 51 (58); milk, 192 (63); wool, 14 (9·7); 122m. eggs (18m.).

INDUSTRY. Turkmenistan is rich in minerals, such as ozocerite, oil, coal, sulphur and salt. Industry is being developed, and there are now chemical, tailoring, textile, light, food, agricultural implements, cement and other factories, oil refineries, as well as ore-mining.

In the Kara-Kum Desert deposits of magnesium, minerals and coal were discovered, as well as some 50 new saltmines. Here a new oil town, Nebit-Dag, has sprung up. On the Kara-Bogaz bay a sulphate industry has been developed. Industrial output in 1970 included 14·5m. tons of oil, 359,900 tons of cement, 19m. metres of cotton fabrics, 2·1m. pairs of leather footwear. Electric power output was 1,800m. kwh. (in 1940: 83·5m.). 13,107m. cu. metres of natural gas were produced.

In 1970 there were 478,000 industrial and office workers in the national economy; specialists with a higher education numbered 45,000.

COMMUNICATIONS. Length of motor roads 8,700 km (4,700 km hard surface). Motor communication exists between Ashkhabad and Meshed (Iran).

Length of railways, 2,110 km. The line Chardzhou–Kungrad crosses the Chardzhou and Tashauz regions of Turkmenia and runs across Uzbekistan. Another line connects Chardzhou and Urgench. Inland waterways, 1,300 km.

Airlines connect Leninsk and Tashauz, and Ashkhabad and remote areas in the west, north and east.

UZBEKISTAN

Ozbekiston Soviet Sotsialistik Respublikasy

In Oct. 1917 the Tashkent Soviet assumed authority, and in the following years established its power throughout Turkestan. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into 'People's Republics', then (1923–24) into Soviet Socialist Republics and finally merged in the Uzbek SSR and other republics.

The Uzbek Soviet Socialist Republic was formed on 5 Dec. 1924 from lands formerly included in Turkestan. It includes a large part of the Samarkand region, the southern part of the Syr Darya, Western Ferghana, the western plains of Bukhara, the Kara-Kalpak ASSR and the Uzbek regions of Khorezm. In May 1925 Uzbekistan, by the decision of the Congress of Soviets of the USSR, was accepted as one of the constituent republics in the Soviet Union.

Uzbekistan is bordered on the north by the Kazakh Soviet Socialist Republic, on the east by the Kirghiz Soviet Socialist Republic and the Tadzhik Soviet Socialist Republic, on the south by Afghánistán and on the west by the Turkmen Soviet Socialist Republic.

The Supreme Soviet, elected in 1971, consists of 452 deputies (1 per 15,000 population); 151 are women, 311 Communists.

At elections to the regional, district, urban and rural Soviets (13 June 1971), of 83,282 deputies returned, 38,466 (46·2%) were women, 45,339 (54·4%) non-Party and 65,758 (65·2%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: Nazar Matchanov.
Chairman, Council of Ministers: N. D. Hudaiberdyev.
First Secretary, Communist Party: S. R. Rashidov.

AREA AND POPULATION. The Uzbeks, who form 65% of the population, were the ruling race in Central Asia, until the arrival of the Russians during the third quarter of the 19th century. The several native states over which Uzbek dynasties formerly ruled were founded in the 15th century upon the ruins of Tamerlane's empire. The Uzbek speak Jagatai Turk, which is related to Osmanli and Azerbaijan Turk; many are Sunni Mohammedans. Russians number 12·5%, other Central Asians 10·3%, Tatars 4·8%.

The area of Uzbekistan is 449,600 sq. km (173,546 sq. miles). The population in Jan. 1971 was 12·3m. (36% urban). The country comprises the following regions: Andijan, Bukhara, Ferghana, Kashkadar, Khorezm, Namangan, Samarkand, Surkhan-Darya, Syr-Darya (formed 16 Feb. 1963), Tashkent and the Autonomous Soviet Republic of Kara-Kalpakia. The capital of the Republic is Tashkent; other large towns are Samarkand, Andizhan, Namangan.

On 19 Sept. 1963 the Supreme Soviet of the USSR confirmed decisions of the Supreme Soviets of Kazakhstan and Uzbekistan, transferring over 40,000 sq. km from the former to the latter to ensure more efficient use of the Hungry Steppe.

EDUCATION. In 1970–71 there were 9,353 elementary and secondary schools with 3,324,000 pupils, 38 higher educational establishments with 232,900 students and 165 technical colleges with 165,000 students. Uzbekistan has an Academy of Sciences and 146 research institutes with 25,244 scientific staff, 3,256 of them in

31 institutions of the Uzbek Academy of Sciences. There are universities and medical schools in Tashkent and Samarkand. In 1970, 247,400 children were attending 2,865 kindergartens.

The Uzbek Arabic script was in 1929 replaced by the Latin alphabet which in 1940 was superseded by one of the Cyrillic alphabet.

Newspapers (1970). There were 130 newspapers in the Uzbek and Kara-Kalpak languages out of a total of 226, with a circulation of 2,551,000 and 3·5m. respectively.

HEALTH. In 1970 there were 24,600 doctors and 125,300 hospital beds; cots in permanent crèches, 37,700, with 68,700 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 1,364; 1964, 1,599; 1965, 1,841; 1966, 1,951; 1967, 2,225; 1968, 2,344; 1969, 2,616; 1970, 2,736.

AGRICULTURE. Uzbekistan is a land of intensive farming, based on artificial irrigation. It is the chief cotton-growing area in the USSR and the third in the world. About 2·8m. hectares of collective and state farmland have irrigation networks; 2·7m. are in full use.

In 1939 the Ferghana Canal (270 km) was built. During 1940, among the irrigation canals completed were: the North Ferghana Canal (165 km), and Andreev South Ferghana Canal (108 km) and the first section of the Tashkent Canal (63 km). A canal from the Amu-Darya to Bokhara across the Kzil-Kum and Ust-Urt deserts (180 km) was completed in 1965. A 200-km canal joining the river Zeravshan with the Kashka Darya at the village of Paruz was completed in Aug. 1955; it is part of the Iski–Angara Canal. The first section (93 km) of a canal irrigating the southern 'Hungry Steppe' was opened in 1960; 500,000 hectares of this desert were under cultivation in 1967.

Agriculture flourishes, particularly in the well-watered, warm, rich oases areas, such as the Ferghana valley, Zeravshan, Tashkent and Khorezm, where cotton, fruit, silk and rice are cultivated. In the higher-lying plains grain is grown; the wide desert and semi-desert area of Western Uzbekistan is mainly given to pasture land and the breeding of the Karakul sheep; there is a Karakul institute at Samarkand.

Orchards occupied 129,000 hectares and vineyards 58,000 hectares in 1970. The Central Asian Branch of the Scientific Research Institute of Viticulture in Tashkent has produced new frost resistant grapes by crossing the wild Amur grape with Central Asian and European types. In 1970 there were 1,056 collective farms and 377 state farms, with 212,000 tractors and 6,900 grain combines. Ploughing, cotton-sowing and cultivation are completely mechanized; cotton-picking over 40%.

Uzbekistan provides 67% of the total cotton, 50% of the total rice and 60% of the total lucerne grown in the USSR. The area under crops was 2,189,000 hectares in 1913, 3,036,000 hectares in 1940 and 3·6m. hectares in 1970.

Livestock on 1 Jan. 1971: 2·95m. cattle, 7·6m. sheep, 438,000 goats and 335,000 pigs.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat, 409 (513); maize, 70 (39); cotton, 4,666 (517); potatoes, 184 (46); fruit, 410; grapes, 310; meat, 214 (89); milk, 1,373 (231); wool, 22·1 (5·3); 871m. eggs (87m.).

Afforestation over an area of 50,000 hectares has been carried out to protect the Bokhara and Karakul oases from the advancing Kzyl-Kum sands and to stop the sand-drifts in a number of districts of Central Ferghana.

INDUSTRY. Of its mineral resources, in addition to oil and coal, copper and building materials and ozocerite deposits are now also exploited. New very rich coal deposits were discovered in 1944 and 1947 near Tashkent.

There are nearly 1,600 factories and mills. They include a factory of agricultural machinery (in Tashkent), a cement factory, a sulphur-mine, an oxygen factory, a paper-mill, a leather factory, textile-mills, clothing factories, iron and steel works, the Chirchik electro-chemical plant, a superphosphate plant in Kokand and oil refineries, coalmines, etc. Output in 1970 included 3·7m. tons of coal, 389,000 tons of steel, 1·8m. tons of oil, 3,196,000 tons of cement, 4·1m. tons of mineral fertilizers, 210m. metres of cotton fabrics, 50·4m. metres of silk fabrics, 18·4m. pairs of leather footwear, 784,000 hectolitres of wine (apart from collective farm output). Gold is being worked at Muruntau, Chadak and Kochbulak.

There are some 800 electrical power stations in the republic. Power output in 1970 was 18,300m. kwh. (481m. kwh. in 1940). Two natural-gas pipelines (Djaikak–Tashkent, Ferghana–Kokand) and a third from Bukhara to the Urals are operating. Natural gas output (1970) was 32,094m. cu. metres.

In 1970 there were 2·7m. industrial and office workers in the national economy and 255,000 specialists with a higher education.

COMMUNICATIONS. The total length of railway in 1970 was 3,000 km. Branches lead to Karshe-Kitab, Kerki-Termez, Jalal-Abad, Namangan, Andijan and other centres. In 1947–55 a new line was built from Chardzhou to Kungrad.

The Great Uzbek Highway was completed in April 1941. Total length of motor roads in 1970 was 29,500 km (hard surface, 21,500 km). Inland waterways, 1,200 km.

An airline, serving all of Central Asia, is most developed in Uzbekistan.

KARA-KALPAK AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Area, 165,600 sq. km (63,920 sq. miles); population (Jan. 1971), 723,000. Capital, Nukus (77,000). The Karakalpaks are first mentioned in written records in the 16th century as tributary to Bokhara, and later to the Kazakh Khanate. In the second half of the 19th century, as a result of the Russian conquest of Central Asia, they came under Russian rule. On 11 May 1925 the territory was constituted within the then Kazakh Autonomous Republic (of the Russian Federation) as an Autonomous Region. On 20 March 1932 it became an Autonomous Republic within the Russian Federation, and on 5 Dec. 1936 it became part of the Uzbek SSR.

164 deputies were elected to its Supreme Soviet on 13 June 1971, of whom 35% are women.

Its manufactures are in the field of light industry—bricks, leather goods, furniture, canning, wine. Output of cotton in 1970 was 335,000 tons (in 1913: 8,000 tons). There were 4,217 tractors. Cattle numbered 264,000 and sheep 470,000. There were 43 collective and 56 state farms.

In 1970 there were 189,200 pupils in 605 schools; there are also a pedagogical institute and teachers' training college with 9,000 students and a national research institute with 5,400 students.

There were 1,066 doctors and 7,600 hospital beds.

TADZHIKISTAN

Respublikai Sovieth Sotsialistii Tojikiston

The Tadzhik Soviet Socialist Republic was formed from those regions of Bokhara and Turkestan where the population consisted mainly of Tadzhiks. It was admitted as a constituent republic of the Soviet Union on 5 Dec. 1929.

Tadzhikistan is situated between 39° 40′ and 36° 40′ N. lat. and 67° 20′ and 75° E. long., north of the Oxus (Amu-Darya). On the west and north it is bordered by Uzbekistan and by the Kirghiz Soviet Socialist Republic; on the east by Chinese Turkestan and on the south by Afghánistán. It includes one region (Leninabad) and 40 rural districts, 17 towns and 40 urban settlements, together with the Gorno-Badakhshan Autonomous Region. Its highest mountains are Communism Peak (7,495 metres) and Lenin Peak (7,127 metres). Even the lowest valleys in the Pamirs are not below 3,500 metres above sea-level. The huge mountain glaciers are the source of many rapid rivers—the tributaries of the Amu-Darya, which flows from east to west along the southern border of Tadzhikistan.

The Supreme Soviet, elected in 1971, consists of 315 deputies (1 per 5,000 population); 34% are women and 69% Communists.

At elections to the district, urban and rural Soviets and the regional Soviet of Gorno-Badakhshan (13 June 1971), out of 21,150 deputies returned, 9,531 (45·1%) were women, 11,649 (55·1%) non-Party and 14,370 (67·9%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: Makhmadullo Kholov.
Chairman, Council of Ministers: Abdulahad Kakharov.
First Secretary, Communist Party: D. Rasulov.

AREA AND POPULATION. About 56% of the population are Tadzhiks. They speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan. Unlike the Persians, the Tadzhiks are mostly Sunnis. Of the rest, 23% are Uzbeks living in the north-west of the Republic. Russians and Ukrainians number 14·7%.

The area of the territory is 143,100 sq. km (55,240 sq. miles). Population (Jan. 1971), 3m. The capital is Dushanbe. Other large towns are Leninabad (106,000), Kurgan-Tyube, Kulyab.

EDUCATION. In 1970–71 there were 3,088 primary and secondary schools with 774,000 pupils, 7 higher educational institutions with 44,500 students and 36 technical colleges with 35,300 students; the Tadzhik state university had 4,350 students. In 1970, 45,200 children were attending 445 kindergartens. In 1951 an Academy of Sciences was established; it has 18 institutions, the scientific staff of which numbers 966; there are 60 research institutions in all, with 5,067 scientific personnel. The Pamir research station is the highest altitude meteorological observatory in the world.

In 1940 a new alphabet based on Russian was introduced.

Newspapers (1970). 61 newspapers had a total circulation of 888,000. Of these, 51 with 611,000 circulation, were in Tadzhik.

HEALTH. There are 120 hospitals as well as maternity homes, clinics and special institutes to combat tropical diseases. There were 4,700 doctors in 1970 and 29,200 hospital beds; 5,700 cots in crèches, with 16,900 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. new roubles), 1963, 389; 1964, 435; 1965, 491; 1966, 531; 1967, 539; 1968, 581; 1969, 661; 1970, 692.

AGRICULTURE. The occupations of the population are mainly farming, horticulture and cattle breeding. Area under crops in 1970 was 765,000 hectares (1913, 494,000 hectares; 1940, 807,000). Wine production, 1970, was 347,000 hectolitres.

There are 43,000 km of irrigation canals: the irrigation networks cover about 518,000 hectares of land.

Tadzhikistan grows many varieties of fruit, including apricots, figs, olives, pomegranates, a local variety of lemons and oranges, and in the south sugar-cane has been grown. Even on the highest mountain plateaux of the Pamirs, the roof of the world, the biological station of Tadzhikistan (3,860 metres above sea-level) has succeeded in raising crops of 60 varieties of barley, 10 varieties of oats, 4 of wheat, as well as vegetables. Eucalyptus and geranium are grown for the perfumery industry. Jute, rice and millet are also grown.

Tadzhikistan contains rich pasture lands, and cattle breeding is a very important branch of its agriculture. Livestock on 1 Jan. 1971: 1,008,000 cattle, 2,182,000 sheep, 452,000 goats and 78,000 pigs.

The Gissar sheep is famous for its meat and fat in the south; the Karakul sheep is widely bred for its wool.

There were 282 collective farms (208 with electric power) and 89 state farms in 1970; with 38,400 tractors and 1,200 combine harvesters.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat, 127 (133); maize, 5 (2); cotton, 727 (32); potatoes, 67 (10); vegetables, 197; fruit, 143; grapes, 95; meat, 64 (48); milk, 285 (102); wool, 4·9 (2·1); 131m. eggs (20m.).

INDUSTRY. The original small-scale handicraft industries have been replaced by big industrial enterprises, including mining, engineering, food, textile, clothing and silk factories.

There are rich deposits of brown coal, lead, zinc and oil (in the north of the Republic), rare elements, such as uranium, radium, arsenic and bismuth. Asbestos, mica, corundum and emery, lapis lazuli, potassium salts, sulphur and other minerals have been found in other parts of the Republic. Of 270 known deposits, 60 are being exploited.

Industrial output in 1970 included: 887,000 tons of coal, 181,000 tons of oil, 871,700 tons of cement, 99·9m. metres of cotton fabrics, 43·2m. metres of silk fabrics; leather footwear, 6·1m. pairs.

There are 80 big electrical stations. The hydro-electric Varzob station began to work in 1954, that at Kairak-Kum on the Syr Darya River was completed in 1957 and 2 more at Murgab in 1964. Output in 1970 was 3,200m. kwh. (in 1940: 62m. kwh.).

Construction of an electro-chemical combine, the largest in the USSR, has begun in the Yavan steppe in south Tadjikistan, and of a 3·2m. kw. power station in the upper reaches of the Vakhsh River.

In 1970 there were 586,000 industrial and office workers in the national economy, and 54,000 specialists with a higher education.

ROADS. There are 13,400 km of motor roads. Of these, 8,000 km are hard surface, including the Osh–Khorog (700 km), Yasui–Bazar–Charm (107 km) and Dushanbe–Khorog in the Pamirs (557 km) roads.

RAILWAYS. A railway line between Termez and Dushanbe (258 km) connects the Republic with the railway system of the USSR. The mountainous nature of the Republic makes ordinary railway construction difficult; accordingly 345 km of narrow gauge railways have been constructed (Kurgan–Tyube–Piandzh and Dushanbe–Kurgan–Tyube, connecting Dushanbe with the cotton-growing Vakhsh valley and are particularly important).

SHIPPING. A steamship line on the Amu-Darya runs between Termez, Sarava and Jilikulam on the river Vakhsh (200 km).

AVIATION. Dushanbe is connected by air with Moscow, Tashkent, Baku and the regional and district centres of the Republic.

GORNO-BADAKHSHAN AUTONOMOUS REGION

Comprising the Pamir massif along the borders of Afghánistán and China, the region was set up on 2 Jan. 1925. Area, 63,700 sq. km (24,590 sq. miles); population (est. Jan. 1971), 101,000 (83% Tadjiks, 11% Kirghiz). Capital, Khorog.

There were 26,400 pupils in 285 schools in 1968.

Mining industries are developed (gold, rock-crystal, mica, coal, salt). Wheat, fruit and fodder crops are grown and cattle and sheep are bred in the western parts. In 1969 there were 62,900 cattle, 221,000 sheep and goats.

In 1965 there were 47 collective farms and 1 state (livestock) farm.

KIRGHIZIA

Kyrgyz Sovietik Sotsialistik Respublikasy

After the establishment of the Soviet regime in Russia, Kirghizia was part of Soviet Turkestan, which itself became an Autonomous Soviet Socialist Republic within the RSFSR in April 1921. In 1924, when Central Asia was reorganized territorially on a national basis, Kirghizia was separated from Turkestan and formed into an autonomous region within the RSFSR. On 1 Feb. 1926 the Government of the RSFSR transformed Kirghizia into an Autonomous Soviet Socialist Republic within the RSFSR and finally in Dec. 1936 Kirghizia was proclaimed one of the constituent Soviet Socialist Republics of the USSR.

The Supreme Soviet, elected in 1971, consists of 339 deputies (1 per 5,000 population); 120 are women, 231 Communists.

At elections to the regional, district, urban and rural Soviets (13 June 1971), of the 24,595 deputies returned, 11,020 (44·8%) were women, 13,691 (55·7%) non-Party and 16,668 (67·7%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: Turabay Kulatov.
Chairman, Council of Ministers: A. S. Suyumbayev.
First Secretary, Communist Party: T. U. Usubaliev.

AREA AND POPULATION. The territory of Kirghizia covers 198,500 sq. km (76,460 sq. miles), and its population in Jan. 1971 was 3m. The republic comprises 3 regions: Issyk-Kul, Naryn and Osh. There are 15 towns and 35 urban settlements. Its capital is Frunze (formerly Pishpek). Other large towns are Osh (126,000), Przhevalsk (43,000), Kyzyl-Kia, Tokmak.

Kirghizia is situated on the Tian-Shan mountains and bordered on the east by China, on the west by Kazakhstan and Uzbekistan, on the north by Kazakhstan and in the south by Tadzhikistan. The Kirghizians are of Turkic origin and form 44% of the population; the rest are Russians (29%), Ukrainians (4%), Uzbeks (11·3%) and others.

EDUCATION. Kirghizia had 1,854 primary, continuation (8-year) and secondary schools with 772,000 pupils in 1970–71; 63,000 children attended 718 kindergartens. There were also 9 higher educational institutions with 48,400 students, 36 technical and teachers' training colleges with 41,700 students, as

well as music and art schools. The Kirghizian Academy of Sciences was established in 1954. In 1970 there were 50 research institutes, 18 of them, with 1,137 scientific staff, under the Kirghiz Academy of Sciences; the others have scientist staffs of 5,867. A university was opened in 1951. In Sept. 1940 a new alphabet, based on Russian, was introduced.

Newspapers (1970). Of 90 newspapers with 888,000 circulation, 50 with 562,000 circulation are in the Kirghiz language.

HEALTH. In 1970 there were 6,200 doctors and 31,900 hospital beds; cots in crèches, 9,500, with 17,200 in crèche-sections of kindergartens.

FINANCE. Budget estimates (in 1m. roubles), 1963, 454; 1964, 474; 1965, 531; 1966, 581; 1967, 600; 1968, 641; 1969, 709; 1970, 741.

AGRICULTURE. Kirghizia is famed for its livestock breeding. On 1 Jan. 1971 there were 912,000 cattle, 244,000 pigs, 9·2m. sheep and 255,000 goats. Yaks are bred as meat and dairy cattle, and graze on high altitudes unsuitable for other cattle. Crossed with domestic cattle, hybrids are produced much heavier than ordinary Kirghiz cattle and giving twice the yield of milk. The Kirghizian horse is famed for its endurance, but it is of small stature; it has in recent years been crossed with Don, Arab and other breeds.

In 1970 there were 245 collective and 103 state farms. Area under crops (1970), 1·26m. hectares (1913, 640,000 hectares; 1940, 1,056,000). There were 42,600 tractors and 3,400 grain combine harvesters in 1970; nearly all collective and state farms received electric power.

Kirghizia raises wheat sufficient for its own use and other grains and fodder, particularly lucerne; also sugar-beet, hemp, kenaf, kendyr, tobacco, medicinal plants and rice. Sericulture, orchards, vineries, vegetables and apiary are also important branches of Kirghiz agriculture. Agriculture is highly mechanized; over two-thirds of the area under crops is worked by tractors. In 1970 irrigation networks in collective and state farms covered 883,000 hectares; practically all were in use. A canal in the western Tien-Shan ranges and a reservoir in the Urto-Tokoi mountains are being constructed.

The health resorts of Jety-Oguz (7,200 ft high) and Jalal-Abad are famous for their mild alpine climate and mineral springs.

Output of main agricultural products (1,000 tons) in 1970 (1913 figures in brackets): Wheat, 595 (250); maize, 103 (37); cotton, 187 (28); sugar-beet, 1,683 (0); potatoes, 278 (19); vegetables, 191; fruit, 85; grapes, 21; meat, 134 (39); milk, 548 (91); wool, 27·1 (4·7); 268m. eggs (19m.).

INDUSTRY. Kirghizia contains about 500 large modern industrial enterprises, including sugar refineries, tanneries, cotton and wool-cleansing works, flour-mills, a tobacco factory, food, timber, textile, engineering, metallurgical, oil and mining enterprises.

The output of coal in 1970 was 3·7m. tons; oil, 298,000 tons; cotton fabrics, 1,7m. metres; leather footwear, 9·6m. pairs; granulated sugar, 198,000 tons; silk fabrics, 8·6m. metres.

Hydro-electric power stations are being built in the Central Tien-Shans and the cotton-growing districts in the Osh Region, the Chui valley and on the shore of Lake Issyk-Kul. Power output (1970) was 3,500m. kwh.

There were, in 1970, 780,000 industrial and office workers in the national economy, and 67,000 specialists with a higher education.

COMMUNICATIONS. In the north a railway runs from Lugovaya through Frunze to Rybachi on Lake Issyk-Kul. Towns in the southern valleys are linked by short lines with the Ursatyevskaya–Andizhan railway in Uzbekistan. Total length of railway lines is 370 km. Most of the traffic is by road; there were 19,600 km of motor roads (11,400 hard surface) in 1970. A road tunnel through

the Tien Shan mountains at an altitude of 9,600 ft, connecting Frunze and Osh, is being constructed. Inland waterways, 600 km. Airlines link Frunze with Moscow and Tashkent.

UNITED ARAB EMIRATES

HISTORY AND GOVERNMENT. From Sha'am, 35 miles south-west of Ras Musam dam, for nearly 400 miles to Khor al Odeid at the south-eastern end of the peninsula of Qatar, the coast, formerly known as the Pirate Coast, of the Gulf (together with 50 miles of the coast of the Gulf of Oman) belongs to the rulers of the 7 Trucial States. In 1820 these rulers, after committing acts of hostility against the East India Company, signed a treaty prescribing peace with the British Government and perpetual abstention from plunder and piracy (specifically including the slave trade) by land and sea. This treaty was followed by further agreements providing for the suppression of the slave trade and by a series of other engagements, of which the most important are the Perpetual Maritime Truce (May 1853) and the Exclusive Agreement (March 1892). Under the latter, the shaikhs, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, or cede, sell or give for occupation any part of their territory save to the British Government.

British forces withdrew from the Gulf at the end of 1971 and the treaties whereby Britain had been responsible for the defence and foreign relations of the Trucial States were terminated, being replaced on 2 Dec. 1971 by a treaty of friendship between Britain and the United Arab Emirates. The United Arab Emirates, comprising 6 of the 7 Trucial States came into existence on the same day. The remaining state, Ras al Khaimah, joined in Feb. 1972. The UAE became a member of the Arab League on 6 Dec. and of the United Nations on 9 Dec. 1971.

President: Shaikh Zayed bin Sultan al Nahayan (Ruler of Abu Dhabi).
Vice-President: Shaikh Rasmid bin Said al Marktoum (Ruler of Dubai).

AREA AND POPULATION. The area of these states is approximately 32,300 sq. miles (83,660 sq. km). The total population at census (1972), over 200,000, of whom about one-tenth are nomads. The formerly independent small state of Kalba on the Gulf of Oman was merged with Sharjah in 1952.

The largest and most important town of the UAE is Dubai (about 60,000 inhabitants). Abu Dhabi has a population in excess of 60,000 and has expanded rapidly since it became an important oil producer. Traditionally the inhabitants of the UAE have depended for their livelihood on trading, fishing and pearling. In recent years there has been a drift towards the towns, and the oil industry, particularly in Abu Dhabi, has become the major employer.

See map in this edition of THE STATESMAN'S YEAR-BOOK, The Gulf States of the Middle East.

EDUCATION. Primary-intermediate education for boys is available in the UAE, and for girls in Dubai (4 schools), Sharjah, Ras al Khaimah and Abu Dhabi; a limited secondary education for boys, in Dubai (8 schools), Abu Dhabi, Sharjah and Ras al Khaimah and for girls in Sharjah. There are 5 boys' schools in Sharjah; 6 boys' and 5 girls' schools in Ras al Khaimah, 1 boys' and 1 girls' school in Fujairah; and 1 boys' school in Ajman. The education system is the same as that followed in Kuwait, and many of the teachers in the Trucial States

are supplied by the Kuwait, Qatar, Egypt, Jordan and Bahrain education departments. The oil companies in Abu Dhabi operate apprentice training schools and there is also a vocational training institute. A vocational training centre is under construction.

There are trade schools in Sharjah, Dubai and Ras al Khaimah.

HEALTH. There are several hospitals in Dubai, including a 400-bed hospital now under construction. There are also hospitals in Ras al Khaimah and in Sharjah. Clinics have been built in Sharjah and other towns. There is a hospital in Abu Dhabi and at Al Ain and also a free medical service. A tuberculosis sanatorium is to be constructed by the State of Kuwait in Sharjah.

AGRICULTURE. The fertile Buraimi Oasis, known as Al Ain, is largely in Abu Dhabi territory, but owing to lack of water and good soil there is little agriculture in the rest of the Trucial States. However, since the establishment of an agricultural trials station and an agricultural school in Ras al Khaimah the number of gardens under cultivation has more than doubled and there have been remarkable increases in the variety of crops and the length of the agricultural season. In 1970 a herd of dairy cattle was imported for the agricultural trials station. An experimental agricultural farm exists in Al Ain which produces vegetables for Abu Dhabi.

FINANCE. Currency. Dubai uses the Qatar/Dubai *riyal*. Abu Dhabi adopted the Bahrain *dinar*. The UAE will issue its own currency in 1972 based on the *dirham*.

Budget. Revenue is principally derived from customs dues on imports and oil-concession payments. Accurate estimates of the States' income are difficult to make, but Dubai's income in 1970 is believed to have been about £4m. and may rise with increasing oil revenue to about £15m. by 1972. Abu Dhabi's income (1971) was about £180m. The 5 smallest states have incomes of less than £1m. per annum.

DEFENCE. Formation of an air wing in Abu Dhabi, to support land forces, began in 1968 with the purchase of 2 Britten-Norman Islander light STOL transports and 4 Agusta-Bell JetRanger light helicopters. Four larger Caribou STOL transports are now in service and are being followed by 10 Hunter fighters and reconnaissance fighters and 2 Hunter 2-seat trainers. Initial personnel are mostly British.

PLANNING. Public projects under construction include the 15-berth Port Rashid harbour, the £4m. airport terminal building and the £6m. Rashid Hospital. A municipal sewerage scheme is under way and a police headquarters is planned. Further developments are expected to include reclamation of part of the sea front, improvement of the creek unloading facilities and a traffic tunnel or additional bridge over the creek. In Sharjah, Mina Khalid is now operational and ships are using the new jetty, while improvement of the creek entrance and additional wharfage are now being undertaken. There are plans for a cement works and a flour-mill in Dubai in the near future and a large deep-water harbour is being constructed in Abu Dhabi.

OIL. In 1962 oil was shipped for the first time from Das Island in Abu Dhabi territory by Abu Dhabi Marine Areas Ltd (owned two-thirds by British Petroleum and one-third by Compagnie Française des Pétroles). The Abu Dhabi Petroleum Company (a subsidiary of the Iraq Petroleum Co.), who hold the land concession in Abu Dhabi, started to ship oil in Dec. 1963. Oil production in the Dubai offshore concession started in Sept. 1969. The concession is operated by Continental Oil Co.'s subsidiary Dubai Petroleum Co., on behalf of Dubai

Marine Areas which is owned half by CFP and half by Hispanoil, and Texaco and Dubai Sun Oil Co. Other concessions in the Northern Trucial States are held by Dubai Petroleum Co. (Dubai Onshore), Buttes Gas & Oil Co. (Sharjah West Coast Offshore), Occidental Petroleum Co. (Ajman On and Offshore and Umm al Qaiwain Offshore), Union Oil/Southern Natural Gas (Ras al Khaimah Offshore), Shell Hydrocarbons (Sharjah Onshore West Coast, Umm al Qaiwain and Ras al Khaimah Onshore), and Shell Minerals (Sharjah East Coast On and Offshore and Fujairah On and Offshore). Drilling was planned at several sites in the area during 1970–71. In 1967 a land concession in Abu Dhabi was awarded to a group consisting of Phillips Petroleum Co., Ammoil and AGIP, and an offshore concession was awarded to the Abu Dhabi Oil Co. Ltd consisting of Maruzen Oil, Daiko Oil and Nippon Mining (all of Japan). In 1968 and 1970 land concessions were awarded in Abu Dhabi to 5 companies from Mitsubishi group of Japan known as Middle East Oil Co. (Japan) Ltd. In June 1970 a consortium composed of Pan Ocean Oil Corporation, Syracuse Oils Ltd, Wington Enterprises Ltd were awarded an offshore concession in Abu Dhabi.

COMMERCE. Imports in 1965, excluding Abu Dhabi, amounted to about £17·4m.; exports and re-exports to £2·6m. The UK was the principal supplier (£3m.), followed by Japan (£2·4m.) and India (£1·7m.).

Total trade between the former Trucial States (excluding Abu Dhabi) and UK, in £1,000 sterling (British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	6,660	36,739	13,632	13,378	20,626
Exports and re-exports from UK	5,339	9,078	13,528	13,748	13,842

Total trade between Abu Dhabi and UK, in £1,000 sterling (British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	15,900	14,500	16,600	18,730	26,492
Exports and re-exports from UK	6,924	9,658	15,006	10,802	12,475

SHIPPING. British and European shipping lines call at Dubai (30–40 vessels a month) and Abu Dhabi.

AVIATION. Dubai, Sharjah and Abu Dhabi have international civil airports. Gulf Aviation, Ltd, operate services from Bahrain, Kuwait and London. Regular services are operated by BOAC between London, Abu Dhabi, Dubai, Bombay and Karachi; by Middle East Airlines between Beirut, Doha, Abu Dhabi and Dubai; by Iranair to Dubai and Abu Dhabi; by Pakistan International Airways and Kuwait Airlines to Dubai and Abu Dhabi; by Syrian Arab Airlines to Dubai and Abu Dhabi; by Saudi Arabian Airlines to Dubai; by Royal Jordanian Airlines to Abu Dhabi and by Air India to Dubai and Abu Dhabi.

TELECOMMUNICATIONS. The Dubai State Telephone Co. has carried out an expansion scheme to increase the number of lines available to 5,500. In Sharjah a new telephone company has been formed and the other Northern Trucial States are now linked by telephone. The new Cable and Wireless Station at Jebel Ali in the State of Dubai links the system with the international communications network.

All the Trucial States have their own post offices and issue their own stamps. The British Post Office is responsible for their representation in the Universal Postal Union.

BANKING. The British Bank of the Middle East has branches in Dubai, Abu Dhabi, Sharjah, Khor Fakkan and Ras al Khaimah; the Chartered Bank has branches in Dubai, Sharjah, Abu Dhabi and Al Ain; the National & Grindlays Bank (Ottoman Branch) has branches in Abu Dhabi and Al Ain. The Arab Bank has branches in Al Ain, Ras al Khaimah, Sharjah, Abu Dhabi and Dubai; the First National City Bank of New York has branches in Dubai and Abu Dhabi;

the Habib Bank of Pakistan have branches in Dubai and Sharjah and the United Bank Ltd of Pakistan branches in Dubai, Sharjah, Abu Dhabi and Al Ain. There is also the National Bank of Dubai, formed in 1963, which has a branch in Abu Dhabi and Umm al Qaiwain, and the Bank of Oman Ltd, formed in 1967, which has a branch in Al Ain. The Commercial Bank opened in Dubai in 1969. The Bank Sadarat of Iran has branches in Abu Dhabi, Dubai, Fujairah and Ras al Khaimah. The National Bank of Abu Dhabi, formed in 1967, has its head office in Abu Dhabi and a branch office in Al Ain.

British Ambassador (in Abu Dhabi): C. J. Treadwell.
British Consul-General (in Dubai): J. L. Walker, MBE.

URUGUAY

República Oriental del Uruguay

HISTORY. The Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Río de la Plata and subsequently a province of Brazil, declared its independence 25 Aug. 1825 which was recognized by the treaty between Argentina and Brazil signed at Rio de Janeiro 27 Aug. 1828. The first constitution was adopted 18 July 1830.

CONSTITUTION AND GOVERNMENT. Since 1900 Uruguay has been unique in her constitutional innovations, all designed to protect her from the emergence of a dictatorship. The favourite device of the group known as the 'Batllistas' (a *Colorado* faction) which, until defeated at the 1958 elections, held the majority for over 90 years, has been the collegiate system of government, in which the two largest political parties were represented.

One such pattern lasted from 1917 to 1933, when it was abolished by a dictator who re-established the system of an individual President. Until 1951 Presidents were elected every 4 years and they selected their own Cabinet Ministers (*see* list of Presidents in THE STATESMAN'S YEAR-BOOK, 1956, p. 1493). In 1951, on the initiative of the 'Batllistas', the Constitution was amended: the individual presidency was abolished and the executive power vested in a National Council of Government of 9 members (6 from the majority and 3 from the minority parties).

As a result of a referendum held in conjunction with the elections on 27 Nov. 1966, which gave the Colorado party a majority, Uruguay returned to the presidential system. The President appoints a council of 11 Ministers; the Vice-President presides over the Senate and the General Assembly when this takes place.

President: Juan María Bordaberry (sworn in for a 5-year term on 1 March 1972).
Minister for Foreign Affairs: Dr José Mora Otero.

Parliament consists of 2 Houses, the Senate composed of 31 members and the Chamber of Representatives composed of 99 members. The President, Vice-President and members of both Houses are elected for a 5-year term. All people of 18 years or over at the election date are entitled to vote.

The electorate in 1971 numbered 1·7m.; women constituted 50%.

The Colorado party favours 'statism' and social-welfare legislation. Most banking and all forms of insurance are government monopolies, as are also the railways and all the public utilities. The Government controls cement, fuel, petroleum and alcohol, including the manufacture of *caña*, a cheap rum-like drink which is the national beverage.

National flag: A white field with 4 horizontal azure blue stripes; a golden sun in splendour with 16 rays, alternately straight and wavy, in a white canton.

National anthem: Orientales, la patria ó la tumba (words by Francisco Acuña de Figueroa; music by Francisco José Deballi).

AREA AND POPULATION. The area is 186,926 sq. km (72,172 sq. miles). The following table shows the area and the population of the 19 departments (capitals in brackets) at the census of 16 Oct. 1963:

Departments	Area, sq. km	Population	Pop. per sq. km
Artigas (Artigas)	11,378	63,589	5·6
Canelones (Canelones)	4,752	201,359	42·4
Cerro-Largo (Melo)	14,929	110,339	7·3
Colonia (Colonia)	5,682	135,038	23·8
Durazno (Durazno)	14,315	99,063	6·9
Flores (Trinidad)	4,519	35,565	7·9
Florida (Florida)	12,107	106,284	8·8
Lavalleja (Minas)	12,485	115,852	9·3
Maldonado (Maldonado)	4,111	67,933	16·5
Montevideo (Montevideo City)	664	836,165	1,259·3
Paysandú (Paysandú)	13,252	92,417	7·0
Río Negro (Fray Bentos)	8,471	51,954	6·1
Rivera (Rivera)	9,829	91,740	9·3
Rocha (Rocha)	11,089	86,334	7·8
Salto (Salto)	12,603	108,030	8·6
San José (San José)	6,963	96,848	13·9
Soriano (Mercedes)	9,223	99,927	10·8
Tacuarembó (Tacuarembó)	21,015	119,658	5·7
Treinta y Tres (Treinta y Tres)	9,539	72,063	7·5
Total	186,926	2,590,158	13·9

Estimated population in 1967 was 2·78m. In 1964 Montevideo (the capital) had an estimated population of 1·2m.; Paysandú, 60,000; Salto, 60,000; Rivera, 40,000.

Crude birth rate, 1957, 20 per 1,000 population and crude death rate, 7·91 (both unofficial calculations). Crude marriage rate, 1957, 7·6; infant mortality rate, 46·6 per 1,000 live births (65·7 in 1955). Births in 1960, 60,163; deaths, 23,026; marriages, 19,725.

The 387 immigrants in 1967 were reported as: from Spain, 144; US, 58; Argentina, 47; Italy, 21; Germany, 20; others, 97.

The language of the country is Spanish.

RELIGION. State and Church are separated, and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 9 suffragan bishops in Salto, Melo, Florida, Minas, San José, Canelones, Tacuarembó, Mercedes and Maldonado.

Protestants numbered about 10,500 in 1957.

EDUCATION. Primary education is obligatory; both primary and superior education are free.

In 1971 there were 1,950 primary public schools with 331,754 pupils and approximately 10,300 teachers; in 1968, 249 secondary schools had 189,204 pupils. There are also evening courses for adults. Illiteracy is now confined largely to the older age groups.

The University of the Republic at Montevideo, inaugurated in 1849, has about 16,200 students; tuition is free to both native-born and foreign students; there are 10 faculties. There are 43 normal schools for males and females, and a college of arts and trades with about 26,909 students. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a school for the blind, 2 for the deaf and dumb and a school of domestic science.

CINEMAS (1970). Cinemas numbered 150 with seating capacity of 83,000.

NEWSPAPERS (1971). There were 8 daily newspapers in Montevideo with aggregate daily circulation of about 210,000; most of the 25–30 provincial newspapers appear bi-weekly.

WELFARE. Hospital beds, 1971, numbered 15,250; physicians numbered 4,434.

JUSTICE. The Supreme Court consists of 5 judges elected by the 2 Chambers sitting as a National Assembly. The President is chosen annually by the members of the court from among themselves. This court has original jurisdiction in constitutional, international and admiralty cases, and hears appeals from the appellate courts, of which there are 4, each with 3 judges. In Montevideo there are also 8 courts for ordinary civil cases, 3 for government (*Juzgado de Hacienda*), as well as criminal and correctional courts. Each departmental capital has a departmental court; each of the 224 judicial divisions has a justice of peace court. In Sept. 1907 the death penalty was abolished, replaced by penal servitude for a period of 30–40 years.

FINANCE. Currency. There is no gold in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, gold content of which was fixed, Dec. 1964, at 0·05924 gramme. It is equal to 100 *centésimos*. The actual circulating medium consists of paper notes issued by the Bank of the Republic in denominations of 10,000, 5,000, 1,000, 500, 100, 50 *pesos*. There are also aluminium–bronze coins of 50, 20, 10, 5, 1 *pesos* and copper–nickel coins of 50 and 20 *pesos*.

In 1971, there were UR$250 to the US$; UR$598 = £1.

Budget. The receipts and expenditure of the national accounts as approved by the National Council of Government (UR$1m.):

	1965	*1966*	*1967*[1]	*1968*	*1969*	*1970*[1]
Revenue	5,451·5	12,314·9	18,700	45,983	61,772	83,927
Expenditure	8,125·2	15,377·7	22,200	50,088	74,462	94,973

[1] Estimates.

Now covering a 5-year period the budget is presented during the year following election of each new government; differences in actual annual income and expenditure and amendments to the budget (including new taxes) must be approved by Parliament each year-end; these usually come forward in June or July each year.

Expenditures in 1971 (in 1m. pesos) included 1,480 for education and welfare, 11,998 for defence, 6,367 for health, 8,042 for interior, 2,655 for finance and 520 for public works, 1,757 for agriculture and 2,030 for transport and tourism. Expenditure on public works is separately financed from specific revenues (*e.g.*, fuel tax). A law inaugurating income tax came into operation on 1 July 1961.

Public debt outstanding on 30 June 1971 was 28,123m. pesos. Total gold reserves of the Banco Central on 31 May 1971 was US$76·1m.

DEFENCE. Army. The Army is composed of the active army and its reserves. The active army is formed of volunteers, who contract for 1 year or 2 years service. There are 2 armoured regiments, 6 regiments of cavalry, 4 of artillery, 4 of infantry, 4 battalions of engineers. Peace-time strength 9,000 men.

The reserve is formed by elements who, for some reason or other, retire from the active army, and by citizens who are trained every year in accordance with the law of compulsory military instruction. It is reckoned that about 120,000 men could be mobilized in case of war.

Navy. The Navy consists of 2 destroyer escorts, 1 training frigate, 1 escort (*ex*-fleet minesweeper), 2 patrol vessels, 1 coastal minesweeper, 1 survey ship, 1 salvage vessel, 1 rescue launch, 1 oiler and 1 tug. Personnel in 1971: 440 officers and 2,300 ratings.

There is a small naval air service, with 3 bases on the river Plate estuary.

Air Force. Organized with US aid, the Air Force has about 75 aircraft, including 1 fighter-bomber squadron with 6 F-80C Shooting Stars and 6 AT-33 armed jet trainers, 2 transport squadrons with 2 turboprop Friendships, 13 C-47s and a photographic Beechcraft T-11, a search and rescue squadron with 4 H-23F light helicopters and 3 Piper L-21As, and a number of Cessna U-17A/182 and T-6 aircraft for liaison duties. Basic training type is the T-6.

AGRICULTURE. Uruguay is primarily a pastoral country. Of the total land area of 46m. acres some 41m. are devoted to farming, of which 90% to livestock and 10% to crops. Some large *estancias* have been divided up into family farms; rural landlordism is much less than elsewhere. Uruguay is said to be the only Latin American country in which agricultural workers have the protection of a minimum-wage law. Animals and animal products constitute 71% of the exports. The 1966 census reported on 79,101 farms of all kinds, totalling 16·5m. hectares.

There are 8·8m. cattle, 21·7m. sheep, 498,097 horses, 383,357 pigs and 10,461 goats.

Wool exports for the year 1 Oct. 1967 to 30 Sept. 1968 were 174,763 bales and of these the UK took 50,105. Exports, 1966, of sheepskins were 2,221 metric tons; cattle hides, 10,820 metric tons.

Agricultural products are raised chiefly in the departments of Paysandú, Río Negro, Colonia, San José, Soriano and Florida. The average farm is about 250 acres. The principal crops and their estimated yield (in metric tons) in 3 crop years were as follows:

	Area (hectares)			Yield (metric tons)		
	1968–69	*1969–70*	*1970–71*	*1968–69*	*1969–70*	*1970–71*
Wheat	535,200	336,250	336,700	469,790	403,185	388,338
Linseed	81,680	111,990	91,550	56,458	81,225	41,933
Oats	89,200	74,800	82,950	73,155	59,745	78,035
Barley	39,560	39,360	41,445	48,058	41,088	45,481
Rye	2,530	7,540	..	1,735	4,462	..
Maize	175,800	182,800	181,600	128,829	139,205	164,335
Sunflower	90,750	97,070	70,100	65,515	64,905	47,590
Groundnuts	3,180	3,153	3,000	2,527	2,448	2,253
Rice	34,340	37,490	30,760	134,496	142,296	116,129
Cotton	615	813	983	516	513	673

Uruguay is self-sufficient in rice, with usually a small surplus for export. Three sugar refineries handle cane and (mainly) beet, their total production being approximately 70,000 metric tons, and approaching self-sufficiency.

Wine is produced chiefly in the departments of Montevideo, Canelones and Colonia, about enough for domestic consumption. The country has some 6m. fruit trees, principally peaches, oranges, tangerines and pears.

INDUSTRY. In 1960 there were 34,427 registered enterprises with 284,600 employees. These cover basic activities such as meat packing, lumbering, oil refining, cement manufacture and also many branches of light industry, including one rolling mill for steel and one for aluminium, light engineering and electrical, chemical and textile production. There are 555 textile mills, but with the exception of half a dozen large plants, these are on the whole small. Total capital invested in industry is UR$340·2m.: there are some 147,500 cotton, woollen and rayon spindles, 1,300 looms for woollen fabric and 1,000 looms for cotton rayon goods.

A number of public works programmes are under consideration, including the Carrasco and internal airport modernization, port of Montevideo modernization and bridges and ferry boats to link with Argentina across the river Uruguay; in addition to contracts issued for Highways 5 and 26 with IBRD loans.

The Commission for Investment and Economic Development (CIDE) published its 10-year development plan (1965–74) in Oct. 1965. It consists of 3 plans, plus specific projects, of which some overlap the 3 plan periods. The 3-year public works programme includes on-going projects, and the *Plan Agropecuario* (agriculture and livestock) is in full execution. The overall plan aims at a gross national product growth rate of 5·2% per annum. The plan has been costed at UR$53,000m. at 1963 prices (UR$14 = US$1). It is envisaged that 95% of the required finance will be obtained from internal resources.

LABOUR. Trade unions number about 150,000 members. About 1,036,000 (40%) of the population are classed as gainfully occupied.

POWER. The supply of electricity for light, power and traction has been a State monopoly since 1897. In Jan. 1949 the first hydro-electric plant at the site of the dam of Rincón del Bonete was completed with an installed capacity of 128 megawatts. Another plant at Rincón de Baygorria on the Río Negro came into operation in 1960, with a capacity of 108 megawatts. Power output in 1970 was 1,930m. kwh. An extension of the ANCAP refining plant, opened at Montevideo on 6 Dec. 1961, gives a capacity of 7,500 cu. metres daily of high-octane petrol and high-grade gas for domestic and industrial use.

TOURISM. In 1968, 604,189 tourists and 31,455 motor cars entered the country.

COMMERCE. The Latin American Free Trade Association came into being as a result of a conference in Montevideo in 1961 (*see* p. 48). The foreign trade (officially stated in US$, with the figure for imports based on the clearance permits granted and that for exports on export licences utilized) was as follows (in US$1,000):

	1964	*1965*	*1966*	*1967*	*1968*	*1969*	*1970*
Imports	198·4	150·5	162·2	171·4	159·3	197·3	230·9
Exports	178·9	191·2	185·8	158·8	179·2	200·3	232·7

Of the imports in 1970 (and 1969) (in US$1m.) Brazil furnished 35·1 (26·4); USA, 29·8 (26·7); Argentina, 26·3 (20·8); West Germany, 25·5 (21·7); UK, 16·1 (12·1); and Kuwait, 14·6 (11·7); of the exports West Germany took 30·6 (20·2); Italy, 22·9 (21); Netherlands, 20·1 (14·2); USA, 19·8 (13·2); UK, 19·5 (27); Greece, 13·6 (9·5) Brazil, 12·4 (10·6).

Principal imports and exports (in US$1,000):

Imports	*1969*	*1970*	Exports	*1969*	*1970*
Raw materials	77,816	89,319	Meat and meat products	62,083	87,843
Machinery and accessories	31,798	26,827	Wool	42,716	47,522
Motor vehicles	24,006	36,066	Spun, woven goods, etc.	31,054	31,808
Fuel and lubricants	24,941	33,716	Leather and hides	23,884	24,348

Total trade between Uruguay and UK (British Board of Trade returns) in £1,000 sterling:

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	17,511	13,119	12,918	8,556	6,615
Exports and re-exports from UK	3,361	4,842	4,851	6,401	7,524

SHIPPING. On 31 Dec. 1969 the 10 merchant vessels and 3 tankers under the Uruguayan flag had a gross registered tonnage of 100,860. In 1970, 1,068 ocean-going vessels of 5·2m. net tons entered Montevideo. River transport (1,270 km) is extensive; its main importance being to link Montevideo with Paysandú and Salto.

ROADS. The main highways, linking Montevideo with the interior, have a total length of 7,820 km, of which about 5,000 km are paved. Other roads, unpaved, are about 33,800 km. Considerable improvements, financed both internally and by international loans, have been carried out in the last few years.

Registered motor vehicles, 31 Dec. 1970, are estimated at 202,000 passenger cars and 84,196 trucks and buses.

RAILWAYS. The 4 principal railway systems, embracing 2,398 km, were all built by British capital amounting to £14,513,000. The Uruguayan Government in 1948 bought these railways for £7·15m., assuming control in that year. The East Coast Railway (125·5 km) and 3 minor lines were already controlled by the State under a separate administration. In Oct. 1952 the railways were brought under a single administration and a 'caretaker' Directorate is planning repairs

and modernization. The total railway system open for traffic is 2,975 km of standard gauge. In 1969 it carried 8·6m. passengers, 2·03m. tons of freight.

AVIATION. Carrasco, 22·5 km from Montevideo, is the most important airport. US, Argentine, Brazilian, Chilean, Dutch, French, W. German, Italian, Scandinavian and Paraguayan airlines ply to and from Uruguay. The state-operated civil airline PLUNA runs services in the interior of the country and to Brazil, Paraguay and Argentine.

POST. The telegraph lines in operation have a total length of 12,083 km. The telephone system in Montevideo is controlled by the State; small companies operate in the interior. Telephone instruments, 1969, numbered 205,174. There are 1,277 post offices. Uruguay has 54 long-wave and 17 short-wave broadcasting stations. There are about 1m. wireless sets and 200,000 television receivers. There are 4 television stations. The State itself operates one of the most powerful sound broadcasting stations in South America. Four cable companies connect Montevideo with the US and Europe.

BANKING. The Bank of the Republic (founded 1896), whose president and directors are appointed by the Government, has a paid-up capital of UR$1,338m. The Banco Central was inaugurated on 16 May 1967. On 31 Dec. 1966 foreign exchange was oversold by US$48m.; note circulation on 31 May 1971 was UR$68,463m.

A state-owned National Insurance Bank (Banco de Seguros del Estado) has a monopoly of new insurance business of all kinds. The Bank re-insures much of its business in London.

Of the 36 banks in Uruguay the Bank of London and South America (British) has a main office and 10 branch agencies.

WEIGHTS AND MEASURES. The metric system was adopted in 1862.

VATICAN CITY STATE

Stato della Città del Vaticano

HISTORY. For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy from sea to sea and comprising some 17,000 sq. miles, with a population finally of over 3m. In 1859–60 and 1870 the Papal States were incorporated with the Italian Kingdom. Although, by an Italian law dated 13 May 1871, there was guaranteed to His Holiness and his successors for ever, besides the use of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire, this allowance remained unclaimed and unpaid until 11 Feb. 1929, when the 'Roman question' was settled by three treaties between the Italian Government and the Vatican: (1) A Political Treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican; (2) a Concordat, to regulate the condition of religion and of the Church in Italy; and (3) a Financial Convention, in accordance with which the Holy See received 750m. lire in cash and 1,000m. lire in Italian 5% state bonds. This sum was to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified on 7 June 1929. The treaty has been embodied in the Constitution of the Italian Republic of 1947.

The Vatican City State is governed by a Commission appointed by the Pope. The reason for its existence is to provide an extra-territorial, independent base for the Holy See.

AREA AND POPULATION. The area of the Vatican City is 44 hectares (108·7 acres). It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (opened Nov. 1932), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major, St Paul without the Walls and the Pope's summer villa at Castel Gandolfo. On 8 Oct. 1951 extra-territorial rights were also granted to a new Vatican radio station on Italian soil.

The Vatican City has about 1,000 inhabitants.

Supreme Pontiff: **Paul VI** (Giovanni Battista Montini), born at Concesio near Brescia, 26 Sept. 1897; Secretariat of State 1923–54; Archbishop of Milan 1954–63; elected Pope 21 June 1963; coronation 30 June 1963.

Secretary of State: Cardinal Jean Villot (appointed 5 May 1969).

The Pope exercises the sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-third majority.

From the accession of Clement VII in 1523 all Popes have been Italians.

Name and family	Election	Name and family	Election
Benedict XIV (*Lambertini*)	1740	Pius IX (*Mastai-Ferretti*)	1846
Clement XIII (*Rezzonico*)	1758	Leo XIII (*Pecci*)	1878
Clement XIV (*Ganganelli*)	1769	Pius X (*Sarto*)	1903
Pius VI (*Braschi*)	1775	Benedict XV (*della Chiesa*)	1914
Pius VII (*Chiaramonti*)	1800	Pius XI (*Ratti*)	1922
Leo XII (*della Genga*)	1823	Pius XII (*Pacelli*)	1939
Pius VIII (*Castiglioni*)	1829	John XXIII (*Roncalli*)	1958
Gregory XVI (*Cappellari*)	1831	Paul VI (*Montini*)	1963

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting in Dec. 1971 of 121 Cardinals appointed by him from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Holy See.

In addition to the College of Cardinals, the Pope has created a 'Synod of Bishops'. This is to consist of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals in charge of the Roman Congregations and of other persons nominated by the Pope. The Synod is to meet as and when decided by the Pope; its first session was held in the autumn of 1967; an extraordinary session was held in Oct. 1969 and the third session took place in Oct. 1971.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, each composed of a number of Cardinals and 7 diocesan bishops (both appointed for 5-year periods), with Consultors and Officials. Besides the Secretariat of State and the Council for Public Affairs of the Church (which deals with external relations) there are now 10 Sacred Congregations, viz.: Doctrine, Oriental Churches, Bishops, Discipline of the Sacraments, Clergy, Religious, Catholic Education and Evangelization of the Peoples, Causes of the Saints and Divine Worship. There are also 3 Secretariats: for Christian Unity, Non-Christians and Non-Believers; a Prefecture of Economic Affairs, a Prefecture of the Pontifical Household and a Statistical Office. Furthermore, the Roman Curia contains 3 tribunals, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Chamber, etc. The Pontifical Academy of Sciences was revived by Pius XI in 1936 with 70 members.

More than 2,500 Roman Catholic prelates and 99 observer-delegates from 27 other Christian Churches attended the Second Vatican Council which met 11 Oct. 1962 and 8 Dec. 1965. Sixteen Constitutions and Decrees were approved at the Council, and 7 commissions were set up to implement these decisions.

In its diplomatic relations with foreign countries the Holy See is represented by the Council for Public Affairs of the Church. The Pope is, however, pledged to perpetual neutrality in political disputes between governments and to abstention from international congresses called to cope with them, unless his mediation is specifically requested by both parties to a dispute.

In 1930 the issue of Papal coinage was resumed, after a lapse of 60 years. In virtue of a special convention between the Vatican City and the Italian Government (last renewed in 1962), each state allows the currency of the other to circulate in its territory. The Vatican City has, however, given an undertaking that the total value of its coins issued in ordinary years will not exceed 100m. lire, 200m. lire in years of 'Sede vacante' or holy years, or 300m. in the year of the opening of a Council.

VENEZUELA

Republica de Venezuela

CONSTITUTION AND GOVERNMENT. The constitution of 1958 provides for popular election for a term of 5 years of a President, a National Congress, and State and Municipal legislative assemblies, and guarantees the freedom of labour, industry and commerce. Aliens are assured of treatment equal to that extended to nationals.

Congress consists of a Senate and a Chamber of Deputies. At least 2 Senators are elected for each State and for the Federal District. Senators must be Venezuelans by birth and over 30 years of age. Deputies must be native Venzuelans over 21 years of age; there is 1 for every 50,000 inhabitants. The territories, on reaching the population fixed by law, also elect deputies. Voting (by proportional representation) is compulsory for men and women over 18. Owing to the high rate of illiteracy, voting is by coloured ballot cards.

The President must be a Venezuelan by birth and over 30 years of age; he has a qualified power of veto.

The following is a list of presidents since 1941:

	Took Office		Took Office
Gen. Isaias Medina Angarita	6 May 1941	Col. Marcos Pérez Jiménez.	3 Dec. 1952 [1]
Rómulo Betancourt	20 Oct. 1945	Rear-Adm. Wolfgang Larrazábal Ugueto	23 Jan. 1958 [2, 3]
Rómulo Gallegos	15 Feb. 1948	Dr Edgard Sanabria	14 Nov. 1958 [3]
Lieut.-Col. Carlos Delgado Chalbaud	24 Nov. 1948 [4]	Rómulo Betancourt	13 Feb. 1959
Dr G. Suárez Flamerich	27 Nov. 1950 [3]	Raul Leoni	11 March 1964

[1] Deposed. [2] Resigned. [3] Provisional. [4] Assassinated 13 Nov. 1950.

President: Dr Rafael Caldera, elected 1 Dec. 1968 with 1,082,941 out of 3,723,000 votes, assumed office on 11 March 1969.

Presidential and general elections, held on 1 Dec. 1968, resulted in the leader of the Christian Social party (Copei) being elected as President of the Republic although *Acción Democrática* party remains the largest single party in Congress.

Foreign Minister: Dr. Aristides Calvani

The city of Caracas is the capital. The 20 states, autonomous and politically equal, have each a legislative assembly and an elected governor. The states are divided into 156 districts and 613 municipalities. There are also 2 federal territories with 7 departments, and a federal district with 2 departments and 2 parishes. Each district has a municipal council, and each municipio a communal junta. The federal district and the 2 territories are administered by the President of the Republic.

National flag: Yellow, blue with 7 yellow stars in a semi-circle, red (horizontal).

National anthem: Gloria al bravo pueblo (1811; words by Vicente Salias, tune by Juan Landaeta).

AREA AND POPULATION. The official estimate of the area is 912,050 sq. km (352,143 sq. miles); the frontiers with Colombia, Brazil and Guyana extend for 2,972 miles. Over half the population live in the valleys of Caracas and Valencia (once the capital). There are 20 states, 2 territories, the federal district and the federal dependencies (*i.e.*, 72 islands in the Antilles); further states may be created from the territories. Bolívar, the largest state, has an area of 91,868 sq. miles; the other states are far smaller. The federal district embraces 745 sq. miles.

The language of the country is Spanish.

Population according to the census (revised of 26 Feb. 1961):

State	Capital	Pop.	State	Capital	Pop.
Anzoátegui	Barcelona	382,002	Portuguesa	Guanare	203,707
Apure	San Fernando	117,577	Sucre	Cumaná	401,992
Aragua	Maracay	313,274	Táchira	San Cristóbal	399,163
Barinas	Barinas	139,271	Trujillo	Trujillo	326,634
Bolívar	Ciudad Bolívar	213,543	Yaracuy	San Felipe	175,291
Carabobo	Valencia	381,636	Zulia	Maracaibo	919,863
Cojedes	San Carlos	72,652	Ter. Amazonas	Puerto Ayacucho	11,757
Falcón	Coro	340,450	Ter. Delta Amacuro	Tucupita	33,979
Guárico	San Juan	244,966	Federal District	Caracas	1,257,515
Lara	Barquisimeto	489,140	Federal Dependencies	—	861
Mérida	Mérida	270,668			
Miranda	Los Teques	492,349			
Monagas	Maturín	246,217			
Nueva Esparta	La Asunción	89,492		Total	7,523,999

The 1961 census excluded tribal Indians estimated at 31,800, of whom 20,000 are in Ter. Amazonas and 4,000 in Zulia.

In 1971 the total population was estimated at 10,778,051. Of the working population of 3·2m. more than 82,000 were between 10 and 14 years and 429,000 were beteeen 15 and 19 years.

The 1968 population of Caracas was 1·9m. (metropolitan area, estimate, 2m.); Maracaibo, 621,000; Barquisimeto (sugar district), 263,000; Valencia, 210,000; Maracay, 179,000; San Cristóbal, 142,000; Cumaná (1964), 110,201.

Vital statistics, 1968: 384,678 births, 55,932 marriages, 64,592 deaths.

RELIGION. The Roman Catholic is the prevailing religion, but there is toleration of all others. There are 4 archbishops, 1 at Caracas, who is Primate of Venezuela, 2 at Mérida and 1 at Ciudad Bolívar. There are 19 bishops. In the state primary schools instruction is given only to those children whose parents expressly request it. Protestants number about 20,000.

EDUCATION. Elementary instruction is free and, from the age of 7 to the completion of the primary grade, compulsory. In 1968 Venezuela had 10,733 primary schools with (1963) 37,187 teachers and a total enrolment of 1,726,000 pupils; there were 932 secondary and technical schools, of which 517 were private, with a total of 288,100 pupils in secondary and 77,000 pupils in technical schools. For superior education (1961–62) there are the University of Los Andes at Mérida (2,921 students), the Central University in Caracas (300 years old, rebuilt and modernized in 1944) with 16,740 students, the University of Zulia at Maracaibo (3,607 students), the University of Carabobo (1,610 students), the University of Oriente (607 students) and the Instituto Pedagógico (1,992 students). The first 3 universities were granted autonomy on 28 Sept. 1946. Bs.535m. from the yearly national revenue was assigned to the national universities in 1966. A Workers' University in Caracas was set up by law in 1947. Two private universities in Caracas (Universidad Católica 'Andrés Bello', 2,377 students and Universidad Santa Maria, 1,280 students) were authorized by the Government in 1953. The census of 1950 showed that 48·7% of those 10 years of age and older were unable to read and write; this figure was (1965) less than 20%.

CINEMAS (1961). There were 660 cinemas.

NEWSPAPERS (1968). There were 23 daily newspapers and 75 weeklies out of a total of 354 periodicals. In 1961 Caracas had 9 daily and 14 weekly newspapers with a total circulation of about 445,000.

JUSTICE. The Supreme Court, which operates in Divisions, each with 5 members, is elected by Congress for 5 years. The country is divided into 17 legal districts. They select their own President and Vice-President. The Federal Procurator-General is appointed for 5 years. There are lower federal courts.

Each state has a Supreme Court with 3 members, a superior court, or superior tribunal, courts of first instance, district courts and municipal courts. In the

territories there are civil and military judges of first instance, and also judges in the municipios. Finally, there is an income-tax claims tribunal.

FINANCE. Currency. The official monetary unit is the *bolívar*. As a result of exchange reforms of Jan. 1964 the selling rate to the public was changed to Bs.4·50 = US$1. The selling rate applicable to iron and petroleum companies is Bs.4·40 = US$1. Cocoa and coffee exporters may sell exchange to the Central Bank at Bs.4·485. Importers of wheat and powdered milk are eligible for subsidies amounting to the difference between the previous selling rate of Bs.3·35 and the current sellers' Bs.4·50=US$1. The exchange rate of the devalued £ sterling is Bs.10·75; 4·48 Bs. to US$.

The bolívar is divided into 100 *céntimos*. Gold coins, 100 (*pachanos*), 20 and 10 bolívars have been minted but are no longer in circulation; silver coins are 5 (*fuerte*), 2, 1 bolívars; nickel, 50 (*real*), 25 (*medio*) and 12·5 *céntimos* (*locha*), copper-nickel, 5 *céntimos* (*puya*).

The bank-notes in circulation are 500, 100, 50, 20 and 10 bolívars. The circulation of foreign bank-notes is forbidden.

Budget. The revenue and expenditure for calendar years were, in 1m. bolívars, as follows:

	1965	*1966*	*1967*	*1968* [1]	*1969* [1]	*1970* [1]
Revenue	7,273	7,951	8,625	8,965	10,080	10,647
Expenditure	7,020	7,852	8,186	8,965	9,689	9,739

[1] Revised estimates.

The oil industry contributes about 70% of ordinary revenue in the form of royalties and income-tax, the government share of oil companies' profit amounts to about 66%.

The 1968 estimates include receipts of 5,792m. bolívars from the oil industry, and expenditures of 304m. for public debt repayments and 3,273m. for investments. Expenditure (in 1m. bolívars) in 1968 comprised: Health and social welfare, 766; education, 1,219; transport, 306; defence, 889; justice and police, 230; public works, 1,801; foreign relations, 73; agriculture, 615; mines, 179.

The 1961 Constitution provides for a Central Government contribution to the State Governments on a scale rising by 1966 to 15% of its ordinary revenue; in 1965 it totalled Bs.1,025m. (14·5%). In 1965 the autonomous Government Institutes received Bs.904m.

The public debt on 31 May 1968 was Bs.3,007m.

DEFENCE. In 1958 a Joint Staff Organization was established under the Minister of Defence for the closer integration of defence policy and administration of the three Services and the National Guard.

Army. All Venezuelans on reaching 18 years of age are liable for 2 years in the Armed Forces. They can opt for the Air Force or the Navy instead of the Army, but their allocation is finally dependent upon current requirements. The Army's established strength of approximately 18,000 all ranks furnishes a cavalry regiment, 12 infantry battalions, 2 tank squadrons and supporting engineering, anti-aircraft and supply services. There is a military academy for cadets, a school for staff studies and other technical training schools. Women can also be conscripted, as nurses, clerks, etc.

Navy. Strength includes 1 submarine, 3 large destroyers built in Great Britain in 1953–56, 6 light destroyers built in Italy in 1956–57, 10 patrol vessels, 4 landing ships, 1 transport landing ship (ex-repair ship), 3 survey ships, 12 coastguard vessels, 4 light transports and 3 tugs. Eleven coastguard vessels are operated by the National Guard. There is a naval academy for the training of officer cadets and in addition a school of staff studies and various technical training schools. Personnel in 1971: 3,500 officers and men and 4,000 Marine Corps.

Air Force. Formed in 1920, the Air Force of some 9,000 officers and men is a small, but well-equipped service with a total of about 200 aircraft. There are 5 fighter squadrons, equipped with 18 Canadair CF-5As, about 20 F-86F day fighter-bombers and a diminishing number of F-86K all-weather fighters, and 2 squadrons of jet-powered Canberra bombers. Some obsolescent Venom fighters also remain in service. A helicopter force consists of Bell 47s, H-19s, UH-1Ds and Alouette IIIs. Transport units are equipped with C-123 Providers in 2 squadrons and a number of C-47 aircraft. Communications aircraft are Beechcraft Queen Airs and other types. T-6 Texans, T-34 Mentors and Jet Provosts are used for training. A battalion of paratroops comes within Air Force responsibility. There is a staff college and a cadet academy.

National Guard, a volunteer force of some 10,000 under the Ministry of Defence, is broadly responsible for internal security. It includes customs and forestry duties among its tasks.

PRODUCTION. Within the last 30 years Venezuela has been transformed from a largely agricultural country to a leading producer of oil. Since 1960 the government has encouraged the diversification of the economy by industrialization to avoid over-dependence upon oil. In 1964 the gross national product amounted to Bs.32,104m. (at 1960 prices), principal items being: Oil and natural gas production, 21%; manufactures, 17·6%; agriculture, 6·5%; commerce, 15·6%; services, 26·5%; construction, 10·9%; transport and communications, 4%. The cost of living has remained fairly stable for a number of years.

AGRICULTURE. Venezuela is divided into 3 distinct zones—the agricultural, the pastoral and the forest zone. In the first are grown coffee, cocoa, sugarcane, maize, rice, wheat (grown in the Andes), tobacco, cotton, beans, sisal, etc.; the second affords grazing for more than 6m. cattle and numerous horses; and in the third, which covers a very large portion of the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, dividivi, copaiba, vanilla, growing wild, are worked by the inhabitants. The 1950 census showed 40% of the population engaged in agriculture; the 1969 livestock estimate showed beef cattle, 1·36m.; pigs, 759,000; goats, 266,000; sheep, 26,000; poultry, 69·85m. Area under cultivation is 5,530,898 acres.

Production in metric tons in 1969: Beans, 16,177; beef, 194,107; cocoa, 23,500; yuca, 309,000; coffee, 60,000; maize, 670,000; rice, 244,000; sugar, 4·2m.; bananas, 980,000.

The coffee plantations number 62,673, covering 543,400 acres with 135m. bushes. The Venezuelan cocoa, from 13,000 plantations, is considered to be of high quality; it is grown chiefly in the states of Sucre and Miranda. The sugar industry has 6 government and 20 privately owned mills.

Under the Agrarian Reform Law of 1960, the Instituto Agrario Nacional establishes agricultural colonies where farmers are settled on smallholdings. Since the Agrarian Reform Act of early 1960 to the end of 1966, 119,384 families received about 6·5m. acres of land. In 1966 two-thirds of the rural population had a *per capita* annual income of less than Bs.800. The ultimate envisaged is 300,000 farmers possessing 74m. acres.

FORESTRY. Resources have been barely tapped; 600 species of wood have been identified. Output of timber, two-thirds being soft wood (in cu. metres): 1965, 438,525; 1966, 452,181.

FISHERIES. The total catch for 1969 consisted of 106,000 tons of fresh-water and 9,000 tons of salt-water fish.

OIL. Venezuela is the largest petroleum exporting country in the world and the third largest producer; production began in 1917 with 18,000 cu. metres; for latest statistics *see* p. xxiii. The oil-producing region around Maracaibo, covering some 30,000 sq. miles, produces about three-quarters of Venezuelan petroleum.

Proved reserves were stated in 1969 to be 14,876m. bbls, at over 3·3m. bbls production per day. A bituminous belt north of the Orinoco River is estimated to contain a further 20,000m. bbls.

Powerful foreign oil groups own all the concessions; Venezuelan capital (the CVP) is beginning, starting in July 1961, to enter the industry. Major producers are 3: Creole (Standard Oil of New Jersey), with 40% of total production; Shell de Venezuela, 25%, and Mene Grande (Gulf Oil), 13%. Nineteen companies are active. The government-owned CVP began drilling in the Mata–Acema region between Anzoátegui and Monagas at the end of 1964 and has a small refinery at Morón. Natural gas is produced during normal operations, the proportion utilized rising from 30% (1957) to 55·4% (1961). In June 1956 the dredging of a channel in the Maracaibo basin was completed, enabling ocean-going vessels to use the port of Maracaibo.

MINING. There are important goldmines in the region south-east of Bolívar State, and new deposits have been discovered near El Callao (1959) and Sosa Méndez (1961) in the Guayana region. Output, 1968, amounted to 640 kg. Imports of 7,000 kg per annum are necessary for industrial purposes. Diamond output, from Amazonas territory, was 194,000 carats in 1969. Manganese deposits, estimated at several million tons, were discovered in 1954. Phosphate-rock deposits (yielding from 64 to 82% tricalcium phosphate) are found in the state of Falcón; reserves of 15m. tons of high-quality rock have been established. The state of Sucre has large sulphur deposits. Coal is worked in the states of Táchira, Aragua and Anzoátegui, production in 1968 being 32,000 tons. An important nickel deposit (at Loma de Hierro near Tejerías) is estimated to equal 600,000 tons of pure nickel. Saltmines are now worked by the Government on the Araya peninsula; output, 1964, 202,000 metric tons. Asbestos and copper pyrite are being exploited.

Iron ore is exploited in Bolívar State by the Orinoco Mining Co. and Iron Mines of Venezuela, subsidiaries respectively of the US Steel Corp. and the Bethlehem Steel Co. Proven reserves at the end of 1963 were 1,513m. metric tons. National output of iron ore, 1969, 19·9m. metric tons.

A largely state-run petrochemical complex is being developed at Morón and in the state of Zulia, and private investment in this and the chemical industry is being encouraged.

INDUSTRY. Venezuela is not yet highly industrialized, but the government are encouraging the establishment of local industries both by offering financial assistance and by establishing and equipping factories, which are then leased out to manufacturers. The development of local industries is fostered either in the form of high import duties or by the virtual elimination of imports through licensing restrictions. In 1960–64 the State Development Corporation (CVF) advanced credit and authorized financial decrees amounting to Bs.1,178m.

Electric power is being expanded rapidly. National production: 1966, 8,770 kwh. On completion of the first stage of the Guri dam project in 1967 there will be an additional 1·75m. kw. hydro-electric power available.

A government steel works is being developed in Puerto Ordaz, with an annual capacity of 600,000 tons of finished products; production began at the end of 1961. This is planned to be the centre of a heavy industry complex in Guayana.

Well-established industries include food processing, textiles, shoes, chemicals (195,140 tons in 1966, of which 240,236 tons is fertilizers), wood, finished metal goods and assembly of cars and trucks.

LABOUR. The first trade unions were those of the workers in the oilfields (36,897 in all) formed in 1935. Members of trade unions and peasant leagues now number 1·8m. The important Venezuelan Workers' Confederation has 600,000 members in 14 industrial and 21 regional federations and a peasant membership of 700,000. By 1963 over 500,000 workers were covered by long-term collective agreements.

Ministry of Development figures reported 3,029,184 people 'economically active' in 1969. These were (in 1,000): Agriculture, 661; services, 710; manufactures, 458; commerce and finance, 520; building, 152; transport, 177, extractive, including oil, 59; public utilities, 44; unemployed, 244.

In mid-1964 the Instituto Nacional de Cooperación Educativa estimated that about 90,000 enter the labour market each year, but there are new openings only for about 35,000. In 1966 the total labour force was rated at 2·93m., of whom 8·1% were unemployed.

TOURISM. 99,775 tourists visited Venezuela in 1969.

COMMERCE. The International Monetary Fund carries the values of Venezuela's exports and imports in the following convenient form (in 1m. bolívars):

	1961	*1962*	*1963*	*1964*	*1965*	*1966*
Exports	8,084	8,689	8,807	11,946	12,255	11,942
Whereof oil	7,441	8,025	8,154	10,982	11,229	11,038
Imports	3,522	3,871	3,685	4,898	5,590	5,121
By oil companies	157	264	233	265	270	198

The principal foreign imports in 1966 came, by value in US$1m., from USA, 613·6; West Germany, 118·1; UK, 66·3; Canada, 64·4; Japan, 63·5; Italy, 63. The value of main exports in 1966 was, in US$1m.: Petroleum, 2,508; iron ore, 144; coffee, 14.

Total trade between UK and Venezuela (according to British Board of Trade returns, in £1,000 sterling):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	68,290	73,068	56,653	50,825	76,462
Exports and re-exports from UK	21,662	32,839	31,655	33,706	36,493

SHIPPING. Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government. La Guaira, Maracaibo, Puerto Cabello, Puerto Ordaz and Guanta are the chief ports. In Dec. 1963 the merchant fleet—with a total of 100 ships of 100 tons and over—had an aggregate gross tonnage of 363,337; this included 14 tankers of 216,734 gross tons.

The principal navigable rivers are the Orinoco and its tributaries Apure and Arauca, from San Fernando to Tucupita through Ciudad Bolívar, Puerto Ordaz and San Félix; San Juan from Carípito to the Gulf of Paria; and Esculante in Lake Maracaibo.

ROADS. There were, 1963, 28,198 km of road fit for traffic the year round; of these 13,220 km are paved, 10,130 km are gravel. There are 200 km of high-speed 4-lane motorway type. The motorway system runs from Caracas to Puerto Cabello *via* Valencia and will shortly be linked direct with one from La Guaira to Caracas. Venezuela has received two World Bank loans for US$45m. and 30m. in connexion with this programme, for improvements of the express-ways in Caracas and for 2 roads in the South West of the country. Motor vehicles, 1968, totalled 554,680 and included 321,774 private cars. The 1,678-metre Angostura bridge linking the Orinoco cities of Ciudad Bolívar and Soledad was opened in Jan. 1967.

RAILWAYS. The state-run railways consist of 175 km of standard gauge. There are also 300 km used by the two US-owned iron-mining companies. Railway passengers, 1963, 371,373; goods carried, 1963, 174,201 metric tons; omnibus, taxi and coach passengers, 1963, 256,027,577.

AVIATION. The chief Venezuelan airlines are LAV (Líneas Aéreas Venezolanas), a government-owned concern, and AVENSA (Aerovías Venezolanas). Both operate numerous internal services. VIASA operates international routes

in conjunction with KLM. There are also 3 specialist air freight companies. In all there are over 100 commercial aircraft in operation. In addition to Venezuelan international services, a number of US and Latin American and European lines operate services to Venezuela. BOAC operates twice-weekly flights between London and Caracas.

POST. The telegraph system had a network, 1955, of 22,349 km with 437 telegraph offices. It is supplemented by wireless telegraphy, with 72 stations, and by wireless telephony. There are telephone systems in the principal towns (nationalized in 1954). There were 405,613 instruments in 1971; 260,806 were in Caracas. The telephone network is to be extended by 100,000 additional lines over the next 3 years. An international telex service operates in the Caracas metropolitan zone. There is a submarine telephone link with USA.

There are 77 radio stations at Caracas, Maracaibo, Maracay and other towns. There are 3 television stations in Caracas, of which 2 cover, with relays, most of the country. In Oct. 1963 a new station with transmitter located in Valencia but relaying programmes to Caracas began operations.

BANKING. In Oct. 1939 a Central Bank was established, with a capital of 10m. bolívars (one-half by the Government and one-half by the public) to regulate the currency and to act as fiscal agent for the Government. This was opened on 1 Jan. 1941 with a gold stock equal to US$29m., which rose to US$503m. in Oct. 1956. In mid-Jan. 1968 its gold and foreign reserve totalled US$939m.

In 1967 money in circulation was Bs.6,681m. (compared with Bs.4,134m. at the end of 1965).

Before 1939 the Bank of Venezuela, with (now) a capital of 105m. bolívars, was the sole depository of government funds and controlled the circulation of the currency. There are 36 commercial banks, of which 32 are Venezuelan (including the Banco Nacional de Descuento, with an authorized capital of 120m. bolívars), Banco Unión (100m.), Banco Mercantil y Agrícola (60m.), Banco Venezolano de Crédito (42m.), Banco de Maracaibo (40m.); and 4 are foreign (1 Canadian, 1 American, 1 Dutch and 1 French–Italian). Banco Obrero, with capital and reserves of 1,038m. bolívars, and Banco Agrícola y Pecuario (176m.) are important instruments of official policy. On 1 June 1965 the British Bank of London and South America merged with the Venezuelan Banco de La Guaira under the name of Banco La Guaira Internacional.

WEIGHTS AND MEASURES. Decrees of 1875 and 1917 introduced the metric system.

VIETNAM

HISTORY. The recorded history of Vietnam can be traced to Tonkin (now known as the northern part of Vietnam) at the beginning of the Christian era. Conquered by the Chinese (Han dynasty) in A.D. 111, the kingdom of Nam-Viet, as it was then called, broke free of Chinese domination in 939, though at many subsequent periods it again became a nominal vassal of the Chinese emperors.

By the end of the 15th century the Vietnamese had conquered most of the kingdom of Champa (in Annam, now known as the central part of Vietnam) and by the end of the 18th had acquired Cochin-China (now known as the southern part of Vietnam), formerly Cambodian territory.

French interest in Vietnam started in the late 16th century with the arrival of French and Portuguese missionaries. The most notable of these was Alexander of Rhodes, who, in the following century, romanized Vietnamese writing. At the end of the 18th century a French bishop and several soldiers of fortune helped to establish the Emperor Gia-Long (with whom Louis XVI had signed a treaty in 1787) as ruler of a unified Vietnam, known then as the Empire of Annam.

An expedition sent by Napoleon III in 1858 to avenge the death of some French missionaries led in 1862 to the cession to France of part of Cochin-China, and thence, by a series of treaties between 1874 and 1884, to the establishment of French protectorates over Tonkin and Annam, and to the formation of the French colony of Cochin-China. By a Sino-French treaty of 1885 the Empire of Annam (including Tonkin) ceased to be tributary to China. Cambodia had become a French protectorate in 1863, and in 1899, after the extension of French protection to Laos in 1893, the Indo-Chinese Union was proclaimed.

In 1940 Vietnam was occupied by the Japanese and used as a military base for the invasion of Malaya. During the occupation there was considerable underground activity among nationalist, revolutionary and Communist organizations. In 1941 a nominally nationalist coalition of such organizations, known as the Vietminh League, was founded by the Communists.

On 9 March 1945 the Japanese interned the French authorities and proclaimed the 'independence' of Indo-China. In Aug. 1945 they allowed the Vietminh movement to seize power, dethrone Bao Dai, the Emperor of Annam, and establish a republic known as Vietnam, including Tonkin, Annam and Cochin-China, with Hanoi as capital. In Sept. 1945 the French re-established themselves in Cochin-China and on 6 March 1946, after a cease-fire in the sporadic fighting between the French forces and the Vietminh had been arranged, a preliminary convention was signed in Hanoi between the French High Commissioner and President Ho-Chi-Minh by which France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. Subsequent conferences convened in the same year at Dalat and Fontainebleau to draft a definitive agreement broke down chiefly over the question of whether or not Cochin-China should be included in the new republic. On 19 Dec. 1946 Vietminh forces made a surprise attack on Hanoi, the signal for hostilities which were to last for nearly 8 years.

An agreement signed by the Emperor Bao Dai on behalf of Vietnam on 8 March 1949 recognized the independence of Vietnam within the French Union, and certain sovereign powers were forthwith transferred to Vietnam. Others remained partly under French control until Sept. 1954. The remainder connected with services in which Cambodia, France, Laos and Vietnam had a common interest were regulated by the Pau conventions of Dec. 1950. These conventions were abrogated by the Paris agreements of 29 Dec. 1954, which completed the transfer of sovereignty to Vietnam. Supreme authority in the military field remained with the French until the departure of the last French C.-in-C. in April 1956. Treaties of independence and association were initialled by representatives of the French and Vietnamese governments on 4 June 1954.

An agreement on the cessation of hostilities in Vietnam was reached on 20 July 1954 at the Geneva conference. The agreement was signed on behalf of the

C.-in-C. of the French Union Forces in Indo-China and on behalf of the C.-in-C. of the People's Army of Vietnam. The Government of Vietnam did not sign the agreement.

Important articles of the agreement were: (i) The withdrawal within 300 days, by stages, of the forces of both parties to regroupment zones on either side of a provisional military demarcation line (this line divides Vietnam at about 17° N.); (ii) pending general elections designed to bring about the unification of Vietnam, the conduct of civil administration in each zone to be in the hands of the party regrouped in that zone; (iii) until the expiry of the 300 days civilians to be permitted and helped to move to and live in the zone of their choice; (iv) a ban on the introduction of fresh troops, military personnel, arms and munitions, and on the establishment of new foreign military bases in either zone; (v) a ban on the adherence of either zone to any military alliance. An international commission composed of representatives of Canada, India and Poland is responsible for the control and supervision of the application of the provisions of the agreement.

The final declaration of the Geneva conference (21 July 1954) declared that the general elections should take place in July 1956. The elections did not take place, and Vietnam remains in effect divided into two separate countries—the northern and southern zones.

SOUTHERN ZONE

Viet Nam Cong Hoa—Republic of Vietnam

AREA AND POPULATION. The zone comprises most of the 18 southern provinces of the central part of Vietnam and the 27 provinces of the southern part of Vietnam. It has an area of 171,665 sq. km (66,263 sq miles). The population was estimated in 1965 at 15·1m., including some 677,000 highlanders and 454,000 Cambodians, Chinese and French. As a consequence of the Geneva agreement over 800,000 refugees from the northern zone have migrated to the south. The chief towns are Saigon, the capital (1966 population of Saigon–Cholon, 2m.), Da Nang (1966: 144,300) and Hué (1962: 103,500). The population is concentrated in the fertile plain of the Mekong Delta in the southern part and in the lowland region of the central part. The highland region of the central part is sparsely populated by primitive people radically distinct from the Vietnamese, such as the Bahnar, Rhadé, Jarai, etc.

CONSTITUTION AND GOVERNMENT. On 23 Oct. 1955 a referendum showed a majority of 98% in favour of the deposition of the Emperor Bao Dai and the elevation of Ngo-dinh-Diem to Chief of State. His first act, on 26 Oct., was to declare Vietnam a Republic of which he became the President.

On 26 Oct. 1956 a new Constitution was promulgated under which executive power is vested in the President and legislative power in a single chamber National Assembly. Both are elected by universal suffrage and secret ballot.

On 19 Oct. 1961 the President declared a state of emergency and the National Assembly conferred upon the President full powers 'to protect national security and to mobilize all manpower resources'. In 1963 these powers were used by the President and his Roman Catholic family and entourage to launch a ruthless persecution of Buddhists and other opponents of the Diem dictatorship. On 1 Nov. 1963 their régime was overthrown by the Army. President Diem and his brother were shot, and the Revolutionary Military Council took over the government. The junta, headed by Maj.-Gen. Duong Van Minh, was on 30 Jan. 1964 ousted by another group of generals, led by Gen. Nguyen Khanh and the commander of the Saigon army corps, Gen. Tran Thien Khiem.

The National Assembly, elected on 27 Sept. 1963, was dissolved by the Military Revolutionary Council on 1 Nov. A council of notables, appointed on 19 Dec., was dissolved on 30 Jan. 1964.

On 26 Oct. 1964 the Military Revolutionary Council resigned and civilian rule was restored, but on 27 Jan. 1965 Gen. Nguyen Khanh again seized power. He was superseded as commander-in-chief by Maj.-Gen. Tran Van Minh on 21 Feb. On 20 June 1965 the army again took over control of the government in the form of a National Leadership Council, a 'Directory', with Maj.-Gen. Nguyen van Thieu as head and Air Vice-Marshal Nguyen cao Ky as prime minister. In June 1966, 10 civilians were co-opted into the Directory, and on 11 Sept. 1966 nation-wide elections were held for a National Constituent Assembly. Its 117 deputies drafted a constitution and agreed upon elections for President, Vice-President, Senate and House of Representatives. The presidential and senatorial elections were held on 3 Sept. and those for the lower house on 22 Oct. 1967 Following elections to the lower house in Aug. 1971 at which opposition candidates increased their strength, President Thieu was returned unopposed as President for a second term.

President of the Republic: Gen. Nguyen van Thieu. *Vice-President:* Tran van Huong.
Prime Minister: Gen. Tran Thiem Khiem. *Foreign Minister:* Tran van Lam. *Defence Minister:* Lieut.-Gen. Nguyen van Vy.

RELIGION. Taoism in all its manifestations—ancestor worship, the worship of spirits and the worship of Vietnamese national heroes—is the real religion of the country. Buddhism is widespread, and in 1956 there were just over a million Catholics in the southern zone. Caodaism, a religious synthesis based on Christianity, Buddhism and Confucianism, and founded in 1926, had about 1·5m. followers at the end of 1954. The Hoa Hao sect, with about a million believers, is associated with Buddhism. The political and military power of the Caodaist and Hoa Hao sects and of the non-religious Binh Xuyen sect was broken by the Government in 1955 and 1956.

EDUCATION. On 31 Aug. 1965 there were the following schools in the southern zone: 5,762 private and public primary schools (1,563,756 pupils and 27,218 teachers), 156 state secondary schools (123,271 pupils and 2,453 teachers) and 442 private and semi-private secondary schools (205,958 pupils and 7,622 teachers). The Universities at Saigon, Hué and Dalat with 17 faculties, had 24,122 students, of whom about 6,000 were female.

The official language is Vietnamese; French is probably still the main language of higher education, but English is rapidly gaining ground in all fields.

NEWSPAPERS. There are 24 vernacular, 3 English, 2 French and 8 Chinese dailies.

JUSTICE. Mixed Franco-Vietnamese courts were abolished on 16 Sept. 1954, when complete sovereignty in the judicial field was transferred to the Vietnamese Government.

FINANCE. Currency. The unit of currency is the *piastre* (VN$). There are 3 rates of exchange, 'official' VN$118 = US$1; 'parallel' VN$275 = US$1; 'special' VN$400 = US$1.

Budget. The budget for 1971 forecasts expenditure of VN$267,000m. (defence, VN$130,000m.) and receipts of VN$239,000m.

The foreign debt in May 1967 amounted to VN$5,747m.

DEFENCE. Army. South Vietnam maintained in 1971 an Army of about 412,000 regulars, including infantry, armour, artillery, an airborne division, a ranger division, engineer, signals and administrative units. All formations and units are commanded entirely by Vietnamese officers who are trained at the officers' schools at Dalat and Thu Duc. There are also 2 auxiliary forces, the Regional Forces, formerly the Civil Guard (290,000) and the Popular Forces, formerly the Self-Defence Corps and Combatant Youth (paper strength, 240,000).

The Army and auxiliary forces are being trained under the supervision of a US military Aid Assistance Command.

Navy. The Navy includes 2 destroyer escorts, 2 frigates, 8 escort vessels, 1 patrol vessel, 2 coastal minesweepers, 20 gunboats, 24 landing ships, 119 landing craft, 1 training ship, 12 minesweeping launches, 200 river assault craft, 3 oilers, 2 supply vessels, 500 auxiliary gunboats (motorized junks), a water carrier and many small craft. Personnel, including 9 battalions of the Marine Division, in 1971, was 5,000 officers and 34,000 men.

Air Force. The Air Force was reorganized as an independent service in 1955 and has since received considerable US assistance. Its combat units are deployed in 5 air divisions, each with an average of 4 squadrons of attack and liaison aircraft and helicopters. Main attack force comprises 5 squadrons of A-37B jet light attack aircraft, 3 squadrons of A-1 Skyraider piston-engined aircraft and 1 squadron of supersonic F-5 fighter-bombers. Transport units are equipped with C-119s and C-47s. Other C-47s are equipped as gunships and for reconnaissance and ECM duties. Cessna O-1 Bird Dog, Beaver and U-17 Skywagon aircraft are used for liaison, forward air control and psychological warfare duties. A large helicopter force operates 11 squadrons (more than 250 aircraft) of CH-47 Chinook, UH-1 and H-34 aircraft. Initial pilot training is on T-41D aircraft, followed by basic and advanced training in USA. Personnel, about 37,000, with 700 aircraft. Very large USAF and US Army air forces as well as squadrons of the RAAF are also based on South Vietnam, together with US surface-to-air missile units.

AGRICULTURE. Rice is the main crop cultivated. In 1969, 2·4m. hectares yielded 5·1m. metric tons of paddy; in 1969, 104,950 hectares produced 27,650 metric tons of rubber.

The production figures of other crop products for 1969 were as follows: Maize (30,555 tons from 28,565 hectares), sugar-cane (321,445 tons from 12,070 hectares), tobacco (7,713 tons from 8,270 hectares), sweet potatoes (225,560 tons from 32,250 hectares), manioc (233,485 tons from 32,150 hectares), peanuts (34,410 tons from 31,295 hectares), tea (4,900 tons), coffee (3,550 tons), timber (463,000 cu. metres). Livestock, 1970: Water buffaloes, 571,900; cattle, 878,000; pigs, 4·09m.

FISHERIES. Fishing is an important occupation and production (1970) was 577,450 tons. Fresh and dried fish and fish sauce form major ingredients of the local diet. Vietnam had, in 1970, 317,442 fishermen, 42,603 motorized and 45,612 non-motorized fishing craft.

MINING. The known mineral resources are limited to a small coal-bearing region at Nong-Son (near Da Nang), which now produces 5,000 tons per annum (1961, 105,605 tons). There are also important phosphate deposits on the Paracel Islands.

INDUSTRY. There is little heavy industry in South Vietnam, but 2 industrial estates are being developed, one at Bien-Hoa and the other at Can-Tho. Most industry is concentrated in the Saigon–Cholon area and comprises rice-milling, brewing, distilling, ice-making, cotton spinning and weaving, the manufacture of gunny bags, cement, paper and tyres, the assembly of radios, motor scooters, sewing-machines and bicycles, the manufacture of tobacco products and matches, the production of oxygen, acetylene and carbonic acid gases, and the processing of duck feathers. There are also small factories making soap, paint, ball-point pens, pencils, articles in plastic, ceramic tiles, aluminium hollow-ware, dry-cell batteries, fruit and fish conserves, etc.

The following are some figures of production in 1969: Beer, 134·2m. litres; soft drinks, 120·4m. litres; rice alcohol, 6·7m. litres; ice, 295,000 metric tons; acetylene gas, 257,000 cu. metres; carbonic dioxide, 332 tons.

The textile industry is under intensive development with the active help of Nationalist Chinese technicians and some American investment. A total of 160,000 spindles and 22,964 looms had been installed by Dec. 1969.

Kenaf yarn production has been severely affected by the war. From a peak of 3,185 tons in 1965, production fell to 1,615 tons and only 383,000 jute-bags were manufactured in 1969. To cover its needs, South Vietnam had to import during that year 1,344 tons of jute.

Total production of paper products reached 33,199 tons in 1969. A semi-government glass plant, with a capital of VN$170m., produced, in 1969, 16,466 tons consisting of more than 50 different kinds of bottles for use in pharmacy and beverage industries. There is only one manufacturer of cement in South Vietnam which is government-owned. There are plans to triple the existing capacity of 300,000 tons per annum. A plywood factory, established in 1966, now produces about 500,000 sheets a year. A fertilizer plant is under consideration.

Sugar is at present processed in 3 large government-owned sugar mills and a number of small artisan mills. In 1969, sugar produced was 108,447 tons of refined sugar and 3,988 tons of brown sugar, whereas local requirements were more than 270,000 tons. It is expected that the government-owned 'Quang Ngai Sugar Mill', inaugurated in May 1971 with a US$5·4m. capital investment, will be capable of crushing 250,000 metric tons of sugar-cane per annum.

As of the end of 1968, 1,537 rice-mills were operating.

POWER. In 1970 total power produced was 1,134·2m. kwh. thermal electricity. Expansion of the electricity system in the Saigon area is in progress. The hydro-electric project at Da-Nhim is being repaired.

COMMERCE. In 1970 imports amounted to US$550m. and exports to US$11·5m. Although USA aid continues to finance some categories of goods, the majority of commercial imports are now financed by Vietnam's abundant foreign-exchange reserve.

Total trade between South Vietnam and UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	1,498	1,038	794	615	446	256
Exports and re-exports from UK	4,872	3,963	3,618	4,391	4,382	2,605

ROADS. In 1964 there were 20,027 km of roads in the southern zone. Of these, 5,495 km were asphalted and 3,655 km roughly metalled. The remainder can be used by private cars only during the dry 6 months of the year. The best roads are in the south, the hill country of the centre being badly served.

RAILWAYS. The railways in working order in 1969 were Phu Cat–Song Pha, Da Nang–Hué and Cholon–Saigon–Long Khanh.

SHIPPING. The major ports are Saigon and Da Nang. During 1970, 2,952 ships took 6·8m. metric tons of goods into Saigon and 2,971 ships took 925,000 metric tons of goods out; 1,096 ships took 1·6m. tons into Da Nang and 1,101 ships took 10,000 tons out of Da Nang.

In 1961 there were 4,762 km of navigable waterways, of which just over 2,000 were more than 2·5 metres deep and 50 metres wide.

AVIATION. In 1970 domestic air traffic carried 1,293,978 arriving and 1,261,967 departing passengers, unloading 6,409 tons of freight and loading 7,809 tons. International air traffic carried 380,760 arriving and 397,147 departing passengers, unloading 66,855 tons of freight and loading 25,423 tons.

POST. Of the 34,889 telephones in use in Jan. 1971, 27,752 were in Saigon–Cholon.

BANKING. The National Bank is responsible for the issue of currency. Apart from the National Bank and its commercial subsidiary, the Crédit Commercial, there are 28 banks or bank-agencies at Saigon, including the Banque française pour le commerce, Banque française de l'Asie, Banque nationale de Paris, Bank of America, the Chase-Manhattan Bank, the Hongkong and Shanghai Bank, and the Chartered Bank.

NORTHERN ZONE

Viet-Nam Dan-Chu Cong-Hoa
Democratic Republic of Vietnam

AREA AND POPULATION. The zone comprises 25 provinces in all and 2 centrally-administered cities, Hanoi and Haiphong. It includes the 4 northern provinces of Central Vietnam and the 5 and 3 provinces respectively of the 2 Autonomous Regions, Viet-Bac (50,180 sq. km., 330,000 inhabitants) and Tay-Bac (26,000 sq. km, 800,000 inhabitants); area 158,800 sq. km. At the census of 1 March 1960 the total population was 15,916,955 (7,687,814 males, 8,229,141 females); 48% male; 9·6% urban; estimate, 1968, 18·8m. The capital, Hanoi, had 643,576 inhabitants (with suburbs, 850,000), and Haiphong, the next town in

size and the port of the region, 369,248. The population is crowded into the Red River delta and coastal plain and reaches densities of up to 1,500 per sq. km. Average density, 102 per sq. km.

Vital statistics: Death rate (1964), 6 per 1,000; infant mortality (1968), 28 per 1,000; growth rate (1971), 3% per annum.

About 88% of the population are Vietnamese (Kinh), concentrated in the delta and the plains. There are also over 60 minority groups thinly spread in the extensive mountainous regions which constitute four-fifths of North Vietnam's territory. The largest minorities are the Tays (525,000) and Nungs (335,000), north-east of the Red River, and the Muongs (450,000), south of it. Thais (435,000) are spread widely in the west and straddle the frontier with Laos; the Mees (400,000) dwell mainly in small pockets of territory at an elevation of 3,000 ft or higher. There are also about 300,000 Chinese, chiefly in Hanoi and Haiphong.

CONSTITUTION AND GOVERNMENT. The present, second, Constitution dates from 1960 (the first was promulgated in 1946). It consists of a preamble and 112 articles grouped into 12 chapters. It states that North Vietnam is a 'people's democratic state based on the alliance between the workers and peasants and led by the working class', and that the 'DRV is advancing step by step from people's democracy to socialism' and aims at 'the peaceful re-unification of all Vietnam'.

The National Assembly is elected every 4 years and meets twice a year. It has a permanent executive body in its Standing Committee. All citizens may vote a 18 and be elected to office at 21. Rural constituencies contain 50,000 electors, urban 10,000–30,000. The President of the Republic is elected by the National Assembly, and the Great Council consists of the Premier, Vice-Premiers and other Ministers.

Elections to the National Assembly of North Vietnam were last held in April 1964. There are 368 deputies, 63 of whom represent national minorities and including 62 women.

Local government authorities are the people's councils, which appoint executive committees. A special form of autonomous administration has been established in the regions inhabited by the ethnic minorities.

President: Ton Duc Thang (succeeded Ho Chi Minh who died 3 Sept. 1969).
Vice-President: Nguyen Luong Bang.

Standing Committee of the National Assembly. Chairman: Truong Chinh; *Secretary-General:* Ton Quang Phiat.

All political power stems from the communist Worker's Party of Vietnam (Dang Lao Dong), founded in 1930; it had 800,000 members in 1968. In April 1972 the Politburo consisted of 10 full and 2 alternate members: Le Duan (*First Secretary*); Truong Chinh (*President of the National Assembly*); Pham Van Dong (*Prime Minister*); Pham Hung; Vo Nguyen Giap (*Minister of Defence*); Le Duc Tho; Nguyen Chi Than; Nguyen Duy Trinh (*Foreign Minister*); Le Thanh Nghi; Hoang Van Hoan; (candidates) Tran Quoc Hoan (*Minister of Public Security*) and Van Tien Dung.

There are 2 puppet parties, the Democratic (founded 1944) and the Socialist (1946), which are unified with the trade and youth unions in the Fatherland Front.

National flag: Red, with a 5-pointed golden star in the centre.
National anthem: 'Tien quan ca' ('The troops are advancing')

RELIGION. Buddhism is the prevalent religion. In 1966 there were officially estimated to be 800,000 Roman Catholics.

EDUCATION. Primary education consists of a 10-year course divided into 3 levels of 4, 3 and 3 years respectively. In 1966–67 there were 10,987 schools.

In 1964–65 there were 149,000 children in kindergartens, 780,300 in infant schools, 2,666,000 in primary schools, 35,600 pupils in 28 technical schools and 27,000 students in 16 institutes of higher education. There were 90,000 teachers. Total literacy was claimed in 1970.

At Hanoi University (founded 1918) and 35 other institutes of higher education there were 72,000 students in 1970. A polytechnical university, donated by the USSR, was completed in Hanoi in 1965. In 1967 there were 2,100 Vietnamese studying in the USSR.

CINEMAS. There were 41 cinemas in 1961. Since 1959 some 20 films have been made.

NEWSPAPERS (1968). The official organ of the Workers' Party, *Nhan Dan* ('The People') has a circulation of 100,000. There are 126 other newspapers and periodicals, including 3 dailies.

JUSTICE. There are the Supreme People's Court, local people's courts and military courts. The president of the Supreme Court is responsible to the National Assembly, as is the Procurator-General, who heads the Supreme People's Office of Supervision and Control.

HEALTH. In 1965 there were over 2,000 doctors and 480 hospitals.

FINANCE. Currency. The monetary unit is the *dong* = 100 *sau*. There are coins of 1, 2 and 5 *sau*, and notes of 1, 2, 5 and 10 *dong*. Official rates of exchange: £1 sterling = 9 *dong*; US$1 = 3·5 *dong*; 100 *dong* = 30·6 roubles.

Budget. The budget for 1962 balanced at 1,725,152,000 *dong*. The expenditure was earmarked as follows: 62·5% for economic construction, 20% for defence and administration, 11·2% for social and cultural affairs. An estimated US$350m. were spent on defence in 1967.

DEFENCE. Army. Estimated strength in 1969, 447,000, of whom at least 85,000 were serving in South Vietnam. The army is organized in 13 infantry divisions and includes about 400 armoured vehicles and 6,000 anti-aircraft guns.

Navy. In 1971 the Navy comprised 3 patrol vessels, 15 torpedo boats, 28 motor gunboats, 7 landing ships, 4 minesweeping boats, 30 patrol craft, 17 landing craft and 100 junks and auxiliary craft. Personnel numbered 270 officers and 2,730 men.

Air Force. The Air Force, built up with Soviet and Chinese assistance, has 1 squadron of Il-28 twin-jet tactical bombers, about 40 MiG-21 and 25 MiG-19 supersonic fighters, 70 MiG-17 jet fighter-bombers, about 25 helicopters, including a few large Mi-6s, and transport, liaison and training aircraft. Fighter pilots are trained in the USSR. 'Guideline' surface-to-air missiles are operational in large numbers. Personnel, about 9,000 with 175 aircraft.

PLANNING. Long-term forward planning envisages the creation of local industry geared to agriculture manned by surplus peasant labour as a first step towards the development of a heavy industrial base. Following a 3-year (1958–60) and a 5-year plan (1961–65), planning has been on a yearly basis.

The plan for 1970 gave priority to the development of industry, but departed from precedent in stepping up agricultural and consumer goods production. The 1971 plan aims at a massive increase in rice production and extension of irrigation. Under the 1972 plan production is scheduled to rise 8·6%.

AGRICULTURE. In 1966 there were 28,000 agricultural co-operatives, each comprising 200–400 households; in 1964 there were 59 state farms. 4·66m. metric tons of rice were produced in 1965 (4·3m. in 1964). Other crops include sugar-

cane, maize, sweet potatoes and cotton. The cultivated area in 1962 was 3m. hectares, of which 2·4m. were under rice; in 1964, 2·4m. hectares were irrigated.

A considerable quantity of raw silk is produced and woven locally.

Livestock. Cattle (1963), 2·23m., (1964), 2·32m.; pigs (1962), 4·24m.

FORESTRY. 50% of the area is forested; 10·95m. cu. metres of timber were produced in 1964.

FISHERIES. Fishing is carried out, especially in Along Bay, which is rich in prawns and crayfish. Total catch in 1960 was 151,000 metric tons.

MINING. North Vietnam is rich in coal (anthracite, lignite and hard coal). The open-cast anthracite mines near Along Bay produced 3·4m. tons in 1964. There are deposits of iron ore, manganese, titanium, chromite, bauxite and a little gold. Chromite production in 1962 was 35,000 tons. Reserves of apatite are some of the biggest in the world: production in 1963, 740,000 tons, plus 50,000 tons of phosphates. Annual salt production is about 130,000 tons.

INDUSTRY. Next to mining, food processing and textiles are the most important industries; there is also some machine building. Older industries include cement, cotton and silk manufacture. Under the 1970 plan the coal, electricity, timber, machine-building, textile and paper industries were expanded. It was announced in 1971 that the policy of dispersing industry to remote areas was being ended. Local industries and handicrafts account for 50% of production.

Production in 1964 (in 1,000 metric tons): Coal, 3,410; steel, 50; cement, 595; paper, 19·4; sugar, 26·7; mineral fertilizers, 177; cotton fabrics, 105·2m. metres; irrigation pumps, 2,064 units. In 1967 trade unions had 1·1m. members. The industrial work-force was stated to be 3% of production in 1972.

POWER. In 1964, 548·7m. kwh. of electricity were produced (442m. kwh. in 1963). A power plant at Wong Bi (capacity, 24,000 kw.) is being constructed with Soviet aid.

COMMERCE. In 1965, 85% of trade was with Communist countries. Imports, 162m. roubles; exports 88m. roubles. Other trade partners are Japan, Cambodia and France. North Vietnamese imports from USSR in 1970 totalled 166·5m. roubles; exports to USSR, 16·7m. roubles. In Sept. 1971 and Jan. 1972 China signed free economic and military aid agreements for 1972. Sweden is to give £16m. of aid during 1970–73.

Trade between North Vietnam and UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	91	75	51	85	74	91
Exports and re-exports from UK	37	67	106	67	54	43

ROADS. In 1952 there were about 13,500 km of roads. Many roads and bridges were destroyed during hostilities, but by 1963, 6,560 km are said to have been restored with Chinese help.

RAILWAYS. Railways reported to be in working order (1969) were Hanoi–Haiphong ((104 km), Hanoi–Muc Quan (162 km), Hanoi–Thanh Hoa (167 km), Hanoi–Laokay (296 km) and Dong Anh–Thai Nguyen (completed to serve the projected steel works at Thai Nguyen—51 km).

SHIPPING. The principal port is Haiphong, which can handle ships of 10,000 tons. It is regularly visited by Polish vessels. In 1953 there were 830 km of navigable waterways open to ships of less than 2 metres draught at high water, and 530 km at low.

The total volume of traffic by rail, road, river and sea in 1962 was stated to have been 2,463m. ton-km of freight and 1,372m. passenger km.

AVIATION. Scheduled flights are operated by the Chinese airline between Peking and Gia Lam (the airport of Hanoi) twice a week. The Vietnamese operate internal services to Vinh and Dong Hoi (near the demarcation line) and to Dien Bien Phu.

POST. Postal and telegraphic communications between the northern zone and China were officially opened on 1 Jan. 1955; and international mail for the UK is now carried by this route. In 1965 there was one radio set per 61 inhabitants.

BANKING. The bank of issue is the National Bank of Vietnam (founded in 1951). Its director is a member of the Great Council.

DIPLOMATIC REPRESENTATION. The following countries maintain embassies at Hanoi:

Albania	Czechoslovakia	Indonesia	Romania
Algeria	Denmark	Korea (North)	Sweden
Bulgaria	Egypt	Laos	Switzerland
Chile	Germany (East)	Mali	USSR
China	Guinea	Norway	Yugoslavia
Cuba	Hungary	Poland	

Diplomatic relations exist also with Ceylon, Congo (Br.), Ghana, Iraq, Mauritania, Mongolia, Senegal, Somalia, South Yemen, Syria, Tanzania and Yemen.

French interests are attended to by a Delegate-General. The UK, India and Burma are represented at Hanoi by consulates-general.

YEMEN

al Jamhuriya al Arabiya al Yamaniya

On the death of the Iman Ahmad on 18 Sept. 1962, army officers seized power on 26–27 Sept., declared his son, Saif Al-Islam Al-Badr (Imam Mansur Billah Muhamrnad), deposed and proclaimed a republic. The republican régime was supported by Egyptian troops, whereas the royalist tribes received aid from Saudi Arabia.

On 24 Aug. 1965 President Nasser and King Faisal signed an agreement according to which the two powers are to support a plebiscite to determine the future of the Yemen; a conference of republican and royalist delegates met at Haradh on 23 Nov. 1965, but no plebiscite was agreed upon. At a meeting of the Arab heads of state in Aug. 1967 the President and the King agreed upon disengaging themselves from the civil war in Yemen. At the time there were still about 50,000 Egyptian troops in the country, holding San'a, Ta'iz, Hodeida and the plains, whereas the mountains are in the hands of the royalist tribes. By the end of 1967 the Egyptians had withdrawn.

CONSTITUTION AND GOVERNMENT. On 31 Oct. 1962, 13 April 1963, 17 April 1964, 9 May 1965 the revolutionary council issued 'interim' constitutions and on 28 Dec. 1970 a first permanent constitution was announced with provision for a Council of 179 members (20 members would be chosen by the President and the remainder by general franchise).

Prime Minister and Foreign Affairs: Muhsin al Aini.

National flag: Red, 5 white 5-pointed stars, white scimitar in the centre.

AREA AND POPULATION. The area is about 75,000 sq. miles (195,000 sq. km), with a population of 4·5m. (official estimate, 1953). The capital is Ta'iz with a population of about 30,000.

The most important towns are the port of Hodeida (population, 30,000), San'a (altitude 7,200 ft) and Ta'iz (altitude 4,600 ft); other towns are Ibb (6,275 ft), Yerim (8,600 ft), Dhamar (7,650 ft) and the ports of Mokha and Loheiya.

There are between 0·5m. and 1m. Yemenis abroad, principally on the Red Sea and Persian Gulf coasts.

In the north the boundary between the Yemen and Saudi Arabia has been defined by the Treaty of Taif concluded in June 1934. This frontier starts from the sea at a point some 5 or 10 miles north of Maidi and runs due east inland until it reaches the hills some 30 miles from the coast, whence it runs northwards for approximately 50 miles so as to leave the Sa'da Basin within the Yemen. Thence it runs in an easterly and south-easterly direction until it reaches the desert area near Nejran.

The British and Yemeni governments in 1934 concluded a treaty of friendship whereby Britain recognized the Imam as King of the Yemen. In 1951 they agreed on the exchange of diplomatic representatives.

FINANCE. Currency. The currency is the silver *riyal* of 40 *bugshahs* (approximately £0·33).

Budget. The budget for 1967–68 balanced at 50,948,500 rials (1966–67: 47,408,600 rials); estimated revenue, 29,343,500 rials; estimated expenditure, 50,948,500 rials, the balance being achieved by foreign aid.

DEFENCE. Air Force. Built up with Egyptian, Soviet and Czech aid, the air force has about 12 MiG-17 jet fighters, 12 Il-28 light jet bombers, Il-14 and C-47 transports, Mi-4 helicopters and Yak-11 armed trainers.

PRODUCTION. Wherever water-supply allows, and in general throughout the south-western part of the country, millet (*dhurra*) is grown as a subsistence crop. The traditional cultivation of coffee (no longer exported through Mokha) continues, but is giving place to that of *qat* (*cathula edulis*), a narcotic shrub. Cotton is grown in the Tihama, the coastal belt, round Bait al Faqih and Zabid (seat of a medieval university). Fruit is plentiful, especially fine grapes from the San'a district.

In Nov. 1955 an oil and mineral concession for 30 years was granted to an American group, the Yemen Development Corporation. The concession extends over an area of 40,000 sq. miles. No oil has yet been found.

Russian, Chinese and USA economic aid has been provided. The Chinese have built a road from Hodeida to San'a; the Russians have built a new port near

Hodeida. The Americans are building a metalled road from Mokha to Ta'iz and San'a, and installing a water-supply for Ta'iz.

COMMERCE. Trade with the UK (British Board of Trade returns, in £1,000 sterling):

YUGOSLAVIA

Socijalistička Federativna Republika Jugoslavija—Socialist Federal Republic of Yugoslavia

On 29 Nov. 1945 Yugoslavia was proclaimed a republic. On 8 March 1947 King Peter II and the other members of the Karageorgevitch dynasty were deprived of their nationality and their property was confiscated.

The peace treaty with Italy, signed in Paris on 10 Feb. 1947, stipulated the cession to Yugoslavia of the greater part of the Italian province of Venezia Giulia, the commune of Zara and the island of Pelagosa and the adjacent islets (*see* p. 1087).

CONSTITUTION AND GOVERNMENT. The Constitution passed on 31 Jan. 1946 declared that the Federal Republic is composed of the 6 republics: Serbia, Croatia, Slovenia, Bosnia and Herzegovina, Macedonia and Montenegro.

On 13 Jan. 1953 a new Constitution (Fundamental Law) confirmed the management of all public affairs by the workers and their representatives (which was introduced in 1950) as the basis of the entire social, economic and political system of Yugoslavia.

The Constitution promulgated on 7 April 1963 changed the name of the country into the Socialist Federal Republic of Yugoslavia, composed of the socialist republics of Bosnia and Herzegovina, Crna Gora (Montenegro), Croatia, Macedonia, Serbia and Slovenia (*i.e.*, now ranking in alphabetical order).

According to the new Constitution, the working people are the sole holder of power and the only factor taking decisions on social affairs. Social self-government is exercised by the representative bodies of communes, districts, autonomous provinces, republics and the Federation. The rights to self-government and distribution of income proclaimed in 1953 are now extended to the employed in

public services as well. The former Council of Producers, in which only the workers and employees engaged in economic production were represented, has been replaced by Councils of Working Communities representing the working people employed in every field of social activity. These representative bodies are the supreme organs of authority and social self-government in each territorial community. They consist of delegates of citizens (political councils) and of delegates of working people (councils of working communities).

Every citizen over the age of 18 has the suffrage. The maximum working week is 42 hours. Religion is free.

All the means of production as well as mineral and other natural resources are social property. The exceptions are peasants' holdings (up to 10 hectares of arable land) and handicrafts. Citizens may be owners of houses and dwellings for their personal and family needs.

National flag: Blue, white, red (horizontal); with a red 5-pointed star in the middle.

The Federal Assembly is the supreme organ of government and social self-government of the Federation. It has 5 chambers (Federal, Economic, Education and Culture, Social Welfare and Health, Organizational-Political Chamber); every chamber has 120 deputies. The Federal Chamber comprises 140 members delegated by the 6 republics (20 from each) and 2 autonomous provinces (10 from each); they sit as a Chamber of Nationalities to safeguard the rights and equality of peoples and republics.

Elections were held in April 1969 for the Federal Assembly (620 members) and the assemblies of the 6 socialist republics (2,148 members), 2 autonomous provinces (614 members) and communes (40,791 members).

The members of all assemblies are being elected for a 4-year term. No person can be elected twice successively as a member of the same chamber or of the Federal Executive Council. The President of the Republic can be re-elected for a second 5-year term; this restriction does not apply to Josip Broz-Tito. Federal and republic officials cannot hold the same post longer than 4 years except when the assembly approves it.

The Federal Assembly at a joint meeting of all Chambers elects the President of the Republic, and the president and 6 vice-presidents of the Federal Assembly. The functions of the President of the Republic are separated from those of the President of the Federal Executive Council.

The President and the members of the Federal Executive Council are elected by the Federal Chamber from among its deputies. The Federal Executive Council is the political executive organ of the Federal Assembly. It comprises the President, 1 vice-president and 20 members.

President of the Republic: Josip Broz-Tito (elected 14 Jan. 1953; re-elected 30 Jan. 1954, 19 April 1958, 30 June 1963, 17 May 1967 and 29 July 1971).

Vice-President of the Presidency: Krste Crvenkoski (elected 29 July 1971).

President of the Federal Assembly: Mijalko Tedorović (elected 29 May 1971).

Chairman of the Federal Executive Council: Djemal Bijedić. *Vice-Chairmen:* Jakov Siro Ković; Anton Vrotuša.

State Secretary for Foreign Affairs (Acting)*: Mirko Tepavac. State Secretary for National Defence:* Nikola Ljubičić. *Federal Secretary for Home Affairs:* Luka Banović. *Federal Secretary for Finance:* Janko Smole. *Federal Secretary for Foreign Trade:* Hadidjić Muhamed. *Federal Secretary for Economy:* Bosko Dimitrijević.

In addition to the 4 Federal Secretariats, there are 4 Federal Administrations and 2 Federal Inspectorates.

Chairmen of the Republic Executive Councils: Bosnia and Hercegovina: Dragutin Kosovac; Montenegro: Victorje Žarković; Croatia: Ivo Perišin; Macedonia: Ksente Bogoev; Slovenia: Stane Kavčić; Serbia: Milenko Bojanić;

The Communist League of Yugoslavia had 1,049,000 members in Dec. 1970. As of Mar. 1969 its Presidency had 15 members, with President Tito as President of the League.

AREA AND POPULATION. According to the census taken 31 March 1971 the area and population of Yugoslavia are shown as follows:

Federal units	Area in sq. km	Population	Pop. per sq. km
Bosnia and Hercegovina	51,129	3,742,852	73·2
Montenegro	13,812	530,361	38·4

The languages of the Yugoslav nations and nationalities are recognized in the Yugoslav state. Serbo-Croat serves as the *lingua franca* of the state. The Serb is printed in Cyrillic, and Croat in Latin characters. Macedonian is printed in the same Cyrillic characters as Serb (the Cyrillic alphabets used for Bulgarian, Russian, Ukrainian and Byelo-Russian are each slightly different from this), while Slovene is written exclusively in Latin characters.

RELIGION. On the basis of the constitution of Yugoslavia and the basic law on the legal status of religious communities, the religious communities are

detached from the State and are free to perform religious affairs and religious rights. All religious communities, recognized by law, enjoy the same rights.

As the results of the historical development of the Yugoslav people, nowadays in Yugoslavia there are more than 30 religious communities. The 1953 percentage of the denominations was as follows: Orthodox, 41·2%; Roman Catholic, 31·7%; Moslems, 12·3%; Protestants, 0·9%; without religion, 12·6%. Accordingly, the greatest number of believers belong to the Orthodox Pravoslav churches, the Serbian Orthodox Church and the Macedonian Orthodox Church, then the Roman Catholic Church and the Moslem Religious Community.

The Serbian Orthodox Church with the Patriarch Mgr. Gherman with its seat in Belgrade has 20 bishoprics within the country and 4 abroad, 3 in US and Canada and 1 in Hungary. The Serbian Orthodox Church numbers about 2,000 priests.

The Macedonian Orthodox Church with the Archbishop of Ohrid and Macedonia with Mgr. Dositej as its head in Skopje, has four bishoprics in the country and one abroad (American–Canadian–Australian). The Macedonian Orthodox Church numbers about 300 priests.

The Roman Catholic Church is divided into two provinces: Zagreb with 4 suffragan sees, and Sarajevo with 2 suffragan sees. In addition, the Roman Catholic Church has 4 archbishoprics, 10 independent bishoprics directly connected with the Vatican and 3 Apostolic Administrators. There is a National Conference of Bishops with Archbishop, the cardinal of Zagreb, Mgr Franja Šeper as its head. The Roman Catholic Church has about 4,000 priests.

Diplomatic relations between Yugoslavia and the Vatican were broken off in 1952. However, with the protocol on talks between the Representatives of the Holy See and the government, on 25 June 1966 in Belgrade, the relations have been re-established on the basis of acknowledgment of the constitution and the basic law on the legal status of religious communities.

The Moslem Religious Union has 4 republic Superiorates in Sarajevo, Skopje, Titograd and Priština. The highest authority is the supreme synod of the Islamic Religious Community, which elects the Reis-ul-Ulema and the Supreme Islamic Superiorate. Its head is Mgr F. Kemura. The Moslem religious community has about 2,000 priests.

The Protestant churches covering 4 independent Lutheran Churches, numbering about 150,000 believers, the Reformed Christian Church, numbering about 60,000 believers, include also several much smaller churches of Baptists, Methodists, Adventists, Nazarenes, etc., numbering together about 100,000 believers. The Protestant churches have about 450 priests.

Also there are independent Old Catholic Churches with Synodal Council at Zagreb.

The Jewish religious community has about 35 communities making up a common league of Jewish Communities with its seat in Belgrade.

EDUCATION (1969–70). Elementary schools (4-year course and complementary schools (6- and 8-year courses), 14,053 with 116,930 teachers and 2,857,291 pupils; senior secondary schools, 415 with 10,028 teachers and 184,068 pupils; teachers' training colleges, 56 with 1,299 teachers and 21,194 students; technical schools, 572 with 7,587 teachers and 191,561 students; schools for adults, 637 with 2,076 teachers and 70,785 pupils.

For higher and specialized education there were 247 faculties, academies and high schools with 15,950 professors and instructors and 239,701 students.

The national minorities have been provided with elementary, secondary and teachers' training schools of their own, namely: Albanian (1,040, 30, 80), Magyar (217, 8, 49), Bulgarian (86, 1, 0), Czech (12, 1, 0), Slovak (31, 1, 1), Italian (29, 4, 3), Romanian (29, 1, 1), Turkish (56, 5, 7), Ruthenian (4, 0, 1).

CINEMAS (1970). There were 1,592 cinemas with a seating capacity of 541,993.

JUSTICE. There are county tribunals, district courts, the supreme court of the Autonomous Province of Vojvodina, supreme courts of the constituent

republics and the supreme court of the Socialist Federal Republic of Yugoslavia. In county tribunals and district courts the judicial functions are exercised by professional judges and by lay assessors constituted into collegia. There are no assessors at the supreme courts.

All judges are elected by the social-political communities in their jurisdiction. The judges exercise their functions in accordance with the legal provisions enacted since the liberation of the country.

FINANCE. Currency. On 26 July 1965 the value of 1 *dinar*, divided into 100 *para*, was fixed at 0·710937 milligrammes of fine gold instead of 2·96224 milligrammes. On 22 Jan. 1972 the dinar was devalued. The official exchange rate was established at 43·5 *dinars* to £ and 17 *dinars* to the US $.

A new *dinar*, equivalent of 100 old dinars, was introduced on 1 Jan. 1966.

The National Bank issues coins of 0·05, 0·1, 0·2, 0·5 and 1, 2 and 5 new dinars, and notes of 5, 10, 50,100, and 500 new dinars. Coins and notes in old dinars are still in circulation.

Circulation of notes and coins, as of 31 Dec. 1971, was 18,350m. new dinars.

Budget. Revenue and expenditure for calendar years (in 1m. new dinars):

	1965[1]	*1966*	1967	*1968*	*1969*	*1970*[2]
Revenue	18,724	19,427	18,563[1]	20,429	22,769	27,672
Expenditure	18,802	19,133	18,426	20,167	22,437	25,659

[1] The figures from 1965 are not comparable with earlier ones due to the change-over of the financing from the system of budget expenditures to the system of resource distribution for the territorial communities.
[2] Preliminary.

The revenue, 1969 (and 1968), was composed of 10,752m. (10,829) dinars in the federal budget, 4,300m. (3,830) dinars in the states budgets and 6,802m. (5,771) dinars in other budgets.

Main items of distributed resources in 1969 (in 1m. new dinars): Defence, 6,277; education, 561; government, 4,530; contributions to territorial communities, 1,777; investments in economy, 934.

In 1949–50 the US Export-Import Bank granted loans amounting to $55m. at 3½% interest; the International Bank for Reconstruction and Development granted loans amounting to $60m. A British loan of £16·5m. granted in 1950 is to be repaid in 1962–67 at 3% interest. In 1955 the USSR advanced credits to the value of US$54m. and granted a loan of US$30m. at 2% interest.

Yugoslavia in 1960 resumed partial service on the sterling loans of 1909 and 1936; final settlement will be negotiated in 1967.

DEFENCE. Army. The Yugoslav Army comprises 8 army corps, of 13 infantry, 3 armoured and 6 mountain divisions. Peace-time strength, 220,000.

Navy. The Navy comprises 5 submarines, 2 destroyers, 2 small frigates, 100 torpedo boats, 1 minelayer, 3 patrol vessels, 4 coastal minesweepers, 17 patrol boats, 20 inshore minesweepers, 14 river minesweepers, 10 landing craft, a training ship, a salvage vessel, a yacht, a despatch vessel, 2 transports, 5 oilers and 6 tugs. Personnel in 1971: 27,000 officers and ratings.

Air Force. The Air Force has about 350 first-line aircraft and is organized in 2 Air Corps, with HQ at Zagreb and Zemun. There are 2 divisions of Russian-built MiG-21 (2 squadrons), Canadian-built Sabre Mk. 2 and 4 and F-86E Sabre jet interceptors, 2 ground-attack divisions of F-84 Thunderjet fighter-bombers (some being replaced by locally-built Jastreb light jet attack aircraft), locally-built Kraguj piston-engined light attack aircraft, and 2 squadrons of RT-33A jet reconnaissance aircraft. Transport units fly Russian Il-14 and American-built C-47 twin-engined aircraft and 4 ex-airline DC-6Bs. Apart from T-33A jet advanced trainers, training types are of national design, including the Galeb jet basic trainer. A number of Whirlwind and Mi-4 helicopters are in service. 'Guideline' surface-to-air missiles have been supplied by the USSR. Personnel numbers 20,000.

PLANNING. A 5-year plan of economic development for 1971–75 is under public discussion. Industrial production under the plan should increase annually by 8%, and that of agriculture by 3·5%. A Danube–Tisa canal system is under construction.

AGRICULTURE. Yugoslavia, with a total area of 25,580,400 hectares, had a cultivated area of 10·2m. hectares in 1970. A law of 22 May 1953 limits private land holdings to 10 hectares and provides for expropriation of larger estates. Compensation of 30,000–100,000 dinars a hectare of expropriated land is to be paid over a period of 20 years.

Area (in hectares) and yield (in 1,000 metric rons) in 1969: Maize, 2·4m. (78); wheat, 2m. (4,880); barley, 0·3m. (299); rye, 0·12m. (135); tobacco, 53,896 (46); hemp, 16,450 (83); sunflower, 218,829 (390); potatoes, 330,000 (3,144).

Livestock, 15 Jan. 1971: 1m. horses, 5m. cattle, 8·7m. sheep, 6·5m. pigs.

The 1969 yield of fruit was as follows (in 1,000 metric tons): Apples, 485; pears, 111; grapes, 1,499; plums, 1,290; olives, 7; walnuts, 39; 7·1m. hectolitres of wine and 381,000 metric tons of sugar-beet were produced.

There were, on 31 Dec. 1969, 1,278 peasant co-operatives with (1970) 870,767 members, using 8,427 tractors and 1,179 threshing machines.

FORESTRY. The forest areas of Yugoslavia consist largely of beech, oak and fir. The gross timber cut in 1970 was 17·5m. cu. metres.

FISHERIES. In 1970 the landings of fish were 46,211 metric tons (salt-water, 26,738; freshwater, 19,473). The number of fishing craft was 182 motor vessels (7,190 GRT) and 2,187 sailing and rowing vessels.

MINING. Yugoslavia has considerable mineral resources, including coal (chiefly brown coal), iron, copper ore, gold, lead, chrome, antimony and cement. The most important iron mines are at Vareš and Ljubija in Bosnia, and there are also considerable siderite and limonite iron ores between Prijedor, Sanski Most and Topusko. Copper ore is exploited chiefly at Bor (Serbia). The principal lead mines are at Trepča and Mežice. Chrome mines are in southern Serbia (Kosovo) and Macedonia (Skopje, Kumanovo). There are 2 antimony mines in western Serbia (Podrinje).

Mining output, in 1,000 metric tons, in 1968 (and 1969): Coal, 835 (861); lignite, 25,897 (26,815); coke, 1,236 (1,226); bauxite, 2,072 (2,127); mercury, 0·5 (0·5); salt, 138 (146); manganese ore, 14 (12); iron ore, 2,720 (2,721); copper ore, 7,002 (8,715); lead and zinc ore, 2,693 (2,928); chrome ore, 4 (4); antimony ore, 109 (93); crude petroleum, 2,494 (2,699); pyrite concentrates, 274 (272); magnesite, 400 (477). In 1969, gold output was 2,615 kg; silver, 107.500 kg.

INDUSTRY. The majority of industries are situated in the north-west part of the country. Employees in nationalized industries numbered 1,356,386 in 1968, 1,398,404 in 1969.

Industrial output (in 1,000 metric tons) in 1968 (and 1969): Pig-iron, 1,201 (1,198); steel, 1,924 (2,047); cement, 3,765 (3,964); sulphuric acid, 589 (696); nitric acid, 340 (488); fertilizers, 1,645 (1,789); iron castings, 259 (306); steel castings, 32·1 (39·3). Fabrics (in 1m. sq. metres): Cotton, 401 (415); woollen, 49 (49); rayon, 31 (30); hemp, 11·6 (19·9).

ELECTRICITY. Generation of electricity in 1968 (and 1967) was 20,641m. kwh. (18,702m.), of which 11,768m. kwh. (10,655m.) was hydro-electric.

TOURISM. In 1971, 5,238,000 (1970: 4,748,000) tourists visited Yugoslavia, spending an estimated 5,390m. (3,428m.) new dinars.

COMMERCE. Foreign trade, in 1m. new dinars, for calendar years:

	1966	*1967*	*1968*	*1969*	*1970*
Imports	19,692·9	21,341·7	22,460·2	26,672·1	35,925·1
Exports	15,251·0	15,645·8	15,796·3	18,730·9	20,986·7

Imports to Yugoslavia, 1969, in 1m. new dinars, from: West Germany, 4,858·9; Italy, 3,996·3; USSR, 2,102·3; Czechoslovakia, 1,498·3; USA, 1,155·;8 UK, 1,492·3. Exports from Yugoslavia, 1969, in 1m. new dinars, to: USSR, 2,580·1; Italy, 2,837; West Germany, 2,023·7; East Germany, 550·3; Czechoslovakia, 784·9.

The main imports (by value) in 1969 were (in 1m. new dinars): Machinery and metal products, 8,298; chemicals, 3,118; textiles, 2,962; iron and steel, 1,915; electro industry, 1,750. The main exports: Timber, 1,569; non-ferrous metals, 2,543; animals and animal produce, 2,220; machinery and metal products, 2,050.

Total trade between Yugoslavia and UK, in £1,000 sterling (British Board of Trade returns):

	1967	*1968*	*1969*	*1970*	*1971*
Imports to UK	15,670	23,535	24,799	21,725	18,408
Exports and re-exports from UK	23,106	24,992	31,779	45,608	61,996

SHIPPING. In 1970 Yugoslavia possessed a total of 377 (1940: 210) vessels of 1·47m. (1940: 374,391) gross tons.

In 1970 vessels of 31m. net tons entered the ports of Yugoslavia.

In 1970 Yugoslavia had 1,263 river craft. The length of the navigable rivers amounted to 1,844 km, that of canals to 191 km. There are 2 navigable lakes: Skadarsko (391 sq. km, of which 243 in Yugoslavia) and Ohridsko (348 sq. km, of which 230 in Yugoslavia).

RAILWAYS. In 1970 Yugoslavia had 10,289 km (1930: 9,647) of railway, carrying 157,016m. passengers, 75,374m. metric tons of freight.

ROADS (1970). There were 23,899 km of asphalted roads and 41,381 km of macadamized roads. There were 720,874 passenger motor cars and 122,156 trucks and buses.

AVIATION. The national airline, Jugoslovenski Aero Transport (Adria-aviopromet, Pan-adria and Aviogenex) in 1970 flew on its home services, 8,309,000 km and carried 977,000 passengers and 2,287,000 ton-km of freight; international services (without Pan-adria), 28·3m. km, 1,121,000 passengers and 9·8 ton-km of freight. The chief airfields are Belgrade, Zagreb, Ljubljana, Sarajevo, Skopje, Dubrovnik, Split, Titograd, Pula and Zadar.

POST (1970). There were 3,327 post offices, 736,045 telephone subscribers; 8 large and 141 small broadcasting stations. Number of wireless licences the end of 1970, was 3,372,000.

BANKING. All banking was nationalized immediately after the War, with the banks passing completely into the hands of the State. The main bank of the country is the National Bank. At 31 Dec. 1970 total credits for working assets amounted to 72,452m. new dinars. Savings deposits totalled 16,817m. new dinars at that date.

WEIGHTS AND MEASURES. The metric weights and measures have been in use since 1883. The *wagon* of 10 metric tons is used as a unit of measure for coal, roots and corn. The Gregorian calendar was adopted in 1919.

ZAÏRE

République Démocratique de Zaïre

HISTORY. Until the middle of the 19th century the territory drained by the Congo River was practically unknown. When Stanley reached the mouth of the Congo in 1877, King Leopold II of the Belgians recognized the immense possibilities of the Congo Basin and took the lead in exploring and exploiting it. The Berlin Conference of 1884–85 recognized King Leopold II as the sovereign head of the Congo Free State.

The annexation of the state to Belgium was provided for by treaty of 28 Nov. 1907, which was approved by the chambers of the Belgian Legislature in Aug. and Sept. and by the King on 18 Oct. 1908. The law of 18 Oct. 1908, called the Colonial Charter (last amended in 1959), provided for the government of the Belgian Congo, until the country became independent on 30 June 1960.

The departure of the Belgian administrators, teachers, doctors, etc., on the day of independence left a vacuum which speedily resulted in complete chaos. Neither Joseph Kasavubu, the leader of the Abako Party, who on 24 June 1960 had been elected head of state, nor Patrice Lumumba, leader of the Congo National Movement, who was the prime minister of an all-party coalition government, could establish his authority. Personal, tribal and regional rivalries led to the breakaway of Katanga province under premier Moïse Tshombe. Lumumba found his main support in the Oriental and Kivu provinces. Early in July the Force Publique mutinied and removed all Belgian officers. Lumumba called for intervention by the United Nations as well as the USSR. The Secretary-General dispatched a military force of about 20,000, composed of contingents of African and Asian countries. Lumumba was kidnapped by Katanga tribesmen and, in early Feb. 1961, murdered; his place was taken by Antoine Gizenga, who set up a government in Stanleyville.

On 15 Aug. 1961 the United Nations recognized the government of Cyrille Adoula as the central government. United Nations forces, chiefly Irish and Ethiopians, in mid-September invaded Katanga.

On 15 Jan. 1962 the forces of Gizenga in Stanleyville surrendered to those of the central government, and on 16 Jan. Adoula dismissed Gizenga. United Nations forces, chiefly Ethiopians and Indians, again invaded Katanga in Dec. 1962 and by the the end of Jan. 1963 had occupied all key towns; Tshombe left the country. The U.N. troops left the Congo by 30 June 1964.

The Gizenga faction started a fresh rebellion and after the capture of Albertville (19 June) and Stanleyville (5 Aug.) proclaimed a People's Republic on 7 Sept. 1964. Government troops, Belgian paratroopers and a mercenary contingent captured Stanleyville on 24 Nov. after the rebels had massacred thousands of black and white civilians. The last rebel strongholds were captured at the end of April 1965.

AREA AND POPULATION. The boundaries of the Congo colony were defined by the neutrality declarations of Aug. 1885 and Dec. 1894, and by treaties with Germany, Great Britain, France and Portugal.

On 22 July 1927 Belgium ceded to Portugal territory in the extreme south-west portion of the Belgian Congo, having an area of 3,500 sq. km, in return for a cession by Portugal of an area in the estuary of the Congo, near Matadi, of 3 sq. km. Belgium further undertook the construction of a railway to link up with the Portuguese railway, starting at Lobito; this railway was opened on 1 July 1931.

The area of the republic is estimated at 2,345,409 sq. km (895,348 sq. miles). The population is composed of 3 ethnical groups: Negroes (Bantu, Sudanese, Nilotics), Pygmies and Hamites (in the east). In the census (1970) the population was 21,637,876.

In 1966 some 300,000 refugees from Angola, some 24,000 Tutsi refugees from Rwanda and 24,000 refugees from the Sudan were living in Zaïre.

On 2 May 1966 the main cities were renamed: Kinshasa (Léopoldville), Mbandaka (Coquilhatville), Bandundu (Banningville), Kisangani (Stanleyville), Lubumbashi (Elisabethville), Kalemie (Albertville). The capital is Kinshasa. The country and the river were named 'Zaïre' in 1971.

The country is divided into the following provinces (with population as in 1967): Kinshasa city (1,225,720), Bandundu (2·1m.), Equateur (1,700,638), Kasai West (1,600,182), Kasai East (1,717,779), Kivu (2,168,533), Kongo Central (1,067,105), Katanga (1,853,089), Orientale (2·4m.). (*See* map in THE STATESMAN'S YEAR-BOOK, 1966–67.)

The most important languages are: Kiswahili or Kingwana in the east, Tshiluba or Kiluba in the south, Lingala and Kikongo.

CONSTITUTION. On 30 Sept. 1963 President Kasavubu dissolved parliament, suspended the constitution of Oct. 1962 (*see* THE STATESMAN'S YEAR-BOOK, 1963, p. 914) and (on 1 Oct.) granted Prime Minister Adoula full legislative powers until elections were held and a new constitution had been approved. Tshombe, who returned in June 1964, was appointed prime minister on 10 July.

Elections were held in April 1965, but those held in constituencies in which irregularities were proved, were annulled by the Appeal Court.

President Kasavubu dismissed the Tshombe government on 13 Oct. 1965, but the new government under Evariste Kimba, set up on 18 Oct., failed to win the confidence of Parliament on 14 Nov. On 25 Nov. President Kasavubu was deposed by Gen. Joseph Mobutu, the Army Commander-in-Chief, who cancelled the presidential elections due in 1966. The new regime, with Gen. Mobutu as President of the Republic and Minister of Defence, was approved by Parliament on 28 Nov. On 26 Oct. 1966, President Mobutu assumed the office of prime minister and minister of defence. A new Constitution, approved in a national regime in which the President of the Republic is also head of the executive. In 1971 it was revised to establish: a single-chamber Parliament, the National Assembly, directly elected with 1 deputy for each 50,000 inhabitants; a President directly elected for 7 years. The supreme institution is the sole political party, the

Mouvement Populaire de la Revolution (MPR); its President is President of the Republic; its chief organ is the *Bureau Politique* consisting of the President of the Republic, the President of the National Assembly, the Ministers of the Interior and of Foreign Affairs and 11 leading members of the MPR.

National flag: A black hand holding a red flaming torch in a yellow roundel on a green ground.

RELIGION. There were, on 31 Dec. 1958, 10,284 missionaries, of whom 7,436 (including 1,532 natives) were Roman Catholic and 2,848 (including 1,195 natives) Protestant. Numerous missionaries were massacred in 1964.

Roman Catholics in 1962 numbered 5·3m.; Protestants, 1·1m.; Moslems about 115,000 and Jews, 1,520.

EDUCATION. In 1966–67 there were 9,168 primary schools with 2,193,200 pupils, exclusive of nursery schools, and 878 secondary schools—general, commercial, technical and professional—with 140,620 pupils. Secondary education comprises a 2-year orientation cycle, followed by either a 2- or 4-year cycle, during which pupils specialize in literary, scientific, commercial studies, etc.

1,726 students were attending 16 establishments of higher education, apart from universities: 7 advanced teacher-training colleges (Ecoles Normales Moyennes), the National School of Administration, the Institute of Building and Public Works, the National Institute of Mines, the Academy of Fine Arts, the Higher Institute of Commerce, the Higher Institute of Physical Education, the Institute of Social Training, the Institute of Medical Training and the National Institute of Political Studies.

In 1971 the 3 universities at Kinshasa, Lubumbashi and Kisangani became the one National University of Zaïre. The faculties are Medicine and Law (Kinshasa), Arts and Literature (Lubumbashi), Sciences (Kisangani). In 1972 there were 4,389 students and 1,240 teachers.

JUSTICE. On 31 Dec. 1958 there were 26 district courts, 25 magistrates' courts, 139 police courts, 6 courts of first instance, 2 courts of appeal (at Kinshasa and Lubumbashi) and 1,552 native courts.

FINANCE. Currency. The currency unit, introduced on 23 June 1967, is the *zaïre*, divided into 100 *makuta*. Each *likuta* (plural *makuta*) is divided into 100 *sengi*. Bank-notes are issued in the following denominations: 5 and 1 *zaïre*, 50, 20 and 10 *makuta* (0·5 *zaïre* = 1 US$; 1·2 *zaïres* = £1 sterling).

Budget. Estimated revenue and expenditure (in 1m. francs until 1967 then in 1m. *zaïres*) for calendar years:

	1965	*1966*	*1967*	*1968*	*1969*	*1970*	*1971*
Revenue	38,000	57,200	59,900	125	181	215	...
Expenditure	60,000	62,500	59,900	125	181	300	285

DEFENCE. Army. The Army is organized into 7 territorial groups of about brigade strength each, and 1 parachute division. The total strength is some 50,000 men, organized into an infantry arm of 14 battalions, a parachute arm of 14 battalions, a parachute arm of 7 battalions, 6 guard battalions and 7 gendarmerie battalions. There are the usual supporting arms and services of signals, engineer, ordnance, health, etc., and a new armoured corps is forming with, to date, about 100 Panhard armoured cars.

Air Force. Equipped in 1972 with more than 125 aircraft, including 32 combat machines, the Air Force receives assistance from Italy, where aircrew and ground personnel are trained. It has 17 Aermacchi MB.326GB armed jet trainers, about 13 T-6G and T-28D armed piston-engined trainers, 3 C-130, 4 C-54 and 10 C-47 transports, 12 Siai-Marchetti SF.260MC basic trainers, 5 Alouettes and an initial batch of 7 SA 330 Puma helicopters, and a variety of other types.

AGRICULTURE. The plantations (in hectares) cultivated by Europeans comprised. in 1959, 135,182 of palm, 83,816 of coffee, 368,382 of cotton, 47,937 of rubber, 4,605 of tea and 17,338 of cocoa.

Chief agricultural exports in 1967 (in metric tons): Cassava, 7m.; cotton 9,000; coffee, 60,000; rubber, 30,000; bananas and plantains, 1·55m.; palm-oil 155,000; ground-nuts, 113,000.

In 1959 European-owned cattle (mainly in the provinces of Katanga, Kasaï, Orientale and Kongo Central) numbered 482,525 head; sheep, 19,900; pigs, 49,888; African-owned cattle (mainly in the provinces of Kivu and Orientale), 552,524; sheep, 621,156; goats, 2,135,425; pigs, 318,528.

MINING. Mining flourishes, the chief minerals being copper, diamonds (12·4m. carats in 1966), gold, silver, tin, cobalt, uranium, radium, germanium, zinc and iron. The most important mines are the coppermines near Kipushi, Musonoie and Ruwe (production 1969, 362,000 metric tons).

Two oil pipelines connect Matadi with Kinshasa.

On 24 Dec. 1966 the property of the Union Minière du Haut Katanga was seized by the Government as the Union Minière refused to transfer its headquarters from Brussels to Kinshasa. On 31 Dec. a new company, Société Générale Congolaise de Minerais, was created, in which the Zaïre Government holds 60% of the shares.

COMMERCE. Imports in 1968 totalled 154,789,036 zaïres, exports totalled 254,559,998 zaïres. More than half of the exports (by value) consisted of copper.

Of the 1968 exports, 35% went to Belgium; 9% to Italy; 6% to France; 5% to the UK.

Total trade between Zaïre and UK (British Board of Trade returns, in £1,000 sterling):

	1966	*1967*	*1968*	*1969*	*1970*	*1971*
Imports to UK	10,172	11,566	17,714	22,834	18,872	18,684
Exports and re-exports from UK	4,953	3,011	8,100	11,444	12,033	18,050

SHIPPING. The Zaïre River and its tributaries are navigable over 13,744 km. Regular traffic has been established between Kinshasa and Kisangani as well as Port Francqui, on the Lualaba (*i.e.*, the river above Kisangani), on some tributaries and on the lakes.

At the port of Matadi, the most important harbour, the imports in 1970 amounted to 628,623 metric tons and the exports to 547,632 metric tons. Imports at Boma were 63,256 metric tons, and exports, 89,805 metric tons.

ROADS. Of 140,000 km of roads only 40,000 km are of national importance and only some 2,000 km have a bitumous surface. There were an estimated 120,468 motor vehicles in 1970, of which 45% were in Kinshasa.

RAILWAYS. The total length of public railways on 1 Jan. 1970 was 5,795 km.

AVIATION. There are 2 international and 20 principal airports, and over 200 other landing strips.

Nine international airlines operate in and out of Kinshasa from Europe and the USA. The national airline Air Zaïre operates on all the main internal routes as well as on international routes to Europe and other African cities. Internal feeder services are assured by the private charter company AMAZ. PANAM act as technical and managerial advisers to Air Zaïre.

POST. In 1958 there were 335 post offices. Zaïre is included in the Universal Postal Union and in the African Postal Union. Length of telegraph lines,

2,459 km. There were 15 broadcasting stations, 161 stations of wireless telegraphy and 206 telegraph offices; telephones numbered 21,919 in 1969. There is a ground satellite communications station outside Kinshasa.

BANKING. The national bank is Banque du Zaïre. Commercial banks operating in Zaïre are Banque de Kinshasa, Barclay's Bank SZPRL, First National City Bank, Union Zairoise de Banques, Banque Commerciale Zairoise, Bank du Peuple and Banque International pour L'Afrique au Zaire.

WEIGHTS AND MEASURES. The metric system was introduced by law on 17 Aug. 1910.
